ADDITIONAL CHANGES

Technical Questions and Answers (Nonauthoritative)

Sections throughout Technical Questions and Answers have been revised to reflect conforming changes necessary due revisions to the FASB *Accounting Standards Codification*[®].

Trust Services Principles, Criteria, and Illustrations

A new section, TSP section 100, *Trust Services Principles and Criteria for Security, Availability, Processing Integrity, Confidentiality, and Privacy*, has been added. TSP section 100 replaces the 2009 version, which is now archived in new TSP section 100A, *Trust Services Principles, Criteria, and Illustrations for Security, Availability, Processing Integrity, Confidentiality, and Privacy—2009*.

The criteria in TSP section 100 are effective for periods ending on or after December 15, 2014, with earlier implementation permitted. TSP section 100A will retain the superseded material until March 31, 2016. The practitioner should identify which set of criteria was used for the report and assertion.

HOW *TECHNICAL PRACTICE AIDS* IS ORGANIZED

Scope of *Technical Practice Aids*

Technical Practice Aids brings together the following:

- Selected AICPA Technical Questions and Answers (nonauthoritative)
- Public Company Accounting Oversight Board (PCAOB) Staff Guidance
- Trust Services Principles, Criteria, and Illustrations of the AICPA Assurance Services Executive Committee (ASEC)
- Principles and Criteria for XBRL-Formatted Information established by ASEC
- A listing of issues papers of the AICPA Accounting Standards Division
- Statements of Position of the AICPA Audit and Attest Standards Division

Special Note About Financial Accounting Standards Board *Accounting Standards Codification*[®]

The Financial Accounting Standards Board (FASB) released the FASB *Accounting Standards Codification* (ASC) on July 1, 2009. On its effective date, FASB ASC became the source of authoritative U.S. accounting and reporting standards for nongovernmental entities, in addition to guidance issued by the Securities and Exchange Commission (SEC). FASB ASC significantly changes the way financial statement preparers, auditors, and academics perform accounting research.

FASB ASC flattens the U.S. generally accepted accounting principles (GAAP) hierarchy to two levels: one that is authoritative (in FASB ASC) and one that is nonauthoritative (not in FASB ASC). Exceptions include all rules and interpretive releases of the SEC under the authority of federal securities laws, which are sources of authoritative U.S. GAAP for SEC registrants, and certain grandfathered guidance having an effective date before March 15, 1992. The codification creates FASB ASC 105, *Generally Accepted Accounting Principles*.

Amendments to FASB ASC are now issued by FASB through Accounting Standards Updates (ASUs) and serve only to update FASB ASC. FASB does not consider the ASUs authoritative in their own right; such amendments become authoritative when they are incorporated into FASB ASC. The ASUs issued include the amendments to the codification and an appendix of FASB ASC update instructions. ASUs also provide background information about the amendments, and explain the basis for FASB's decisions. This method of updating the accounting guidance means that there will no longer be, for example, accounting standards in the form of statements, staff positions, Emerging Issues Task Force (EITF) abstracts, or AICPA Accounting Statements of Position (SOPs). ASUs are issued in the form of ASU No. 20YY-XX, in which "YY" is the last two digits of the year and "XX" is the sequential number for each update. For example, ASU No. 2011-01 is the first update in the year 2011. FASB organizes the contents of each ASU using the same section headings as those used in FASB ASC.

FASB ASC is a major restructuring of accounting and reporting standards designed to simplify user access to all authoritative U.S. GAAP by providing the

authoritative literature in a topically organized structure. FASB ASC disassembled thousands of nongovernmental accounting pronouncements (including those of FASB, the EITF, and the AICPA) and reassembled them under approximately 90 topics and included all accounting standards issued by a standard setter within levels A–D of the current U.S. GAAP hierarchy. FASB ASC also includes relevant portions of authoritative content issued by the SEC, as well as selected SEC staff interpretations and administrative guidance issued by the SEC; however, FASB ASC is not the official source of SEC guidance and does not contain the entire population of SEC rules, regulations, interpretive releases, and staff guidance. Moreover, FASB ASC does not include governmental accounting standards. FASB ASC is not intended to change U.S. GAAP or any requirements of the SEC.

FASB ASC uses a topical structure in which guidance is organized into *areas*, *topics*, *subtopics*, *sections*, and *subsections*. These terms are defined as follows:

Areas. The broadest category in FASB ASC and represent a grouping of topics.

Topics. The broadest categorization of related content and correlate with the International Accounting Standards (IASs) and International Financial Reporting Standards (IFRSs).

Subtopics. Represent subsets of a topic and are generally distinguished by type or scope.

Sections. Indicate the nature of the content such as recognition, measurement, or disclosure. The sections' structure correlates with the IASs and IFRSs.

Subsections. Allow further segregation and navigation of content.

Topics, subtopics, and sections are numerically referenced. This effectively organizes the content without regard to the original standard setter or standard from which the content was derived. An example of the numerical referencing is FASB ASC 305-10-05, in which 305 is the *Cash and Cash Equivalents* topic, 10 represents the "Overall" subtopic, and 05 represents the "Overview and Background" section.

FASB ASC represents a major shift in the organization and presentation of U.S. GAAP. Users are encouraged to read the notice to constituents, which explains the scope, structure, and usage of consistent terminology in FASB ASC. This document is available on the FASB website at <http://asc.fasb.org>. In addition to the notice, this link contains information on the options available for users to access the codification. FASB ASC is offered by FASB at no charge in a Basic View and for an annual fee in a Professional View. FASB ASC and the notice to constituents are also offered by certain third party licensees, including the AICPA.

To read more about FASB ASC, including recent developments and updates, see the AICPA's dedicated FASB ASC website at www.aicpa.org/InterestAreas/FRC/AccountingFinancialReporting/Pages/FASBAccountingStandardsCodification.aspx.

FASB ASC Effect on AICPA Literature Included in Technical Practice Aids

As noted previously, FASB ASC disassembled and reassembled thousands of nongovernmental accounting pronouncements (including those of FASB, the EITF, and the AICPA) and codified them under approximately 90 topics. FASB ASC reduces the U.S. GAAP hierarchy to two levels: one that is authoritative (in FASB ASC) and one that is not (not in FASB ASC). Those standards you have come to memorize through FASB Statement Nos., FASB Interpretation

Nos., accounting SOPs, and the like now reside in FASB ASC and have a FASB ASC reference for accountants to use. FASB ASC codifies all AICPA accounting SOPs and Practice Bulletins and also sections .38–.76 of TIS section 5100, *Revenue Recognition*.

Arrangement of Material in *Technical Practice Aids*

The material in *Technical Practice Aids* is arranged as follows:

Technical Questions and Answers (Nonauthoritative)

- Financial Statement Presentation

 - Assets

 - Liabilities and Deferred Credits

 - Capital

 - Revenue and Expense

 - Specialized Industry Problems

 - Specialized Organizational Problems

 - Audit Field Work

 - Auditors' Reports

 - Attestation Engagements

PCAOB Staff Guidance

- Select PCAOB Staff Questions and Answers

 - Staff Views

 - Staff Audit Practice Alerts

- Trust Services Principles, Criteria, and Illustrations

- Principles and Criteria for XBRL-Formatted Information

- Statement of Position—Accounting

- Issues Papers Listing of the Accounting Standards Division

- Statements of Position—Auditing and Attestation

Description of Content

The major divisions are divided into sections, each with its own section number. Each paragraph or equivalent is decimally numbered for reference purposes. With respect to Technical Questions and Answers, within each section, each question and answer is decimally numbered. For example, TIS section 9100.02 is the second question and answer in TIS section 9100, *Signing and Dating of Reports*. When a question and answer is deleted, its number is reserved. Reserved sections are deleted permanently if no future questions and answers are expected for a particular topic.

Authoritative pronouncements are referenced in the questions and answers, whenever possible, to support the guidance provided. The following list explains the references and cites the publications containing the authoritative literature:

- AR Accounting and Review Services standard or interpretation contained in AICPA *Professional Standards*

- AT Attestation standard or interpretation contained in *AICPA Professional Standards*
- AU-C¹ Clarified auditing standard or interpretation contained in *AICPA Professional Standards*
- AUD Statements of Position—Auditing and Attestation contained in *AICPA Technical Practice Aids*
- ET Section from the Code of Professional Conduct of the AICPA contained in *AICPA Professional Standards*
- TSP Trust Services Principles, Criteria, and Illustrations of ASEC contained in *AICPA Technical Practice Aids*

Note: Generally, abbreviations are not used to reference AICPA Audit and Accounting Guides. Each guide is published separately and is also included in the AICPA Audit and Accounting Guides subscription service.

The TIS Topical Index for Technical Information Service Questions and Answers uses the key word method to facilitate reference to the inquiries. This index is arranged alphabetically by subject, with references to section numbers.

PCAOB Staff Guidance sections are assigned section and decimal numbers in chronological order as they are issued. However, the format and any numbering assigned by the PCAOB has been retained.

The PC Topical Index for PCAOB Staff Guidance facilitates reference to the guidance. This index is arranged alphabetically by subject, with references to section, paragraph, and question numbers.

The Trust Services Principles, Criteria, and Illustrations are assigned section numbers in chronological order as they are issued. Each paragraph or equivalent is decimally numbered for reference purposes.

Statements of Position—Auditing and Attestation are assigned section numbers in chronological order as they are issued. Each paragraph or equivalent is decimally numbered for reference purposes.

[The next page is 11.]

¹ The “AU-C” identifier was established to avoid confusion with references to existing “AU” sections, which have been superseded and deleted from *Professional Standards* as of December 2013. The AU-C identifier was scheduled to revert back to the AU identifier at the end of 2013, by which time the previous AU sections would be superseded for all engagements. However, in response to user requests, the AU-C identifier will be retained indefinitely.

TECHNICAL QUESTIONS AND ANSWERS (NONAUTHORITATIVE)

Notice to Readers

The questions and answers in this section of *Technical Practice Aids* are not sources of established authoritative accounting principles as described in Financial Accounting Standards Board *Accounting Standards Codification*[™] and Governmental Accounting Standards Board Statement No. 55, *The Hierarchy of Generally Accepted Accounting Principles for State and Local Governments*, the authoritative sources of generally accepted accounting principles for nongovernmental and governmental entities, respectively. This material is based on selected practice matters identified by the staff of the AICPA's Technical Hotline and various other bodies within the AICPA and has not been approved, disapproved, or otherwise acted upon by any senior committee of the AICPA.

This publication is designed to provide accurate information in regard to the subject matter covered. It is sold with the understanding that the publisher is not engaged in rendering legal, accounting, or other professional service.

AICPA TECHNICAL HOTLINE

The AICPA Technical Hotline answers inquiries about specific audit or accounting problems.

Section 1100

Statement of Financial Position

[.01] Reserved

[.02] Reserved

.03 Unclassified Balance Sheet for Venture With Limited Life

Inquiry—A corporation has recently been organized with the sole purpose of constructing a shopping center which will take several years to complete, after which the company will be liquidated. The company uses the completed contract method to recognize income, and will have only one operating cycle. Would an unclassified balance sheet be appropriate?

Reply—An unclassified balance sheet would be more appropriate than a classified one in this situation. The sole purpose of the corporation is to construct the shopping center, and the appropriate time frame for reporting purposes, by definition, becomes the time required to complete the project, rather than an arbitrary one-year period.

[.04] Reserved

[.05] Reserved

[.06] Reserved

.07 Comparative Statement Disclosures

Inquiry—When financial statements of the prior period are presented on a comparative basis with financial statements of the current period, should the notes to the comparative financial statements disclose details for the prior year?

Reply—Generally, in practice notes to comparative financial statements are also comparative if they present details of items on the financial statements or are otherwise pertinent. For example, details of notes payable outstanding at the end of each period are normally disclosed, but the future maturities disclosure need only be disclosed for the current year.

[Amended, June 1995.]

.08 Classification of Outstanding Checks

Inquiry—Should the amount of checks that have been issued and are out of the control of the payor but which have not cleared the bank by the balance sheet date be reported as a reduction of cash?

Reply—Yes. A check is out of the payor's control after it has been mailed or delivered to the payee. The balance sheet caption "cash" should represent an amount that is within the control of the reporting enterprise, namely, the amount of cash in banks plus the amount of cash and checks on hand and deposits in transit minus the amount of outstanding checks. Cash is misrepresented if outstanding checks are classified as liabilities rather than a reduction of cash.

[.09] Reserved

[.10] Reserved

[.11] Reserved

[.12] Reserved

[.13] Reserved

.14 Classification of Convertible Debt

Inquiry—A company has debt that is convertible into common stock of the company at the option of the company. The debt by its terms is considered long-term debt in the classified balance sheet. The company intends to call the debt and issue the common stock within one year of the balance sheet date. Should this debt be classified as a current liability?

Reply—No. The expected call of the debt securities will not consume current assets or increase current liabilities, and accordingly should continue to be classified as a long-term obligation.

The general principle underlying the classification of debt in a debtor's principal balance sheet should be based on facts existing at the date of the balance sheet rather than on expectations. According to Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) glossary, the term *current liabilities* "is used principally to designate obligations whose liquidation is reasonably expected to require the use of existing resources properly classifiable as current assets, or the creation of other current liabilities."

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.15 Liquidity Restrictions

Inquiry—Entities may invest in assets such as money market funds or other short term investment vehicles from which they generally may withdraw funds at any time without prior notice or penalty, but for which the fund (or its trustee) may restrict the ability of an entity to withdraw its balance in the fund or other short term investment vehicle. In some circumstances, with little or no notice, the fund (or its trustee) may impose such withdrawal restrictions. For example, the fund (or its trustee), in accordance with the terms of the fund, may, with little or no notice, stipulate that up to 20 percent of the fund balance can be withdrawn immediately, an additional 30 percent can be withdrawn in 6 months, and the remaining balance can be withdrawn in 2 years.

What are the potential accounting and auditing implications of such an event for a nongovernmental entity (the event being restrictions on the ability of an entity to withdraw its balance in the money market fund or other short term investment vehicle)?

Reply—The following are examples of potential accounting and auditing issues that may be relevant if such an event exists. Each situation is different and should be evaluated based on its specific facts and circumstances:

Balance Sheet Classification. Such withdrawal restrictions should be considered in determining whether such assets meet the definition of *cash equivalents*. (This technical question and answer does not address whether such assets met the definition of *cash equivalents* prior to the imposition of such withdrawal restrictions.)

Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) glossary provides a definition of *cash equivalents* for the purposes of applying FASB ASC 230, *Statement of Cash Flows*.

Such withdrawal restrictions should be considered in determining whether such assets meet the definition of *current assets*.

FASB ASC glossary defines *current assets* for balance sheet classification purposes.

For entities that do not prepare a classified balance sheet, such withdrawal restrictions should be considered in determining the sequencing of assets on the balance sheet or disclosures in the notes to financial statements providing relevant information about the liquidity or maturity of assets.

Disclosures. The entity may be required to provide financial statement disclosures about such events. For example, such events may create or lead to risks and uncertainties pertaining to certain significant estimates, such as measurement, liquidity, and violation of debt covenants, and vulnerability from concentrations of investments in volatile markets. Entities should consider whether they should make disclosures in their financial statements (beyond those required or generally made in financial statements) about the risks and uncertainties resulting from such events and existing as of the date of the financial statements. In addition, auditors should consider whether such disclosures include forward-looking statements that are not required by generally accepted accounting principles and therefore may not be audited.

FASB ASC 275, *Risks and Uncertainties*, provides guidance pertaining to disclosures about risks and uncertainties.

Debt Covenants. Such events may result in balance sheet classifications (balance sheet classifications are previously discussed) and other events that may trigger violations of debt covenants. If a covenant violation occurs, issuers of debt should consider whether that covenant violation triggers classification of the debt liability as current (or otherwise affects reported information about liquidity) or cross covenant violations in other arrangements.

FASB ASC glossary defines *current assets* and *current liabilities* for balance sheet classification purposes. FASB ASC 470-10-45-11 clarifies how the debtor should present obligations that are callable by the creditor in a balance sheet in which liabilities are classified as current or noncurrent.

Paragraphs 12A–12B of FASB ASC 470-10-45 provide guidance for the classification of short-term obligations that are expected to be refinanced on a long-term basis.

FASB ASC 470-10-45 and FASB ASC 470-10-55 address the classification of obligations at the balance sheet date that are not callable at the balance sheet date, but that become callable by violation of a debt agreement provision after the balance sheet date but before the financial statements are issued.

FASB ASC 470-10-45-2 and FASB ASC 470-10-50-3 provide guidance pertaining to balance sheet classification in circumstances in which debt agreements include subjective acceleration clauses.

Events Occurring Subsequent to the Balance Sheet Date. Events occurring subsequent to the balance sheet date, but prior to the issuance of the financial statements, such as significant changes in fair value or changes in liquidity leading to violation of debt covenants, may need to be reflected in the financial statements (either through adjustment to or disclosure in the financial statements).

AU-C section 560, *Subsequent Events and Subsequently Discovered Facts* (AICPA, *Professional Standards*), addresses the auditor's responsibilities relating to subsequent events and subsequently discovered facts in an audit of financial statements.

Going Concern. Certain events (some interrelated) could call into question the entity's ability to continue as a going concern. For example:

- The inability to withdraw funds can pose significant challenges to the entity's liquidity.
- As discussed earlier, balance sheet reclassifications or other events may trigger violations of debt covenants.

AU-C section 570, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern* (AICPA, *Professional Standards*), addresses the auditor's responsibilities in an audit of financial statements with respect to evaluating whether there is substantial doubt about the entity's ability to continue as a going concern.

AU-C section 260, *The Auditor's Communication With Those Charged With Governance* (AICPA, *Professional Standards*), addresses the auditor's responsibility to communicate with those charged with governance.

Paragraph .06 of AU-C section 706, *Emphasis-of-Matter Paragraphs and Other-Matter Paragraphs in the Independent Auditor's Report* (AICPA, *Professional Standards*), requires that if the auditor considers it necessary to draw users' attention to a matter appropriately presented or disclosed in the financial statements that, in the auditor's professional judgment, is of such importance that it is fundamental to users' understanding of the financial statements, the auditor should include an emphasis-of-matter paragraph in the auditor's report, provided that the auditor has obtained sufficient appropriate audit evidence that the matter is not materially misstated in the financial statements. For example, the auditor may wish to refer, in the auditor's report, to financial statement disclosures about restrictions on liquidity pertaining to such events.

[Issue Date: October 2008; Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC; Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

[The next page is 161.]

Section 1200

Income Statement

.01 Disclosure of Revenues of an Agent

Inquiry—Company A is in the business of arranging sales of used cars for which service it receives a commission based on an established fee schedule. Company A receives title to the cars sold but simultaneously transfers title to the car buyer. Company A warrants main engine components for thirty days after date of sale.

The following presentations of revenue in the income statement are being considered:

Commission Earned	<u>\$20,000</u>
or	
Sales	\$300,000
Cost of Sales	<u>(280,000)</u>
Gross Profit (or Net Commisions)	\$20,000

What is the proper presentation of revenue?

Reply—Since Company A is operating as a broker, Company A should report Commissions Earned rather than Sales. However, Company A could disclose above the Commissions Earned figure, without showing a deduction, the amount of sale, as follows:

Sales Arranged	<u>\$300,000</u>
Commissions Earned	\$20,000
Expenses, etc.	XXX

Company A should also make proper provision for the cost of warranties.

[.02] Reserved

[.03] Reserved

.04 Statement Title When There Is a Net Loss

Inquiry—What title is suggested for the “Statement of Income” when a “net loss” exists in one or more years?

Reply—Companies included in the annual survey entitled *Accounting Trends & Techniques* (“Trends”) file with the Securities and Exchange Commission. Accordingly, their annual reports include a three year statement of income. If a current year net loss is shown in the income statement, the “Trends” companies usually describe the statement of income as the “Statement of Operations.” They occasionally use the title “Statement of Income (Loss)” and very rarely use the title “Statement of Loss.”

Some companies always use “Statement of Operations” since the heading will be the same whether there is a “net loss” or “net income.”

.05 Presentation of Reimbursed Payroll Expense

Inquiry—One company of a controlled group, in addition to its own operations, acts as a “paymaster” for the entire group. This company records the entire payroll of all members in the group on its general ledger to facilitate reconciliation with state and federal payroll tax returns. Each member of the group reimburses the “paymaster” for its share of payroll and payroll taxes and records management fee expense while the paymaster records it as management fee income.

Should the reimbursement be classified as other income in the separate income statement of the “paymaster” company?

Reply—No. The reimbursement should be allocated as a reduction of payroll and payroll tax expense because this approach would more accurately present the “paymaster” company’s expenses for its own operations.

.06 Note to TIS Section 1200.07 to 1200.16—Accounting by Noninsurance Enterprises for Property and Casualty Insurance Arrangements That Limit Insurance Risk

Insurance enables a company (the insured) to transfer insurance risk to an insurer for a specified premium. Insurance may be purchased for a number of economic reasons generally with the underlying goal of transferring insurance risk, including property damage, injury to others, and business interruption.

The following series of questions and answers (Sections 1200.07–.16) focus on certain aspects of finite insurance products that are utilized by noninsurance enterprises. Due to the diverse nature of contracts in the marketplace, the guidance in these questions and answers is designed to assist practitioners in identifying the relevant literature to consider in addressing their specific facts and circumstances. The TPAs contain many excerpts of applicable guidance, but readers should be familiar with all the guidance contained in that literature not only the specific paragraphs listed.

GAAP guidance for an insurance enterprise’s purchase of reinsurance is more extensive than guidance on accounting by noninsurance enterprises for insurance contracts. The accounting guidance for reinsurance addresses transactions between an insurer (the contract holder) and a reinsurer (the issuer of the contract). TIS sections 1200.07–.16 address property and casualty insurance contracts between a policyholder and an insurance enterprise, which is similar to the relationship between an insurer and a reinsurer.

.07 Finite Insurance

Inquiry—What are “finite” insurance transactions?

Reply—Finite insurance contracts are contracts that transfer a clearly defined and restricted amount of insurance risk from the policyholder to the insurance company, and the policyholder retains a substantial portion of the related risks under most scenarios. Nevertheless, under certain finite contracts there may be a reasonable possibility that the insurance company will incur a loss on the contract.

.08 Insurance Risk Limiting Features

Inquiry—What types of insurance risk limiting features do finite insurance contracts normally contain?

Reply—Contractual features that serve to limit insurance risk transfer are found in both traditional and finite insurance contracts; however, the degree to which these features limit risk is relatively higher in finite insurance. All contractual provisions that limit risk transfer need to be considered when reviewing insurance contracts. Common features that may limit the transfer of insurance risk include:

- *Sliding scale fees and profit sharing formulae.* These features adjust cash flows between the policyholder and insurance company based on loss experience (for example, increasing payments from the insured enterprise as losses increase and decreasing payments as losses decrease, subject to maximum and minimum limits).
- *Experience refunds.* These arrangements allow the policyholder to share in the favorable experience of the underlying contracts by reference to an “experience account” that typically tracks premiums paid, less fees, less losses incurred, plus interest. Experience provisions also can require the policyholder to share in unfavorable experience by requiring additional payments to the insurer in the event that the experience account is negative.
- *Caps.* Caps are used to limit the insurer’s aggregate exposure by imposing a dollar limit, or a limit expressed as a percentage of premiums paid, on the amount of claims to be paid by the insurer. For example, the insurer will not be responsible for losses beyond 150 percent of the premiums paid. While commercial insurance policies usually have limits on the amount of coverage provided, there may be significant risk mitigation for the insurer if the premium paid is a substantial percentage of the maximum coverage provided.
- *Loss Corridors.* This feature, which may exist in various forms, serves to eliminate or limit the risk of loss for a specified percentage or dollar amount of claims within the contract coverage. For example, in a contract providing coverage for a policyholder’s first \$3,000,000 of losses, the insurer will pay the first million and last million of losses but will exclude the corridor from \$1,000,000 to \$2,000,000.
- *Dual-triggers.* This feature requires the occurrence of both an insurable event and changes in a separate pre-identified variable to trigger payment of a benefit/claim. An example is a policy entered into by a trucking company that insures costs associated with rerouting trucks over a certain time period if snowfall exceeds a specified level during that time period.
- *Retrospectively-Rated Premiums.* Such premiums are determined after the inception of the policy based on the loss experience under the policy.
- *Reinstatement Premiums.* To the extent the coverage provided by a contract is absorbed by losses incurred, the contract provides for the policyholder to reinstate coverage for the balance of the contract period for a stated additional premium. To the extent reinstatement is required rather than optional, the additional premium may mitigate risk to the insurer.
- *Termination Provisions.* These provisions can be structured to reduce the risk of the insurer, for example, by allowing for termination by the insurer at a discounted amount under certain circumstances.
- *Payment Schedules.* Features that delay timely reimbursement of losses by the insurer prevent the transfer of insurance risk.

There may be other features and provisions, in addition to the list of common insurance risk transfer limiting features above, that exist in a contract. Determining the appropriate accounting requires a full understanding of all of the features and provisions of the contract.

.09 Transfer of Insurance Risk

Inquiry—Why is transfer of insurance risk important under GAAP?

Reply—If a contract does not provide for the indemnification of the insured by the insurer, it is accounted for as a deposit (financing) rather than as insurance as noted in Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 720-20-25-1.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.10 Accounting Guidance for Transfer of Insurance Risk

Inquiry—What GAAP accounting literature provides guidance related to transfer of insurance risk?

Reply—The assessment of transfer of insurance risk requires significant judgment and a complete understanding of the insurance contract and other related contracts between the parties. The greater the number and/or degree of insurance risk limiting features that exist in a contract, the more difficult it becomes to assess whether or not the insurance risk transferred is sufficient to permit the contract to be accounted for as insurance rather than as a deposit.

Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 720-20-25-1 provides the following guidance on insurance contracts that do not provide for indemnification of the insured by the insurer against loss or liability:

To the extent that an insurance contract or reinsurance contract does not, despite its form, provide for indemnification of the insured or the ceding entity by the insurer or reinsurer against loss or liability, the premium paid less the amount of the premium to be retained by the insurer or reinsurer shall be accounted for as a deposit by the insured or the ceding entity. Those contracts may be structured in various ways, but if, regardless of form, their substance is that all or part of the premium paid by the insured or the ceding entity is a deposit, it shall be accounted for as such.

FASB ASC 944, *Financial Services—Insurance*, establishes the conditions required for a contract between an insurer and a reinsurer to be accounted for as reinsurance and prescribes accounting and reporting standards for those contracts. FASB ASC 944-20-15-41 notes:

Unless the condition in paragraph 944-20-15-53 is met, indemnification of the ceding entity against loss or liability relating to insurance risk in reinsurance of short-duration contracts exists under paragraph 944-20-15-37(a) only if both of the following conditions are met:

- a. Significant insurance risk. The reinsurer assumes significant insurance risk under the reinsured portions of the underlying insurance contracts. Implicit in this condition is the requirement that both the amount and timing of the reinsurer's payments depend on and directly vary with the amount and timing of claims settled under the reinsured contracts.
- b. Significant loss. It is reasonably possible that the reinsurer may realize a significant loss from the transaction.

FASB ASC 944 looks to the present value of all cash flows between the parties, however characterized, under reasonably possible outcomes in determining whether it is reasonably possible that the reinsurer may realize a significant loss from the contract.

FASB ASC 720-20-25-2 suggests that noninsurance entities look to the risk transfer guidance in FASB ASC 944 and states, in part:

Entities may find the conditions in Section 944-20-15 useful in assessing whether an insurance contract transfers risk.

FASB ASC 944-20-25-1 states that a multiple-year retrospectively rated insurance contract must indemnify the insured as required by FASB ASC 944-20-15-36 to be accounted for as insurance. FASB ASC 944-20 also indicates that there may be certain situations in which the guarantee accounting in accordance with FASB ASC 460, *Guarantees*, is applicable.

FASB ASC 815, *Derivatives and Hedging*, addresses scenarios where there are dual-triggers and includes a number of relevant examples.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.11 Differences Between Retroactive and Prospective Insurance

Inquiry—What are the differences between retroactive and prospective insurance?

Reply—Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 944-605-05-7 states that for property and casualty insurance: The distinction between prospective and retroactive reinsurance contracts is based on whether the contract reinsures future or past insured events covered by the underlying contracts.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.12 Accounting for Prospective Insurance

Inquiry—How does a noninsurance enterprise account for prospective insurance contracts that qualify for insurance accounting?

Reply—A noninsurance enterprise amortizes the premiums over the contract period in proportion to the amount of insurance protection provided. If an insured loss occurs, and if it is probable that the policy will provide reimbursement for the loss and the amount of the loss can be reasonably estimated, the noninsurance enterprise records a receivable from the insurance enterprise and a recovery of the incurred loss in the income statement. If it is not probable¹ that the policy will provide reimbursement, then the receivable and recovery are not recorded.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.13 Accounting for Retroactive Insurance

Inquiry—How does a noninsurance enterprise account for retroactive insurance contracts that qualify for insurance accounting?

Reply—Paragraphs 3–4 of Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 720-20-25 state:

¹ According to the Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) glossary, *probable* means that the future event or events are likely to occur.

Notwithstanding that Topic 944 applies only to insurance entities, purchased retroactive insurance contracts that indemnify the insured shall be accounted for in a manner similar to the manner in which retroactive reinsurance contracts are accounted for under Subtopic 944-605. The guidance in that Subtopic shall be applied, as appropriate, based on the facts and circumstances of the particular transaction. That is, amounts paid for retroactive insurance shall be expensed immediately. Simultaneously, a receivable shall be established for the expected recoveries related to the underlying insured event.

If the receivable established exceeds the amounts paid for the insurance, the resulting gain is deferred. Immediate gain recognition and liability derecognition are not appropriate because the liability has not been extinguished (the entity is not entirely relieved of its obligation). Additionally, the liability incurred as a result of a past insurable event and amounts receivable under the insurance contract do not meet the criteria for offsetting under paragraph 210-20-45-1.

FASB ASC 720-20-35-2 further states:

If the amounts and timing of the insurance recoveries can be reasonably estimated, the deferred gain shall be amortized using the interest method over the estimated period over which the entity expects to recover substantially all amounts due under the terms of the insurance contract. If the amounts and timing of the insurance recoveries cannot be reasonably estimated, then the proportion of actual recoveries to total estimated recoveries shall be used to determine the amount of the amortization.

Paragraphs 22–23 of FASB ASC 944-605-25 state:

Amounts paid for retroactive reinsurance of short-duration contracts that meets the conditions for reinsurance accounting shall be reported as reinsurance receivables to the extent those amounts do not exceed the recorded liabilities relating to the underlying reinsured contracts. If the recorded liabilities exceed the amounts paid, reinsurance receivables shall be increased to reflect the difference and the resulting gain deferred.

If the amounts paid for retroactive reinsurance for short-duration contracts exceed the re-corded liabilities relating to the underlying reinsured short-duration contracts, the ceding entity shall increase the related liabilities or reduce the reinsurance receivable or both at the time the reinsurance contract is entered into, so that the excess is charged to earnings.

FASB ASC 944-605-35-9 further states:

Any gain deferred under paragraph 944-605-25-22 shall be amortized over the estimated remaining settlement period. If the amounts and timing of the reinsurance recoveries can be reasonably estimated, the deferred gain shall be amortized using the effective interest rate inherent in the amount paid to the reinsurer and the estimated timing and amounts of recoveries from the reinsurer (the interest method). Otherwise, the proportion of actual recoveries (the recovery method) shall determine the amount of amortization.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.14 Accounting for Multiple-Year Retrospectively Rated Insurance

Inquiry—How does a noninsurance enterprise account for a multiple-year retrospectively rated insurance contract?

Reply—As noted in Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 720-20-05-10, multiple-year retrospectively rated contracts:

include a retrospective rating provision that provides for any of the following based on contract experience:

- a. Changes in the amount or timing of future contractual cash flows, including premium adjustments, settlement adjustments, or refunds to the noninsurance entity
- b. Changes in the contract's future coverage.

FASB ASC 720-20-05-9 also states, in part:

A critical feature of these contracts is that part or all of the retrospective rating provision is obligatory such that the retrospective rating provision creates for each party to the contract future rights and obligations as a result of past events.

FASB ASC 944-20-25-2 also discusses the accounting for retrospective adjustments and states:

For a multiple-year retrospectively rated insurance contract accounted for as insurance, the insurer shall both:

- a. Recognize an asset to the extent that the insured has an obligation to pay cash (or other consideration) to the insurer that would not have been required absent experience under the contract.
- b. Recognize a liability to the extent that any cash (or other consideration) would be payable by the insurer to the insured based on experience to date under the contract.

Paragraphs 3–4 of FASB ASC 944-20-35 further state:

The amount recognized under paragraph 944-20-25-4 in the current period shall be computed, using a with-and-without method, as the difference between the ceding entity's total contract costs before and after the experience under the contract as of the reporting date, including costs such as premium adjustments, settlement adjustments, and impairments of coverage.

The amount of premium expense related to impairments of coverage shall be measured in relation to the original contract terms. Future experience under the contract (that is, future losses and future premiums that would be paid regardless of past experience) shall not be considered in measuring the amount to be recognized.

FASB ASC 944-20-25-4 also further states:

For contracts that meet all of the conditions described in paragraph 944-20-15-55:

- a. The ceding entity shall recognize a liability and the assuming entity shall recognize an asset to the extent that the ceding entity has an obligation to pay cash (or other consideration) to the reinsurer that would not have been required absent

experience under the contract (for example, payments that would not have been required if losses had not been experienced).

- b. The ceding entity shall recognize an asset and the assuming entity shall recognize a liability to the extent that any cash (or other consideration) would be payable from the assuming entity to the ceding entity based on experience to date under the contract.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.15 Deposit Accounting

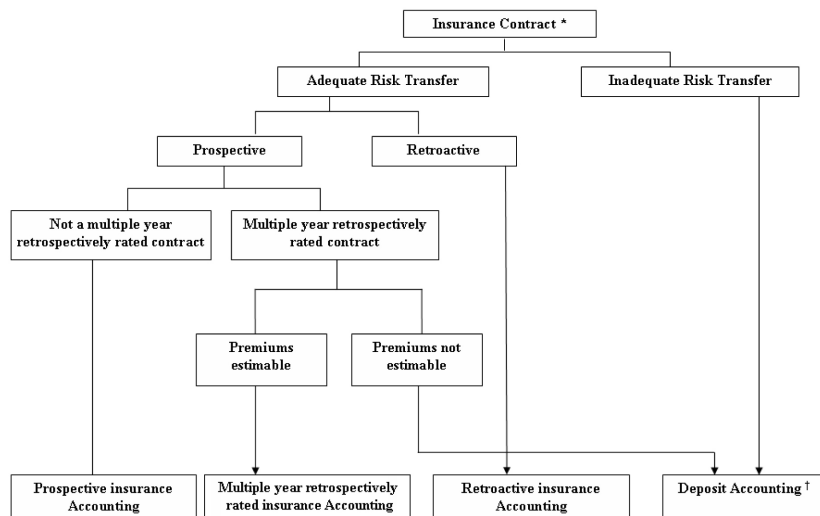

Inquiry—What is deposit accounting?

Reply—Deposit accounting essentially treats the contract as a financing transaction similar to a loan taking into account the time value of money. Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 340, *Other Assets and Deferred Costs*, provides guidance on how to account for insurance and reinsurance contracts that do not transfer insurance risk.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.16 Identifying Accounting Model for Insurance Transactions

The accompanying chart depicts the basic decision process in identifying the appropriate accounting model for insurance transactions.

* The insurance model discussed in this series of technical practice aids is based on property and casualty and other short-duration contracts, as defined in Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 944, *Financial Services—Insurance*.

† FASB ASC 944-20 should also be considered in determining the accounting for multiple-year retrospectively rated contracts that do not transfer risk.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

[The next page is 201.]

Section 1300

Statement of Cash Flows

[.01] **Reserved**

[.02] **Reserved**

.03 Comparative Statements of Cash Flows

Inquiry—Is it necessary to provide a statement of cash flows for both the current and prior periods if comparative income statements are presented, but only the current balance sheet is presented?

Reply—Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 230-10-15-3 states:

A business entity or not-for-profit entity that provides a set of financial statements that reports both financial position and results of operations shall also provide a statement of cash flows for each period for which results of operations are provided.

Therefore, if a balance sheet is presented, a statement of cash flows should be presented for both current and prior periods if income statements are presented for such periods.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

[.04] **Reserved**

.05 Statement of Cash Flows for Annual Report With Balance Sheet Only

Inquiry—When only a statement of financial position is presented, is it necessary that the auditor's opinion be qualified relative to the omission of the statement of cash flows?

Reply—Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 230-10-15-3 states:

A business entity or not-for-profit entity that provides a set of financial statements that reports both financial position and results of operations shall also provide a statement of cash flows for each period for which results of operations are provided.

Therefore, when a statement of financial position is not accompanied by a statement of operations, there is no need for presentation of a statement of cash flows, and no comment on the absence of such a statement is necessary.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

[.06] **Reserved**

[.07] **Reserved**

[.08] **Reserved**

[.09] **Reserved**

[.10] Special Purpose Frameworks

Inquiry—When an entity prepares its financial statements in accordance with a special purpose framework, is a statement of cash flows required?

Reply—Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 230-10-15-3 states:

A business entity or not-for-profit entity that provides a set of financial statements that reports both financial position and results of operations shall also provide a statement of cash flows for each period for which results of operations are provided.

Paragraph .A17 of AU-C section 800, *Special Considerations—Audits of Financial Statements Prepared in Accordance With Special Purpose Frameworks* (AICPA, *Professional Standards*), states, in part:

Terms such as *balance sheet*, *statement of financial position*, *statement of income*, *statement of operations*, and *statement of cash flows*, or similar unmodified titles, are generally understood to be applicable only to financial statements that are intended to present financial position, results of operations, or cash flows in accordance with GAAP.

Paragraph .A34 of AU-C section 800 states, in part:

Special purpose financial statements may not include a statement of cash flows. If a presentation of cash receipts and disbursements is presented in a format similar to a statement of cash flows or if the entity chooses to present such a statement, the statement would either conform to the requirements for a GAAP presentation or communicate their substance. As an example, the statement of cash flows might disclose noncash acquisitions through captions on its face.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC; Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

.11 The Effect of an Error Correction on the Statement of Cash Flows When Single Period Statements Are Presented

Inquiry—How would an error correction be presented in the statement of cash flows if single period statements are presented?

Reply—Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 250-10-45-24 states that “error corrections shall, in single period statements, be reflected as adjustments of the opening balance of retained earnings.” A corresponding error correction will normally result in a change in the beginning balance of an asset or liability account. FASB ASC 230-10-50-3 states, in part:

Information about all investing and financing activities of an entity during a period that affect recognized assets or liabilities but that do not result in cash receipts or cash payments in the period shall be disclosed.

Therefore, the difference in an account between the current balance sheet and that same account in the restated beginning balance sheet (even if not presented) that resulted from the error correction, should be reflected in the related footnote disclosures and clearly referenced to the statement of cash flows.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

[.12] Reserved**.13 Classification of Increase in Cash Value of Officers' Life Insurance in Statement of Cash Flows**

Inquiry—How should the increase in cash surrender value of officers' life insurance be classified in the statement of cash flows?

Reply—An increase in the cash surrender value of officers' life insurance would normally be presented as an investing outflow if the increase in cash value is less than the related premium paid. If the increase in cash value exceeds the premium paid, the premium paid is an investing outflow and the remainder of the increase in cash value would be presented as a reconciling item on the reconciliation of net income to net cash provided by operating activities.

[.14] Reserved**.15 Presentation of Cash Overdraft on Statement of Cash Flows**

Inquiry—A company has accounts at three separate banks. One of the bank accounts is in an overdraft position at year end, thus it is shown as a liability on the balance sheet. Does the company show as cash and cash equivalents on the statement of cash flows only the two accounts with the positive balances or does it show the net cash (the three accounts combined) at the end of the year as its cash and cash equivalents?

Reply—The amount that will be shown on the statement of cash flows is the two accounts with the positive balances. Per Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) ASC 230-10-45-4, "The total amounts of cash and cash equivalents at the beginning and end of the period shall be the same amounts as similarly titled line items or subtotals shown in the statements of financial position . . ." The net change in overdrafts during the period is a financing activity.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.16 Purchase of Inventory Through Direct Financing

Inquiry—An automobile dealer purchases its inventory from a manufacturer which finances purchases through a finance subsidiary. The finance subsidiary pays the manufacturer directly on behalf of the dealer. Cash is not disbursed by the dealer until the automobiles are sold.

Under the provisions of Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 230, *Statement of Cash Flows*, how should the purchases of inventory be reported by the automobile dealer in the statement of cash flows?

Reply—A statement of cash flows reports an enterprise's cash receipts and cash payments during the period. Transactions that do not involve cash receipts and cash payments should be excluded from the statement of cash flows. Noncash investing and financing transactions should be reported in separate disclosures.

The purchases of inventory described above do not involve a cash flow by the automobile dealer until the automobiles are sold and the dealer pays the finance subsidiary under the financing arrangement. Therefore, only the cash outflows from payments to the finance subsidiary should be included in the body of the statement of cash flows.

Payments made to the finance subsidiary of the manufacturer should be classified as operating cash outflows in accordance with FASB ASC 230-10-45-17, which defines operating cash outflows to include principal payments on accounts and notes payable to suppliers for goods acquired for resale.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.17 Omission of Reconciliation of Net Income to Cash Flow From Operations

Inquiry—When an accountant is requested to compile financial statements that omit substantially all of the disclosures required by accounting principles generally accepted in the United States of America in accordance with paragraph .20 of AR section 80, *Compilation of Financial Statements* (AICPA, *Professional Standards*), would the omission of the schedule, “reconciliation of net income to net cash flow from operating activities” required by the direct method of reporting cash flows under FASB ASC 230 be considered a departure from accounting principles generally accepted in the United States of America?

Reply—Yes. Under the direct method of reporting net cash flows from operating activities, the separate schedule reconciling net income to net cash flow from operating activities is a required part of the cash flow statement. If the schedule is omitted, the accountant should modify his compilation report to disclose a departure from accounting principles generally accepted in the United States of America in accordance with paragraphs .27–.29 of AR section 80.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC; Revised, December 2010, to reflect conforming changes necessary due to the issuance of SSARS No. 19.]

.18 Presentation on the Statement of Cash Flows of Distributions From Investees With Operating Losses

Inquiry—An entity carries an investment in a limited partnership interest under the equity method of accounting. The partnership had operating losses during the year, but a positive cash flow allowed the partnership to distribute funds to its investors. Would receipt of that distribution by the entity be classified on the statement of cash flows as cash inflows from investing activities or as cash inflows from operating activities?

Reply—Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 230, *Statement of Cash Flows*, requires dividends received (returns on investments) to be classified as cash inflows from operating activities. Receipts from returns of investments are classified as cash inflows from investing activities.

Distributions to investors from investees should be presumed to be returns on investments and be classified by the investor as cash inflows from operating activities, similar to the receipt of dividends. That presumption can be overcome based on the specific facts and circumstances. For example, if the partnership sells assets, the distribution to investors of the proceeds of that sale would be considered a return of investment and be classified by the investor as cash inflows from investing activities.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.19 Classification of Payments on Equipment Finance Note

Inquiry—Under the provisions of Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 230-10-50-3, noncash investing and financing transactions are to be disclosed in related narrative form or summarized in a schedule. An example of a transaction of this type would be an acquisition of equipment in a transaction in which an enterprise borrows money from a financial institution for the purchase of equipment and the financial institution remits the money directly to the vendor. In a transaction of this nature, should the payments of principal be presented as an outflow in the financing or investing section of the cash flow statement?

Reply—Payments on the aforementioned notes would be recorded as financing outflows per FASB ASC 230-10-45-15(b).

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.20 Direct vs. Indirect Method for Statement of Cash Flows

Inquiry—A company has decided to present its statement of cash flows using the direct method for the current year although the indirect method was used in the prior year. Would this change require an emphasis-of-matter paragraph noting a lack of consistency in the financial statements?

Reply—No. A change in the presentation for the statement of cash flows from the indirect to direct method (or vice versa) is considered a change in classification rather than a consistency problem. If the statement of cash flows is presented for the prior period, it should be restated using the direct method approach for comparative purposes. In addition, disclosure should be made indicating the prior period restatement.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature; Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

.21 Presentation of Financing Transaction on Statement of Cash Flows

Inquiry—A buyer contracts to purchase real estate. The lender gives the buyer a check made payable to the buyer for a loan to purchase the property. The buyer in turn endorses the check over to the seller. How should this financing transaction be presented on the buyer's statement of cash flows?

Reply—This transaction should be treated as a cash receipt by the buyer since the buyer was named as payee on the check. The amount of the check should be reported on the statement of cash flows even though the buyer did not convert the check to currency or deposit it in his or her bank account. The cash receipt belongs to the payee named on the check. The buyer should present the amount of the check as "Proceeds From Borrowings" as a cash inflow from financing transactions and "Purchase of Real Estate" as a cash outflow from investing activities.

.22 Negative Amortization of Long-Term Debt in Cash Flows Statement

Inquiry—The cash repayments on a long-term loan are less than the interest expense for the period. The amount of the interest expense not paid becomes part of the principal balance (negative amortization). How should the negative amortization be shown on the cash flows statement?

Reply—Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 230-10-45-28(a) indicates:

Adjustments to [reconcile] net income to determine net cash flow from operating activities shall reflect accruals for interest earned but not received and interest incurred but not paid.

The negative amortization should therefore be treated as an adjustment to net income to remove the effect of this noncash expense. Disclosure should also be considered.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

[The next page is 261.]

Section 1400

Consolidated Financial Statements

[.01] Reserved

.02 Consolidation of Corporation and Proprietorship

Inquiry—How should the financial statements of a corporation and a proprietorship be consolidated?

Reply—This answer assumes that 100 percent of the corporation capital stock is owned by the proprietorship.

As in any consolidation, the stockholders' equity of the subsidiary corporation should be eliminated against the investment of the parent (the proprietorship). Any net earnings of the subsidiary corporation subsequent to its acquisition and not recorded on the books of the parent should be reflected in the consolidated net equity, which, because the parent is a sole proprietorship, will be a single figure. As income taxes are assessed against the owner as an individual rather than against the proprietorship, no provision is made for income taxes beyond those payable by the corporation. However, a footnote should disclose such omission, and if it is anticipated that funds will have to be withdrawn from the proprietorship to meet future taxes on income earned to date, this too should be disclosed, with an estimate of the amount thereof if practicable. Of course, provision should be made for elimination of profits to the extent that they may be reflected in consolidated inventories or in other consolidated assets.

[Revised, April 2010.]

[.04] Reserved

[.05] Reserved

.06 Combined and Separate Financial Statements

Inquiry—Company A and Company B are new car dealers with A selling an American made car and B selling a foreign made car. One individual owns 100 percent of the outstanding stock of both companies.

Both companies A and B are at the same location with separate buildings for sales staffs. Company A maintains the parts and service departments for both companies with the parts inventory, warranty and service receivables of Company B on Company A's books. In return, Company B pays Company A a per car fee for services to be performed on each new car sold by B.

Company A maintains the only used car inventory on the lot adjacent to Company B's building. Each time B receives a used car in trade, it is sold to Company A at the wholesale fair market value.

Although there is a differentiation in sales staffs, management, accounting, secretarial, and other related services are performed by the same staff out of both buildings, and Company B pays a monthly fee for services performed.

Company A has income for the year, but Company B has a loss for the period. Combined financial statements will be prepared, but is it also necessary to provide combining statements for the individual companies?

Reply—Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 810-10-55-1B states, in part:

There are circumstances, however, in which combined financial statements (as distinguished from consolidated statements) of commonly controlled entities are likely to be more meaningful than their separate statements. For example, combined financial statements would be useful if one individual owns a controlling interest in several entities that are related in their operations.

Combined financial statements of the companies would be appropriate, and there is no necessity for presenting separate statements for the companies.

Unfortunately, FASB ASC 810, *Consolidation*, makes no statement as to appropriate presentation of the stockholder's equity section of a combined balance sheet. Appropriate disclosure, therefore, may depend upon the circumstances. Either on the statement of financial position, or in a note, there should be disclosure for each company of their number of shares of stock that are authorized and outstanding, and the par value. While under some circumstances it might not be necessary to disclose the allocation of retained earnings between the two companies, other circumstances may exist under which such disclosure would be required—for example, if the losses of either company have been so severe that an insolvent condition might be anticipated.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.07 Reporting on Company Where Option to Acquire Control Exists

Inquiry—Corporation A acquired debentures from Corporation B convertible into common voting stock within ten years at \$1 per share. Corporation A also has an option to purchase additional shares at \$1 per share upon conversion to bring A's holdings in B up to 51 percent of the total outstanding shares. Corporation A also has the right to appoint a majority of Corporation B's Board of Directors and has done so. Other intercompany transactions are negligible.

May each company issue separate financial statements, or are consolidated statements required? What disclosures would be necessary?

Reply—At present there is no ownership of one company by the other, and consolidation would not be proper. Further, since intercompany transactions (other than interest on the debentures) are negligible, combined statements would probably not be particularly useful.

Corporation A should disclose in its financial statements the terms under which it may obtain controlling stock ownership of Corporation B, the amount of interest received, that no other intercompany transactions are significant, and that it presently has the right to and does appoint a majority to Corporation B's Board of Directors. It should also present summarized information as to the assets, liabilities, and operating results of Corporation B, or include B's financial statements with its report.

Corporation B, in addition to disclosing the interest rate and maturity of the convertible debentures, should disclose Corporation A's conversion and option privileges and should disclose that Corporation A has the right to and has appointed a majority to Corporation B's Board of Directors.

.22 Intervening Intercompany Transactions Between Subsidiary's and Parent's Year-End

Inquiry—A parent company has a December 31 year-end and its wholly owned subsidiary has a November 30 year-end. The two companies generally have substantial intercompany sales and purchases which are recorded by each company as they occur. The parent uses the subsidiary's November 30 year-end statement to prepare the consolidated financial statements.

The intervening intercompany transactions, which occur between December 1 and December 31, create intercompany account balances which do not eliminate upon consolidation due to the difference in year-ends of the parent and its subsidiary. How should these intervening transactions be accounted for in the consolidated financial statements?

Reply—In discussing differences in fiscal periods, Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 810-10-45-12 states, “if the difference is not more than about three months, it usually is acceptable to use, for consolidation purposes, the subsidiary's financial statements for its fiscal period; if this is done, recognition should be given by disclosure or otherwise to the effect of intervening events that materially affect the financial position or results of operations.”

When a subsidiary's fiscal year differs from that of the parent, intercompany accounts may not agree. Transactions in the interval between the subsidiary's year-end and the parent's year-end must be analyzed and appropriate consolidation entries prepared.

A practical approach to preparing these consolidation entries would be to reverse the intervening intercompany transactions in the parent company's accounts but not in the subsidiary's accounts. A summary of these intervening transactions could then be disclosed in a note to the consolidated financial statements.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.23 Conforming Subsidiary's Inventory Pricing Method to Its Parent Company's Method

Inquiry—A parent company uses the first-in, first-out (FIFO) cost assumption to price its inventory, while its subsidiary uses the last-in, first-out (LIFO) cost assumption to price its inventory. Must the subsidiary's inventory method be changed to conform to the FIFO method used by its parent company in consolidated financial statements?

Reply—There is no requirement under generally accepted accounting principles for the subsidiary to conform its inventory pricing method with the parent company's method. Consolidated statements may be presented with the subsidiary using LIFO and the parent using FIFO. Also, separate subsidiary only statements may be presented on the LIFO basis.

[.24] Reserved**.25 Issuance of Parent Company Only Financial Statements**

Inquiry—Generally accepted accounting principles preclude preparation of parent company financial statements for issuance to stockholders as the financial statements of the primary reporting entity. Are there any circumstances under which parent company financial statements may still be prepared?

Reply—Yes. Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 810-10-45-11 states: "In some cases parent entity statements may be needed, in addition to consolidated statements, to indicate adequately the position of bondholders and other creditors or preferred stockholders of the parent. Consolidating statements, in which one column is used for the parent entity and other columns for particular subsidiaries or groups of subsidiaries often are an effective means of presenting the pertinent information."

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.26 Consolidated Versus Combined Financial Statements

Inquiry—S Corporation has 2000 common shares and 1000 preferred shares outstanding. The preferred shareholders have the same rights as the common shareholders, except the right to vote. Of the 2000 common shares outstanding, 1000 shares are owned by P Corporation and 1000 shares are owned by I (an individual) who also owns all of the outstanding common shares of P Corporation. The preferred shares of S Corporation are owned by an outside party. Should P Corporation consolidate S Corporation for financial reporting purposes?

Reply—Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 810-10-05-6 states that to "justify the preparation of consolidated financial statements, the controlling financial interest shall rest directly or indirectly in one of the entities included in the consolidation." In this situation P does not control S directly or indirectly and therefore consolidation is not appropriate. Combined financial statements could be presented if the circumstances are such that combined financial statements of S Corporation and P Corporation are more meaningful than separate financial statements.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.27 Subsidiary Financial Statements

Inquiry—Generally accepted accounting principles indicate that “consolidated rather than parent-company financial statements are the appropriate general-purpose financial statements.” May subsidiary-only financial statements be issued without consolidated financial statements?

Reply—Yes. Generally accepted accounting principles do not preclude issuance of subsidiary-only statements. Care should be taken to include all disclosures required by Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) SC 740-10-50-17, FASB ASC 850, *Related Party Disclosures*, and other relevant pronouncements.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

[.28] Reserved**.29 Consolidated Versus Combined Financial Statements Under FASB ASC 810, Consolidation**

Inquiry—If a reporting entity is the primary beneficiary of a variable interest entity (VIE) under Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 810, *Consolidation*, would it be appropriate to issue combined financial statements rather than consolidated financial statements?

Reply—No. FASB ASC 810-10-05-6 permits combined financial statements in certain situations in which consolidated financial statements are not required. However, FASB ASC 810-10-25-38 states that “an entity shall consolidate a variable interest entity if that entity has a variable interest (or combination of variable interests) that will absorb a majority of the variable interest entity’s expected losses, receive a majority of the variable interest entity’s expected residual returns, or both.” Furthermore, the starting point for the preparation of combined financial statements is two or more sets of financial statements that are prepared in accordance with GAAP; in the case of a primary beneficiary of a VIE, financial statements prepared in accordance with GAAP would be consolidated financial statements.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.30 Stand-Alone Financial Statements of a Variable Interest Entity

Inquiry—Regarding Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 810, *Consolidation*, is it appropriate to present stand-alone financial statements of a variable interest entity (VIE)?

Reply—FASB ASC 810 does not specifically address this issue. Subsidiary-only financial statements are appropriate under generally accepted accounting principles. By extension, it may be appropriate to present stand-alone financial statements of a VIE.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.31 GAAP Departure for FASB ASC 810

Inquiry—If a reporting entity is the primary beneficiary of a variable interest entity under Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 810, *Consolidation*, what are the implications for the auditors’ report if the reporting entity does not consolidate the variable interest entity?

Reply—AU-C section 705, *Modifications to the Opinion in the Independent Auditor's Report* (AICPA, *Professional Standards*), addresses the auditor's responsibility to issue an appropriate report in circumstances when, in forming an opinion in accordance with AU-C section 700, *Forming an Opinion and Reporting on Financial Statements* (AICPA, *Professional Standards*), the auditor concludes that a modification to the auditor's opinion on the financial statements is necessary. Paragraph .07a of AU-C section 705 states that when the auditor concludes that, based on the audit evidence obtained, the financial statements as a whole are materially misstated, the auditor should modify the opinion in the auditor's report.

As paragraph .02 of AU-C section 705 explains, the decision regarding which type of modified opinion (a qualified opinion, an adverse opinion, and a disclaimer of opinion) is appropriate depends upon the following:

- a. The nature of the matter giving rise to the modification (that is, whether the financial statements are materially misstated or, in the case of an inability to obtain sufficient appropriate audit evidence, may be materially misstated)
- b. The auditor's professional judgment about the pervasiveness of the effects or possible effects of the matter on the financial statements

If an auditor concludes that a qualified opinion is appropriate, he or she should disclose the GAAP departure in a separate paragraph headed "Basis for Qualified Opinion" preceding the opinion paragraph of the report. Furthermore, the opinion paragraph of the report should include the appropriate qualifying language and a reference to the basis for qualified opinion paragraph. The basis for modification paragraph should include a description and quantification of the financial effects of the misstatement, unless impracticable. If it is not practicable to quantify the financial effects, the auditor should so state in the basis for modification paragraph. If such disclosures are made in a note to the financial statements, the basis for modified opinion paragraph may be shortened by referring to it.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC; Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

.32 Parent-Only Financial Statements and Relationship to GAAP

Inquiry—Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 810, *Consolidation*, addresses parent company financial statements. If consolidation is required under generally accepted accounting principles (GAAP), are there any circumstances in which an entity may prepare parent company-only financial statements without preparing related consolidated financial statements and say that the parent company-only financial statements are in accordance with GAAP?

Reply—No. FASB ASC 810-10-10-1 notes the presumption in GAAP that consolidated financial statements are more meaningful than parent entity-only financial statements. FASB ASC 810-10-15-10 states that all majority-owned subsidiaries shall be consolidated, with few exceptions. FASB ASC 810-10-45-11 adds that parent company financial statements may be needed in addition to consolidated financial statements, but it does not suggest that parent company financial statements may be prepared in place of consolidated financial statements.

For example, if, as a condition of a legal or regulatory agreement, an entity is required to submit “restricted” or “special use” parent-only financial statements without related consolidated financial statements, the restricted or special use parent-only financial statements are not in accordance with GAAP.

Financial Statements Prepared in Accordance With a Special Purpose Framework

For nonauthoritative guidance regarding financial statements prepared in accordance with the cash- or tax-basis of accounting, consult the AICPA publication *Accounting and Financial Reporting Guidelines for Cash- and Tax-Basis Financial Statements*. That practice aid alerts the reader to some of the most frequently-encountered issues faced by accounting professionals in dealing with cash- and tax-basis financial statements and provides suggestions and insight into how these issues are resolved in practice. In addition, the AICPA has published a separate practice aid, *Applying OCBOA in State and Local Government Financial Statements*. To order these publications, call the AICPA at 1.888.777.7077 or visit www.cpa2biz.com.

.04 Terminology for Special Purpose Financial Statements

The Clarification and Convergence project of the AICPA Accounting and Review Services Committee is currently underway. Upon the completion of this project, this Inquiry and Reply will be conformed to include references to the pertinent clarified AICPA Statements on Standards for Accounting and Review Services that are expected to be issued as a result of the project.

Inquiry—(1) If an entity prepares financial statements in accordance with a special purpose framework, may GAAP financial statement titles be used?

(2) What should be the caption for “net income” or “net loss,” and may the corporation use “retained earnings”?

Reply—(1) No. Paragraph .A17 of AU-C section 800, *Special Considerations—Audits of Financial Statements Prepared in Accordance With Special Purpose Frameworks* (AICPA, *Professional Standards*), explains that unmodified GAAP financial statement titles are not acceptable for use in special purpose financial statements. The paragraph contains a few examples of appropriate financial statement titles (for example, *Statement of Assets and Liabilities Arising from Cash Transactions* and *Statement of Income—Regulatory Basis*). However, the examples presented in the authoritative literature were not meant to be all-inclusive and are not the only acceptable titles. Equally acceptable titles would be *Balance Sheet—Cash Basis* or *Statement of Operations—Income Tax Basis*. The selection of specific financial statement titles is a matter of judgment; any modified title would fulfill the requirements

of AU-C section 800 as long as it is clear that the financial statements are not prepared in accordance with GAAP.

(2) The authoritative literature is silent regarding the captions to be used within special purpose financial statements. Therefore, there is no requirement to modify standard GAAP financial statement captions in special purpose financial statements. If modifications are desired, common examples for cash basis financial statements are *Excess of revenue collected over expenses paid*, *Excess of expenses paid over revenue collected*, and *Accumulated excess of revenue over expenses paid*. For tax-basis financial statements, acceptable modifications include *Retained earnings—income tax basis* and *Net income—tax basis*.

[Amended, February 1995; Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

[.06] **Reserved**

.07 Disclosure Concerning Subsequent Events in Special Purpose Financial Statements

Inquiry—FASB *Accounting Standards Codification (ASC) 855, Subsequent Events*, sets forth general standards of accounting for and disclosure of events that occur after the balance sheet date but before financial statements are issued or are available to be issued. FASB ASC 855 also requires disclosure of the date through which an entity has evaluated subsequent events and the basis for that date, that is, whether that date represents the date on which the financial statements were issued or were available to be issued. Should full disclosure financial statements prepared in accordance with a special purpose framework contain the disclosures set forth in FASB ASC 855?

Reply—Paragraph .19 of AR section 80, *Compilation of Financial Statements (AICPA, Professional Standards)*, and paragraph .32 of AR section 90, *Review of Financial Statements (AICPA, Professional Standards)*, state, in part, “financial statements prepared in accordance with an OCBOA¹ are not considered appropriate in form unless the financial statements include informative disclosures similar to those required by GAAP if the financial statements contain items that are the same as, or are similar to, those in financial statements prepared in accordance with GAAP.” Paragraph .A20 of AU-C section 800 states, in part, “when the special purpose financial statements contain items that are the same as, or similar to, those in financial statements prepared in accordance with GAAP, informative disclosures similar to those required by GAAP are necessary to achieve fair presentation.”

Therefore, the date through which an entity has evaluated subsequent events and the basis for that date should be disclosed. Furthermore, some nonrecognized subsequent events are of such a nature that disclosure is required to keep the financial statements prepared from being misleading. Such events should be disclosed following the guidance in FASB ASC 855.

Personal Financial Statements

[.01] Reserved

[.02] Reserved

.03 Social Security Benefits—Personal Financial Statements

Inquiry—Do social security benefits to be received based on the future life expectancy of an individual qualify as an asset in personal financial statements?

Reply—No. Financial Accounting Standards Board (FASB) *Accounting Standards Codification (ASC) 274, Personal Financial Statements*, indicates that nonforfeitable rights to receive future sums must meet certain criteria to be accounted for as assets. One of these criteria is that the rights must not be contingent on the individual's life expectancy or the occurrence of a particular event, such as disability or death. In this example, because the social security benefits are contingent on the individual's life expectancy, they do not qualify as a recognizable asset for the personal financial statements.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.04 Presentation of Assets at Current Values and Liabilities at Current Amounts in Personal Financial Statements

Inquiry—Financial Accounting Standards Board (FASB) *Accounting Standards Codification (ASC) 274, Personal Financial Statements*, states that personal financial statements should present assets at their estimated current values and liabilities at their estimated current amounts at the date of the financial statements. FASB ASC 274 also defines estimated current values and current amounts.

Are the definitions of *current values* (assets) and *current amounts* (liabilities) for personal financial statements meant to be the same as *fair value*, as defined in FASB ASC 820, *Fair Value Measurements and Disclosures*?

Reply—No. FASB ASC 820 did not contemplate the reporting of personal financial statements, and FASB did not amend the definitions of estimated current values and current amounts for personal financial statements as part of its codification process.

.03 Disclosure of Change in Fiscal Year

Inquiry—What disclosure in the financial statements is necessary when a company changes its fiscal year?

Reply—Generally accepted accounting principles (GAAP) do not specifically require disclosure of a change in the fiscal year. However, disclosure of such a change is generally considered necessary to make the financial statements meaningful to users.

[.04] Reserved

.05 Applicability of Fair Value Disclosure Requirements and Measurement Principles in Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 820, Fair Value Measurements and Disclosures, to Certain Financial Instruments

Inquiry—Do the fair value measurement principles and disclosure requirements in Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 820, *Fair Value Measurements and Disclosures*, apply to financial instruments that are not recognized at fair value in the statement of financial position, but for which fair value is required to be disclosed in the notes to financial statements in accordance with paragraphs 10–19 of FASB ASC 825-10-50?

Reply—The measurement principles of FASB ASC 820 apply when determining for disclosure purposes the fair value of financial instruments that are not recognized at fair value in the statement of financial position. FASB ASC 820-10-15-1, which establishes the scope of FASB ASC 820, provides that “Except as noted below, this Topic applies when another Topic requires or permits fair value measurements or disclosures about fair value measurements (and measurements, such as fair value less costs to sell, based on fair value or disclosures about those measurements).” The exceptions relate to (a) share-based payment transactions, (b) FASB ASC sections, subtopics, or topics that require or permit measurements that are similar to fair value but that are not intended to measure fair value, and (c) certain fair value measurements for purposes of lease classification or measurement in accordance with FASB ASC 840.

In addition, certain disclosure requirements of FASB ASC 820 apply to financial instruments for which fair value is only disclosed. Specifically, FASB ASC 820-10-50-2E provides that for each class of assets and liabilities not measured at fair value in the statement of financial position but for which the fair value is disclosed,

a reporting entity shall disclose the information required by paragraph 820-10-50-2(b), (bbb), and (h). However, a reporting entity is not required to provide the quantitative disclosures about significant unobservable inputs used in fair value measurements categorized within Level 3 of the fair value hierarchy required by paragraph 820-10-50-2 (bbb). For such

assets and liabilities, a reporting entity does not need to provide the other disclosures required by this Topic.

[Issue Date: May 2010; Revised, April 2014, to reflect conforming changes necessary due to revisions to FASB ASC.]

.06 Applicability of Fair Value Disclosure Requirements in FASB ASC 820 to Financial Statements Prepared in Accordance With a Special Purpose Framework

Inquiry—If management prepares an entity’s financial statements in accordance with a special purpose framework, and those financial statements include accounts measured at fair value, what is the auditor’s responsibility with respect to fair value disclosure requirements in FASB ASC 820-10-50?

Reply—As indicated in paragraph .19 of AR section 80, *Compilation of Financial Statements* (AICPA, *Professional Standards*), and paragraph .32 of AR section 90, *Review of Financial Statements* (AICPA, *Professional Standards*), “financial statements prepared in accordance with an OCBOA¹ are not considered appropriate in form unless the financial statements include informative disclosures similar to those required by GAAP if the financial statements contain items that are the same as, or are similar to, those in financial statements prepared in accordance with GAAP.” Additionally, paragraph .A20 of AU-C section 800, *Special Considerations—Audits of Financial Statements Prepared in Accordance With Special Purpose Frameworks* (AICPA, *Professional Standards*), states “when the special purpose financial statements contain items that are the same as, or similar to, those in financial statements prepared in accordance with GAAP, informative disclosures similar to those required by GAAP are necessary to achieve fair presentation.”

Therefore, if special purpose financial statements reflect assets or liabilities measured at fair value in accordance with FASB ASC 820, the accountant/auditor should consider whether the financial statements (including the accompanying notes) include the fair value disclosure requirements of FASB ASC 820 as appropriate for the basis of accounting used.

Section 1900

Interim Financial Information

.01 Condensed Interim Financial Reporting by Nonissuers

Inquiry—Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 270, *Interim Reporting*, provides accounting and disclosure guidance relating to *recognition and measurement* in interim financial information (including condensed interim financial statements). FASB ASC 270 does not provide a reporting framework for condensed interim financial statements—that is, minimum requirements for the *form and content* of condensed interim financial statements. Article 10 of Securities and Exchange Commission (SEC) Regulation S-X provides guidance on the form and content of condensed interim financial statements of issuers. When preparing condensed interim financial statements, because specific guidance with respect to form and content is absent, may nonissuers apply Article 10 of SEC Regulation S-X in addition to complying with FASB ASC 270 with respect to recognition and measurement?

Reply—Yes. In the absence of established accounting principles for form and content in preparing condensed interim financial statements, nonissuers may analogize to the guidance in Article 10 of SEC Regulation S-X.

Preparers should keep in mind that the purpose of *condensed* interim financial statements is to provide an update to users of the entity's annual financial statements prepared in accordance with generally accepted accounting principles. Article 10 of SEC Regulation S-X also has this premise. Therefore, to avoid being considered misleading,

- such condensed interim financial statements would include a note that the financial information should be read in conjunction with the entity's latest annual financial statements, and
- the entity's latest annual financial statements would either accompany such condensed interim financial statements or be made readily available by the entity. The financial statements are deemed to be readily available if a user can obtain the financial statements without any further action by the entity (for example, financial statements on an entity's Web site may be considered readily available, but being available upon request is not considered readily available).

[Issue Date: January 2009; Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.02 Checks Held at Balance Sheet Date

Inquiry—It is the practice of a company to eliminate its recorded accounts payable balance at the end of each month by writing checks to all of its trade vendors prior to the end of the month. To prevent overdrafts that would result from this practice, the company retains possession of the checks and only mails them to the vendors after the end of the month, when sufficient funds are available to satisfy them.

How should these held checks be accounted for by the company at month end?

Reply—At month end the aggregate dollar amount of held checks should be added back to cash and accounts payable. Checks which have not left the custody of the company should not reduce the company's recorded cash or accounts payable balances because they have not been tendered to the vendor to satisfy the debt.

[.03] Reserved

[.04] Reserved

[.05] Reserved

.06 Disclosure of Cash Balances in Excess of Federally Insured Amounts

Inquiry—Should the existence of cash on deposit with banks in excess of FDIC-insured limits be disclosed in the financial statements?

Reply—The existence of uninsured cash balances should be disclosed if the uninsured balances represent a significant concentration of credit risk. *Credit risk* is defined in Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) glossary as follows:

For purposes of a hedged item in a fair value hedge, credit risk is the risk of changes in the hedged item's fair value attributable to both of the following:

- a. Changes in the obligor's creditworthiness
- b. Changes in the spread over the benchmark interest rate with respect to the hedged item's credit sector at inception of the hedge.

For purposes of a hedged item in a cash flow hedge, credit risk is the risk of changes in the hedged item's cash flows attributable to all of the following:

- a. Default
- b. Changes in the obligor's creditworthiness
- c. Changes in the spread over the benchmark interest rate with respect to the hedged item's credit sector at inception of the hedge.

As a result, bank statement balances in excess of FDIC-insured amounts represent a credit risk.

A concentration of credit risk exists if an entity has exposure with an individual counterparty or groups of counterparties. For example, a material uninsured cash balance with a single bank should generally be disclosed. In contrast, numerous immaterial uninsured cash balances on deposit with several banks may not require disclosure. The threshold for “significance” is a matter of judgment and will vary with individual circumstances.

An example of disclosure for this circumstance might be:

The Company maintains its cash accounts primarily with banks located in Alabama. The total cash balances are insured by the FDIC up to \$100,000 per bank. The Company has cash balances on deposit with two Alabama banks at December 31, 1996 that exceeded the balance insured by the FDIC in the amount of \$1,100,000.

.06 Accounting for Preferred Dividends Received on Investments in Common Stock

Inquiry—A company received dividends on its investment in common stock of another company in the form of preferred stock. How should the dividend be recorded?

Reply—The assets and related dividend income should be recorded at fair value. Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 845-10-30-1 states that in general, accounting for nonmonetary transactions should be based on the fair values of the assets (or services) involved which is the same basis as that used in monetary transactions and that a nonmonetary asset received in a nonreciprocal transfer should be recorded at the fair value of the asset received. (FASB ASC 505, *Equity*, discusses accounting for stock dividends by the recipient; however, the scope of that pronouncement specifically excludes distributions of a different class of shares from that owned.)

.05 Out-of-Pocket Costs Incurred by a Law Firm

Inquiry—A law firm incurs certain out-of-pocket costs on behalf of its clients. If the law firm’s efforts on behalf of the client are successful, these costs are recovered from the client in addition to the legal fees. If the case is lost, the costs are absorbed by the law firm. How should these costs be treated by the law firm?

Reply—These out-of-pocket costs should be reported as an asset in the financial statements of the law firm (for example, in an account called “client costs receivable”). At each balance sheet date, the law firm should apply the criteria in Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 450-20-25-1 to determine whether a loss contingency should be accrued.

If an asset is recorded, an allowance for unrecoverable client disbursements should be established representing the estimated amount of such costs that will not be realized. If these out-of-pocket costs become uncollectible because a case is lost, they should be written off against the allowance.

[Amended, June 1995; Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

[.06] Reserved

.07 Requirement for Doubtful Accounts Allowance

Inquiry—Do generally accepted accounting principles require an enterprise to establish an allowance for doubtful accounts even though management, based on analysis of the receivables and past charge-off experience, believes that no accounts are uncollectible at the balance sheet date?

Reply—FASB ASC 310-10-35-7 states that “the conditions under which receivables exist usually involve some degree of uncertainty about their collectibility, in which case a contingency exists . . .” FASB ASC 450-20-25-2 would require an accrual of a loss by a charge to income if both of the following conditions exist:

- a. “Information available prior to issuance of the financial statements indicates that it is probable that an asset had been impaired . . . at the date of the financial statements.” and
- b. “The amount of loss can be reasonably estimated.”

If both conditions are not met, an allowance for doubtful accounts would not be required. Further, there is no requirement to disclose the absence of a loss accrual. If the conditions are met, an accrual for the loss should be recognized

even though the specific receivables that are uncollectible may not be identifiable.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

[.08] Reserved

.09 Scope Part I: Application of FASB ASC 310-30 to Debt Securities

Inquiry—Does the scope of FASB ASC 310-30 include debt securities?

Reply—Yes. FASB ASC 310-30 applies to *loans*, as defined in the FASB ASC glossary, as follows:

Loan: A contractual right to receive money on demand or on fixed or determinable dates that is recognized as an asset in the creditor's statement of financial position. Examples include but are not limited to accounts receivable (with terms exceeding one year) and notes receivable. This definition encompasses loans accounted for as debt securities.

Debt Security: Any security representing a creditor relationship with an entity. The term debt security also includes all of the following:

- a. Preferred stock that by its terms either must be redeemed by the issuing entity or is redeemable at the option of the investor
- b. A collateralized mortgage obligation (or other instrument) that is issued in equity form but is required to be accounted for as a nonequity instrument regardless of how that instrument is classified (that is, whether equity or debt) in the issuer's statement of financial position
- c. U.S. Treasury securities
- d. U.S. government agency securities
- e. Municipal securities
- f. Corporate bonds
- g. Convertible debt
- h. Commercial paper
- i. All securitized debt instruments, such as collateralized mortgage obligations and real estate mortgage investment conduits
- j. Interest-only and principal-only strips.

The term debt security excludes all of the following:

- a. Option contracts
- b. Financial futures contracts
- c. Forward contracts
- d. Lease contracts
- e. Receivables that do not meet the definition of security and, so, are not debt securities (unless they have been securitized, in which case they would meet the definition of a security), for example:
 1. Trade accounts receivable arising from sales on credit by industrial or commercial entities

2. Loans receivable arising from consumer, commercial, and real estate lending activities of financial institutions.

Therefore, the scope of FASB ASC 310-30 includes acquired loans that are accounted for as debt securities.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.10 Scope Part II: Instruments Accounted for as Debt Securities Under FASB ASC 310-30

Inquiry—Some types of instruments are measured like debt securities. In accordance with the guidance of FASB ASC 310-30 and considering expected cash flows for instruments measured like debt securities, when does the investor follow the guidance of paragraphs 8–9 of FASB ASC 310-30-35 (loans accounted for as debt securities) or paragraphs 10–11 of FASB ASC 310-30-35 (loans not accounted for as debt securities)?

Reply—FASB ASC 860-20-35-2 provides an example of instruments that are measured like debt securities:

Financial assets, except for instruments that are within the scope of Subtopic 815-10, that can contractually be prepaid or otherwise settled in such a way that the holder would not recover substantially all of its recorded investment shall be subsequently measured like investments in debt securities classified as available for sale or trading under Topic 320. Examples of such financial assets include, but are not limited to, interest-only strips, other beneficial interests, loans, or other receivables.

For these types of instruments measured like debt securities, investors should follow the impairment guidance in paragraphs 8–9 of FASB ASC 310-30-35 (loans accounted for as debt securities) unless the asset is otherwise excluded according to FASB ASC 310-30-15.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC; Revised, April 2014, to reflect conforming changes necessary due to revisions to FASB ASC.]

.11 Determining Evidence of Significant Delays and Shortfalls Relative to FASB ASC 310-30

Inquiry—FASB ASC 310-30-15-8 states that “investors shall consider the significance of delays and shortfalls for a loan so FASB ASC 310-30 is not applied in evaluating payment collectability when such delays and shortfalls are insignificant with regard to the contractually required payments.” How might that assessment be determined?

Reply—That assessment will likely be based on individual facts and circumstances and should be guided by an accounting policy adopted and applied consistently by the investor. For instance a percentage could be established to indicate an “insignificant” shortfall and for those items that meet the percentage shortfall, the dollar shortfall itself would be evaluated as to whether it is insignificant in the aggregate.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.12 Determining Evidence of Deterioration of Credit Quality and Probability of Contractual Payment Deficiency in Accordance With FASB ASC 310-30

Inquiry—In accordance with FASB ASC 310-30, how can an investor identify loans that have evidence of deterioration of credit quality and for which it is probable that the investor will be unable to collect all contractually required payments receivable so that they can identify whether the loans are in the scope of FASB ASC 310-30?

Reply—There are several things to consider when determining whether certain loans are within the scope of FASB ASC 310-30. An investor may set policies, including thresholds based on the type of loan product. Commercial loans are generally classified or graded into risk categories as part of an ongoing credit review process. An investor may identify commercial loans with evidence of deterioration using the previous owner's record of changes in classification and accrual status. Such records may also provide evidence concerning whether it is probable that the investor will be unable to collect all contractually required payments receivable. In contrast, consumer loans are generally not individually reviewed or graded and non-accrual and charge-off policies vary by product. For instance, some types of consumer loans are immediately charged-off when the loan is a certain number of days past due and may never be classified as non-accrual. As a result, indicators of credit quality deterioration for consumer products may vary depending on the product and may include non-accrual classification, past due status, or FICO score and changes therein. For debt securities, investors may establish other criteria to determine when securities should be considered for review for application under FASB ASC 310-30; for example, downgrades in credit grade categories.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.13 Non-Accrual Loans Part I: Acquired Non-Accrual Loans Under FASB ASC 310-30

Inquiry—Does an acquired loan (purchased individually or as part of a business combination) that was classified by the seller as non-accrual fall within the scope of FASB ASC 310-30?

Reply—Non-accrual status may be an indicator that a loan that meets the criteria of FASB ASC 310-30. However, the investor should analyze whether the loan meets all the scope criteria in FASB ASC 310-30-15, including evidence of credit deterioration. Classification of a loan as non-accrual by the seller and/or investor does not provide an exemption from FASB ASC 310-30. FASB ASC 310-30 does not prohibit carrying acquired loans on non-accrual status, when appropriate. However, certain disclosures are required for such loans in accordance with FASB ASC 310-30-50-2(a)(4).

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.14 Non-Accrual Loans Part II: Consumer Loans on Non-Accrual Status Under FASB ASC 310-30

Inquiry—Should FASB ASC 310-30 be applied to non-accrual (for example, 90 days past due) consumer loans that are reported as non-performing loans when such loans may be charged off completely in relatively short order (that is, after 120 days)?

Reply—Yes. FASB ASC 310-30 is applicable to all loans within its scope, including non-accrual loans. The accrual accounting specified in FASB ASC 310-30 should be applied if the investor is able to estimate expected cash flows,

including cash flows resulting from foreclosure and other collection efforts. However, when the investor does not have the ability to reasonably estimate cash flows, FASB ASC 310-30 does not prohibit carrying loans on non-accrual. Also, investors should note there are additional disclosure requirements for these circumstances.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.15 Loans Held for Sale in Accordance With FASB ASC 310-30

Inquiry—Why are only mortgage loans held for sale and not all loans held for sale excluded from the scope of FASB ASC 310-30?

Reply—Only mortgage loans held for sale that are accounted for under FASB ASC 948, *Financial Services—Mortgage Banking*, are excluded from the scope because FASB ASC 948 had to provide an exception.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.16 Treatment of Commercial Revolving Loans Under FASB ASC 310-30

Inquiry—FASB ASC 310-30-15-2(f) excludes revolving credit agreements from its scope specifically noting as examples two types of consumer revolving agreements, credit cards and home equity loans. *Revolving privilege* is defined in the FASB ASC glossary as “a feature in a loan that provides the borrower with the option to make multiple borrowings up to a specified maximum amount, to repay portions of previous borrowings, and then to reborrow under the same loan.” Are commercial revolving loans also excluded from the scope of FASB ASC 310-30?

Reply—Commercial revolving loans should be treated the same as consumer revolving loans. Thus, commercial revolving loans are excluded as well, if the borrower has revolving privileges at the acquisition date.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.17 Application of FASB ASC 310-30

Inquiry—The scope of FASB ASC 310-30 excludes loans that are retained (transferor’s beneficial) interests. How does the scope of FASB ASC 310-30 relate to the scope of FASB ASC 325-40?

Reply—Accounting for retained interests should follow FASB ASC 325-40 and for purchased interests should follow FASB ASC 310-30 if they meet the scope criteria in FASB ASC 310-30-15.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.18 Loans Reacquired Under Recourse Under FASB ASC 310-30

Inquiry—If a loan that was transferred with recourse and qualified for accounting as a sale under FASB ASC 860, *Transfers and Servicing*, is subsequently repurchased under the recourse provision, is it within the scope of FASB ASC 310-30?

Reply—Yes, if it meets the criteria in FASB ASC 310-30-15 related to credit quality. Except for purchases triggered by initial representations and warranty deficiencies, it is likely that the repurchased loan would meet the criteria to be included in the scope of FASB ASC 310-30. FASB ASC 310-30 includes guidance

on the evidence of credit deterioration. (See TIS section 2130.11, “Determining Evidence of Significant Delays and Shortfalls Relative to FASB ASC 310-30.”)

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.19 Acquired Loans Where Purchase Price Is Greater Than Fair Value Under FASB ASC 310-30

Inquiry—If the fair value of a purchased loan is less than the purchase price because a loan is repurchased under a recourse provision, does FASB ASC 310-30 permit recording the loan at the purchase price?

Reply—If a loan meets the criteria of FASB ASC 310-30-15 such that it is in the scope of FASB ASC 310-30 and the seller repurchases the asset at a price that is more than fair value, the seller should record the asset at its fair value and record a loss for the difference between the price paid and the fair value, if not already recognized. An allowance for loan losses to offset recording the loan at the purchase price should not be recorded. In most cases, if the loan had previously been transferred with recourse, the seller should already have recognized an associated liability for the recourse obligation in accordance with FASB ASC 450, *Contingencies*, and FASB ASC 860, *Transfers and Servicing*, as well as FASB ASC 460, *Guarantees*.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.20 Acquired Loans Where Purchase Price Is Less Than Fair Value Under FASB ASC 310-30

Inquiry—In accordance with FASB ASC 310-30, if the fair value of a purchased loan is more than the purchase price because a loan is acquired (for example, as part of a clean up call) should the seller record a gain?

Reply—No. There may be instances where the seller is required or has an option to re-purchase an asset at a price that is less than fair value. In that situation and if the loan is within the scope of FASB ASC 310-30, the investor should record the asset at the purchase price and the excess of expected cash flows over the initial investment should be recognized as the yield under FASB ASC 310-30.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.21 Accounting for Loans With Cash Flow Shortfalls That Are Insignificant Under FASB ASC 310-30

Inquiry—Related to FASB ASC 310-30-15-8, an investor might establish a policy that a shortfall in contractually required payments below a certain amount or percentage is insignificant and thus, certain acquired loans would not be in the scope of FASB ASC 310-30. For loans with shortfalls in payments of less than the established threshold, how should those discounts be accreted into income as a yield adjustment?

Reply—If a loan is not in the scope of FASB ASC 310-30, then FASB ASC 310-20 applies, and FASB ASC 310-20-35-15 requires that the entire discount be accreted to income over the life of the loan.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

[.22] Reserved**.23 Carrying Over the Allowance for Loan and Lease Losses (ALLL) Under FASB ASC 310-30 (Part II)**

Inquiry—Are there any recommendations on calculating allowance ratios relating to loans in the scope of FASB ASC 310-30?

Reply—Although the nonaccretable difference is akin to an ALLL because it represents amounts that are not expected to be collected, it should not be included in the ALLL or ALLL ratios. The only time there is any ALLL for the loans within the scope of FASB ASC 310-30 is when the expected cash flows have decreased after acquisition and a loss is recognized by the investor. In other words, at the purchase date, for loans within the scope of FASB ASC 310-30, the allowance-to-loans ratio is always zero. The investor may wish to disclose in the notes to the financials the amount of the nonaccretable difference so that the readers understand by how much the loans have already been “written down.”

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

[.24] Reserved**.25 Income Recognition for Non-Accrual Loans Acquired Under FASB ASC 310-30 (Part I)**

Inquiry—What is the accounting for a purchased loan that was classified by the previous owner as non-accrual and for which cash flows cannot be reasonably estimated under FASB ASC 310-30?

Reply—FASB ASC 310-30 does not prohibit placing (or keeping) loans on non-accrual. At inception or thereafter the investor may place a loan on non-accrual, if the conditions in FASB ASC 310-30-35-3 are met. FASB ASC 310-30-50-2(a)(4) requires certain disclosures for purchases of non-accrual loans.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.26 Income Recognition for Non-Accrual Loans Acquired Under FASB ASC 310-30 (Part II)

Inquiry—A loan is classified as non-accrual by a seller because the debtor is not meeting its obligations under the loan’s contractual terms. That loan is sold to an investor who determines that the loan meets the requirements of FASB ASC 310-30. If the investor can reasonably estimate cash flows, should the investor classify the loan as an accruing loan?

Reply—Yes, if the investor can reasonably estimate cash flows, it should recognize an accretable yield and the loan is an accruing loan as discussed in FASB ASC 310-30-35-3.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.27 Income Recognition for Non-Accrual Loans Acquired Under FASB ASC 310-30 (Part III)

Inquiry—Assuming the investor followed the cost recovery method on a loan, and assuming the loan was brought current for a period of time, could the investor return the loan to accrual status and account for the loan as a new loan?

Reply—If the loan was within the scope of FASB ASC 310-30 when it was purchased, it is not accounted for as a new loan but is always under the requirements of FASB ASC 310-30, even if the loan's performance improves. However, as discussed in TIS section 2130.26, the loan should be accruing income whenever the investor is able to reasonably estimate cash flows. Also, if the currently expected cash flows exceed the originally expected cash flows, the guidance in paragraphs 8–11 of FASB ASC 310-30-35 should be applied, which may result in recognizing income at a higher yield than originally expected.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.28 Estimating Cash Flows Under FASB ASC 310-30

Inquiry—In accordance with the guidance in FASB ASC 310-30, how often should an investor reassess the cash flows expected to be collected?

Reply—Investors should reassess expected cash flows at the end of each reporting period. Thus, for entities that prepare quarterly GAAP-basis financial statements, it is expected that cash flows will be re-assessed at least quarterly.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.29 Implications of FASB ASC 310-20-35-11 With a Restructured or Refinanced Loan Under FASB ASC 310-30 (Part I)

Inquiry—Can a loan that meets the requirements of FASB ASC 310-20-35-11 be removed from the scope of FASB ASC 310-30? If a loan is within the scope of FASB ASC 310-30 and there are modifications to that loan, should the guidance in FASB ASC 310-20-35-11 apply?

Reply—No. FASB ASC 310-20-35-11 only applies to loans that are not within the scope of FASB ASC 310-30. The point of FASB ASC 310-30-35-13 is that a loan stays in the scope of FASB ASC 310-30, regardless of restructuring or refinancing, except for a troubled debt restructuring.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.30 Implications of FASB ASC 310-20-35-11 With a Restructured or Refinanced Loan Under FASB ASC 310-30 (Part II)

Inquiry—Can a loan that has been extinguished in accordance with FASB ASC 310-20-35-11 and given a new loan number, with new terms, but which has not been paid off, be accounted for as a new loan under the guidance in FASB ASC 310-30? What steps could the investor and borrower take to permit the loan to be accounted for as a new loan?

Reply—A loan within the scope of FASB ASC 310-30 can never be accounted for as a new loan, except through a troubled debt restructuring in accordance with FASB ASC 310-40.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.31 Variable Rate Loans and Changes in Cash Flows and FASB ASC 310-30

Inquiry—In accordance with the guidance in FASB ASC 310-30, should an investor in variable rate loans determine the cause of a decrease in expected cash flows?

Reply—Yes. To the extent that the investor can directly attribute a decrease in expected cash flows to a decrease in the contractual interest rate, the investor should reduce the yield recognized in income on a prospective basis. However, if the investor is not able to directly attribute the decrease in expected cash flows to a decrease in the contractual interest rate (for example, because the change in the index or rate has no direct effect on the cash flows available to the borrower to service the loan or because the change in the index or rate had no direct effect on expected cash flows that relate to the value of the collateral) the investor should immediately recognize any decrease in expected cash flows as an impairment, not over time as reduced yield.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.32 Pool Accounting Under FASB ASC 310-30 (Part I)

Inquiry—In accordance with the guidance in FASB ASC 310-30, if a loan is removed from a pool, how is the specific carrying amount of a loan determined?

Reply—As discussed in FASB ASC 310-30-40-1, once a pool has been assembled the integrity of the pool should be maintained. If the loan is removed under the specific criteria in FASB ASC 310-30-40-1, it should be removed at its carrying amount. In some cases the cash flows of the pool will have been estimated for the pool as a whole such that there is no specific information on the carrying amount and cash flows related to any particular loan. In that case, an allocation of carrying amount to the loan on a pro rata basis is an appropriate way to achieve the goal of not impacting the accounting for the remaining pool. In other cases, the cash flows of the pool may have been built up as the sum of cash flows of individual loans and there is specific information related to the loan being removed. In that case, the carrying amount is allocated on the basis of the specific information for the loan removed. In either case, the goal remains the same—that is, to not have a removal event result in either impairment or an increase in yield for the remaining pool.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.33 Pool Accounting Under FASB ASC 310-30 (Part II)

Inquiry—Alternatively, and related to TIS section 2130.32, should the loan be removed at its initial fair value in accordance with the guidance in FASB ASC 310-30?

Reply—Generally, no. Removing a loan at its initial fair value, unless done very shortly after acquisition of the loan and creation of the pool, would likely result in a change in the effective yield of the remaining pool and the stated intent of FASB ASC 310-30 is that removing a loan from a pool should not result in such a change.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.34 Application to Fees Expected to Be Collected Under FASB ASC 310-30

Inquiry—In accordance with the guidance in FASB ASC 310-30, should fees be included in “expected cash flows?” The FASB ASC glossary definition for *cash flows expected at acquisition* includes “principal, interest and other cash flows expected to be collected.” Does FASB ASC 310-30 address late fees and other fees?

Reply—“Other cash flows expected to be collected” includes all fees. If late fees are expected to be collected and are contractual, the investor should include them in total contractual cash flows and expected cash flows for purposes of calculating yield and making disclosures. If late fees are contractual but not expected to be collected, the investor should exclude late fees from contractual cash flows and disclose that accounting policy (if it is considered material).

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.35 Application to Cash Flows From Collateral and Other Sources Under FASB ASC 310-30

Inquiry—In accordance with the guidance in FASB ASC 310-30, should cash expected to be received from the ownership and sale of assets taken in settlement of loans be included in “other cash flows expected to be collected?”

Reply—Cash flows expected at acquisition includes all cash flows directly related to the acquired loan, including those expected from collateral. Although yield is measured on this basis under FASB ASC 310-30 for the loan prior to foreclosure, an asset received by the investor in full or partial settlement of a loan should be accounted for in accordance with paragraphs 2–4 of FASB ASC 310-40-40.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.36 Impact on Cash Flows on a Group of Loans Accounted for as a Pool in Accordance With FASB ASC 310-30 if There Is a Confirming Event, and One Loan Is Removed as Expected

Inquiry—FASB ASC 310-30-15-6 states that investors may aggregate loans acquired in the same fiscal quarter that have common risk characteristics and thereby use a composite interest rate and expectation of cash flows expected to be collected for the pool. FASB ASC 310-30-40-1 states that once the pool is assembled, the integrity of the pool should be maintained. What is the impact on the accounting for a group of loans accounted for as a pool, if there is a confirming event, and one loan is removed from the pool as expected?

Reply—The following is an example of the impact on the accounting for a pool of loans, if there is a confirming event, and one loan is removed as expected.

FASB ASC 310-30 Example

Group of Loans

Example 1—Confirming Event, One Loan Is Removed From Pool, as Expected

Facts: The investor purchases 10 loans that individually meet the scope of FASB ASC 310-30 for \$800. Based on the aggregation criteria, the investor assembles the loans into a pool. The investor initially expects to collect \$929.29 in cash flows (which generates a yield of approximately 5.387 percent over 3 years). The investor recognizes one month of yield income. The investor then receives notification that one obligor has become bankrupt and that it will make no further payments on its loan. The investor concludes that event is in accordance with the original expectation of cash flows. That is, the investor continues to expect that it will collect \$929.29 from the pool of loans. The investor removes the contractual cash flows from that loan and an equal amount of nonaccretable difference, in the amount of \$117.42, from the pool such that the yield is unaffected. This TPA does not address charge-offs.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.37 Impact on Cash Flows on a Group of Loans Accounted for as a Pool in Accordance With FASB ASC 310-30 if There Is a Confirming Event, One Loan Is Removed From the Pool, and the Investor Decreases Its Estimate of Expected Cash Flows

Inquiry—FASB ASC 310-30-15-6 states that investors may aggregate loans acquired in the same fiscal quarter that have common risk characteristics and thereby use a composite interest rate and expectation of cash flows expected to be collected for the pool. FASB ASC 310-30-40-1 states that once the pool is assembled, the integrity of the pool should be maintained. What is the impact on the on the accounting for a group of loans accounted for as a pool, if there is a confirming event, one loan is removed from the pool, and the investor decreases its estimate of expected cash flows?

Reply—The following is an example of the impact on the accounting for a group of loans accounted for as a pool, if there is a confirming event, one loan is removed from the pool, and the investor decreases its estimate of expected cash flows:

FASB ASC 310-30 Example

Group of Loans

Example 2—Confirming Event, One Loan Is Removed From Pool, and Investor Decreases Estimate of Expected Cash Flows From Pool

Facts: The investor purchases 10 loans that individually meet the scope of FASB ASC 310-30 for \$800. Based on the aggregation criteria, the investor assembles the loans into a pool. The investor initially expects to collect \$929.29 in cash flows (which generates a yield of approximately 5.387 percent over 3 years). The investor recognizes one month of yield income. The investor then receives notification that one that one obligor has become bankrupt and that it will make no further payments on its loan. The investor concludes that the expected cash flows from the pool are decreased by \$90.35, which has a present value at 5.387 percent of \$78.09. The investor records a provision of \$78.09, increasing the loan loss allowance by \$78.09. In addition, the investor removes the contractual cash flows from that loan and an equal amount of nonaccretable discount, in the amount of \$117.42, from the pool such that the yield is unaffected. This TPA does not address charge-offs.

	Original Purchase	Accrue Income	Receive Payment	Decrease in Expected Cash Flows		Removal of Loan		Balance
				Balance	Balance	Balance	Balance	
Contractual Cash Flows	1,200.00		(25.81)	1,174.19	1,174.19	(117.42)	1,056.77	
Nonaccretable Difference	(270.71)			(270.71)	(282.97)	117.42	(165.55)	
Expected Cash Flows	929.29		(25.81)	903.48	(12.26)	0.00	891.22	
Accretable Yield	(129.29)	6.67		(122.62)	12.26	0.00	(110.36)	
Recorded Amount	800.00	6.67	(25.81)	780.86	0.00	0.00	780.86

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.38 Certificates of Deposit and FASB ASC 820, *Fair Value Measurements and Disclosures*

Inquiry—Are certificates of deposit within the scope of the disclosure requirements of FASB ASC 820, *Fair Value Measurements and Disclosures*?

Reply—Generally not. Certificates of deposit that meet the definition of a security in FASB ASC 320, *Investments—Debt and Equity Securities*, are subject to the disclosure requirements of FASB ASC 820-10-50; those that do not meet the definition are not subject to those disclosure requirements. FASB ASC 320-10-20 defines a *security* as:

A share, participation, or other interest in property or in an entity of the issuer or an obligation of the issuer that has all of the following characteristics:

- a. It is either represented by an instrument issued in bearer or registered form or, if not represented by an instrument, is registered in books maintained to record transfers by or on behalf of the issuer.
- b. It is of a type commonly dealt in on securities exchanges or markets or, when represented by an instrument, is commonly recognized in any area in which it is issued or dealt in as a medium for investment.
- c. It either is one of a class or series or by its terms is divisible into a class or series of shares, participations, interests, or obligations.

Most certificates of deposit would not meet that definition. However, some negotiable certificates of deposit may meet the definition of a security and, therefore, may be subject to the disclosure requirements of FASB ASC 820-10-50 if they are not classified as held to maturity.

[Issue Date: May 2010.]

.39 Balance Sheet Classification of Certificates of Deposit

Inquiry—Where should a certificate of deposit be classified on the balance sheet?

Reply—Certificates of deposit with original maturities of 90 days or less are commonly considered “cash and cash equivalents” under FASB ASC 305. A certificate of deposit with an original maturity greater than 90 days would not be included in cash and cash equivalents. If the certificate of deposit is not a security, as defined in FASB ASC 320, it could be included in “investments—other.”

The following is an example of a policies and procedures note disclosure:

Investments—Other

Certificates of deposit held for investment that are not debt securities are included in “investments—other.” Certificates of deposit with original maturities greater than three months and remaining maturities less than one year are classified as “short-term investments—other.” Certificates of deposit with remaining maturities greater than one year are classified as “long-term investments—other.”

[Issue Date: May 2010.]

.40 Certificates of Deposit and FASB ASC 320

Inquiry—Are certificates of deposit within the scope of FASB ASC 320?

Reply—Generally not. FASB ASC 320-10-20 defines a *security* as:

A share, participation, or other interest in property or in an entity of the issuer or an obligation of the issuer that has all of the following characteristics:

- a. It is either represented by an instrument issued in bearer or registered form or, if not represented by an instrument, is registered in books maintained to record transfers by or on behalf of the issuer.
- b. It is of a type commonly dealt in on securities exchanges or markets or, when represented by an instrument, is commonly recognized in any area in which it is issued or dealt in as a medium for investment.
- c. It either is one of a class or series or by its terms is divisible into a class or series of shares, participations, interests, or obligations.

Most certificates of deposit would not meet that definition. Certain negotiable certificates of deposit, however, may meet the definition of a security and, therefore, may be subject to FASB ASC 320.

[Issue Date: May 2010.]

[The next page is 861.]

Section 2140

Inventories

.01 Warehousing Included in Cost of Inventory

Inquiry—A client deals in wholesaling and retailing automotive tires for foreign cars. Most of the inventory is imported, and it is valued on the company's records at the actual inventory cost plus freight-in. At year-end, the warehousing costs are prorated over cost of goods sold and ending inventory. The company's auditor believes the warehousing costs should not be capitalized to inventory, but the entire amount should be expensed in the year the costs are incurred. Are warehousing costs considered to be product costs or period costs?

Reply—Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 330-10-30-1 states, in part:

As applied to inventories, cost means in principle the sum of the applicable expenditures and charges directly or indirectly incurred in bringing an article to its existing condition and location.

Kieso and Weygandt, *Intermediate Accounting*, 9th Edition states:

Product costs are those costs that "attach" to the inventory and are recorded in the inventory accounts. These costs are directly connected with the bringing of goods to the place of business of the buyer and converting such goods to a saleable condition. Such charges would include freight charges on goods purchased, other direct costs of acquisition and labor, and other production costs incurred in processing the goods up to the time of sale. It would seem proper also, to allocate to inventories a share of any buying costs or expenses of a purchasing department, storage costs, and other costs incurred in storing or handling goods before they are sold (i.e., warehousing costs). Because of the practical difficulties involved in allocating such costs and expenses, however these items are not ordinarily included in valuing inventories.

Costs of delivering the goods from the warehouse would be considered a selling expense and should not be allocated to the goods that are still in the warehouse.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.02 Obsolete Items in Inventory—I

Inquiry—A client purchased in bulk various inventories of stock material. This material is used to produce various specialized parts used in electronic equipment. The bulk purchase took place some eighteen months ago, and less than ten percent of these inventories have been used. The client claims that there may be some obsolete stock on hand from this bulk purchase, but an eighteen month period is not enough time to effectively determine the complete degree of obsolescence because the highly specialized nature of the product line may not lead to renewed orders until periods beyond one or more operating cycles. Based on the information available to the client, about one-third of the original bulk purchase will be written off because of obsolescence. For the remaining inventories, the client will present a representation letter indicating that he or she believes the remaining inventory not to be obsolete.

There may be more obsolete inventory than the client is willing to admit. The poor turnover of such items is the chief reason for concern. Pricing the inventory at the lower of cost or market will be difficult. The nature of the inventory (many small items at low unit cost) and its poor turnover make obtaining market prices difficult.

What is the responsibility of auditors, not being inventory experts, in determining the extent of obsolescence?

Reply—Paragraphs .11 and .A25 of AU-C section 501, *Audit Evidence—Specific Considerations for Selected Items* (AICPA, *Professional Standards*), address the auditor's responsibility to obtain sufficient appropriate audit evidence regarding the condition of inventory, which includes identifying obsolete, damaged or aging inventory. This audit evidence might include the opinion of other experts, for example an electronics engineer, with respect to the quality of the inventories in this case.

Over the eighteen-month period since the inventories were purchased, less than ten percent have been utilized. Such a usage rate indicates that the client has close to an estimated fifteen year supply of these inventories. This would indicate that little or no value should be assigned to these inventories.

[Revised, May 2007; Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

[.03] Reserved

.04 Airplanes Chartered While Held for Sale

Inquiry—A company purchases airplanes for sale to others. However, until they are sold, the company charters and services the planes. What would be the proper way to report these airplanes in the company's financial statements?

Reply—The primary use of the airplanes should determine their treatment on the balance sheet. Since the airplanes are held primarily for sale, and chartering is only a temporary use, the airplanes should be classified as current assets. However, depreciation would not be appropriate if the planes are considered inventory. Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) glossary states, in part, that the term inventory “excludes long-term assets subject to depreciation accounting, or goods which, when put into use, will be so classified.”

If the use period were to exceed one year, reclassification to fixed assets and recognition of depreciation expense would be appropriate under generally accepted accounting principles (GAAP).

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

[.05] Reserved

.06 Inventory of Meat Packer

Inquiry—A client engaged in the meat packing business uses the “National Provisioner Daily Market Service” quotations in valuing its inventories. The client contends that these quotations, adjusted for freight differentials, reflect an accurate approximation of actual costs and, in lieu of a complete cost accounting system, should be considered as cost for inventory valuation. Is this method of inventory valuation acceptable for meat packers?

Reply—Meat packing companies generally value their work in process and finished goods inventories at market price less cost to bring to market in accordance with Financial Accounting Standards Board (FASB) *Accounting*

Standards Codification (ASC) 330, *Inventory*. Live animals and whole carcasses are carried at lower of cost or market. Many companies use quoted costs such as the National Provisioner quotations which are estimated costs of producing a particular cut of meat adjusted for the fluctuating daily livestock prices and other factors. These quoted prices must be further adjusted by the individual meat packers to take into account individual factors such as freight and storage.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

[.07] Reserved

.08 Valuing Precious Metals Inventory Used in Manufacturing Applications

Inquiry—Should inventories of precious metals used in manufacturing applications (for example, diamonds used in drill bits, plutonium or uranium used in steel fabrication, or titanium used in paint manufacturing) be valued at market or at the lower of cost or market?

Reply—These inventories should be valued at the lower of cost or market in accordance with Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 330-10-35-2. The excess of market value over cost may be disclosed.

The exception to “lower of cost or market” that allows precious metals to be recorded at market on the balance sheet does not apply to these industrial applications because the metals will be used in the manufacturing process rather than held for immediate sale and do not meet the other conditions specified in FASB ASC 330-10-35-15, which states:

Only in exceptional cases may inventories properly be stated above cost. For example, precious metals having a fixed monetary value with no substantial cost of marketing may be stated at such monetary value; any other exceptions must be justifiable by inability to determine appropriate approximate costs, immediate marketability at quoted market price, and the characteristic of unit interchangeability.

FASB ASC 330-10-50-3 further states:

Where goods are stated above cost, this fact shall be fully disclosed.

[Amended, June 1995; Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.09 Standard Cost for Inventory Valuation

Inquiry—A client uses standard costs for valuing inventory. What disclosure is necessary in the financial statements regarding inventory valuation?

Reply—Ordinarily, standard costs should be adjusted to a figure which approximates the lower of cost or market. If this is done, then it is appropriate to use standard costs for financial reporting purposes. This is usually the case where standards are currently and frequently adjusted.

Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 330-10-30-13 states:

Standard costs are acceptable if adjusted at reasonable intervals to reflect current conditions so that at the balance sheet date standard costs reasonably approximate costs computed under one of the recognized bases. In such cases descriptive language shall be used which will express this relationship, as, for instance, “approximate costs determined on the first-in first-out basis,” or, if it is desired to mention standard costs, “at standard costs, approximating average costs.”

Accordingly, if in this particular case standard costs do in fact approximate the lower of cost or market, then disclosure along the lines indicated in the above reference is adequate.

On the other hand, if the difference between standard costs and the lower of cost or market is material, then mere footnote disclosure will not cure the known statement imperfection.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

[.10] Reserved

.11 Average Cost Method for Subsidiary

Inquiry—Company A and all of its subsidiaries, except one, determine the cost of inventories by the last-in, first-out method (LIFO). The one subsidiary uses an average cost method. Is the average cost method acceptable for determining the cost of inventory? Is it acceptable for one subsidiary to use the average cost method and Company A and the other subsidiaries to use the LIFO method?

Reply—The average cost method is an acceptable method for determining the cost of inventory. An entity may use more than one method to determine the cost of inventory provided the methods are disclosed.

.12 Classification of Replacement Parts Under a Maintenance Agreement

Inquiry—Company A has entered into a maintenance agreement with Company B, an unrelated party, to provide maintenance and service for specialized computer equipment leased by Company B to third parties. The maintenance contract between A and B requires that A maintain a spare/replacement parts inventory for the equipment. Company A has no use for these parts other than to fulfill the obligation under its contract with Company B. The term of the contract between Company A and Company B is for several years.

Most of the spare parts (i.e., circuit boards) are of a repairable nature, and it is expected that as A replaces a part, A will have the removed part refurbished, at its own cost. The refurbished parts will be available for future use as necessary.

Should Company A classify the refurbished replacement parts as inventory? Should Company A's investment in the parts be amortized?

Reply—Company A should classify the refurbished replacement parts as inventory. Inventory costs should not be amortized; a loss in their utility should be reflected as a charge against revenues of the period in which it occurs, as discussed in Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 330-10-35-2.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.13 Classification of Slow-Moving Inventory

Inquiry—A client, engaged in an oil field related industry, has slow-moving products that are not considered obsolete. The inventory is properly stated at the lower of cost or market. The client plans to continue selling the inventory on hand but will cease manufacturing the specialized product. Based on current sales estimates and demand for the product, it appears likely that the client will be able to sell all of the items in the inventory over a period of about four years. Is it correct to classify a portion of the slow-moving inventory as a long-term asset in the client's classified balance sheet?

Reply—The portion of the slow-moving inventory not reasonably expected to be realized in cash during the client's normal operating cycle should be classified as a long-term asset in the company's classified balance sheet. Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 310-10-45-9 states that the term *current assets* is used to designate cash and other assets or resources commonly identified as those that are reasonably expected to be realized in cash or sold or consumed during the normal operating cycle of the business.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.14 Disclosure of LIFO Reserve

Inquiry—Should a company using the last-in, first-out (LIFO) method of inventory valuation be required to disclose the LIFO reserve in its financial statements or in the accompanying footnotes?

Reply—Yes. The Accounting Standards Division Issues Paper, *Identification and Discussion of Certain Financial Accounting and Reporting Issues Concerning LIFO Inventories*, addresses this matter in section 2, paragraphs 24 through 28. Paragraph 28 indicates that the task force voted (9 yes, 0 no) that either the LIFO reserve or replacement cost and its basis for determination should be disclosed. Paragraph 26 states that the Securities and Exchange Commission (SEC) requires companies whose securities trade publicly to disclose this information [Regulation S-X, section 210.5-02.6(c)] and that many nonpublic companies also disclose this information.

[Amended, June 1995; Revised, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature.]

Section 2210

Fixed Assets

.01 Settlement of Mortgage Installment on Real Estate Between Buyer and Seller

Inquiry—A company purchased an office building subject to the seller’s assumable mortgage. The closing of the transaction occurred in the middle of a month which was between payment dates on the mortgage. The closing statement reflected a credit from the seller to the buyer for the interest that accrued on the mortgage from the last payment date until the date of the closing. How should this credit be accounted for by the buyer?

Reply—The buyer would treat the accrued interest credit as a reduction of interest expense for the first month of ownership. When the buyer makes the first interest payment after the closing, the credit will offset the full month’s interest paid and thus reduce the buyer’s net interest expense to the amount attributable to the period that the property was owned by the buyer.

[Amended, June 1995.]

.02 Broker’s Commission Received by Purchaser of Property as Purchase Price Concession

Inquiry—A corporation (“purchaser”) is engaged in negotiations to purchase real property. During the negotiations, the purchaser was unwilling to accept the seller’s best offer. To induce the purchaser to agree to the sale, the broker agreed to rebate a portion of the seller-paid commission to the purchaser.

Would this rebate be considered income to the purchaser or a reduction of the cost of the property acquired?

Reply—The “rebate” received from the broker should be accounted for as a reduction of the cost of the property rather than as income. Income should not be recognized on a purchase. The receipt of the rebate was part of the acquisition of the real estate and, when netted against the purchase price, reflects the amount the purchaser was willing to pay for the property.

[Amended, June 1995.]

[.04] Reserved

[.05] Reserved

.06 Valuation of Cattle Herd

Inquiry—A client, in the business of raising and selling cattle, has not been in business long enough to develop enough cost information to reliably value the cattle raised by them. Each cow costs \$2,000 or more and has an estimated salvage value of about \$300 at the end of its productive breeding life. The client has adopted a life of seven years for its breeding herd based on the various ages of the cows.

The client proposes to price the cattle raised as follows:

Purchased calves

When a cow is purchased with a “calf at side,” twenty percent of the purchase price is allocated to the calf. An additional \$50 is allocated to the calf

every six months for the first eighteen months. At eighteen months of age, the cows are considered mature enough for breeding and are then either sold or placed in the breeding herd and depreciated.

Raised calves

Since the mother is maintained principally for breeding and is expected to produce one calf each year, the calf birthed and raised is allocated one year's depreciation of the mother, plus \$50 at birth. An additional \$50 is allocated every six months for the first eighteen months.

The problem of valuing the cattle is compounded by the fact that cattle purchased for breeding and those purchased for sale are not separated, and any cow may be sold at any time. What improvements could be made in the pricing scheme, and how should the breeding herd and the herd held for sale be shown on the balance sheet?

Reply—Rather than setting an average breeding life of seven years for the breeding herd, it would appear more reasonable to set an estimated age at which a cow should be fully depreciated and to depreciate the cost of each cow over the remaining estimated years of life. Also, instead of allocating twenty percent of the purchase price of the cow to the calf “at side,” it would be better to determine the percent applicable to the calf on the basis of the number of expected additional calves for that cow.

In valuing the calves, if the \$50 figure is a reasonable estimate of six months of costs, the method seems reasonable. However, instead of allocating one year's depreciation of the mother plus \$50 at birth, it might be better to allocate only the depreciation plus the direct expenses of birth such as veterinarian's fees, etc.

Since it is difficult to determine which of the cattle are “inventory” and which are “fixed assets,” it might not be appropriate in this case to classify the assets and liabilities as current or long-term in the balance sheet.

.07 Costs of Ski Slopes and Lifts

Inquiry—A company has developed a piece of land into a skiing resort. The company has cut the trees, cleared and graded the land and hills, and constructed ski lifts and platter pulls.

Should the tree cutting, land clearing, and grading costs of constructing the ski slopes be capitalized to land? If so, are these costs amortizable?

Should the clearing and grading costs connected with the construction of the ski lifts and platter pulls be capitalized to this equipment and depreciated?

Reply—All expenditures incurred which are made for the purpose of making the land suitable for its intended use or purpose (whether that use be for the construction of a ski lodge, lifts, slopes, platter pulls, or other facilities) are properly capitalizable as land costs, and land is not subject to depreciation. During the course of clearing the land to make it useful for the purpose acquired, salable timber may be recovered, and since the clearing costs are capital items, amounts realized from the sale of the timber may properly be credited to the land account. Recurring maintenance of right-of-way (i.e., the slope and ski-lift areas) would be properly treated as a period cost.

.08 Restaurant Dishes and Silverware

Inquiry—Should a base stock inventory of silverware and dishes be shown on the balance sheet of a restaurant as a fixed asset? In the base stock method, the base stock is recorded at an unchanging amount and additions to the stock are charged to expenses for the period. Inasmuch as fixed assets are specific

items which are subject to depreciation (except land), and the base stock is an approximate figure for many items and is not depreciated, it would seem that the base stock should not be classified as a fixed asset.

Reply—Various publications recommending treatment for large stocks of short-lived, replaceable assets such as silverware and dishes indicate that the assets should be valued on the basis of physical inventories at year-end, with used equipment being valued at 50 percent of current cost, and unused equipment valued at full cost. This, in effect, assigns an average useful life of two years for the equipment. It is recommended that such assets be included in fixed assets.

The classification in the balance sheet should not depend upon the method of valuing the assets. Therefore, regardless of the method of valuation, the assets should be included in fixed assets. If the valuation differs materially from the depreciated cost of individual goods on hand at year-end, the presentation is not in accordance with generally accepted accounting principles.

.15 Capitalization of Cost of Dredging Log Pond

Inquiry—Corporation A operates a log pond and dredged the pond during the year at a cost of \$350,000. Thus, the useful life of the log pond was extended several years. Should the dredging cost be expensed or capitalized?

Reply—FASB Concept No. 6, *Elements of Financial Statements—a replacement of FASB Concepts Statement No. 3 (incorporating an amendment of FASB Concepts Statement No. 2)*, paragraph 149 states, in part, “. . . many assets yield their benefits to an entity over several periods . . . Expenses resulting from their use are normally allocated to the periods of their estimated useful lives (the periods over which they are expected to provide benefits) by a ‘systematic and rational’ allocation procedure, for example, by recognizing depreciation or other amortization.”

Since the dredging cost will benefit future periods, Corporation A should capitalize the cost and amortize it in a systematic and rational manner over the estimated period of benefit.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

[.16] **Reserved**

[.17] **Reserved**

.18 Revaluation of Assets

Inquiry—Company A acquired a material amount of treasury stock resulting in a stockholders’ equity deficit. Since state law (where Company A is incorporated) prohibits the impairment of legal capital, Company A revalued certain of its assets at fair market value. Should Company A record depreciation for the revalued assets based on historical cost or fair market value?

Reply—An opinion expressed on the financial statements of Company A should be qualified or adverse because the write-up of assets is a departure from generally accepted accounting principles.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

[.19] Reserved

.20 Compounding Capitalized Interest

Inquiry—Company A is constructing a building for its own use. The company capitalized interest cost on the average amount of accumulated expenditures for the asset during the current year end. The building was completed in the next year. Should the company capitalize interest on the average amount of expenditures for the assets that were made during the current period only or the average amount of accumulated expenditures for the asset during the period including the expenditures made in the prior period, which already includes capitalized interest cost?

Reply—Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 835-20-30-3 states, in part:

The amount capitalized in an accounting period shall be determined by applying the capitalization rate to the average amount of accumulated expenditures for the asset during the period.

FASB ASC 835-20-35-3 further states:

The compounding of capitalized interest is conceptually consistent with the conclusion that interest on expenditures for the asset is a cost of acquiring the asset.

Accordingly, the rate should be applied to the average of all the accumulated expenditures.

.25 Capitalization of Interest Costs Incurred by Subsidiary

Inquiry—A subsidiary with an asset qualifying for interest capitalization under Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 835, *Interest*, incurs its entire interest cost from a loan from its parent.

What is the extent of interest that may be appropriately capitalized?

Reply—FASB ASC 835-20-30-3 states, in part: “the amount capitalized in an accounting period shall be determined by applying the capitalization rate to the average amount of accumulated expenditures for the asset during the period.” FASB ASC 835-20-30-6 further states

The total amount of interest cost capitalized in an accounting period shall not exceed the total amount of interest cost incurred by the entity in that period. In consolidated financial statements, that limitation shall be applied by reference to the total amount of interest cost

incurred by the parent entity and consolidated subsidiaries on a consolidated basis. In any separately issued financial statements of a parent entity or a consolidated subsidiary and in the financial statements (whether separately issued or not) of unconsolidated subsidiaries and other investees accounted for by the equity method, the limitation shall be applied by reference to the total amount of interest cost (including interest on intra-entity borrowings) incurred by the separate entity.

Such financial statements should disclose related party transactions as required by FASB ASC 850, *Related Party Disclosures*.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

[.26] Reserved

.27 Construction of Asset—Foreign Currency Transaction Gains/Losses

Inquiry—A company is constructing a building in the United States for its own use. In order to finance the cost of the building, a loan denominated in a foreign currency is obtained from a bank in a foreign country. The company is appropriately capitalizing interest incurred as part of the cost of the building in accordance with Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 835, *Interest*. However, the company wants to also capitalize as part of the cost of the building any foreign currency transaction gains or losses it incurs as a result of the loan with the bank in the foreign country. The company's rationale is that the transaction gains or losses relate specifically to the building and therefore should be considered part of the cost of the building. Is this appropriate?

Reply—No. According to FASB ASC glossary, *foreign currency transactions* are transactions whose terms are denominated in a currency other than the entity's functional currency. Foreign currency transactions arise when a reporting entity does any of the following:

- a. Buys or sells on credit goods or services whose prices are denominated in foreign currency
- b. Borrows or lends funds and the amounts payable or receivable are denominated in foreign currency
- c. Is a party to an unperformed forward exchange contract
- d. For other reasons, acquires or disposes of assets, or incurs or settles liabilities denominated in foreign currency.

FASB ASC 830-20-05-2 states:

Foreign currency transactions may produce receivables or payables that are fixed in terms of the amount of foreign currency that will be received or paid.

FASB ASC 830-20-35-1 further states:

A change in exchange rates between the functional currency and the currency in which a transaction is denominated increases or decreases the expected amount of functional currency cash flows upon settlement of the transaction. That increase or decrease in expected functional currency cash flows is a foreign currency transaction gain or loss that generally shall be included in determining net income for the period in which the exchange rate changes.

Thus, even though the loan was obtained to construct the building, the transaction gains and losses are not part of the cost of the building, but are a result of the change in the exchange rate and are included in income each period in which the exchange rate fluctuates.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.28 Accounting for Certain Liquidated Damages

Inquiry—“Liquidated damages” represent contractual payments to a buyer of property, plant, and equipment (PP&E) for the nondelivery or noncompletion of construction of PP&E by a stated completion date. The amount is specified in advance by contract—for example, a stated amount per day of delay—rather than a computation of actual losses of the buyer caused by the delay. Liquidated damages are negotiated to represent compensation for a reasonable estimate of the buyer’s costs associated with a delay. Liquidated damages are specified in advance in order to eliminate the need for possibly contentious after-the-fact negotiations about actual costs incurred. How should a buyer of PP&E account for liquidated damages, as defined above?

Reply—Because the buyer does not provide the payer of the damages with an identifiable benefit in exchange for the payment, a buyer typically records liquidated damages as a reduction of the payments it has made to the vendor for the PP&E (that is, a reduction of the cost of the PP&E). Amounts of liquidated damages in excess of the total cost of PP&E would be recognized by the buyer as income.

The basis for this reply is Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 605-50. The underlying principle in FASB ASC 605-50 is that unless the customer provides the vendor with an identifiable benefit, the payment received from the vendor is a reduction of the purchase price of the goods purchased from the vendor—that is, a return of amounts paid.

Contracts between a buyer and provider of PP&E could be drafted in two ways—with a realistic completion date and contract price with liquidated damages for late delivery, or with a pessimistic completion date and a bargain contract price with a bonus for early delivery. The accounting for liquidated damages, as noted in this reply, results in the same accounting for the buyer regardless of how the contract is drafted.

Section 2220

Long-Term Investments

.01 Equity Method When Current Direct Ownership Less Than Twenty Percent

Inquiry—Company A purchased a 19 percent stock ownership interest in B. The company also made a loan to B that is convertible into stock of B and is secured by shares of C (B's subsidiary). For as long as the loan is outstanding, Company A will have several seats on B's board. The company also has options to purchase shares of C.

Is the company required to report its investment in B under the equity method?

Reply—Paragraphs 6 and 8 of Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 323-10-15 state that the ability to exercise the type of influence contemplated in FASB ASC 323, *Investments—Equity Method and Joint Ventures*, may be indicated in several ways such as representation on the board of directors and investment (direct or indirect) of 20 percent or more in the voting stock of an investee.

The company would own only 19 percent of the outstanding voting stock. Although it is not indicated whether the conversion feature of the loan may result in ownership of 20 percent or more, or whether the board seats would allow A to significantly influence the voting at meetings of B's board of directors, the overall impact of the proposed transaction could demonstrate that the company has the ability to exercise significant influence over the investee. Therefore, the equity method should be followed in accounting for the investment.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

[.02] Reserved

.03 Equity Method for Investee Following Completed Contract Method

Inquiry—A client, a contractor who follows the percentage of completion method for income recognition, has entered into a joint venture. The joint venture follows the completed contract method in its financial statements. The client accounts for his investment in the joint venture on the equity basis. May the client recognize his share of the venture's income (determined on the percentage of completion method) even though the venture will not recognize income until the contract is completed?

Reply—The FASB ASC glossary defines the terms *earnings or losses of an investee* and *financial position of an investee* as “net income (or net loss) of an investee determined in accordance with U.S. generally accepted accounting principles” and “financial position of an investee determined in accordance with U.S. generally accepted accounting principles,” respectively.

Both the completed contract method and the percentage of completion method are generally accepted, and the investor should not change the investee's method of accounting from completed contract to percentage of completion in applying the equity method. If the investee's financial statements are prepared on a comprehensive basis of accounting other than generally accepted accounting principles (GAAP), the investor should eliminate material variances

from GAAP in applying the equity method, in accordance with FASB ASC 970-323-35-20.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

[.04] Reserved

.05 Assuming Pro Rata Share of Venture's Revenues and Expenses

Inquiry—A company has entered into a joint venture with another venturer. Would it be permissible for the company to include in its income its pro rata share of each of the revenue and expense accounts of the venture?

Reply—FASB ASC 323-10-45-1 states:

Under the equity method, an investment in common stock shall be shown in the balance sheet of an investor as a single amount. Likewise, an investor's share of earnings or losses from its investment shall be shown in its income statement as a single amount except for the extraordinary items as specified in the following paragraph.

However, FASB ASC 810-10-45-14, relating to accounting for investments in unincorporated joint ventures states, in part:

If the investor-venturer owns an undivided interest in each asset and is proportionately liable for its share of each liability, the provisions of paragraph 323-10-45-1 may not apply in some industries. For example, in certain industries the investor-venturer may account in its financial statements for its *pro rata* share of the assets, liabilities, revenues, and expenses of the venture.

Guidance for transactions of this type relating to real estate can be found in FASB ASC 970-323-25-12 and FASB ASC 970-810-45-1.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

[.07] Reserved

.08 Acquisition of Subsidiaries by Exchange of Assets With No Book Value

Inquiry—A client, a computer services company, acquired 50 percent of the capital stock of a corporation in exchange for rights to computer programs. The cost of these programs had been expensed by the client. Another party acquired the remaining 50 percent of the stock for \$150,000. The client recorded this transaction as a debit to investments in subsidiaries and a credit to earnings of \$150,000.

A similar transaction, an exchange of rights to computer programs for capital stock with a stated value of \$200,000, occurred later. Investments in subsidiaries was debited and earnings was credited for \$200,000.

The subsidiaries are accounted for under the equity method.

Can the earnings recorded on the exchange of expensed computer programs for common stock be reflected in parent company financial statements, or do generally accepted accounting principles require elimination?

Reply—Intra-entity profit eliminations under the equity method is discussed in FASB ASC 323-10-35-8 and states, in part, "All intra-entity transactions are eliminated in consolidation under that Subtopic, but under the

equity method intra-entity profits or losses are normally eliminated only on assets still remaining on the books of an investor or an investee.”

FASB ASC 323 indicates that the intercompany gain (\$150,000 and \$200,000) recorded by the investor company would be eliminated under the equity method.

In the second case, measuring the value of the computer programs by the \$200,000 stated value of the stock may not be appropriate, and the auditor should try to satisfy himself concerning the estimated values assigned to the tangible and intangible assets contributed by the other stockholders. (See FASB ASC 323, FASB ASC 350, *Intangibles—Goodwill and Other*, and FASB ASC 805, *Business Combinations*.)

.12 Investor's Share of Losses in Excess of Its Investment

Inquiry—Company A's share of the losses of a real estate venture exceeds its investment in the venture. How should Company A account for its investment?

Reply—FASB ASC 970-323 recommends that the equity method be used to account for investments in corporate or noncorporate real estate ventures. Paragraphs 19–22 of FASB ASC 323-10-35 state, in part:

An investor's share of losses of an investee may equal or exceed the carrying amount of an investment accounted for by the equity method plus advances made by the investor. The investor ordinarily shall discontinue applying the equity method if the investment (and net advances) is reduced to zero and shall not provide for additional losses unless the investor has guaranteed obligations of the investee or is otherwise committed to provide further financial support for the investee. An investor shall, however, provide for additional losses if the imminent return to profitable operations by an investee appears to be assured. For example, a material, nonrecurring loss of an isolated nature may reduce an investment below zero even though the underlying profitable operating pattern of an investee is unimpaired. If the investee subsequently reports net income, the investor shall resume applying the equity method only after its share of that net income equals the share of net losses not recognized during the period the equity method was suspended.

Accordingly, the investor should reflect its investment at a zero amount and disclose in a note to the financial statements the amount of its share of investee losses in excess of the zero amount.

If the investor is committed to provide further financial support to the investee, the investor should show the excess of its share of investee losses over its investment and advances as a liability up to the amount of its commitment.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.13 A Change in Circumstances Using the Equity Method of Accounting for an Investment

Inquiry—An investor had guaranteed obligations of an investee and the investor's share of losses of this investee have exceeded the carrying amount of the investment on the investor's book in a prior year. This procedure is in accordance with paragraphs 19–22 of FASB ASC 323-10-35. In the current year, the investee fully paid the obligation which was guaranteed by the investor; accordingly, the investor will no longer guarantee the obligations of the investee and, therefore, will not record its share of the investee's losses.

- (1) Does this constitute a change of accounting principle?
- (2) How should the liability recorded on the investor's books be accounted for?

Reply—(1) This is not a change in accounting principle. According to FASB ASC 250-10-45-1, an "adoption or modification of an accounting principle necessitated by transactions or events that are clearly different in substance from those previously occurring" is not a change in accounting principle. The situation described is a change in circumstances and not a change in accounting principle.

(2) The liability recorded on the investor's books should be reversed in the current year and reported in the income statement with appropriate footnote disclosure.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

[.14] Reserved**.15 Accounting for Distribution From Joint Venture**

Inquiry—A corporation invests in a joint venture which is involved in real estate. The joint venture is a corporation and it is not controlled by the corporate investor. It accounts for this investment in accordance with FASB ASC 323. The joint venture incurred losses over the next few years. That resulted in the investment account on the corporation's books to decline to zero. At this point, the joint venture paid the corporation a cash distribution. How should the corporation account for this distribution?

Reply—FASB ASC 323 states that the investor ordinarily shall discontinue applying the equity method when the investment (and net advances) is reduced to zero and shall not provide for additional losses unless the investor has guaranteed obligations of the investee or is otherwise committed to provide financial support for the investee.

In this situation, the corporate investor in the joint venture should account for the cash distributions received as income if the distribution is not refundable by agreement or by law and the investor is not liable for the obligations of the joint venture and is not otherwise committed to provide financial support to the joint venture.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

[.16] Reserved**.17 Tax Basis Accounting—Use of Equity Method**

Inquiry—Can an investor who prepares its financial statements in accordance with U.S. GAAP use the equity method of accounting for an investment

in the common stock of an investee that presents its financial statements on the income tax basis of accounting if the investment would otherwise qualify for the equity method?

Reply—FASB ASC 323-10-35-4 states, in part:

Under the equity method, an investor shall recognize its share of the earnings or losses of an investee in the periods for which they are reported by the investee in its financial statements.

The FASB ASC glossary defines the term *earnings or losses of an investee* as the “net income (or net loss) of an investee determined in accordance with U.S. generally accepted accounting principles.”

If the investment qualifies for equity method accounting, the investor must adjust the investee’s tax basis financial statements to GAAP basis to determine its share of earnings or losses. If the adjustment cannot be determined, and the amounts are material, it would be considered a GAAP exception.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

Sections 2220.18–.27 are intended to assist reporting entities when implementing the provisions of FASB ASC 820, *Fair Value Measurements and Disclosures*, to estimate the fair value of their investments in certain entities that calculate net asset value. Sections 2220.18–.27 apply to investments that are required to be measured and reported at fair value and are within the scope of paragraphs 4–5 of FASB ASC 820-10-15.

.18 Applicability of Practical Expedient

Inquiry—Which investments are permitted, as a practical expedient, to be measured at fair value on the basis of the net asset value (NAV)?

Reply—FASB ASC 820-10-35-59 permits reporting entities, as a practical expedient, to estimate the fair value of their investments in certain entities that calculate NAV per share (or its equivalent) by using NAV. Such investments, which are often referred to as alternative investments, include interests in hedge funds, private equity funds, real estate funds, venture capital funds, commodity funds, offshore fund vehicles, and funds of funds, as well as some bank common/collective trust funds and other similar funds. Companies in various industries, including investment companies, broker-dealers, banks, insurance companies, employee benefit plans, healthcare organizations, and not-for-profit organizations, often invest in alternative investments.

[Issue Date: December 2009]

.19 Unit of Account

Inquiry—According to the FASB ASC glossary, the *unit of account* is “[t]hat which is being measured by reference to the level at which an asset or liability is aggregated (or disaggregated).” How should the unit of account be identified for an interest in an alternative investment?

Reply—For interests in alternative investments, the appropriate unit of account is the interest in the investee fund itself, not the underlying investments within the investee fund; this is because the reporting entity owns an undivided interest in the whole of the investee fund portfolio and typically lacks the ability to dispose of individual assets and liabilities in the investee fund portfolio. However, as discussed in FASB ASC 820-10-35-61, if it is probable at

the measurement date that a reporting entity will sell a portion of an investment at an amount different from NAV, and the criteria described in FASB ASC 820-10-35-62 are met, the portion that the reporting entity intends to sell is valued in accordance with other provisions of FASB ASC 820. The remaining portion of the interest that is not probable of being sold may be valued by using NAV as a practical expedient in accordance with FASB ASC 820-10-35-59.

[Issue Date: December 2009]

.20 Determining Whether NAV Is Calculated Consistent With FASB ASC 946, Financial Services—Investment Companies

Inquiry—FASB ASC 820-10-35-59 states:

A reporting entity is permitted, as a practical expedient, to estimate the fair value of an investment within the scope of paragraphs 820-10-15-4 through 15-5 using the net asset value per share (or its equivalent, such as member units or an ownership interest in partners' capital to which a proportionate share of net assets is attributed) of the investment, if the net asset value per share of the investment (or its equivalent) is calculated in a manner consistent with the measurement principles of Topic 946 as of the reporting entity's measurement date.

How does a reporting entity conclude that the NAV, as most recently reported by the manager of the alternative investment (reported NAV), has been calculated in a manner consistent with the measurement principles of FASB ASC 946, *Financial Services—Investment Companies*?

Reply—A reporting entity's management is responsible for the valuation assertions in its financial statements. Determining that reported NAV is calculated consistently with FASB ASC 946, including measurement of all or substantially all of the underlying investments of the investee in accordance with FASB ASC 820, requires a reporting entity to independently evaluate the fair value measurement process utilized by the investee fund manager to calculate the NAV. Such an evaluation is a matter of professional judgment and includes determining that the investee fund manager has an effective process and related internal controls in place to estimate the fair value of its investments that are included in the calculation of NAV. The reporting entity's controls used to evaluate the process of the investee fund manager may include the following:

- *Initial due diligence* (procedures performed before the initial investment)
- *Ongoing monitoring* (procedures performed after the initial investment)
- *Financial reporting controls* (procedures related to the accounting for, and reporting of, the investment) (Refer to the AICPA Audit Guide *Special Considerations in Auditing Financial Instruments* and the AICPA nonauthoritative practice aid *Alternative Investments—Audit Considerations* for examples of these controls.¹)

Before concluding that the reported NAV is calculated in a manner consistent with the measurement principles of FASB ASC 946, the reporting entity might evaluate the evidence that is gathered via the initial due diligence and ongoing monitoring of the investee fund. Only after considering all relevant factors can the reporting entity reach a conclusion about whether the reported NAV is

¹ The AICPA nonauthoritative practice aid *Alternative Investments—Audit Considerations* is available on the AICPA website at www.aicpa.org/InterestAreas/FRC/AuditAttest/Fieldwork/DownloadableDocuments/Alternative_Investments_Practice_Aid.pdf.

calculated in a manner consistent with the measurement principles of FASB ASC 946. For example, the reporting entity might consider the following key factors relating to the valuation received from the investee fund manager:

- The investee fund's fair value estimation processes and control environment, and any changes to those processes or the control environment²
- The investee fund's policies and procedures for estimating fair value of underlying investments, and any changes to those policies or procedures³
- The use of independent third party valuation experts to augment and validate the investee fund's procedures for estimating fair value
- The portion of the underlying securities held by the investee fund that are traded on active markets
- The professional reputation and standing of the investee fund's auditor (this is not intended to suggest that the auditor is an element of the investee fund's internal control system, but as a general risk factor in evaluating the integrity of the data obtained from the investee fund manager)
- Qualifications, if any, of the auditor's report on the investee fund's financial statements
- Whether there is a history of significant adjustments to the NAV reported by the investee fund manager as a result of the annual financial statement audit or otherwise
- Findings in the investee fund's advisor or administrator's Statements on Standards for Attestation Engagements No. 16, *Reporting on Controls at a Service Organization* (AICPA, *Professional Standards*, AT sec. 801),⁴ report on management's description of a service organization's system and the suitability of the design of controls (a type 1 report) or on management's description of a service organization's system and the suitability of the design and operating effectiveness of controls (a type 2 report), if any
- Whether NAV has been appropriately adjusted for items such as carried interest and clawbacks (more fully described in section 6910.29, "Allocation of Unrealized Gain (Loss), Recognition of Carried Interest, and Clawback Obligations")
- Comparison of historical realizations to last reported fair value

If the last reported NAV is not as of the reporting entity's measurement date, refer to section 2220.22 for further considerations.

² For further guidance, see AU-C section 501, *Audit Evidence—Specific Considerations for Selected Items* (AICPA, *Professional Standards*), and the AICPA nonauthoritative practice aid *Alternative Investments—Audit Considerations*. [Footnote revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

³ See footnote 2.

⁴ Statement on Standards for Attestation Engagements (SSAE) No. 16, *Reporting on Controls at a Service Organization* (AICPA, *Professional Standards*, AT sec. 801), establishes the requirements and application guidance for a service auditor reporting on controls at a service organization relevant to user entities' internal control over financial reporting. AU-C section 402, *Audit Considerations Relating to an Entity Using a Service Organization* (AICPA, *Professional Standards*), contains the requirements and application guidance related to an auditor's use of a service auditor's report in an audit of the financial statements of an entity that uses a service organization. [Footnote revised, August 2011, to reflect conforming changes necessary due to the issuance of SSAE No. 16. Footnote revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

In cases when the reporting entity invests in a fund of funds (the investee fund invests in other funds that do not have readily determinable fair values), the reporting entity might conclude that the NAV reported by the fund of funds manager is calculated in a manner consistent with FASB ASC 946 by assessing whether the fund of funds manager has a process that considers the previously listed items in the calculation of the NAV reported by the fund of funds, and that the fund of funds manager has obtained or estimated NAV from underlying fund managers in a manner consistent with paragraphs 59–62 of FASB ASC 820-10-35 as of the measurement date. The reporting entity is not required to look through the fund of funds interest to underlying fund investments if the reporting entity has concluded that the fund of funds manager reports NAV consistent with FASB ASC 946 for the fund of funds interest.

[Issue Date: December 2009; Revised, June and August 2011, to reflect conforming changes necessary due to the issuance of SSAE No. 16; Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

.21 Determining Whether an Adjustment to NAV Is Necessary

Inquiry—FASB ASC 820-10-35-60 allows the reporting entity, as a practical expedient, to estimate the fair value of an investment within the scope of paragraphs 4 and 5 of FASB ASC 820-10-15 using the NAV as reported by the investee when the reporting entity has satisfied itself that (a) the investee has calculated NAV consistent with FASB ASC 946 (see section 2220.20), and (b) the NAV has been calculated as of the reporting entity's financial reporting (measurement) date.

FASB ASC 820-10-35-60 further states:

If the net asset value per share of the investment obtained from the investee is not as of the reporting entity's measurement date or is not calculated in a manner consistent with the measurement principles of Topic 946, the reporting entity shall consider whether an adjustment to the most recent net asset value per share is necessary. The objective of any adjustment is to estimate a net asset value per share for the investment that is calculated in a manner consistent with the measurement principles of Topic 946 as of the reporting entity's measurement date.

How does a reporting entity determine whether an adjustment to the last reported NAV is necessary?

Reply—Examples of when an adjustment to the last reported NAV may be necessary include, but are not limited to the following:

- NAV is not as of the reporting entity's measurement date
- NAV is not calculated in a manner consistent with the measurement principles of FASB ASC 946 (which requires, among other things, measurement of all or substantially all of the underlying investments of the investee in accordance with FASB ASC 820)
- Both

The existence of either of these factors may lead the reporting entity to conclude that an adjustment to the last reported NAV may be necessary. Practically, it is difficult to assess whether an adjustment is necessary unless an estimate of the adjustment is calculated.

[Issue Date: December 2009]

.22 Adjusting NAV When It Is Not as of the Reporting Entity's Measurement Date

Inquiry—If the reporting entity concludes that the reported NAV is calculated consistently with FASB ASC 946, but an adjustment is necessary because the NAV is not as of the reporting entity's measurement date, how should the reporting entity estimate the adjustment? (Refer to the inquiry in section 2220.21 for applicable FASB literature.)

Reply—FASB ASC 820-10-35-60 states that “The objective of any adjustment is to estimate a net asset value per share for the investment that is calculated in a manner consistent with the measurement principles of Topic 946 as of the reporting entity's measurement date.” If the last reported NAV is calculated consistently with FASB ASC 946 but is not as of the reporting entity's measurement date, the reporting entity may either request the investee fund manager to provide a supplemental NAV calculation consistent with the measurement principles of FASB ASC 946 as of the reporting entity's measurement date, or it may be necessary to adjust or roll forward (or roll back)⁵ the reported NAV for factors that might cause it to differ from the NAV at the measurement date. For example, the following factors might necessitate an adjustment to the reported NAV when it is not calculated as of the reporting entity's measurement date:

- The reporting entity has made an additional investment(s) (capital contributions) since the calculation date of the reported NAV and prior to the reporting entity's measurement date
- The reporting entity has received a distribution(s) or partial redemption since the calculation date of the reported NAV
- The reporting entity has become aware (through inquiry of the investment manager or communication by the investment manager to the reporting entity) of changes in the value of underlying investments since the calculation date of the reported NAV
- Market changes or other economic conditions have changed to affect (favorably or unfavorably) the value of the investee's portfolio after the calculation date of the reported NAV
- Changes have occurred in the composition of the underlying investment portfolio of the investee fund after the NAV calculation date

The roll forward NAV might be calculated as follows:

i. Last Reported NAV (calculated consistently with FASB ASC 946)	\$ X,XXX
ii. Add capital contributions/subscriptions	C,CCC
iii. Subtract distributions/redemptions/withdrawals	(D,DDD)
iv. Adjust for changes in valuations ^(a)	V,VVV
Roll forward NAV (as of the reporting entity's measurement date)	\$ R,RRR

(continued)

⁵ When the reporting entity's measurement date is prior to the net asset value (NAV) calculation date, it may be more appropriate to use that NAV and perform a roll back rather than using a reported NAV calculated prior to the entity's measurement date.

- (a) Market changes refer to market fluctuations between the date of the reported NAV and the reporting entity's measurement date. Examples of other economic conditions for which it may be necessary to adjust a reported NAV include, but are not limited to, a portfolio company being acquired, going public, or declaring bankruptcy between the date of the reported NAV and the reporting entity's measurement date, or changes in the value of underlying investments caused by company performance or market conditions, or both.

[Issue Date: December 2009]

.23 Adjusting NAV When It Is Not Calculated Consistent With FASB ASC 946

Inquiry—If the reporting entity concludes that an adjustment is necessary because a reported NAV is not calculated consistently with the measurement principles of FASB ASC 946, how does a reporting entity estimate the adjustment? (Refer to the inquiry in section 2220.21 for applicable FASB literature.)

Reply—Although it is not possible to state all the reasons why a reported NAV may not be consistent with the measurement principles of FASB ASC 946 (that is, it is not fair value based), the reporting entity would need to consider and understand the following:

- The reasons why NAV has not been based upon fair value. In some cases investees may appear to function similarly to investment companies, but do not meet the definition of an *investment company* provided in FASB ASC 946-10-15-2 and it is not industry practice for the investee to issue financial statements using the measurement principles in FASB ASC 946. (In those cases, the practical expedient is unavailable and the entity should be valued using the general measurement principles of FASB ASC 820.)
- Whether a fair value based NAV can be obtained from the investee manager.
- Whether the specific data needed to adjust the reported NAV can be obtained and properly utilized to estimate a fair value based NAV.

Examples of circumstances in which the reporting entity may be able to obtain data to estimate an adjustment include, but are not be limited to the following:

- Reported NAV is on a cash basis. The reporting entity could estimate the fair value of each underlying investment as of the measurement date by obtaining additional information from the investee manager.
- Reported NAV utilizes blockage discounts taken on securities valued using level 1 inputs, which is not consistent with FASB ASC 820. The reporting entity could estimate the adjustment to reported NAV required to remove the blockage discount based on additional information from the financial statements or from the investee manager.
- Reported NAV has not been adjusted for the impact of unrealized carried interest or incentive fees. The reporting entity could estimate the impact of carried interest or incentive fees and adjust reported NAV.

If the reporting entity finds that it is not practicable to calculate an adjusted NAV (for example, because sufficient information is not available or it is not in a position to reasonably evaluate the information available and estimate values consistent with FASB ASC 946), then the practical expedient is not available. The reporting entity may also elect not to utilize the practical expedient. In those instances, the reporting entity should apply the general measurement principles of FASB ASC 820 instead (see section 2220.27).

[Issue Date: December 2009]

.24 Disclosures—Ability to Redeem Versus Actual Redemption Request

Inquiry—FASB ASC 820-10-35-54B(c) states the following:

If a reporting entity cannot redeem its investment with the investee at net asset value per share (or its equivalent) at the measurement date but the investment may be redeemable with the investee at a future date (for example, investments subject to a lockup or gate or investments whose redemption period does not coincide with the measurement date), the reporting entity shall take into account the length of time until the investment will become redeemable in determining whether the fair value measurement of the investment shall be categorized within Level 2 or Level 3 of the fair value hierarchy. For example, if the reporting entity does not know when it will have the ability to redeem the investment or it does not have the ability to redeem the investment in the near term at net asset value per share (or its equivalent), the fair value measurement of the investment shall be categorized within Level 3 of the fair value hierarchy.

In most cases, redemptions from alternative investment funds that redeem at NAV are only permitted with advance notice, ranging from 30 to 120 days. In order to classify the investment within level 2 of the fair value hierarchy, must the investor have submitted a previous redemption request effective as of the measurement date or is it sufficient for an investor to have had the ability to redeem on the measurement date, even though it may not have exercised this ability?

Reply—Determining the appropriate level within the fair value hierarchy is a matter of professional judgment. Even though a redemption notice may not have been submitted effective on the measurement date, so long as the reporting entity has the ability to redeem at NAV in the near term (for example, it has the contractual and practical ability to redeem) at the measurement date, then consistent with FASB ASC 820-10-35-54B(a), the investment may be classified within level 2 of the fair value hierarchy.

[Issue Date: December 2009; Revised, September 2013, to reflect conforming changes necessary due to the issuance of FASB ASU No. 2011-04.]

.25 Impact of “Near Term” on Classification Within Fair Value Hierarchy

Inquiry—What is considered “near term” for purposes of determining whether the investment would be classified as level 2 or level 3? (Refer to the inquiry in section 2220.24 for applicable FASB literature.)

Reply—What is viewed as near term is a matter of professional judgment and depends on the specific facts and circumstances. A redemption period of 90 days or less generally would be considered near term, because any potential discount relative to the time value of money to the next redemption date would be unlikely to be considered a significant unobservable input in accordance with FASB ASC 820. However, other factors (for example, likelihood or actual imposition of gates) may influence the determination of whether the investment will be redeemable in the near term.

[Issue Date: December 2009]

.26 Categorization of Investments for Disclosure Purposes

Inquiry—The sample disclosure provided in FASB ASC 820-10-55-107 appears to apply to an institutional investor with a diversified portfolio of hedge, private equity, and real estate funds. Certain entities, however, specialize in one particular investment category or have a significant investment in one such category, such as private equity or venture capital. Should these reporting entities use a different categorization than that appearing in the sample disclosure?

Reply—Yes. FASB ASC 820-10-55-107 indicates that “the major categories presented ... are provided as examples only and are not intended to be treated as a template. The major categories disclosed should be tailored to the nature and risks of the reporting entity’s investments.”

Accordingly, the disclosure should be tailored to address the concentrations of risk that are specifically attributable to the investments. For example, a private equity fund of funds should not simply categorize its investments as “private equity” as this categorization is not specific enough to address the nature and risks of the investee funds. In this example, more specific categorization, perhaps relating to industry, geography, vintage year, or the strategy of the investees (venture, buyout, mezzanine, and so on), may be more appropriate and more useful to the reader. Such categorization is a matter of judgment and should only be made after careful consideration of the specific risks and attributes of the portfolio investments has been made.

[Issue Date: December 2009; Revised, October 2013, to reflect conforming changes necessary due to the issuance of FASB ASU No. 2011-04.]

.27 Determining Fair Value of Investments When the Practical Expedient Is Not Used or Is Not Available

Inquiry—For entities that do not elect to use NAV as a practical expedient to estimate fair value or are unable to adjust the most recently reported NAV to estimate a NAV that is calculated in a manner consistent with the measurement principles of FASB ASC 946 as of the reporting entity’s measurement date, what inputs or investment features should be considered in estimating fair value?

Reply—Section 2220 distinguishes between redeemable and nonredeemable types of alternative investments, which are defined as follows:

- **Investments with redeemable interests.** Typically consist of hedge funds (based both in the United States and offshore) and some bank common/collective trust funds. These investment funds permit holders periodic opportunities to subscribe for or redeem interests at frequencies that can run from daily to annually. Certain funds may impose lock-up periods after an initial investment, under which an investor agrees that it may not redeem its investment for a specified period of time (in some cases, an early redemption may be permitted upon payment of an early redemption fee).
- **Investments with nonredeemable interests.** Typically consist of private equity, venture capital, and real estate funds. Generally, these investments have an initial subscription period, under which each investor makes a commitment to contribute a specified amount of capital as called for by the investment manager, typically as investments are identified and money is needed to acquire them. Due to the inherent illiquidity of the underlying investments, redemptions are not permitted during the fund’s life; however, typically, as investments are sold or experience another liquidity event (for example, an initial public offering), the proceeds of the sale, less any incentives due to the

fund sponsor, are often distributed back to the investors in the fund immediately following the sale or liquidity event.

Investment Inputs

A reporting entity might first consider the other market participants to whom it could sell the asset. In accordance with FASB ASC 820-10-35-9, “[t]he fair value of the asset ... shall be determined based on the assumptions that market participants would use in pricing the asset ...” Based on guidance in FASB ASC 820-10-35-53, in the absence of relevant observable inputs, a reporting entity uses “unobservable inputs [that] shall reflect the reporting entity’s own assumptions about the assumptions that market participants would use in pricing the asset or liability (including assumptions about risk).” In accordance with FASB ASC 820-10-35-55, “[i]n developing unobservable inputs, the reporting entity need not undertake all possible efforts to obtain information about market participant assumptions. However, the reporting entity shall not ignore information about market participant assumptions that is reasonably available without undue cost and effort.” When doing so, the reporting entity is reminded that the FASB ASC glossary defines *market participants* as “knowledgeable, having a reasonable understanding about the asset or liability and the transaction based on all available information, including information that might be obtained through due diligence efforts that are usual and customary.” Thus, it can be presumed that a market participant would be aware of, and may be willing to accept, limitations on conversion to cash inherent to alternative investments. However, in some cases, those types of limitations may also affect the fair value measurement (see “Investment Features”).⁶ It also can be presumed that market participants may consider other factors such as the investment manager’s track record and potentially limited access to desirable investment opportunities. Finally, it should be acknowledged that market participant assumptions normally result in a range of values. According to FASB ASC 820-10-35-24, “[a] fair value measurement is the point within that range that is most representative of fair value in the circumstances.” See FASB ASC 820-10-35-9 for further guidance. The reporting entity should also consider the guidance in paragraphs 51A–51H of FASB ASC 820-10-35.

Alternative investments may lend themselves to valuation techniques consistent with the income or market approaches. If both of these approaches are used to measure fair value, the results should be evaluated and weighted as discussed in FASB ASC 820-10-35-24. When NAV is not used as a practical expedient, examples of factors that might be used when estimating fair value (depending on the valuation technique(s) and facts and circumstances) are as follows:

- NAV (as one valuation factor)
- Transactions in principal-to-principal or brokered markets (external markets) and overall market conditions
- Features of the alternative investment
- Expected future cash flows appropriately discounted (detailed description is beyond the scope of this document; however, for many funds with nonredeemable interests, expected future cash flows from the

⁶ Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 820-10-35-15 states that “the effect on a fair value measurement of a restriction on the sale or use of an asset by a reporting entity will differ depending on whether the restriction would be considered by market participants in pricing the asset.”

interests might typically coincide with the expected future cash flows from the underlying investments)

- Factors used to determine whether there has been a significant decrease in the volume and level of activity for the asset when compared with normal market activity for the asset (FASB ASC 820-10-35-51A)

The preceding examples are not listed in any order of importance. Rather, the reporting entity might determine the relative weighting and importance of these inputs based on its view of what market participants might consider in estimating fair value.

Investment Features⁷

A valuation technique used to measure the fair value of an asset or a liability should reflect assumptions a market participant might use to price the asset or liability, including assumptions about liquidity and risk, based on the best information available. The following discussion provides a detailed description of features of alternative investments that normally might be expected to be considered by market participants in the estimation of the fair value of an alternative investment. When considering the potential impact of the features of an alternative investment on its fair value, it is important that all relevant features be considered in the aggregate because that is how a market participant might be likely to evaluate them in determining how much it might be willing to pay for an alternative investment.

Other factors that may be considered include observed subscriptions and redemptions in redeemable interests; external market transactions in non-redeemable interests; expected future cash flows; and features of the alternative investment. Additionally, a market participant might normally be expected to compare the performance of the alternative investment to publicly available data (for example, benchmarks, indexes, expected returns, and returns of comparable vehicles), and the cash returns of the investment to NAVs reported by the alternative investment during the year. A conclusion may ultimately be reached that the reported NAV is equivalent to fair value, either because no conditions exist to suggest an adjustment is necessary or because factors indicating a discount to the reported NAV may be offset by other factors that might justify a premium. In other cases, however, the investment may be valued at a discount or premium to the reported NAV because factors indicate that the fair value of the investment is less than, or more than, the reported NAV. Regardless of whether or not NAV is determined to be equivalent to fair value, the reporting entity needs to evaluate the relevant individual factors and their potential impact on fair value, and consider the level of documentation in its evaluation.

Among the factors that market participants might be expected to consider are the various terms and features of the alternative investment. Such features generally fall into one of two categories: initial due diligence features or ongoing

⁷ The “Investment Features” section contains important information related to features of alternative investments that a reporting entity may consider in determining fair value when the option to utilize the practical expedient is unavailable or not elected. The list of features highlighted in this section is intended to provide some examples to better explain the types of scenarios that could impact fair values. Because individual investments may have additional terms and features, the examples included in the “Investment Features” section should not be viewed as an all-inclusive “checklist.” Professional judgment should be applied in evaluating the assumptions appropriate to any individual investment. The actual computation of fair value requires management’s professional judgment and is beyond the scope of this Technical Questions and Answers section.

monitoring features. The magnitude of any adjustment resulting from consideration of ongoing monitoring features is a matter of judgment and should be evaluated based on the facts and circumstances specific to each investee fund.

Initial Due Diligence Features. Generally, *initial due diligence features* are inherent characteristics that may have been considered by the reporting entity as part of its due diligence when making its initial investment in the particular investee fund. The following provides examples of initial due diligence features of an alternative investment. Not every feature may be relevant to every alternative investment, nor does this list necessarily include all assumptions that market participants may apply in any specific situation.

Lock-up periods and redemption fees. (Typically applies only to redeemable interests)

Lock-up period refers to the initial amount of time a reporting entity is contractually required to invest before having the ability to redeem. Typically, when the lock-up period expires, the reporting entity may redeem its interests on any scheduled liquidity date, subject to the other liquidity terms described in the investee fund's governing documents. The length of the lock-up period often depends on the quality and reputation of the fund manager as well as the expected liquidity of the underlying investment portfolio. In some instances, alternative investments may offer reduced fees if an investor agrees to a longer lock-up period. Also, some funds may permit investors to redeem during a lock-up period upon payment of a redemption fee. Such fees are typically imposed on the amount to be redeemed and generally range from 1 percent to 3 percent of the gross redemption amount.

Related to the concept of lock-up periods is the general frequency in which an investor is allowed to redeem or withdraw from a fund. In the absence of a lock-up period, investors with redeemable interests typically may only redeem at prescribed liquidity dates (generally monthly, quarterly, or annually).

Notice periods. (Typically applies only to redeemable interests)

Following the expiration of any applicable lock-up period, a reporting entity may, upon specified prior written notice (generally 45–120 days) to the general partner or manager (redemption notice), elect to redeem all or a portion of its interest as of the last day of a calendar month, quarter, or year (redemption date).

Holdbacks. (Typically applies only to redeemable interests)

When the general partner or investment manager receives a redemption notice, the fund will redeem the interests of an investor as specified in the redemption notice, at the redemption price (as discussed subsequently) as of the applicable redemption date. The fund will distribute all or a substantial portion (for example, 90 percent) of the redemption price with respect to the interests being redeemed within a specified number of business days (for example, 30 days) following the applicable redemption date. Any balance (for example, the remaining 10 percent) is distributed within a specific time frame, often following the release of the fund's audited financial statements for the year in which the redemption date falls. Holdback amounts protect the general partner or investment manager from adjustments reducing the NAV of the fund during an audit of the financial statements.

Suspension of redemptions (“gates”). (Typically applies only to redeemable interests)

Pursuant to the fund’s governing documents, the general partner or investment manager can suspend or restrict the right of any investor to redeem his or her interests (whether in whole or in part). The general partner or investment manager can implement this restriction for certain reasons, including the aggregate amount of redemption requests, certain adverse regulatory or tax consequences, reduced liquidity of portfolio holdings, and other reasons that may render the manager unable to promptly and accurately calculate the fund’s NAV. The most common example is the use of a “gate,” whereby certain redemption requests are deferred, in whole or in part, because the aggregate amount of redemption requests as of a particular redemption date exceeds a specified level, generally ranging from 15 percent to 25 percent of the fund’s net assets. The mere presence of a provision allowing the imposition of a gate might not normally be expected to have an effect on fair value, in the absence of any evidence suggesting that the provision actually may be exercised (see “Ongoing Monitoring Features,” which follows).

Lack of redemption option. (Nonredeemable interests and instances where all or a portion of otherwise redeemable interests have been declared nonredeemable)

As discussed earlier, funds investing in private equity, venture capital, or real estate investments generally do not permit withdrawals or redemptions, primarily to match the liquidity provisions of the fund with the liquidity of the investment portfolio. When the fund sells any of its portfolio holdings, it often distributes the proceeds received on the sale to the investors in the fund.

Fund sponsor approval to transfer. (Redeemable and nonredeemable interests)

As discussed earlier, in virtually all cases, transfers of interests in alternative investments are not permitted under the governing documents of the fund without the written consent of the fund sponsor or general partner, for regulatory or tax reasons or both, and thus, are inherent to the category of investments. Past experiences, as well as the current operating environment, are both considerations in assessing the likelihood of such approval being granted.

In some private equity, venture capital and real estate funds that require investors to make commitments to invest over time and periodically call on the commitments as needed, the fund sponsor or general partner may allow an investor to withdraw or redeem from the fund and, thus, be absolved of future commitments, but the investor may forfeit its existing interest if no other investors (including the fund sponsor or general partner) are willing to assume the withdrawn partner’s interest, including future commitments. If forfeiture occurs (which, in practice, is rare), the investor’s interest is generally reallocated to the remaining investors in the fund. (The balance of the withdrawing partner’s commitment may also be reallocated to the other investors, or the total size of the fund may be reduced).

Use of “side pockets.” (Typically applies only to redeemable interests)

As noted earlier, certain funds issuing redeemable interests may be allowed to invest a portion of their assets in illiquid securities. In such cases, a common mechanism used is a “side pocket,” whereby, at the time of an investment in an illiquid security, a proportionate share of an investor’s

capital account, relative to the entire interest of the fund, is assigned to a separate memorandum capital account or designated account. Typically, the investor loses its redemption rights to the designated account, and even a full redemption request is fulfilled only with that capital ascribed to his or her basic capital account (that is, the nondesignated capital account), while the investor continues to hold its proportionate interest in the designated account. Only when the security is sold (or otherwise deemed liquid) by the fund is the amount moved back to each applicable investor's basic capital account (and otherwise withdrawn investors can redeem the designated account balance). This designated account generally does not pay a performance fee⁸ (although one may be levied) until the illiquid investment is sold or otherwise deemed liquid. Designated accounts are often referred to as "side pocket accounts" or as "special investment accounts." Similar to "gates," the mere existence of contractual provisions permitting the use of side pockets typically does not have a material effect on estimating the fair value unless those provisions are actually exercised and access to a portion of the investment is actually limited (see "Ongoing Monitoring Features," which follows).

As previously noted, these examples of initial due diligence features are common characteristics of alternative investment funds and, as such, are generally considered and accepted by investors when making investment decisions in these investments. Accordingly, a market participant may or may not require an adjustment to the reported NAV in a transfer of an investment interest in an alternative investment solely due to the existence of these items. However, it is necessary to consider these features in conjunction with other inputs available to the reporting entity. For example, if the reporting entity is valuing redeemable interests and observes that other investors are subscribing for interests at the reported NAV under the same terms as the reporting entity's agreement, that fact may provide evidence that no adjustment to the reported NAV is necessary. However, if other investors are subscribing to the fund at the reported NAV under terms that, in aggregate, are less favorable than those in the reporting entity's agreement (for example, higher fees, greater restrictions on redemption), that fact may provide evidence that the reporting entity's holdings may trade at a premium to the reported NAV. Similarly, if other investors are receiving more favorable terms in aggregate than those in the reporting entity's agreement (for example, lower fees, fewer restrictions on redemption), that fact may provide evidence that the reporting entity's holding may trade at a discount to the reported NAV. An investor may also typically consider whether the fund's terms are more or less restrictive than those prevailing in the current market. For example, terms that are more restrictive may suggest a discount. Alternatively, the quality of the investment manager may command a premium.

In short, if market participants would be expected to place a discount or premium on the reported NAV because of features, risk, or other factors relating to the interest, then the fair value measurement of the interest would need to be adjusted for that risk or opportunity.⁹ However, if market participants might accept the same features, risk, and other factors relating to the interest and

⁸ Consistent with the definition in the AICPA Audit and Accounting Guide *Investment Companies*, a *performance fee* (also referred to as an *incentive fee*) is a fee paid to an investment adviser based upon the fund's performance for the period. It may be an absolute share of the fund's performance or a share of the performance in excess of a specified benchmark.

⁹ This is consistent with FASB ASC 820-10-35-54, which states, "A measurement (for example, a mark-to-model measurement) that does not include an adjustment for risk would not represent a fair value measurement if market participants would include one in pricing the related asset or liability."

might transact at the reported NAV without a premium or discount, that fact may suggest that no adjustment is needed for the factors discussed previously to estimate fair value.

Ongoing Monitoring Features. *Ongoing monitoring features* are characteristics related to activity in an investee fund subsequent to a reporting entity's initial investment. Because ongoing monitoring features often include specific events relating to the investee fund, the fund sponsor, the industry or the asset class, they are more likely to result in consideration of a discount or premium to the reported NAV than initial due diligence features. The following provides some examples of ongoing monitoring features for an alternative investment.

As with initial due diligence features, not every feature may be relevant to a particular investment, nor does this list necessarily include all assumptions that market participants may apply in any specific situation. Also, changes in market conditions may affect the investor's assumptions relating to the significance of any particular feature.

Imposition of a gate. (Typically applies only to redeemable interests)

Though an investee fund manager's mere ability to impose a gate on redemption requests is a common initial due diligence feature (as noted previously), the actual imposition of a gate by an investee fund manager may warrant further consideration of whether a discount should be applied to the reported NAV. The act of imposing the gate generally implies that the investee fund manager is experiencing liquidity concerns, either related to specific investments or its portfolio as a whole, which the reporting entity and a market participant normally would be expected to consider in estimating fair value of the interest in the investee fund. Further, the imposition of a gate increases the uncertainty of the ultimate timing of receipt of cash upon redemption, sometimes significantly, and, thus, may impose an additional risk premium on the investment.

Redemptions from an investee fund. (Typically applies only to redeemable interests)

Even in the absence of the actual imposition of a gate, when an investee fund experiences material redemption requests this may suggest comparable liquidity issues that could result in a discount from the reported NAV, particularly in situations when the investee fund is leveraged.

Notification of redemption triggers the assessment of redemption fee. (Typically applies only to redeemable interests)

Though, as noted previously, an investee fund manager may have the ability to charge redeeming investors a redemption fee, the mere existence of this feature is generally considered to be an initial due diligence feature which, in many instances, may not cause the reported NAV to exceed the fair value of the investment interest. However, if a reporting entity irrevocably agrees to redeem some or all of its interest, the redemption fee normally would be expected to cause the reported NAV to exceed the fair value of the investment interest.

Significant changes in key terms of the investee fund. (Redeemable and nonredeemable interests)

The initial due diligence features, as previously noted, represent standard or common characteristics of an alternative investment. They are generally known and accepted by the reporting entity at the time of making an initial investment at the reported NAV. As such, a market participant with full

knowledge of these features may also likely transact at the reported NAV, so long as the terms remain within the range prevailing in the market.

If, however, the investee fund makes significant changes to the terms (for example, fees, lock-up periods, notification periods, gates) subsequent to the initial investment, the reporting entity normally would be expected to consider these changes when evaluating whether the reported NAV should be adjusted to arrive at fair value. In some cases, changes may be deemed to have little impact on the investment decisions of a market participant, whereas in other cases, changes to key terms may create a distinct difference between the existing interest and other interests (either in the specific alternative investment or comparable investments), which may result in either a discount or premium to the reported NAV.

Closure of fund to new subscriptions. (Redeemable interests)

Some funds may cease accepting subscriptions from new investors because doing so might cause them to exceed the maximum number of investors they can accept without requiring public filings of financial information under securities laws. In other cases, funds may voluntarily suspend the acceptance of subscriptions from new investors, and even in some cases additional subscriptions from existing investors, because of the adviser's view that opportunities to make further investments under the fund's investment strategy may be limited given the size of the markets involved or that they might not bring acceptable returns, or both. Such an event may suggest that existing interests in the fund could trade at a premium because prospective investors may have no other means of investing in the fund. Further, a large number of investors or the intent not to "dilute" the fund's returns by accepting additional investment funds, or both, may provide evidence that the fund may trade at a premium to the reported NAV.

Ability of fund to identify and make acceptable investments. (Nonredeemable interests)

Venture capital, private equity, and real estate funds typically offer interests on the basis of committed capital, which is only called from investors as investments are identified. Investors agree to commit capital under implicit or explicit understandings that committed capital will be called during an initial investment period, often from one to five years. Depending on the market environment, managers may find that they are unable to identify sufficient investments to utilize committed capital on a timely basis. Such funds often are smaller and less diversified than expected at the time of inception of the fund, which may negatively influence fair value. Further, certain vintages (that is, years when funds were organized) may be identified over time as having represented exceptionally good or poor investment opportunities for the particular investment style, and interests in funds organized in those years may be more likely to incur premiums or discounts, respectively. The fund's potential inability to identify and make acceptable investments will often result in unfunded capital commitments, which may need to be considered when estimating the fair value of an investment interest in the fund.

Allegations of fraud against the investee fund manager. (Redeemable and nonredeemable interests)

If the reporting entity is aware of allegations of fraud, noncompliance with laws and regulations, or other improprieties against the investee fund manager or its affiliates, the reporting entity should consider the potential impact of these allegations on the value of its interest in the investee fund.

In many cases, such allegations may result in the unexpected inability to obtain any cash proceeds from the investee fund pending the resolution of the investigation or from a general lack of liquidity resulting from historical misrepresentation of the net assets of the fund. In other cases, the ongoing ability of the investee fund manager to manage the fund may be brought into question.

Change in financial strength or key personnel of investment manager.
(Redeemable and nonredeemable interests)

In some cases, a key consideration for investment in certain funds is the reputation, and prior investment record, of the investment manager, or specific individuals expected to manage the investee fund's portfolio. In some situations, the desirability of the investment manager or individuals, or both, may influence the nature of the fee, lock-up, and similar terms investors are willing to accept in making an initial investment. If those key personnel no longer provide services to the alternative investment, investors may not be willing to continue to accept those terms. Further, if the advisory organization experiences financial deterioration, it may be less able to retain key personnel or, for certain private equity, venture capital, or real estate funds, to repay previously-received incentive fees to the fund under contractual clawback provisions (if the fund experiences subsequent losses). Those uncertainties may increase the risk of the investment.

.02 Balance Sheet Classification of Deposit on Equipment to Be Purchased

Inquiry—What is the appropriate balance sheet classification of a deposit on machinery which is to be purchased within one year?

Reply—Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 210-10-45-4 states, in part:

The concept of the nature of current assets contemplates the exclusion from that classification of such resources as the following:

- a* Cash and claims to cash that are restricted as to withdrawal or use for other than current operations, are designated for expenditure in the acquisition or construction of noncurrent assets, or are segregated for the liquidation of long-term debts.

Accordingly, the deposit on equipment should be classified as a noncurrent asset even though the equipment will be purchased within one year.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

Section 2240

Cash Surrender Value of Life Insurance

.01 Balance Sheet Classification of Life Insurance Policy Loan

Inquiry—A company has secured a short-term loan from an insurance company against the cash surrender value of its life insurance policies.

In Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 210-10-45-4(d), cash surrender value of life insurance policies is excluded from the classification of a current asset. This reference does not appear to recommend a different classification if the cash value may have been fully borrowed from the insurance company.

Is it proper to classify a readily liquid asset as noncurrent and simultaneously show the related borrowings as a current liability?

Reply—FASB ASC 210-10-45-4 states, in part:

This concept of the nature of current assets contemplates the exclusion from that classification of such resources as . . . (d) cash surrender value of life insurance policies.

FASB ASC 210-10-45-9(d) states, in part:

Loans accompanied by pledge of life insurance policies would be classified as current liabilities if, by their terms or by intent, they are to be repaid within 12 months. The pledging of life insurance policies does not affect the classification of the asset any more than does the pledging of receivables, inventories, real estate, or other assets as collateral for a short-term loan. However, when a loan on a life insurance policy is obtained from the insurance entity with the intent that it will not be paid but will be liquidated by deduction from the proceeds of the policy upon maturity or cancellation, the obligation shall be excluded from current liabilities.

FASB ASC 210-20-05-1 states, in part:

It is a general principle of accounting that the offsetting of assets and liabilities in the balance sheet is improper except if a right of setoff exists.

Therefore, if a company takes out policy loans from the insurance company on life insurance policies which it owns and if there is no intention to repay the loan during the ensuing operating cycle of the business, such loan may be excluded from current liabilities. Furthermore, as the owner of a policy normally has the right to offset the loan against the proceeds received on maturity or cancellation of the policy, it is appropriate to apply the amount of the loan in reduction of the cash surrender value, with disclosure of the amount so offset.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.02 Disclosure of Life Insurance on Principal Stockholders

Inquiry—A client corporation, which is a nonpublic entity, maintains life insurance policies on its principal stockholders that will provide for the repurchase of the stock in the event of a stockholder's death. The cash surrender value of these policies appears on the balance sheet. Is further disclosure necessary?

Reply—The rule of informative disclosure requires that the essential facts respecting firm commitments for purchase of a corporation's own stock pursuant to a buy-sell agreement be set forth in a footnote to the financial statements.

The following is an example of a footnote describing such a situation that might appear on the balance sheet in reference to the cash surrender value account:

The company is the owner and beneficiary of key-man life insurance policies carried on the lives of X, Y, and Z, bearing face value amounts of \$500,000, \$500,000, and \$450,000, respectively. No loans are outstanding against the policies, but there is no restriction in the policy regarding loans.

The life insurance contracts are accompanied by mandatory stock purchase agreements to the amount of the proceeds of the life insurance. In the event of the insured's death, the "fair market value" of the stock will, by previous action, be established by the X Appraisal Company. The insured's estate will be obligated to sell, and the company will be obligated to purchase, the insured's stock up to the appraisal value of the stock or the proceeds of insurance, whichever is the lesser. The purpose is to protect the company against an abrupt change in ownership or management.

[Revised, April 2010.]

.03 Omission of Cash Surrender Value of Life Insurance from Assets

Inquiry—Clearly, cash surrender values of life insurance may be included among the assets in the balance sheet of an enterprise. Is this mandatory, or may management elect to omit this item from the assets on the theory that its inclusion will be misleading since the insurance is carried for the purpose of covering the loss it is anticipated will be sustained as a result of the death of a key official?

Reply—If the enterprise retains all valuable contract rights incident to ownership of the life insurance policy, then it is mandatory from the standpoint of full accountability to reflect the asset status of the cash surrender value of the policy. Not to reflect the cash surrender value would be tantamount to creating a hidden reserve which would be contrary to generally accepted accounting principles.

.04 Corporation's Policy on Life of Debtor Corporation's Officer

Inquiry—A client took out a straight life insurance policy on the life of an officer of another corporation which is indebted to the client. The client corporation hopes to receive the proceeds of the insurance policy tax free and has not deducted the yearly premium payments as expenses. The officer is over 65 years old, and, therefore, there is a great possibility he or she will die prior to the full payment of the outstanding balance of the corporation's debt. The prior CPA reported the accumulated premium payments on the Balance Sheet as "Investment in Life Insurance."

Is it proper to show total premiums paid as an investment under these circumstances?

Reply—Where a corporation takes out a life insurance policy on the life of a debtor corporation's officer (assuming that there is an insurable interest), the manner of accounting for the premiums should not differ from the manner of accounting for premiums paid on the life of the corporation's own officer. The premiums should be broken down between the expense and the cash surrender value elements. Accordingly, the accumulated premiums account should be

analyzed to determine the cash surrender value as at the balance sheet date, the expense portion for the period under audit, and the remaining portion which should be treated as a correction of prior period earnings. See Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 250, *Accounting Changes and Error Corrections*, for a discussion of correction of an error.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.06 Measurement of Cash Value Life Insurance Policy

Inquiry—How should a company measure and record a cash value life insurance policy that it purchases for itself on the company's balance sheet?

Reply—In accordance with FASB ASC 325-30-25-1, “an investment in a life insurance contract shall be reported as an asset.”

FASB ASC 325-30-35-1 states

An asset representing an investment in a life insurance contract shall be measured subsequently at the amount that could be realized under the insurance contract as of the date of the statement of financial position. It is not appropriate for the purchaser of life insurance to recognize income from death benefits on an actuarially expected basis. The death benefit shall not be realized before the actual death of the insured, and recognizing death benefits on a projected basis is not an appropriate measure of the asset.

FASB ASC 325-30-35-3 states

FASB ASC 325-30-30-1 states that a policyholder shall consider any additional amounts included in the contractual terms of the policy in determining the amount that could be realized under the life insurance contract. When it is probable that contractual terms would limit the amount that could be realized under the life insurance contract, these contractual limitations shall be considered when determining the realizable amounts. Those amounts that are recoverable by the policyholder at the discretion of the insurance entity shall be excluded from the amount that could be realized under the life insurance contract.

FASB ASC 325-30-35-4 states that “amounts that are recoverable by the policyholder in periods beyond one year from the surrender of the policy shall be discounted in accordance with Topic 835.”

FASB ASC 325-30-35-5 states

A policyholder shall determine the amount that could be realized under the life insurance contract assuming the surrender of an individual-life by individual-life policy (or certificate by certificate in a group policy). Any amount that ultimately would be realized by the policyholder upon the assumed surrender of the final policy (or final certificate in a group policy) shall be included in the amount that could be realized under the insurance contract. See Example 1 (paragraph 325-30-55-1) for an illustration of this guidance.

FASB ASC 325-30-35-6 states

A policyholder shall not discount the cash surrender value component of the amount that could be realized under the insurance contract when contractual restrictions on the ability to surrender a policy exist, as long

as the holder of the policy continues to participate in the changes in the cash surrender value as it had done before the surrender request. If, however, the contractual restrictions prevent the policyholder from participating in changes to the cash surrender value component, then the amount that could be realized under the insurance contract at a future date shall be discounted in accordance with Topic 835.

FASB ASC 325-30-35-7 states “if a group of individual-life policies or a group policy only allows for the surrender of all of the individual-life policies or certificates as a group, then the policyholder shall determine the amount that could be realized under the insurance contract on a group basis.”

.06 Accounting Treatment of Agreements Not to Compete

Inquiry—A company enters into an agreement with an outgoing officer whereby the company will make future periodic payments to the officer in return for the officer's agreement not to compete with the company for the period coinciding with the payments.

Would it be appropriate for the company to record a liability for the total future payments to the former officer and a corresponding intangible asset for the covenant?

Reply—The authoritative literature does not provide specific guidance for the treatment of executory contracts, which require future consideration upon the occurrence of certain events.

FASB Concept No. 6, *Elements of Financial Statements—a replacement of FASB Concepts Statement No. 3 (incorporating an amendment of FASB Concepts Statement No. 2)*, paragraph 36 specifies that a characteristic of a liability is that “the transaction or other event obligating the entity has already happened.” Because the event that gives rise to the company's obligation is the former officer's forbearance from competition, many accountants believe that the transaction should be recorded prospectively, as the payments are “earned” by the former officer. They would disclose the contractual obligation as a commitment in the company's notes to its financial statements.

FASB Concept No. 6 paragraph 26 provides that a characteristic of an asset is that “it embodies a probable future benefit.” Accordingly, the company would only record an intangible asset if the payment to the former officer preceded the period of forbearance.

.03 Legal Expenses Incurred to Defend Patent Infringement Suit

Inquiry—A company is sued for patent infringement. Should the cost to defend the patent be capitalized or expensed?

Reply—The choice of capitalizing or expensing depends on the outcome of the lawsuit. FASB Concept No. 6, *Elements of Financial Statements—a replacement of FASB Concepts Statement No. 3 (incorporating an amendment of FASB Concepts Statement No. 2)*, paragraph 247 states “. . . the legal and other costs of successfully defending a patent from infringement are ‘deferred legal costs’ only in the sense that they are part of the cost of retaining and obtaining the future economic benefit of the patent.”

If defense of the patent lawsuit is successful, costs may be capitalized to the extent of an evident increase in the value of the patent. Legal costs which relate to an unsuccessful outcome should be expensed.

Section 3100

Current Liabilities

.01 Estimated Liability for Unemployment Claims

Inquiry—Under state law, a corporation has a choice of the method to pay unemployment insurance contributions. The corporation may pay a percentage of gross wages or may reimburse the state employment commission directly for actual unemployment claims. A client chose to reimburse the state for the actual claims which may arise. If no claims against the client are filed, may the client record an expense and a liability for unemployment claims?

Reply—The estimated unemployment insurance costs should be accrued currently based on the client's estimated or past history of unemployment. Unemployment insurance cost should be related to the period worked by the employees. Not recording unemployment costs until claims are actually filed would result in a mismatching of revenues and expenses. Such an approach would be unacceptable under generally accepted accounting principles.

[.02] Reserved

.03 Accounting for Possible Refunds of Leasing Fees

Inquiry—A company franchises distributorships for home and office oxygen inhalator units. The licensees lease the units from the company and pay an initial leasing fee for each unit before receipt of the unit. As stipulated in the franchise agreement, the licensee is entitled to a refund, upon termination of the franchise agreement and return of the units, of a specified amount of the initial leasing fee depending on the period of time that the units are leased out. When units are returned they can usually be redistributed with little or no repair. Is there a liability for the return of a portion of the initial leasing fees?

Reply—The returned units can usually be redistributed with little or no repair. Therefore, accounting for these units would be similar to accounting for returnable containers. Because the licensee pays the initial leasing fee prior to delivery of the units, there is no receivable to be offset by an "allowance account" for the estimated refunds, and so the amounts for estimated refunds should be shown as a liability.

.04 Date for Accrual of Tax Penalties

Inquiry—A company has received certain billings from the federal government for interest and penalties for late filing of federal withholding taxes. Some of these notices were received prior to the balance sheet date, while other notices were received after the balance sheet date, but in either case they apply to periods prior to the balance sheet date. Should liabilities for the interest and penalties be shown on the balance sheet?

Reply—Paragraph .02 of AU-C section 560, *Subsequent Events and Subsequently Discovered Facts* (AICPA, *Professional Standards*), states, in part:

Financial statements may be affected by certain events that occur after the date of the financial statements ... financial reporting frameworks ordinarily identify two types of events:

- a. Those that provide evidence of conditions that existed at the date of the financial statements

- b. Those that provide evidence of conditions that arose after the date of the financial statements

The auditor's objective is to determine whether events occurring between the date of the financial statements and the date of auditor's report that require adjustment of, or disclosure in, the financial statements have been identified and are appropriately reflected in the financial statements. Therefore, provision should be made for any billings received for penalties on late filing of federal withholding taxes which were required to be filed prior to the balance sheet date. Similarly, any such interest should be provided for up to the balance sheet date. Interest accrued subsequent thereto would be an expense of the following period.

[.08] Reserved

.09 Accrual for Employer Co-Insurance Arrangements

Inquiry—A company pays for the medical expenses of its active employees but purchased “stop-gap” or “excess of loss” insurance to cover medical expenses exceeding \$10,000, lifetime benefit, per employee. What amount, if any, should the company accrue to cover its liability?

Reply—Although Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 450, *Contingencies*, excludes employment-related costs, that accounting guidance may be appropriate for this situation. FASB ASC 450-20-25-2 states that an accrual for a loss contingency is required if the loss is probable and the amount of the loss can be reasonably estimated. Medical expenses incurred by the employee during the reporting period should be accrued. This includes expenses incurred during the reporting period but submitted after the balance sheet date. The accrual should be based on all relevant data (including statistical data), the company's historical experience, and its expectations of the future. Some of this data may be available from insurance administrators or actuaries.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.10 Compensated Absences

Inquiry—A company with a June 30 year end has a sick pay policy that states that an employee employed for at least three months is entitled to ten sick days annually. The employee is entitled to these days as of January 1 and any unused sick days as of December 31, are paid to these workers. Should the company accrue a liability as of June 30 for the unused sick days of these workers?

Reply—Yes. Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 710, *Compensation—General*, indicates that sick pay that is customarily paid even though the absence from work is not actually the result of an illness, should not be considered sick pay in applying the provisions of paragraphs 6–7 of FASB ASC 710-10-25. In considering necessity for making an accrual, the four criteria in FASB ASC 710-10-25-1 should be considered.

In determining the amount of the accrual, the guidance in FASB ASC 450, *Contingencies*, concerning the probability of future payment should be considered. Specifically, the company should consider its payment history and employee turnover in calculating the accrual.

In this example, if an employee had taken three days through June 30, the remaining accrual would be seven days. If this example were modified, and the days were earned on a pro rata basis throughout the year, the company would record a liability for the expected payment to be made to the employee for only the accumulated right through June 30. With the same three days taken through June 30, the company would have an accrual for the remaining two days in the June 30 financial statements.

.06 Amortization Period for Placement Fee When Mortgage Refinanced

Inquiry—A company paid a \$100,000 mortgage placement fee for an eighteen year mortgage. Ten months later, it became apparent that a refinancing of a significantly larger mortgage would be needed. The company negotiated a commitment with a bank for a larger mortgage to be placed one year from the date of this agreement. At the time of the commitment, in accordance with Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 350, *Intangibles—Goodwill and Other*, which deals with intangible assets, the company reduced the amortization period of the placement fee to the expected remaining period of the original mortgage.

Two months before the closing date of the original mortgage, at which time almost the entire prepaid mortgage fee had been amortized, the bank was unable to make the loan and exercised an option to extend the closing date of the old mortgage and the placement date of the new mortgage for six more months.

Should the amortization period now be extended to the new settlement date?

Reply—The mortgage placement fee should not be viewed as an intangible asset but as a deferred charge under FASB ASC 835, *Interest*. It is an amortizable cost incurred to secure the mortgage.

The unamortized amount of the fee at the time when the bank exercises the option should be amortized over the remaining six month period. The reasons for the exercise of the option do not change the fact that the period benefited has been extended. The change should be treated as a change in accounting estimate, in accordance with FASB ASC 250, *Accounting Changes and Error Corrections*. If the new mortgage is placed before the end of the six month option period, any balance of the fee should then be written off in accordance with FASB ASC 470-50 and FASB ASC 470-50-45-1, which deal with early extinguishment of debt.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

[.08] Reserved

.09 Financial Statement Presentation of “Pay Any Day” Loans

Inquiry—Corporation A finances its purchases of equipment through “pay any day” loans. Under this type of financing arrangement, the borrower signs

a note and security agreement which sets forth the amount financed, the finance charge, and the amount of monthly payment. This instrument differs from a conditional sales contract or “add-on” loan. The “add-on” loan is a contract calling for a specified number of payments, including interest, and therefore the liability is the total amount to be repaid over the life of the contract; whereas, the “pay any day” loan, or note and security agreement is a simple interest loan and the agreement shows the finance charge in order to disclose the amount of interest that will be paid if each installment payment is made on its exact due date.

What is the appropriate financial statement presentation of “pay any day” loans?

Reply—A “pay any day” loan can be recorded and reported in the financial statements at its face amount plus accrued interest because it is in effect a term loan with interest charged at the current rate. The amount of the loan, if any, expected to be paid within one year would be shown as a current liability.

.10 Determining the Allocation for Lease Payments for a Lease Capitalized at Fair Market Value

Inquiry—According to Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 840-30-30-1, a lessee accounting for a capital lease, records an asset and an obligation equal to the present value of the minimum lease payments at the beginning of the lease term, excluding any portion of the payments which represent executory costs (such as insurance and taxes) which will be paid by the lessor. However, if this amount is greater than the fair market value of the leased property, the amount recorded as the asset and obligation should be fair market value. When the asset and obligation are recorded at the fair market value, since the interest rate is not known, how should the amount for the lease payments be recorded?

Reply—FASB ASC 840-30-35-6 states that during the lease term, each minimum lease payment shall be allocated between a reduction of the obligation and interest expense so as to produce a constant periodic rate of interest on the remaining balance of the obligation. This is the “interest” method described in paragraphs 2–3 of FASB ASC 835-30-35.

When the asset to be recorded based on the present value of the minimum lease payments exceeds the fair market value of the asset, it is usually because the incremental borrowing rate used to determine present value is lower than the interest rate implicit in the lease.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.11 Effect of Sales Taxes on the Determination of Present Value of Minimum Lease Payments

Inquiry—A company leases a machine for \$14,000 a month for 72 months. The monthly invoice received from the lessor includes the stipulated monthly rent plus a charge for state sales taxes. The lease does not meet the 90 percent criterion of a capital lease (i.e., the present value of the minimum lease payments excluding executory costs equals or exceeds 90 percent of the fair value of the leased property) if sales taxes are excluded from minimum lease payments. The criterion is met if both the rent and sales taxes are included as minimum lease payments.

Should the minimum lease payments include sales taxes?

Reply—Practice in this area varies. Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 840-10-25 describes, in part,

minimum lease payments as the payments that the lessee is obligated to make or can be required to make in connection with the leased property. However, the lessee's obligation to pay (apart from rental payments) executory costs such as insurance, maintenance, and taxes in connection with leased property are excluded. Many accountants interpret this to mean that all taxes, including sales taxes, levied on lease payments are considered executory costs since the lessor is merely acting as a collection agent for the taxing authority.

Other accountants believe that only taxes other than sales taxes (such as property taxes) should be excluded from the minimum lease payments because sales taxes are often capitalized as part of the cost of purchased assets. FASB ASC 840-10-10-1 states that the criteria are derived from the concept that a lease that transfers substantially all of the benefits and risks incident to ownership should be accounted for as the acquisition of an asset and the incurrence of an obligation.

Because the authoritative pronouncements do not specifically address whether sales taxes should be included as part of minimum lease payments, practice varies and should be determined by the company's general policy for accounting for sales taxes on purchased assets.

Regardless of which approach is used, in order to properly apply the 90 percent test referred to in FASB ASC 840-10-25-1(d), the components of the numerator and denominator should be the same. For example, if the sales taxes are included as part of the minimum lease payments (the numerator) then the sales taxes should be included in the fair value of the leased asset (the denominator).

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.12 Balance Sheet Classification of Revolving Line of Credit

Inquiry—A company has a revolving line of credit with a bank. The company is only required to make monthly interest payments. No principal payments are required. In the event the credit line is terminated, the principal is due 12 months after the date of termination.

Should the principal amount be classified as current or long-term in a classified balance sheet?

Reply—Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 210-10-45-9 states that liabilities whose regular and ordinary liquidation is expected to occur within a relatively short period of time, usually 12 months, are intended for inclusion in the current liability classification. If the line of credit has not been terminated at the balance sheet date, the principal amount should be classified as long-term, unless the company intends to repay the outstanding debt within 12 months.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.13 Uncertainty Arising From Violation of Debt Agreement

Inquiry—At the end of 20X1, a company was in violation of its long-term debt covenant and was unable to obtain a waiver from the bank. It therefore reclassified its debt to current and appropriate footnote disclosures were made. During 20X2, the violation was cured. What is the proper classification of the debt in the company's 20X2 comparative financial statements?

Reply—Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) ASC 470-10-45-11 states that:

Current liabilities shall include long-term obligations that are or will be callable by the creditor either because the debtor's violation of a provision of the debt agreement at the balance sheet date makes the obligation callable or because the violation, if not cured within a specified grace period, will make the obligation callable. Accordingly, such callable obligations shall be classified as current liabilities unless either of the following conditions is met:

- a. The creditor has waived or subsequently lost (for example, the debtor has cured the violation after the balance sheet date and the obligation is not callable at the time the financial statements are issued) the right to demand repayment for more than one year (or operating cycle, if longer) from the balance sheet date. If the obligation is callable because of violations of certain provisions of the debt agreement, the creditor needs to waive its right with regard only to those violations.
- b. For long-term obligations containing a grace period within which the debtor may cure the violation, it is probable that the violation will be cured within that period, thus preventing the obligation from becoming callable.

Since the violation was cured in 20X2, the debt should be classified as long-term in the 20X2 financial statements. The debt should not be reclassified to long term in the 20X1 financial statements because it was a current liability based on the facts existing at the 20X1 balance sheet date.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

[.14] Reserved

.15 Disclosure of Five-Year Maturities on Long-Term Debt

Inquiry—A company entered into a 10-year loan agreement with a lender. The mortgage note contains a variable interest rate based on prime plus one percent. In accordance with Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 440, *Commitments*, the company will disclose the maturities on the debt for each of the next five succeeding years. Should the disclosure include principal and interest?

Reply—No. The required disclosure of the amount of scheduled repayments for each of the five succeeding fiscal years relates only to principal repayments and should not include interest. Disclosure is also called for when interest rates vary with the prime rate.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.16 Amortization of Premium or Discount in Investment Securities With an Early Call Date

Inquiry—Investment securities may be acquired at par value, at a premium, or at a discount. If the investment securities have an earlier call date, how should the amortization of premium or accretion of discount be recorded?

Reply—Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 310-20 applies to the accounting for discounts, premiums, and commitment fees associated with the purchase of loans and other debt securities such as corporate bonds. In accordance with FASB ASC 310-20-35-26, “the calculation of the constant effective yield necessary to apply the interest method shall use the payment terms required by the loan contract,

and prepayments of principal shall not be anticipated to shorten the loan term.” Accordingly, the period of amortization or accretion is from the purchase date to the maturity date. As provided by FASB ASC 310-20-35-26, in order to amortize the premium or accrete the discount to an early call date, the enterprise must hold a large number of similar loans for which prepayments are probable and the timing and amount of prepayments can be reasonably estimated.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.17 Disclosure of Covenant Violation and Subsequent Bank Waiver

Inquiry—At the balance-sheet date, an entity was in violation of certain provisions of the loan covenant associated with its long-term debt. Under the terms of the loan agreement, the obligation is now callable by the creditor. Subsequent to the balance-sheet date, the bank waived its right to demand repayment for more than one year from the balance-sheet date. Therefore, the loan remained classified as long-term, per Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 470-10-45-12. Does the covenant violation and subsequent bank waiver need to be disclosed in the financial statements?

Reply—The authoritative literature applicable to nonpublic entities does not address disclosure of debt covenant violations existing at the balance-sheet date that have been waived by the creditor for a stated period of time. Nevertheless, disclosure of the existing violation(s) and the waiver period should be considered for reasons of adequate disclosure. If the covenant violation resulted from nonpayment of principal or interest on the debt, inability to maintain required financial ratios, or other such financial covenants, that information may be vital to users of the financial statements even though the debt is not callable. If the lender has waived the right for greater than one year but retained the future covenant requirements (i.e., covenant requirements will have to be met at interim dates during the next 12 months), the accounting and disclosure provisions of FASB ASC 470, *Debt*, apply.

For SEC registrants, Regulations S-X, Article 4, Section 210-4-08(c), requires disclosure of the amount of the obligation and the period of waiver whenever a creditor has waived its right to call the debt for a stated period of time.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

[The next page is 2471.]

Section 3400

Contingent Liabilities

.01 Contested Liability

Inquiry—A company acquired the entire outstanding stock of another company several years ago. The acquired company was reorganized under IRS Code Section 334(b)(2) causing its building and equipment to be written up in value. Inventory was later written down.

An unpaid portion of the original purchase price is claimed by the former owners of the acquired company, but this is contested by the acquiring company on the grounds that the value of the acquired company's stock was misrepresented.

The acquired company's shareholders intend to sue the acquiring company for the unpaid balance, but a suit has not yet been filed. How should the amount due under the original purchase contract and the possible suit be reflected on the acquiring company's financial statements?

Reply—Because the possibility of a suit exists, footnote disclosure describing the entire dispute should be made, including legal counsel's comment that no suit is pending at this time. The amount due under the original purchase contract, plus accrued interest, should still be reported as a liability. No adjustments should be made in the acquiring company's financial records until the dispute is settled or legal counsel advises that a statute of limitations effectively bars filing of the suit in question and the company is not legally liable to pay the debt.

[.02] Reserved

[.03] Reserved

.04 Accounting for Issuance of Cents Off Coupons

Inquiry—A client includes with its consumer product a coupon for cents off on the next purchase of the product. Should the coupon be accounted for as a reduction of the selling price when the second product is sold?

Reply—Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 450-20-05-10 would consider the possible future coupon claims as a loss contingency to be evaluated as a future event. More than likely, the redemption of some or all of the coupons would be considered a *probable* event as defined in FASB ASC glossary. The amount to be accrued and charged to earnings at the time the first product is sold should be based on a reasonable estimate of the amount of coupons expected to be presented for redemption. This estimate could be based on experience in previous promotions.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

[.06] Reserved

[The next page is 2571.]

Section 3500

Commitments

.01 Accounting for Contract to Cut Timber

Inquiry—A corporation is engaged in the forest products industry and purchases timber under both “pay as cut” (specifies a rate the buyer will pay per unit of volume cut) and “lump sum” (buyer pays a fixed amount for the right to cut timber on a specific tract of land). The corporation agrees to purchase timber on land which is identified in the contract. The exact amount of timber purchased can vary in total footage as well as species due to the nature of the goods. Is it proper to recognize the transactions as assets and liabilities on the balance sheet?

Reply—It would be improper to recognize a contract to cut timber as an asset and a liability unless the contract, at the time it was entered into, resulted in the purchase of the timber.

A distinction must be made between a contract that is executory in nature and one in which a sale and a purchase of lumber has occurred. Evidence of a purchase would be the transfer of title to the lumber at the time the contract is signed. Such a transfer usually occurs with lump sum contracts and may occur under pay as cut contracts if they include performance guarantees or risk of monetary damages if not performed. Therefore, those contracts would generally be recognized as assets and liabilities.

Receiving title at the time the timber is cut rather than at the time the contract is signed makes the contract executory. It is generally accepted practice to adequately disclose the nature and amounts of commitments relating to executory contracts in the notes to financial statements. Therefore, pay as cut contracts without performance guarantees or risk of monetary damages would generally not be recognized as assets and liabilities until performance occurs.

.02 Liability Under Foreign Bank's Letter of Payment Guarantee

Inquiry—A client, an import-export firm, agreed to purchase goods from a foreign manufacturer. The agreement calls for advance payment with the goods being delivered over the twelve-month period following the date of the agreement. The client arranged to make this advance payment through a letter of credit issued by a U.S. bank. The U.S. bank has received a letter of payment guarantee issued by a bank in the foreign country. If the supplier fails to make shipments under the terms of the agreement, the U.S. bank will look to the foreign bank for any unpaid advances owed to the U.S. bank by the client. The U.S. bank will look to the client for payment of all amounts represented by shipments to the client under the terms of the agreement.

Is the client directly liable for the amount advanced by the U.S. bank through its letter of credit, or does the client become liable only as the goods are received and payment is due the U.S. bank?

Reply—The client is directly liable for the amount advanced to the foreign supplier. It appears from the description of the transactions that the foreign bank is contingently liable if the supplier does not perform under the agreement. The offsetting asset would be classified as an “Advance to Suppliers.” Additional footnote disclosure of the financial arrangements would also be required.

[.03] Reserved**.04 Recognition of Losses on Purchase Commitments**

Inquiry—Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 330-10-35-17 states: “A net loss on firm purchase commitments for goods for inventory, measured in the same way as are inventory losses, shall be recognized in the accounts”. FASB ASC 330-10-50-5 further states: “The amounts of net losses on firm purchase commitments accrued under paragraph 330-10-35-17 shall be disclosed separately in the income statement.”

Does this statement mean that the measurement of losses cannot be done on an item by item basis but must only be done if there is an overall net loss on purchase commitments?

Reply—Net losses apply to specific purchase commitments and contracts, and not necessarily to components of major categories of inventories, as discussed in FASB ASC 330-10-35-8.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.05 Letters of Credit

Inquiry—Should a company report its outstanding letters of credit as a liability in the financial statements?

Reply—Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 440-10-50-1 requires disclosure of unused letters of credit. They are commitments and should not be reported as a liability in the financial statements.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.06 Covenants Imposed by Loan Agreements

Inquiry—Restrictive covenants under certain loan agreements of Company A require the Company to maintain a special level of working capital, reduce the amount of its debts, and restrict the amount of retained earnings available for dividend payments. Should the restrictive covenants be disclosed?

Reply—FASB ASC 440-10-50-1 requires the disclosure of restrictive covenants.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC; Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

.07 Disclosure of Unused Lines of Credit

Inquiry—Should nonpublic companies disclose the existence of unused lines of credit that are available as of the balance sheet date?

Reply—Although public companies are required [pursuant to SEC Regulation S-X, section 210.5-02.19(b)] to disclose significant unused lines of credit for short-term financing in the notes, there is no such explicit requirement for nonpublic companies under generally accepted accounting principles. However, under certain circumstances, disclosure by nonpublic companies may be advisable based on the general principle of adequate disclosure.

The notes, as well as the financial statements, should be informative of matters that may affect their use, understanding, and interpretation.

[Amended, June 1995; Revised, October 2009, to reflect conforming changes necessary due to the withdrawal of SAS No. 69; Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

[The next page is 2671.]

Section 3600

Deferred Credits

.01 Balance Sheet Presentation of Unearned Revenue

Inquiry—A client, a motor club with an insurance company subsidiary, has annually contended that unearned insurance premiums and membership dues should be presented on the consolidated balance sheet as deferred income immediately preceding the members' equity and should not be included in the amount for total liabilities. The client recognizes the revenues on the insurance premiums and membership dues on a pro rata basis over the period covered by the insurance policy and the memberships, therefore, the auditors have maintained that the unearned portion of the insurance premiums and membership dues represent a liability on the part of the client to render services in the future.

Is it appropriate to show these unearned premiums and dues outside the liability section of the balance sheet?

Reply—FASB Concepts Statement No. 5, *Recognition and Measurement in Financial Statements of Business Enterprises*, paragraph 84, indicates that amounts received for goods or services in advance are not treated as revenue of the period in which they are received but as revenue of the period or periods in which they are earned. These amounts are carried as “unearned revenue”—that is, liabilities to transfer goods or render services in the future—until the earnings process is complete. Therefore, the unearned portions of the insurance premiums and membership dues represent liabilities to provide services in the future. While the description of the liabilities might vary, to present the unearned premiums and membership dues outside of the liability section of the balance sheet would be inappropriate.

Section 4110

Issuance of Capital Stock

.01 Expenses Incurred in Public Sale of Capital Stock

Inquiry—A closely held corporation is issuing stock for the first time to the public.

How would costs, such as legal and accounting fees, incurred as a result of this issue, be handled in the accounting records?

Reply—Direct costs of obtaining capital by issuing stock should be deducted from the related proceeds, and the net amount recorded as contributed stockholders' equity. Assuming no legal prohibitions, issue costs should be deducted from capital stock or capital in excess of par or stated value.

Such costs should be limited to the direct cost of issuing the security. Thus, there should be no allocation of officers' salaries, and care should be taken that legal and accounting fees do not include any fees that would have been incurred in the absence of such issuance.

.02 Stock Issued for No Consideration

Inquiry—A corporation issued stock without receiving any consideration and set up goodwill to offset the credit to capital stock. Was this transaction properly recorded?

Reply—This is primarily a legal rather than an accounting question, and it would be advisable to obtain legal advice as to the effect of such issuance. If such stock were legally issued, the appropriate entry would be to show the offset as discount on capital stock issued. Goodwill should only be recognized when acquired, in accordance with Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 350, *Intangibles—Goodwill and Other*.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.03 Stock Issued for Accounting and Management Services

Inquiry—A newly formed corporation is going public and wishes to issue shares of stock for certain services, such as accounting, legal, underwriting, printing, etc.

How should the value for these services be set up on the books of the corporation?

Reply—It would be appropriate to record the stock issued at the fair value of the stock or services rendered, whichever is the more clearly evident. The recipients should be able to furnish evidence as to such fair value. Since the amounts the Securities and Exchange Commission might consider to be fair value cannot be predicted, a consultation with the staff of the Commission might be advisable before formal submission of the financial statements.

[.04] Reserved

[.05] Reserved

[.06] Reserved

.07 Expenses Incurred in Withdrawn Public Offering

Inquiry—What is the proper accounting for the costs of a public offering that was withdrawn?

Reply—Accounting Research Study No. 15, *Stockholders' Equity*, page 23, discusses accounting for stock issue costs. The Study states that such costs are usually deducted from contributed portions of equity, that is, capital stock or capital in excess of stated or par value, as a reduction in the proceeds from the sale of securities.

Since there were no proceeds from a sale of securities to offset the costs, the costs should be charged to current year's income, but not as an extraordinary item.

[.08] Reserved

.09 Costs Incurred to Acquire Treasury Stock

Inquiry—A company has incurred legal and accounting costs arising from the acquisition of treasury stock. How should the costs be classified in the company's financial statements?

Reply—There is no authoritative literature on this particular subject. Some accountants believe that costs associated with the acquisition of treasury stock should be treated in a manner similar to stock issue costs. Stock issue costs are usually accounted for as a deduction from the gross proceeds of the sale of stock. Costs associated with the acquisition of treasury stock may be added to the cost of the treasury stock.

.10 Costs Incurred in Shelf Registration

Inquiry—A public company incurs legal and other fees in connection with an SEC filing for a stock issue it plans to offer under a shelf registration. How should the company account for these costs?

Reply—The costs should be capitalized as a prepaid expense. When securities are taken off the shelf and sold, a portion of the costs attributable to the securities sold should be charged against paid in capital. Any subsequent costs incurred to keep the filing "alive" should be charged to expense as incurred. If the filing is withdrawn, the related capitalized costs should be charged to expense.

.11 Default on Stock Subscribed

Inquiry—A company entered into a stock subscription agreement to sell its stock. The agreement called for three monthly payments of \$10,000 after which the stock would be issued. Although the first payment was received by the company, the subscriber subsequently defaulted on the remaining two payments. According to the agreement, any payments made by the subscriber towards the stock subscription are not refundable. How should the company account for the retention of the first \$10,000 payment?

Reply—The payment should be recorded as an addition to shareholders' equity (i.e., a credit to paid-in capital). According to Financial Accounting

Standards Board (FASB) *Accounting Standards Codification* (ASC) 505-10-25-2, capital transactions shall be excluded from the determination of net income or the results of operations.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

[The next page is 3121.]

Section 4120

Reacquisition of Capital Stock

[.01] Reserved

[.02] Reserved

.03 Repurchase of Stock in Excess of Retained Earnings and Additional Paid-in Capital

Inquiry—A corporation has contracted to repurchase, over a period, some of its own stock. The corporation does not have sufficient retained earnings and additional paid-in capital from which to charge the excess of amounts paid over par value. How should this repurchase be reflected in the company's financial statements?

Reply—In many states, it would not be legal for a corporation to repurchase shares of its own stock at a cost greater than the amount of retained earnings of the corporation. Competent legal advice as to the effect of the agreement should be obtained. This may be an executory contract, with only amounts currently being paid for considered as repurchases. If this be the case, only amounts disbursed are to be recognized in the accounts, with an offset to treasury stock. There should of course be disclosure in a note to the financial statements of the date, number of shares, and amounts of future payments under the contract. Such future payments would thus include the interest factor, which would be an additional cost of the stock, rather than being interest expense.

However, if legal counsel advises that this is in fact a completed contract and enforceable, the full amount should be shown (excluding interest) as treasury stock, with an offsetting liability. Again, there should be footnote disclosure of the nature of the liability and of the interest rate and maturity dates. Under these circumstances, the interest would be included as a current expense.

[.04] Reserved

.05 Purchase of Treasury Shares for an Amount in Excess of Market Price

Inquiry—A corporation enters into an agreement to purchase a major block of its shares from one of its shareholders at a price in excess of its current market price. These shares represent the controlling interest in the corporation. The purchase price of the treasury stock does not include any other rights or privileges. At what value should the corporation record the treasury stock?

Reply—Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 505-30-30-4 states that transactions do arise in which an acquisition of an enterprise's stock may take place at prices different from routine transactions in the open market. A block of shares representing a controlling interest will generally trade at a price in excess of market, and a large block of shares may trade at a price above or below the current market price depending on whether the buyer or seller initiates the transaction. A company's acquisition of its shares in those circumstances is solely a treasury stock transaction and is properly accounted for at the purchase price of the treasury shares.

In this situation, since the purchase price does not include amounts attributable to items other than the shares purchased, the entire purchase price should be accounted for as the cost of treasury shares.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

[The next page is 3201.]

Section 4130

Warrants

[.01] Reserved

[.02] Reserved

.03 Warrants Recquired

Inquiry—Company A issued, in a prior year, stock warrants with a subordinated note. The value of the warrants as determined at the date of issuance was added to capital in excess of par value and recorded as deferred loan costs to be amortized over the term of the loan. Company A plans to reacquire the warrants for \$110,000. Should the \$110,000 be:

- (a) accounted for as additional cost of the loan and amortized over the remaining term of the loan, or
- (b) accounted for as a capital transaction and deducted from capital in excess of par value, or
- (c) accounted for in some other manner?

Reply—The purchase price of the warrants should be deducted from either capital in excess of par value or retained earnings.

[The next page is 3341.]

Section 4150

Stock Dividends and Stock Splits

[.01] Reserved

.02 Stock Dividend Affecting Market Price of Stock

Inquiry—A company issued a 10 percent stock dividend. May the dividend be treated as a stock split if the dividend resulted in a drop in the market price of the stock?

Reply—Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 505-20-25-3 states, in part: “except for a few instances, the issuance of additional shares of less than 20 or 25 percent of the number of previously outstanding shares would call for treatment as a stock dividend as described in paragraph 505-20-30-3.” FASB ASC 505-20-30-3 requires a transfer from retained earnings to the category of permanent capitalization in an amount equal to the fair value of the additional shares issued.

In order to treat the 10 percent “stock dividend” as a “split-up effected in the form of a dividend,” the company would have to demonstrate that the additional shares issued is “large enough to materially influence the unit market price of the stock” as indicated in FASB ASC 505-20-25-3.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

[The next page is 3401.]

Section 4160

Contributed Capital

.01 Payment of Corporate Debt by Stockholders

Inquiry—Three shareholders own stock in Corporations A and B. They agree to personally pay a debt of Corporation A by giving the creditor stock in Corporation B. How should this transaction be recorded on the books of Corporation A?

Reply—The payments by the three stockholders of Corporation A's debt would represent an additional contribution by the stockholders to Corporation A. This can be recorded as a credit to "additional capital."

[.02] Reserved

[The next page is 3501.]

Section 4200

Retained Earnings

.01 Foreign Currency Translation—Retained Earnings

Inquiry—A parent company is translating a foreign subsidiary's financial statements for consolidation purposes. It is the second year of operation for the subsidiary. How should retained earnings be translated?

Reply—For assets and liabilities, Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 830-30-45-3 requires the use of the exchange rate at the balance sheet date. For revenues, expenses, gains, and losses, the exchange rate at the dates on which those elements are recognized shall be used. However, an appropriately weighted average exchange rate for the period may be used to translate the income statement.

In year two, net income or loss would be translated at the weighted average exchange rate for the current year and accumulated with the historical opening translated retained earnings. It should be noted there may be a number of other transactions that may affect the subsidiary's retained earnings including the declaration of dividends.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

[The next page is 3551.]

Section 4210

Dividends

.01 Write-Off of Liquidating Dividends

Inquiry—Quite a few years ago, cash dividends were distributed to stockholders in excess of earnings. The company would now like to “clean up” the stockholders’ equity section of the balance sheet by removing the account “Prior Years’ Liquidation Dividends” which is shown as a reduction of the capital stock account. Can the liquidating dividends account be written off against “retained earnings” or “paid in capital in excess of par value”?

Reply—Essentially, this question is a legal one as to whether cash distribution to stockholders in excess of earnings in prior years may be charged to earnings in subsequent years. When liquidating dividends are declared, the charge is made to accounts such as “capital repayment,” “capital returned,” or “liquidating dividends” which appear on the balance sheet as offsets to paid-in capital. By this treatment, the amount of capital returned as well as the amount of capital originally paid in can be disclosed. Perhaps the wisest thing to do under the circumstances is to consult legal counsel to determine whether the write-off proposed is legal under the corporate statutes of the state. Perhaps it is legally permissible, under the laws of incorporation, to reduce the par or stated value of the corporation’s stock, thereby creating a reduction surplus which may then be used retroactively to absorb the original deficit, on the ground that the excess payments were dividends in partial liquidation.

[.02] Reserved

[.03] Reserved

.04 Accrual of Preferred Dividends

Inquiry—A corporation has cumulative preferred stock. It has not paid any dividends on this stock in the last three years. Should the corporation accrue the preferred dividends in arrears?

Reply—Generally, preferred stock contains a cumulative provision whereby dividends omitted in previous years must be paid prior to the payment of dividends on other outstanding shares. Since dividends do not become a corporate liability until declared, no accrual is needed. Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 505-10-50-5 requires entities to disclose within its financial statements (either on the face of the statement of financial position or in the notes thereto) the aggregate and per-share amounts of arrearages in cumulative preferred dividends. Furthermore, FASB ASC 260-10-45-11 states that dividends accumulated for the period on cumulative preferred stock (whether or not earned) should be deducted from income from continuing operations and also from net income when computing earnings per share. If there is a loss from continuing operations or a net loss, the amount of the loss should be increased by those preferred dividends. Preferred dividends that are cumulative only if earned should be deducted only to the extent that they are earned.

If preferred dividends are not cumulative, only the dividends declared should be deducted. In all cases, the effect that has been given to preferred

dividends in arriving at income available to common stockholders in computing basic earnings per share should be disclosed for every period for which an income statement is presented.

[Amended, September 1997; Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

[The next page is 3631.]

Section 4230

Capital Transactions

[.01] Reserved

.02 Exchange of No Par Common Shares for Par Value Preferred Shares

Inquiry—The shareholders of Corporation A exchanged their no par common shares for preferred shares with a par value to “freeze” the value of stock ownership for estate tax purposes. How should the difference between the carrying basis of the preferred shares and the carrying basis of the common shares be accounted for?

Reply—The difference should be charged or credited to additional paid-in capital. If there is no additional paid-in capital, any “debit” balance should first be charged to retained earnings and any remaining “debit” balance should be described in the financial statements as a discount on preferred stock. However, in many states the law requires that issued stock must be fully paid and nonassessable and therefore, if the par value of the preferred shares exceeds the market value of the common shares this exchange may have legal implications that should be considered.

.03 Use of Stockholder’s Assets to Repay Corporate Loan

Inquiry—The sole owner of a corporation agreed to collateralize the company’s bank loan with personal assets. As a result of financial difficulties, the company’s bank loan was called and its owner agreed to sell his personal assets collateralizing the company’s loan, to repay the bank debt. What is the appropriate accounting of this transaction?

Reply—The monies used to repay the bank loan are in substance a further capital infusion by the individual, which increases his investment in the company. The company would eliminate its liability to the bank and credit paid-in capital.

Section 5100

Revenue Recognition

.01 Equipment Sales Net of Trade-Ins

Inquiry—A Client who deals in heavy equipment records all sales at net of trade-ins. Is this an acceptable accounting practice?

Reply—Support for the accounting treatment for trade-ins which this client follows could not be found. Sales should be credited with the nominal or stated contract price, and the difference between (a) the trade-in allowance and (b) the amount determined by pricing the trade-in at net realizable value minus normal profit margin should be treated as a sales allowance or discount. The traded-in equipment should be set up in inventory at an amount which, when reconditioning costs are added, will allow a margin approximating a normal profit when the sale is made.

.02 Rights to Broadcast Time Received for Services

Inquiry—An advertising agency creates and sells jingles and station identifications to radio and television stations. The agency receives broadcast time credit as part payment. This broadcast time is then resold by the agency to its clients. Should this broadcast time be recognized by the advertising agency:

1. when the agency bills the radio or television station, or
2. when it is subsequently sold to advertisers?

Reply—The broadcast time credit should be recognized as income when the services are billed to the station. It may be necessary to estimate the value of the credits. A corresponding asset account should be charged. This asset would be relieved as the broadcast time is sold by the advertising agency.

[.03] Reserved

.04 Discounts on Prepaid Funeral Arrangement Plans

Inquiry—An incorporated mortuary sells pre-need funeral plans in addition to rendering current mortuary services. These pre-need funeral plans are sold at a discount in order to be attractive to the public. All monies received from the sale of these plans are placed in a trust fund which has been set up at a local bank. The bank is the trustee of the trust and makes investments as it sees fit. The pre-need funeral plan agreements stipulate that all income earned by the trust belong to the mortuary, and withdrawals of such income from the trust may be made by the mortuary periodically. In return for the feature of the agreements calling for the mortuary's entitlement to the trust fund income, purchasers of the pre-need plans are permitted to buy the plans at a substantial discount. The agreements also provide for fully-covered funeral benefits in certain cases, although the plans may not be fully paid at time of death. Another advantage to the purchasers is that the costs of their funerals will not be influenced by increases in the cost of living index.

Certain expenses are met by the mortuary in the selling of its pre-need funeral plans; these are recorded monthly in a separate expense account in its general ledger. Trust fund income earned is also recorded monthly in the mortuary's general ledger, in a separate income account. As pre-need plans are utilized by persons who had purchased them earlier, the special discounts mentioned in the preceding paragraph are recorded in a separate expense

account in the mortuary's general ledger. It should be emphasized here that such discounts are not reflected as an expense in the mortuary's operations until such time the plans are actually used, whereas the expenses of the sales of the plans and the income earned by the trust affect operations currently, with no dependency whatsoever on the deaths of the purchasers or holders of the plans.

In order to achieve a better matching of expenses with revenues accruing from the sales of plans, could the trust fund income or the excess of trust fund income over the expenses of selling the plans be deferred until the plans are utilized? Or could the special discounts be charged to income at some date prior to the utilization of the plans?

Reply—It would be more acceptable to currently accrue or recognize selling expenses, fees and commissions, and trust fund income rather than use the “completed contract” or deferral accounting approach. If it is a fact that costs of furnishing services commonly exceed the trust funds expended at time of utilizing a plan, current provision should be made on an estimated basis for the potential or possible losses (more accurately, estimated excess of future servicing costs over monies to be released from trust to defray same) on plans not utilized as yet at the balance sheet date.

The special discounts are more in the nature of sales adjustments rather than costs or expenses.

[.05] Reserved

[.06] Reserved

.07 One-Cent Sales

Inquiry—A client in the fast food business has a “one-cent sale” once a week. For example, the sale might be two cheeseburgers for the price of one (60¢) plus one cent. The company would record the transaction as follows:

Cash (.60 + .01)	\$.61	
Advertisement Expense59	
Sales (.60 x 2)		\$1.20

The company makes this entry so that their “food costs” are not distorted, but should an adjustment be made at the end of the year for financial reporting purposes eliminating this advertising expense against sales?

Reply—The practice of crediting sales and charging advertising expense for the difference between the normal sales price and the “bargain day” sales price of merchandise is not acceptable for financial reporting. Realization of the full sales price cannot properly be imputed under such conditions. To do so would seem to imply that the same quantities would have been sold if the price had not been reduced.

It might however be appropriate to adjust the cost of sales and charge advertising for the cost of the one-cent hamburger. Such cost of sales should include only out-of-pocket expenses.

.08 Life Membership Fees in a Club

Inquiry—A company is engaged in a service club enterprise. What is the proper accounting for life membership fees?

Reply—The life membership fees should be allocated over the time the individual may be expected to require the services of the club.

[.09] Reserved

.10 Members of Country Club Assessed for Debt Retirement

Inquiry—A country club has voted to impose a special yearly assessment on its membership for ten years. The proceeds are to be used to retire a first mortgage on the property of the club.

The assessment is being imposed on all members including voting certificate holders and nonvoting associate members.

Is the proper accounting treatment of this transaction a contribution to capital, or are dues to be reflected in the annual income statement?

Reply—When billing the assessments each year, the receivables from the members can be shown as an asset with a credit to income for the special assessment. Such amounts might then be appropriated to a special membership equity, perhaps entitled “appropriation for retirement of debt.” The financial statements should disclose that the directors had voted a special assessment for ten years and the amount of assessment per year. The first or the last year for the assessment, or both, should also be disclosed.

.11 Excise Tax on Club Dues

Inquiry—The members of certain private clubs must pay a federal excise tax in addition to their annual dues. Should the clubs record, as revenues, the dues net of the excise tax, or should revenues include both dues and taxes?

Reply—A club, in collecting excise taxes on dues, is acting as no more than an agent or conduit for the federal government. The amounts paid to the club by members to be turned over as excise taxes should not be construed as dues, and to show them as such on the income statement is erroneous.

[.13] Reserved

.14 Recognition of Fees Earned on Construction Mortgage Placements

Inquiry—A client is in the business of bringing lenders and borrowers together for a fee. When a construction mortgage has been arranged and agreed to, it would appear that the client has earned its fee. However, because of the terms of the fee arrangement, there is some doubt as to when the income should be recognized.

The following is a summary of the types of transactions involved:

1. Negotiable Note

The company receives a negotiable note in payment of its fees. Generally the note is unsecured and non-interest-bearing and is payable over the same period as the construction draws on the related mortgage are to be made.

2. Nonnegotiable Note

The terms of the nonnegotiable note are comparable to the negotiable note.

3. Commitment Letter, Not Contingent on Future Events

The company receives a letter from the borrower indicating that the lender and the borrower have agreed on the terms of the

mortgage. In addition, the letter states that the borrower agrees to pay the company a fixed fee by a specified date for services rendered in arranging the loan.

4. Commitment Letter, Contingent on Future Draws

The company receives commitment letters from the borrower as described in No. 3 in the preceding. However, the commitment letters state that a certain amount of the fee will not be paid unless or until certain construction draws are received from the lender.

When should revenue be recognized as earned by the client?

Reply—Revenue recognition is discussed in Financial Accounting Standards Board (FASB) Concepts Statement No. 5, *Recognition and Measurement in Financial Statements of Business Enterprises*, paragraphs 83 and 84.

Applying the guidelines of Concepts No. 5, paragraphs 83 and 84, to the specific situations, revenue would be recognized as follows:

1. Negotiable Note

Income would be recognized when the services have been performed and billed which may be prior to receipt of the negotiable note.

2. Nonnegotiable Note

The terms of the nonnegotiable note are comparable to the negotiable note, and revenue would be recognized in a similar manner.

3. Commitment Letter, Not Contingent on Future Events

Such a letter would be evidence that the services have been rendered and are now “billable”; therefore, the fee has been earned and income should be recognized.

4. Commitment Letter, Contingent on Future Draws

From the description, it appears that the agreement between the client, borrower, and lender in this case is such that the parties do not consider all the services rendered until actual borrowings take place even though the client need not physically do anything else. In such a situation, a portion of the fees should be deferred until the stipulated draw provisions have been met.

[.15] Reserved

.16 Rental Revenue Based on Percentage of Sales

Inquiry—A supermarket built an addition to its store to house a liquor store. The rent to the liquor store is to be a percent of its sales. On its income statement, would it be proper for the supermarket to include the liquor store sales as though they were their own sales? The rent would then appear as a gross margin.

Reply—No. In accordance with the FASB *Accounting Standards Codification* (ASC) glossary, this transaction meets the definition of a *lease*, which is “... the right to use property, plant, or equipment (land and/or depreciable assets) usually for a stated period of time.”

The revenue received from the liquor store represents rental income to the supermarket and it would be inappropriate for the supermarket to include as its sales the sales of the liquor store. However, it would be appropriate for the supermarket to include the rental income as part of its gross revenues.

[Amended June 1995; Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.20 Payment for Termination of License Agreement

Inquiry—A research and development company holds numerous patents. The company derives its income from the sale of products which utilize its patents as well as from the licensing of the patents, for which it receives royalties, and also from the sale of patent rights, for which it receives a single payment for the term of the license.

A licensee desired to terminate its license, since it was no longer using the technology contained in the company's patent, and paid to the company a lump sum termination payment. This payment approximated the amount the company would have earned during the remaining years of the license agreement. How should the termination payment be reflected in the company's financial statements?

Reply—The transaction is similar to sale of a license for the remaining life of a patent and should be accounted for in the same manner. If this is the sole license for a patent, any remaining unamortized cost of such patent should be written off at this time. If the license represents only a portion of the use of the patent, an appropriate portion of the remaining unamortized cost should be written off. The proceeds should be included in this year's current operations, and there should be disclosure that a major source of income from licensing agreements is being terminated.

.25 Finished Parts Held by Manufacturer for Customers

Inquiry—Corporation A, a subcontractor, manufactures precision parts to customers' specifications. Parts produced by Corporation A are inspected by a customer's quality control representative and then held in a secured area in Corporation A's plant. Corporation A is entitled to full contract payment on parts inspected and held in the secured area. Historically, there has been a short time span between completion date and scheduled shipment date, but recently production efficiency has improved to the extent that contracts are completed significantly in advance of scheduled shipment dates. Based on the recent experience of Corporation A, what is the proper date for revenue recognition?

Reply—FASB Concepts Statement No. 5, *Recognition and Measurement in Financial Statements of Business Enterprises*, paragraph 83, states in part:

“Revenues are not recognized until earned. An entity’s revenue-earning activities involve delivering or producing goods, rendering services, or other activities that constitute its ongoing major or central operations, and revenues are considered to have been earned when the entity has substantially accomplished what it must do to be entitled to the benefits represented by the revenues”

Revenue should be recognized at the time of inspection and delivery to the secured areas, since the realization criteria have been met. Corporation A should disclose the method followed for income recognition as part of its disclosure of accounting policies.

[.27] **Reserved**

.28 Revenue From Private Label Sales

Inquiry—Corporation A produces certain products that are sold under Corporation B’s label. Corporation B reimburses Corporation A for all direct costs of raw material, ingredients, and packaging plus 10 cents per pound processing fee. Corporation A prepares an invoice for each shipment which itemizes the various direct costs plus 10 cents per pound processing fee. Should Corporation A record the total invoice amount as a sale or should it record the processing fee as revenue and the reimbursed direct costs as a reduction of expenses?

Reply—Corporation A should probably record the total invoice amount as a sale. Accounting for contracts of this type would be treated similar to cost-plus-fixed-fee contracts discussed in FASB ASC 912-605.

[.30] **Reserved**

.31 Accounting for Zero Coupon Bonds

Inquiry—A client purchased a 20-year zero coupon treasury bond for \$189, with a maturity value of \$1,000, at an 8 1/2 percent yield to maturity.

- (1) What authoritative pronouncement would provide guidance for this transaction?
- (2) How is the interest income computed for financial reporting purposes?

Reply—(1)FASB ASC 835-30-15-2 states that, “The guidance in this Subtopic applies to receivables and payables that represent contractual rights to receive money or contractual obligations to pay money on fixed or determinable dates, whether or not there is any stated provision for interest Some examples are secured and unsecured notes, debentures, bonds”

(2)FASB ASC 835-30-35-2 states that, “the difference between the present value and the face amount shall be treated as discount or premium and amortized as interest expense or income over the life of the note in such a way as to result in a constant rate of interest when applied to the amount outstanding at the beginning of any given period.” This is the “interest” method described in paragraphs 2–3 of FASB ASC 835-30-35. However, other methods of amortization may be used if the results obtained are not materially different from those which would result from the “interest” method.

The following is an example of the application of the interest method. To calculate the semi-annual amount, multiply the purchase price by 4 1/4 percent (half of 8 1/2 percent) to arrive at the adjusted cost basis for the first six-month period. Then repeat this calculation for the next six-month period using the adjusted cost basis. The total amount of income (accrual) in the first year will be \$16.40. Each year the cost basis is increased by the amount of income (accrual) reported in the previous year, as indicated in the following example:

<i>Semi-Annual Period</i>	<i>Your Purchase Price or Adjusted Cost Basis</i>	<i>1/2 Purchase YTM</i>	<i>Accrual During Period</i>	<i>Adjusted Coast Basis at End of Period</i>
1	\$189.00	4.25%	\$8.03	\$197.03
2	197.03	4.25%	8.37	205.40
3	205.40	4.25%	8.73	214.13
4	214.13	4.25%	9.10	223.23

The interest income would be reported annually for financial reporting purposes. If the bond is held to maturity, there will be no gain or loss. If sold prior to maturity any gain or loss is determined by the difference between the adjusted cost basis and the selling price.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

[.32] Reserved

.33 Operating Lease With Rental Payments Rebated Against Purchase Price

Inquiry—A lessor corporation leases construction equipment for periods of six to eighteen months under short-term cancellable leases. The leases provide that during the first six months, 100 percent of the rentals paid may be applied toward the purchase price of the equipment if the lessee decides to purchase the equipment; during the next three months the percentage drops to 80 percent, and after nine months 60 percent may be applied toward the purchase price. The leases do not qualify as capital leases. How should the lessor account for the leases and the respective rebates?

Reply—The authoritative literature does not address this matter. The lessor should record rental income until the lessee decides to purchase the equipment. The lessor should then record the sale of the equipment net of the applicable rebate. The amount recorded as rental income should not be reclassified as sales proceeds.

[.34] Reserved

.35 Involuntary Conversion—Recognition of Gain

Inquiry—A tornado virtually destroys a company's building on June 12, 20X0. The company has insurance and expects to be reimbursed for costs incurred to refurbish the building. The company's fiscal year-end is June 30, 20X0. On August 15, 20X0, prior to the issuance of the financial statements, the company receives a check in excess of the carrying amount of the building. Should the company recognize the gain on the involuntary conversion in the June 30, 20X0 financial statements?

Reply—No. Since the company was reimbursed for an amount in excess of the carrying amount of the building there was no loss to record on June 30, 20X0. The gain, which was received on August 15, 20X0, was a gain contingency

on June 30, 20X0. Per FASB ASC 450-30-25-1, contingencies that might result in gains usually are not reflected in the accounts since to do so might be to recognize revenue prior to its realization.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.36 Sales of Investment to Minority Stockholder

Inquiry—A corporation enters into an agreement to sell an investment accounted for on the equity method to a minority stockholder in return for his shares in the corporation. The fair value of the investment exceeds its book value. Would the corporation recognize a gain on this transaction or would the excess be credited to equity?

Reply—FASB ASC 845-10-30-1 states that a transfer of a nonmonetary asset to a stockholder or to another entity in a nonreciprocal transfer should be recorded at the fair value of the asset transferred, and that a gain or loss should be recognized on the disposition of the asset. FASB ASC 845-10-30-2 also indicates that the fair value of an entity's own stock reacquired may be a more clearly evident measure of the fair value of the asset distributed in a nonreciprocal transfer if the transaction involves acquiring stock for the treasury or retirement.

The corporation should recognize as a gain, in the year in which the transaction occurs, the excess of the fair value of the investment transferred over its carrying amount.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.37 Sales Price Based on Future Revenue

Inquiry—A company sold one of its direct-mail catalog offices for cash plus a percentage of revenue to be earned over the next five years. The sales agreement limits the percentage of revenue to a stipulated maximum. Management believes the maximum will be earned within the five-year period. When should revenue from this transaction be recorded?

Reply—According to FASB ASC 450-30-25-1, “A contingency that might result in a gain usually should not be reflected in the financial statements because to do so might be to recognize revenue before its realization.”

Unless it is assured that adequate revenue will be earned to cause payment of the contingent portion of the sales price, the contingent portion of the sales price should only be accrued as earned. The accuracy and reasonableness of management's projections must be ascertained. If realization is assured, which would be relatively infrequent, revenue should be recorded as of the date of the sale using the present value of the projected cash receipts in accordance with FASB ASC 835, *Interest*.

Depreciation and Depletion

[.01] Reserved

.02 Disclosure of Depreciation Expense

Inquiry—Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 360-10-50-1 states that the financial statements should disclose depreciation *expense* for a period. Does *expense* mean the total amount of depreciation accrued (that is, credited to the allowance for depreciation account) for the period or the amount actually expensed after allowing for depreciation included in overhead apportioned to inventories?

Reply—In concerns such as public utilities and trading or commercial enterprises, determination of the total provision for depreciation is usually simple since the amounts of depreciation are generally identified in the expense accounts. In manufacturing concerns, however, there are difficulties in determining the amount of depreciation to be disclosed. Depreciation is usually included in overhead which in turn is distributed over a number of departments and products and finds its way ultimately into cost of sales through inventory accounts. To determine the amount of depreciation which is included as a part of the cost of merchandise sold may require an extensive and usually impracticable, if not impossible, analysis of cost accounts. The auditor usually solves the problem by suggesting that the amount of depreciation charged to manufacturing costs and to expense accounts be taken as representing the amount charged to income. Obviously, this method does not correctly state the depreciation charge which was recovered through sale of goods in which depreciation was an element of cost. From a practical standpoint, in view of the indicated difficulty, if not impossibility, of determining the exact amount of depreciation included in cost of sales, it has become recognized practice to report the amount of depreciation charged in the statement of income as that which has been charged to manufacturing costs and to expense accounts, even when amounts of depreciation included in inventories at the beginning and end of the period vary sufficiently to affect depreciation included in cost of sales. Such practice also is acceptable to the Securities and Exchange Commission.

[.03] Reserved

.04 Depreciation of Clothing Rented to Individuals

Inquiry—Company A maintains a stock of tuxedos, shoes and related items which are rented to individuals. Management estimates that this stock will have a useful life of approximately two years. Additional stock will be purchased from time to time as required. At the end of each fiscal year, a complete physical inventory is taken of all items on hand. What is the most appropriate accounting treatment for the stock of rental clothing?

Reply—The clothing represents a fixed asset to be depreciated over its estimated life. The estimated life should be adjusted periodically to reflect experience and should not exceed two years. The depreciation charge should be computed monthly based on inventory at the beginning of the period plus additions during the current year.

Logically it seems that loss and retirement of clothing will relate to that clothing first purchased. Accordingly the first-in first-out basis would appropriately account for such loss and retirement.

.05 Classification of Costs of Constructing a Golf Course

Inquiry—How should the costs of constructing a golf course be broken down into depreciable and nondepreciable classifications?

Reply—For the costs incurred in constructing a golf course, those expenditures made to change the land itself, exclusive of buildings, should be treated as permanent improvements to the land and are not, therefore, depreciable. These costs would include clearing the land, building fairways, changing the contour of the earth by moving and filling, building sand traps, and creating water hazards. If trees are planted, and their lives can be estimated, it would appear to be proper to depreciate these over such lives. In the absence of any reasonable estimate, trees and shrubs should be carried at cost. Any structures such as buildings, shacks or stands should be depreciated along with the costs of any vehicles such as trucks or carts, and any equipment used. A watering system should be depreciated as it is made of material that will not last indefinitely.

[.06] Reserved

[.07] Reserved

.08 Additional First Year Depreciation

Inquiry—A corporation reports depreciation expense on its financial statements at the same amount that it claims on its income tax return. If that amount included the maximum \$10,000 deduction for additional first year depreciation (election to expense recovery property) allowed for tax purposes, whereas, normal depreciation was \$18,000, would the financial statements be in accordance with generally accepted accounting principles?

Reply—FASB ASC 360-10-35-4 states, in part: “. . . depreciation accounting, a system of accounting which aims to distribute the cost or other basic value of tangible capital assets, less salvage (if any), over the estimated useful life of the unit . . . in a systematic and rational manner . . .” Accordingly, if any arbitrary additional first year depreciation amount is included in the financial statements and it is material, it would be a departure from generally accepted accounting principles. Refer to paragraph .A5 of AU-C section 705, *Modifications to the Opinion in the Independent Auditor’s Report* (AICPA, *Professional Standards*), and paragraph .06 of AU-C section 320, *Materiality in Planning and Performing an Audit* (AICPA, *Professional Standards*), for guidance on materiality.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC; Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

.09 Amortization of Leasehold Improvement

Inquiry—A zoological society leases property in the city zoo for concession stands. The society plans to construct a new building, which will house several concession stands, on the leased property. When construction is complete the title to the building will be turned over to the city. The lease is not a service concession arrangement within the scope of FASB ASC 853, *Service Concession Arrangements*. How should the building be accounted for by the zoological society?

Reply—The construction of a building on leased property is considered a leasehold improvement. A leasehold improvement is a permanent improvement or betterment that increases the usefulness of the leased property and will revert to the lessor at the end of the lease term. The costs of such improvements are normally amortized either over the life of the improvement or the lease term, whichever is shorter.

[Revised, April 2014, to reflect conforming changes necessary due to revisions to FASB ASC.]

[.10] Reserved

[The next page is 4201.]

Section 5220

Interest Expense

.01 Deferral of Payment of Interest

Inquiry—A client experienced problems in meeting its current obligations and reached an agreement with its primary creditor concerning several mortgage loans. Under the agreement, the interest rate on these loans will, for the present, be reduced from 10 percent to 8 percent, but the lender has the option in the future of increasing the interest rate to 11 percent to recover the foregone interest. At the maturity date, any unpaid interest calculated at the original 10 percent rate will be due.

How should the interest expense be recorded on the client's financial statements?

Reply—Interest should be accrued at the rate of 10 percent, the original rate under the mortgage loans. This debit would represent the interest expense charged to income. The credit would be segregated between current liabilities (an amount representing the 8 percent rate) and noncurrent liabilities (an amount representing the *deferred interest*).

[.02] Reserved

.03 Computation of Interest Expense on Long-Term Redeemable Bonds

Inquiry—A bank has issued four year nonnegotiable savings bonds with interest of 7 percent for the first year, 7 1/2 percent for the second year, 8 percent for the third year and 8 1/2 percent for the fourth year. The depositor has the option to request that he or she be paid his interest on a semiannual or annual basis, but few do so, and the normal procedure is that the interest will be compounded and left on deposit for the four years.

If a bond is redeemed prior to maturity, interest is paid to the bondholder at the rate of 5 percent per annum for the period that the bond was held, less 90 days. Few instances of bond redemption prior to maturity are anticipated.

Which of the following methods of accounting for interest expense is appropriate?

(1) Accrue interest at 7 percent for the first year, 7 1/2 percent for the second year (plus the compounding factor), 8 percent for the third year (plus the compounding factor), and 8 1/2 percent for the fourth year (plus the compounding factor), making a debit to the interest expense and a credit to the accrued interest payable on four year bonds.

(2) Determine the total amount of interest that will be due to the holder upon the maturity of the bond and accrue a pro rata share of this amount for each month of the four year period that the bond is in effect.

Reply—A rate of interest should be used which reflects the bank's liabilities and assumes that the bondholders will not redeem their bonds and not withdraw the interest prior to maturity. This is essentially the second approach in the preceding.

[.04] Reserved**.05 Amortization of Prepaid Interest on Discounted Notes**

Inquiry—An equipment leasing company will use as of the beginning of the year the interest method to amortize prepaid interest on new discounted notes. But it will continue to use the straight-line method to amortize prepaid interest on notes discounted earlier. Is the adoption of the interest method on a prospective basis a change in accounting principle?

Reply—Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 835-30-35 states that the interest method of amortization should be used but that other methods of amortization may be used if the results obtained are not materially different from those which would result from the interest method.

If the results in earlier periods would not have differed materially by using the interest method, the interest method may be adopted for the new notes, disclosed, and not be reported as a change in accounting principle.

If the results in earlier periods would have been materially different by using the interest method, the interest method should be adopted for the old and new notes, and be reported as a correction of an error.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.06 Imputed Interest on Shareholder Loans

Inquiry—A section of the Internal Revenue Code requires, under certain circumstances, that a company impute interest on demand loans made to a shareholder of the company. Would this also be required under generally accepted accounting principles? If not, must it be disclosed and would there be an effect on the deferred income tax accounts?

Reply—No. FASB ASC 835-30-15-2 states that the guidance in FASB ASC 835-30 applies to receivables and payables which represent contractual rights to receive money or contractual obligations to pay money on fixed or determinable dates. Imputed interest would not be required on demand loans since they have no fixed or determinable due date.

However, disclosure of this transaction would be required under FASB ASC 850, *Related Party Disclosures*.

There would be no effect on the deferred income tax accounts since this would be considered a permanent difference.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.07 Imputed Interest on Note Exchanged for Cash Only

Inquiry—If an enterprise receives cash in exchange for a non-interest bearing long-term note payable with a stated amount equal to the cash received, must interest be imputed on the note in accordance with FASB ASC 835, *Interest*?

Reply—If there are rights or privileges other than cash attendant to the exchange, the value of such rights or privileges should be given accounting recognition pursuant to FASB ASC 835-30-25-6. If the note is issued solely for cash (that is, the cash received is equivalent to the face amount of the note) and no other right or privilege is exchanged, it is presumed to have a present value at issuance measured by the cash proceeds exchanged.

[Amended, June 1995; Revised, June 2009, to reflect conforming changes
necessary due to the issuance of FASB ASC.]

.06 Deferred Compensation Payable To Surviving Spouse

Inquiry—Corporation A and its president entered into an employment contract. The contract stipulated that if the president died while employed by Corporation A, Corporation A would pay \$500 a month to the president's widow for the rest of her life. Shortly after the contract was signed, the president died. The present value of the estimated future payments by Corporation A to the president's widow is \$X. Should Corporation A accrue the \$X?

Reply—Under Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 710-10-25-11, the estimated amounts to be paid under a compensation contract would normally be accrued over the period of active employment. The president's death accelerates recognition of a liability that is reasonably determinable from actuarial tables. Accordingly, the present value of the estimated future payments not previously recognized should be accrued and recognized as an expense.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

[.07] Reserved

[.08] Reserved

.09 Deferred Compensation Arrangement Funded by Life Insurance Contracts

Inquiry—A company has a deferred compensation contract with one of its employees. In accordance with FASB ASC 710-10-25-11, the estimated amount of future payments was accrued over the period of active employment. The company purchases a life insurance policy on the employee, naming the company as beneficiary. May the cash surrender value earned on the policy be offset against the liability for the deferred compensation arrangement?

Reply—No. Paragraphs 1–2 of FASB ASC 325-30-35 specify that the cash surrender value on a life insurance contract should be reported on the balance sheet as an asset with any changes in that value reflected as an adjustment of insurance expense for the period. No right of offset or other deviations from the preceding accounting would be appropriate regardless of the funding objective pertaining to the purchase of the insurance contract, as stated in paragraphs 2–3 of FASB ASC 325-30-15.

.10 Sale of Research and Development Technology

Inquiry—A company has incurred material research and development costs in the current year. Subsequent to the balance sheet date but prior to issuance of the financial statements, the company commenced negotiations and sold the research and development technology to an unrelated company. May the company capitalize the incurred research and development costs in its annual financial statements in light of the subsequent sale?

Reply—No. Financial Accounting Standards Board *Accounting Standards Codification* 730-10-25 states that research and development costs should be expensed when incurred. There is no justification for capitalizing the costs because the technology will be sold. The company should disclose the subsequent sale of the research and development technology in the footnotes to its financial statements if the amount is material.

- .14 Application of Financial Accounting Standards Board (FASB) Interpretation No. 48, *Accounting for Uncertainty in Income Taxes* (codified in FASB *Accounting Standards Codification* (ASC) 740-10) to Taxes Other Than Income Taxes**

Inquiry—Does FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes*, (codified in FASB ASC 740-10) apply to federal or state income taxes only, or does it apply to sales, payroll, and other taxes as well?

Reply—The scope of FASB Interpretation No. 48 or FASB ASC 740-10 applies to income taxes only. Entities should follow FASB ASC 450, *Contingencies*, to account for uncertainties related to payroll, sales, and other taxes.

[Issue Date: May 2010.]

- .15 Application of Certain FASB Interpretation No. 48 (codified in FASB ASC 740-10) Disclosure Requirements to Nonpublic Entities That Do Not Have Uncertain Tax Positions**

Inquiry—FASB released Accounting Standards Update (ASU) No. 2009-06, *Implementation Guidance on Accounting for Uncertainty in Income Taxes and Disclosure Amendments for Nonpublic Entities*. The ASU retains the disclosure requirements in FASB ASC 740-10-50-15(e), which requires a description of tax years that remain subject to examination. Is this disclosure requirement applicable to a nonpublic entity even if the entity has no uncertain tax positions?

Reply—Yes. ASU No. 2009-06 modifies the FASB ASC to eliminate the disclosure requirements in FASB ASC 740-10-50-15(a)–(b) for nonpublic entities, including pass-through and not-for-profit entities, but the disclosure requirements in paragraphs 15(c)–(e) remain in effect (if applicable), regardless of whether the entity has any uncertain tax positions.

Section 5260

Estimated Losses

.01 Recognition of Estimated Losses on Uncompleted Contracts

Inquiry—An engineering firm manufactures and sells telemetry components on the basis of bids previously submitted to customers. In some cases, engineering time is required to modify a component to customer specifications. Since the amount of required engineering time is not known at the time a bid is submitted, costs to complete a particular job may exceed the bid price. The firm completes all jobs.

Presently all costs that accumulate on a particular job (direct materials, labor, and applied manufacturing and engineering overhead) are charged to that job and treated as work in process, even though the costs may exceed the selling price. Once the job is completed, it is taken out of work in process inventory and treated as costs of completion in the month that the job is shipped. Therefore, a loss on a job is recognized only when the job is shipped. When cost to complete a job is expected to exceed the bid price, what disclosure should be made on the balance sheet?

Reply—The problem faced by the firm is not primarily one of disclosure but rather that of satisfying the generally accepted accounting principle of “providing for losses which are reasonably certain to occur.”

It is assumed that the firm is accounting on the completed-contract basis. With regard to construction companies using this method of accounting, Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 605-35-25-89 states, “Although the completed-contract method does not permit the recording of any income prior to completion, provision shall be made for expected losses. See paragraphs 605-35-25-45 through 25-47.” The same concept applies to companies accounting under the percentage-of-completion method (paragraphs 5 and 46 of FASB ASC 605-35-25).

A possible journal entry to recognize the loss would be a charge to “Estimated Loss on Uncompleted Contracts” while crediting “Estimated Liability for Loss on Uncompleted Contracts.” This estimated liability could then be deducted from any excess of accumulated costs over related billings (or added to any liability arising from billings in excess of accumulated costs) for balance sheet purposes. If the loss is not deductible for tax purposes, part of the income tax paid should be set up as a deferred charge.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

[The next page is 4551.]

Section 5290

Other Expenses

[.01] Reserved

.02 Classification of Expenses Which Are Taxable to Employees

Inquiry—An amendment to the Internal Revenue Code requires, under certain circumstances, that an employer include as income, the fair value for the use of a company automobile, in the employee's wage and tax statement (Form W-2).

Should this be reported in the company's statement of income as compensation to employees?

Reply—No. The fair value is the amount the employee would have paid to use the car if the employee had owned it. The employer should report, as automobile expenses, the amount of actual expenses it incurred as owner of the car.

[.03] Reserved

[.04] Reserved

.05 Accrual of Audit Fee

Inquiry—A CPA has been engaged to audit the financial statements of a client company. The audit is being conducted after year end. Is it proper to accrue the audit fee as an expense of the year under audit?

Reply—According to FASB Concepts Statement No. 6, *Elements of Financial Statements*, paragraph 145, "The goal of accrual accounting is to account in the periods in which they occur for the effects on an entity of transactions and other events and circumstances, to the extent that those financial effects are recognizable and measurable." The audit fee expense was incurred in the period subsequent to year end. Therefore, it is properly recorded as an expense in the subsequent period. However, fees incurred in connection with planning the audit, together with preliminary procedures (for example, confirmation work) would be accruable for the year under audit.

.06 Accounting for a Lease Trial Period

Inquiry—A lease agreement allows a prospective lessee the free use of newly introduced specialized equipment for 30 days prior to entering into a long-term lease agreement for the equipment. The prospective lessee is not committed to enter into a long-term lease agreement at the beginning or during the 30-day trial period and there is no economic penalty to the lessee if the lessee does not enter into that agreement. How should the prospective lessee account for the 30-day trial period?

Reply—The 30-day trial period is part of the lessor’s marketing strategy. Therefore, the lessee should not report any lease expense during the 30-day trial period. If the lessee subsequently enters into the lease arrangement, the date of inception should begin on the first day of the lease with no accounting recognition given to the trial period.

[The next page is 4801.]

Section 5400

Extraordinary and Unusual Items

[.01] Reserved

.02 Sale of Cotton Futures Commitment Contracts

Inquiry—A textile manufacturer entered into firm purchase commitments for cotton at a very favorable price. At the present time, the corporation has an unusually long position of purchase commitments at a low fixed price. Some of these contracts may be sold at a tremendous profit which is extremely material in relation to normal operating income. This results from the tremendous increase in cost of raw cotton during recent months. The corporation has not sold such commitment contracts in the past; nor does it anticipate selling such contracts in the future.

Will the sale of cotton futures commitment contracts be considered an extraordinary item?

Reply—Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 225-20-45 discusses the criteria for extraordinary items. In order to be classified as an extraordinary item, an event or transaction would have to be both unusual in nature and infrequent in occurrence. The transaction would not meet the “unusual nature” test. Making a commitment for future delivery of cotton to insure a source of supply would be part of the normal operations of a textile manufacturer. Any resulting gain or loss would therefore be considered ordinary. Although the corporation has not sold such commitment contracts in the past; nor does the corporation anticipate selling such contracts in the future, any gain realized on the sale of such a contract should not be considered an extraordinary item under FASB ASC 225-20-45. However, it should be shown as a separate line item in the income statement in accordance with FASB ASC 225-20-45-16.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

[.03] Reserved

.04 Reporting the Proceeds From Life Insurance on an Officer

Inquiry—A company received the life insurance proceeds on the death of its president before the end of its fiscal year and intends to report the amount in its income statement as an extraordinary item. Would this be in accordance with generally accepted accounting principles?

Reply—No. FASB ASC 225-20-45-2 states that “extraordinary items are events and transactions that are distinguished by their unusual nature and by the infrequency of their occurrence.” The receipt of insurance proceeds from an officer’s life insurance policy is an infrequent occurrence, but it is not unusual in nature. Since it does not meet *both* the criteria of unusual and infrequent it does not qualify as an extraordinary item.

FASB ASC 225-20-45-16 states that “a material event or transaction that is unusual in nature or occurs infrequently but not both, and therefore does not meet both criteria for classification as an extraordinary item, shall be reported as a separate component of income from continuing operations.”

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.05 Accounting and Disclosures Guidance for Losses From Natural Disasters—Nongovernmental Entities

(This section identifies certain issues that may arise in accounting for losses from natural disasters, and lists relevant accounting literature for nongovernmental entities to consider in addressing those financial reporting issues.)

Inquiry—A natural disaster (such as a hurricane, tornado, fire, or earthquake) strikes and causes substantial damages. Though extreme in the loss of life and financial harm caused, the nature and location of the disaster may be such that one might reasonably expect that type of activity of nature to strike again in greater or lesser magnitude of damage. What are some of the accounting issues that arise and which accounting literature provides guidance for recognizing, measuring, and disclosing losses from natural disasters?

Reply—The following questions may arise in accounting for losses incurred as a result of a natural disaster:

1. How should losses from a natural disaster of a type that is reasonably expected to reoccur be classified in the statement of operations?
2. When should an asset impairment loss related to a natural disaster be recognized?
3. When should a liability for non-impairment losses and costs related to a natural disaster be recognized?
4. What is the accounting for insurance recoveries to cover losses sustained in a natural disaster? Also, what are the additional considerations related to business interruption insurance recoveries?
5. What are the required disclosures regarding the impact of a natural disaster?

Issue 1—How should losses from a natural disaster of a type that is reasonably expected to reoccur be classified in the statement of operations?

FASB ASC 225-20-45-2 describes an extraordinary item as an item that is both unusual in nature *and* nonrecurring. A natural disaster of a type that is reasonably expected to reoccur would not meet both conditions. The magnitude of loss from a particular natural disaster does not cause that disaster to be unusual in nature or unlikely to reoccur. If losses from such natural disasters meet the criteria for disclosure of unusual or infrequently occurring items in FASB ASC 225-20-45-16, they should be reported as a separate component of income from continuing operations either on the face of the statement of operations or in the notes to the financial statements.

Issue 2—When should an asset impairment loss related to a natural disaster be recognized?

FASB ASC 360, *Property, Plant, and Equipment*, provides guidance on recognition and measurement of impairment losses on long-lived assets. That literature should be used to determine when an impairment loss on long-lived assets resulting from a natural disaster should be recognized and how that impairment loss should be measured.

FASB ASC 310, *Receivables*, provides guidance on recognition and measurement of impairment losses on loans. The FASB ASC glossary defines *loan* as “a contractual right to receive money on demand or on fixed or determinable dates that is recognized as an asset in the creditor’s statement of financial position.” According to FASB ASC 310-10-35-16, a loan is impaired when, “based on current information and events, it is probable that a creditor will be unable to collect all amounts due according to the contractual terms of the loan agreement.” In measuring impairment losses on loans, creditors should follow FASB ASC 310-10-35-22, which states

When a loan is impaired as defined in paragraphs 310-10-35-16 through 35-17, a creditor shall measure impairment based on the present value of expected future cash flows discounted at the loan’s effective interest rate, except that as a practical expedient, a creditor may measure impairment based on a loan’s observable market price, or the fair value of the collateral if the loan is a collateral-dependent loan.

FASB ASC 350, *Intangibles—Goodwill and Other*, provides guidance on recognition and measurement of impairment losses on intangible assets and goodwill.

FASB ASC 450, *Contingencies*, provides guidance on recognition and measurement of impairment losses on assets not covered by specific other literature.

Issue 3—When should a liability for non-impairment losses and costs related to a natural disaster be recognized?

FASB ASC 450-20-25-2 requires a loss accrual by a charge to income, if it is probable that an asset had been impaired or a liability had been incurred at the date of the financial statements and the amount of loss can be reasonably estimated.

Paragraph 63 of FASB Concepts Statement No. 5, *Recognition and Measurement in Financial Statements of Business Enterprises*, provides that liabilities should be recognized when

- a. the item meets the definition of a liability. Paragraph 35 of Concepts Statement 6 defines liabilities as “probable future sacrifices of economic benefits arising from present obligations of a particular entity to transfer assets or provide services to other entities in the future as a result of past transactions or events” (footnote references omitted).
- b. the liability can be measured with sufficient reliability.
- c. the information about the liability is capable of making a difference in user decisions.
- d. the information about the liability is representationally faithful, verifiable, and neutral.

Other authoritative literature to consider includes FASB ASC 420, *Exit or Disposal Cost Obligations*, and FASB ASC 450-20.

Issue 4—What is the accounting for insurance recoveries to cover losses sustained in a natural disaster? Also, what are the additional considerations related to business interruption insurance recoveries?

In accounting for insurance payments to cover losses, entities should follow the guidance in FASB ASC 210-20; FASB ASC 225-20; FASB ASC 410-30; FASB ASC 605-40; and FASB ASC 815, *Derivatives and Hedging*.

FASB ASC 605-40 clarifies the accounting for involuntary conversions of nonmonetary assets (such as property or equipment) to monetary assets (such as insurance proceeds). It requires that a gain or loss be recognized when a nonmonetary asset is involuntarily converted to monetary assets even though an enterprise reinvests or is obligated to reinvest the monetary assets in replacement nonmonetary assets. FASB ASC 605-40-45-1 states

Gain or loss resulting from an involuntary conversion of a nonmonetary asset to monetary assets shall be classified in accordance with the provisions of Subtopic 225-20.

Entities should follow the guidance in FASB ASC 605-40-25-4 (for recoveries in connection with property and casualty losses), or paragraphs 8–11 of FASB ASC 410-30-35 (for recoveries in connection with environmental obligations), as applicable. That guidance generally requires that an asset relating to the insurance recovery should be recognized only when realization of the claim for recovery of a loss recognized in the financial statements is deemed probable (as that term is used in FASB ASC 450). In addition, under FASB ASC 450-30-25-1, a gain (that is, a recovery of a loss not yet recognized in the financial statements or an amount recovered in excess of a loss recognized in the financial statements) should not be recognized until any contingencies relating to the insurance claim have been resolved. It is important to note that in some circumstances, losses and costs might be recognized in the statement of operations in a different (earlier) period than the related recovery.

An additional consideration relates to FASB ASC 225-30, which indicates that entities may choose how to classify such recoveries in the statement of operations, provided that classification does not conflict with existing GAAP requirements.

Issue 5—What are the required disclosures regarding the impact of a natural disaster?

In disclosing the impact of a natural disaster in the financial statements, entities should follow the guidance in FASB ASC 225-20-45-16 pertaining to presentation and disclosure of a material event or transaction that is unusual in nature or occurs infrequently.

As it relates to the issues covered in this section, entities also should consider the disclosure requirements of FASB ASC 275, *Risks and Uncertainties*; FASB ASC 310; FASB ASC 350; FASB ASC 360; FASB ASC 410, *Asset Retirement and Environmental Obligations*; FASB ASC 420; and FASB ASC 450.

Earnings per Share

[.01] Reserved

.02 Earnings Per Share of Wholly-Owned Subsidiaries

Inquiry—The annual report of a holding company with five wholly owned subsidiaries shows the consolidated net income and earnings per share of the companies. If the report also includes the individual income statements of the five subsidiaries, is it necessary to include individual earnings per share figures?

Reply—Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 260-10-15-3 does not require presentation of earnings per share in statements of wholly owned subsidiaries.

Therefore, it is not necessary to show earnings per share figures for the subsidiaries.

[Amended, September 1997; Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.03 Weighted Average Shares Outstanding for an Interim Period

Inquiry—A company retired some of its common stock during the first quarter of its fiscal year. Should earnings per share for the interim period be based on annualized weighted average shares outstanding or the weighted average shares outstanding during the period?

Reply—The earnings per share computation should be based on the weighted average shares outstanding during the interim period, and not on an annualized weighted average.

[Amended, September 1997; Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.15 Stock Dividend Declared But Not Paid at Balance-Sheet Date

Inquiry—A client declared a percent stock dividend to shareholders of record in December 20X4, payable in 20X5. In calculating the weighted average number of shares outstanding for determining the earnings per share for 20X4, how should this stock dividend apply?

Reply—FASB ASC 260-10-55-12 requires the computations of basic and diluted earnings per share to be adjusted retroactively for all periods presented to reflect a change in capital structure resulting from a stock dividend. Therefore, the 5 percent stock dividend should be considered as being outstanding for every month of 20X4, as well as for every month of every preceding period presented.

[.02] Reserved

[.03] Reserved

.04 Accounting for Subleases

Inquiry—A corporation leased a building and, ultimately, subleased half of the space to a third party with the lease agreement between the two original parties remaining in effect. Management believed that a fairer presentation was made by netting the rental income from the sublease against its own minimum lease payments. Is the corporation properly accounting for its leased property and sublease income?

Reply—No. Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 840-30-35-12 states that the original lessee, as sublessor, shall continue to account for the obligation related to the original lease as before. The sublease shall be accounted for in accordance with paragraphs 1, 29–31, and 41–44 of FASB ASC 840-10-25, depending upon which of the criteria the original lease met. If the original lease is an operating lease, the original lessee shall account for both it and the new lease as operating leases.

[.05] Reserved

[.06] Reserved

.07 Determining a Lease Term for Accounting Purposes

Inquiry—How should a lessee and lessor determine, for accounting purposes, the lease term of a lease, which is fundamental to determining the appropriate accounting for that lease?

Reply—FASB ASC glossary provides a definition of *lease term* as follows:

The fixed noncancelable lease term plus all of the following, except as noted in the following paragraph:

- a. All periods, if any, covered by bargain renewal options
- b. All periods, if any, for which failure to renew the lease imposes a penalty on the lessee in such amount that a renewal appears, at lease inception, to be reasonably assured
- c. All periods, if any, covered by ordinary renewal options during which any of the following conditions exist:
 1. A guarantee by the lessee of the lessor's debt directly or indirectly related to the leased property is expected to be in effect
 2. A loan from the lessee to the lessor directly or indirectly related to the leased property is expected to be outstanding
- d. All periods, if any, covered by ordinary renewal options preceding the date as of which a bargain purchase option is exercisable

- e. All periods, if any, representing renewals or extensions of the lease at the lessor's option

The lease term shall not be assumed to extend beyond the date a bargain purchase option becomes exercisable.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.08 Lease Term for Accounting Purposes Differs From Term Stated in Lease (Part 1)

Inquiry—Can a lease term for accounting purposes begin before an initial fixed noncancelable term stated in a lease agreement?

Reply—Yes. FASB ASC 840 provides that a lease term for accounting purposes includes all periods in which a lessee has access to and control over leased space, even if those periods precede the fixed noncancelable term stated in the lease agreement. For example, a lease agreement is signed on January 1 but the initial fixed noncancelable term begins on April 1. The lease allows the lessee to make improvements to the leased space at any time starting after January 1. In this situation, the lease term for accounting purposes starts on January 1.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.09 Lease Term for Accounting Purposes Differs From Term Stated in Lease (Part 2)

Inquiry—Can a lease term for accounting purposes extend beyond an initial fixed noncancelable term stated in a lease agreement?

Reply—Yes. FASB ASC glossary term *lease term* identifies situations in which the lease term for accounting purposes extends beyond the fixed noncancelable term stated in a lease agreement. Section 5600.07 identifies those situations. For example, the lease term for accounting purposes would include renewal periods that at lease inception appear reasonably assured because failure to exercise renewal periods would impose a penalty on the lessee.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.10 Rent Expense and Rent Revenue in an Operating Lease—General

Inquiry—In an operating lease, how should a lessee accrue rent expense and a lessor recognize rent revenue?

Reply—FASB ASC 840-20-25-1 says that the lessee should accrue rent expense on a straight line basis over the lease term unless another systematic and rational basis is more representative of the time pattern use of the property.

Paragraphs 1–2 of FASB ASC 840-20-25 say that the lessor should recognize rent revenue on a straight line basis over the lease term unless another systematic and rational basis is more representative of the time pattern use of the property.

Also see section 5600.11, “Rent Expense and Rent Revenue in an Operating Lease—Scheduled Increase in Rental Space.”

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.11 Rent Expense and Rent Revenue in an Operating Lease—Scheduled Increase in Rental Space

Inquiry—Related to sections 5600.08 and 5600.10 assume a lessee has access to and use of one floor of a building as of the beginning of a lease agreement in year 1. In accordance with the agreement and at the start of year 3, the lessee will have access to and the ability to occupy a second floor in addition to the first floor, and will pay an additional rental fee starting at that time. In this situation, how should the lessee accrue rent expense and the lessor recognize rent revenue before the lessee is allowed to occupy the second floor?

Reply—FASB ASC 840 is the applicable guidance. In years 1 and 2, the lessee should accrue rent expense on a straight line basis (unless another systematic and rational basis is more representative of the time pattern use of the property) for the one floor and not include the rental of the second floor in its accrual because the lessee does not have access to and control over the second floor until the start of year 3. Starting in year 3, the lessee should accrue rent expense on a straight line basis for both floors.

The lessor's accounting for revenue is parallel to that of the lessee for expense in this fact pattern.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.12 Rent Expense and Rent Revenue in an Operating Lease—Rent Holiday

Inquiry—A lessee has a 120 month lease for \$10,000 per month on space owned by a lessor. The lease term for accounting purposes is 120 months. As an incentive to sign the lessee to the lease agreement, the first 6 of those months are rent free. In an operating lease, if a lease term includes a period of free or reduced rent (rent holiday), how does the rent holiday factor into the lessee's recognition of rent expense and the lessor's recognition of rent revenue?

Reply—FASB ASC 840-20-25-2 provides that the lessee should recognize rent expense of \$9,500 per month ($\$10,000 \times 114 \text{ months} / 120 \text{ month lease term}$) for 120 months, which is on a straight line basis. Likewise, the lessor should recognize rent revenue of \$9,500 per month.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.13 Rent Expense and Rent Revenue in an Operating Lease—Scheduled Rent Increases

Inquiry—In an operating lease, how should a lessee accrue rent expense and a lessor recognize rent revenue using the straight line method (see section 5600.10) when the lease agreement contains scheduled rent increases over the lease term?

Reply—FASB ASC 840-20-25-2 provides that the lessee and lessor should add up all rental payments over the lease term and divide that number by the number of periods in the lease term to arrive at the expense/revenue amounts to be accrued/recognized on a straight line basis.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.14 Amortization/Depreciation of Leasehold Improvements in an Operating Lease (Part 1)

Inquiry—A lessee enters into an operating lease in which the lease term for accounting purposes is 10 years. Upon signing the lease, the lessee acquires

leasehold improvements that have a useful life of 15 years. Over what period should the lessee amortize or depreciate the leasehold improvements?

Reply—For leasehold improvements contemplated at or near the beginning of an initial lease term, the lessee should amortize or depreciate the leasehold improvements over the shorter of the (a) useful life of the improvements or (b) remaining lease term, which is 10 years in this inquiry. If the leasehold improvements are acquired and placed in service significantly after the inception of a lease, FASB ASC 840-10-35-6 requires that the lessee amortize or depreciate leasehold improvements over the shorter of the useful life of the leasehold assets or a term that includes required lease periods and renewals that are deemed to be reasonably assured at the date the leasehold improvements are acquired. Note that FASB ASC 840-10-35-6 does not apply to preexisting leasehold improvements.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.15 Leasehold Improvements and Lease Term in an Operating Lease (Part 2)

Inquiry—A lessee enters into an operating lease in which the initial fixed noncancelable term within the lease agreement is 10 years and the agreement includes three 5-year renewal periods. Upon signing the lease, the lessee plans to acquire leasehold improvements that have a useful life of 15 years. Is the lessee's plan to acquire the leasehold improvements a factor in determining the lease term for accounting purposes?

Reply—Yes, the lessee should consider the impact on the lease term for accounting purposes, if any, of the plan to acquire leasehold improvements. If the leasehold improvements are expected to have a significant value at the end of the initial 10 year term such that the lessee would not be willing to abandon these assets (that is, effectively incur a penalty) resulting in a renewal option being reasonably assured of being exercised, that renewal period would be added to the initial fixed noncancelable term in determining the appropriate lease term for accounting purposes.

.16 Landlord Incentive Allowance in an Operating Lease

Inquiry—A lessee enters into an operating lease in which the landlord offers an incentive allowance towards the cost of the lessee making leasehold improvements. The leasehold improvements are the lessee's assets and cost \$1 million, and the incentive allowance totals \$500,000. Should the lessee net the \$500,000 allowance received from the landlord against the \$1 million leasehold improvement asset?

Reply—No. In accordance with FASB ASC 840-20-55-3, the \$500,000 allowance should be reported by the lessee as a liability and amortized straight line over the lease term as a reduction of rent expense. Therefore, the lessee's amortization/depreciation calculation is based on the \$1 million leasehold improvements.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.17 Cash Flows Statement Presentation of Landlord Incentive Allowance in an Operating Lease

Inquiry—Related to section 5600.16, how should a lessee categorize expenditures for leasehold improvements and a related cash incentive allowance received from a landlord in the statement of cash flows?

Reply—In accordance with FASB ASC 230, *Statement of Cash Flows*, a lessee should report expenditures for leasehold improvements in the investing section of a statement of cash flows. Cash allowances received from the landlord should be presented in the lessee's operating activities section of its statement of cash flows. The cash allowances from the lessor are treated for accounting purposes as adjustments of rent. FASB ASC 230 does not identify rent payments on operating leases as investing or financing activities.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

[The next page is 4901.]

Section 5700

Contributions Made

.01 Income Tax Accounting for Contributions to Certain Not-for-Profit Scholarship Funding Entities

Inquiry—A state's corporate income taxpayers are allowed a credit against their state corporate income tax of 100 percent of eligible contributions made during the year to a not-for-profit scholarship funding entity. Unused credits may be carried forward up to 3 years. The taxpayer may not convey, assign, or transfer the credit to another entity unless all of the assets of the taxpayer are conveyed, assigned, or transferred in the same transaction.

Should corporate income taxpayers report contributions that qualify for the tax credit as contributions or as income tax expense in income statements prepared in accordance with generally accepted accounting principles?

Reply—Corporate income taxpayers should report such contributions as contributions in their income statements in accordance with Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 720-25.

Such contributions meet the definition of a *contribution* in the FASB ASC glossary. Just as the federal government offering a tax deduction for such a contribution does not change the nonreciprocal nature of the gift, the fact that the state provides a dollar-for-dollar tax credit to the donor for its remittance to the scholarship funding entity does not change the nonreciprocal nature of the gift. Nor does having only the alternative of paying a corresponding, higher tax make the contribution involuntary.

FASB ASC 740, *Income Taxes*, provides that total income tax expense or benefit for the year is the sum of deferred tax expense or benefit and income taxes currently payable or refundable.

Example

Assumptions:

\$100 contribution to qualified scholarship funding entity

\$5,000 federal taxable income (includes \$100 charitable contribution deduction)

Tax rate—5.5 percent

State Tax Computation:

Federal taxable income	\$5,000
Contribution	<u>100</u>
State taxable income	5,100
Tax rate	<u>0.055</u>
Pre-credit state income tax	275
Tax credit	<u>(100)</u>
State income taxes payable	\$175

Journal Entries:

Journal entries made during the year should achieve the following result:

Dr. Contributions	100
Cr. Cash	100

To record contribution to scholarship fund

Dr. Income tax expense	175
Cr. State income taxes payable	175

To record state income tax expense

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

Section 6130

Finance Companies

.01 Amortization of Discount on Receivables of Consumer Finance Companies

Inquiry—A client in the consumer finance business loans money for short periods of time. What method should be used to amortize discounts on such loans?

Reply—In determining income from loans receivable which have been issued at a discount, the required method of income recognition for any such discount is the interest method, as described in Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 310-20.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.02 Method of Recognizing Revenue From Finance Charges

Inquiry—A finance company would like to establish a policy of recognizing 15 percent of the finance charges on discount loans as revenues in the first month of the loan and recognizing the balance of such charges as yield adjustments as the receivables are liquidated. Is this an acceptable method of recognizing revenues from finance charges?

Reply—No. In accordance with FASB ASC 310-20, the interest (actuarial) method should be used to account for interest income. In addition, FASB ASC 310-20-35-2 requires that certain direct loan acquisition costs be deferred and treated as yield adjustments in applying the interest method.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.03 Method of Recognizing Revenue From Service Charges

Inquiry—A company finances insurance premiums of individuals through various insurance agents. The company's policy is to receive completed premium finance agreements directly from the insurance agents. The amount financed includes a finance charge and a nonreturnable service charge. The finance charge is recognized in income by the interest method.

How should the service charge be recognized on the records of the company?

Reply—In accordance with FASB ASC 310-20, the service charge should also be recognized in income over the life of the related loan as an adjustment of yield using the interest method.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.04 Method of Recognizing Revenue From Commissions on Loan Insurance

Inquiry—A finance company receives commissions for loan insurance. How should the company recognize commission revenues?

Reply—FASB ASC 942-605-25-1 states that the insurance commissions received from independent insurers should be deferred and systematically amortized to income over the life of the related insurance contracts because the insurance and lending activities are integral parts of the same transactions. The method of commission amortization should be consistent with the method

of premium income recognition for that type of policy in accordance with FASB ASC 944, *Financial Services—Insurance*.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.05 Disclosure of Contractual Maturities of Direct Cash Loans

Inquiry—FASB ASC 944-805-50-4 states

Disclosures that typically would be required by the preceding paragraph for the various specific elements included in the closed block need not be made separately for the closed block if the nature of the information for the closed block would not differ significantly from that already included for the reporting entity as a whole. For example, it is not necessary to show a separate schedule of contractual maturities of closed block fixed maturity securities if the relative composition of contractual maturities is similar to those of the reporting entity taken as a whole. However, if the relative maturities of the closed block fixed maturity securities differ from those of the reporting entity taken as a whole, separate disclosures shall be made.

At December 31, 20X1, a company has only three loans outstanding of \$36,000 each, payable monthly as follows: 12 installments of \$3,000 each; 24 installments of \$1,500 each; and 36 installments of \$1,000 each. How would these contractual maturities properly be shown?

Reply—Appropriate disclosure of the amounts to be received would be: 20X2, \$66,000; 20X3, \$30,000; and 20X4, \$12,000. Refer to FASB ASC 944-805-55 for implementation guidance and illustrations.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.06 Balance Sheet Presentation of Subordinated Debt

Inquiry—A consumer finance company, whose financial statements are used only by the company and its banks, would like to include subordinated debt in its balance sheet with the caption “Total Subordinated Notes and Shareholders’ Equity.” The company believes that presentation would show more clearly the position of the banks with respect to other creditors. Would the presentation be acceptable if the statements were clearly labeled, “For the Use of Banks and Bankers Only”?

Reply—No. Although the total of subordinated long-term debt and stockholders’ equity is important to creditors of finance companies, the prominent presentation of this total in balance sheets causes many users of financial statements to interpret this amount as total stockholders’ equity, and, for this reason, its use is not acceptable.

The proposed balance sheet presentation would not be in accordance with generally accepted accounting principles even if the financial statements are clearly and conspicuously labeled, “For the Use of Banks and Bankers Only.”

[Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

[.07] Reserved

[The next page is 5371.]

Section 6140

Not-For-Profit Entities

.01 Inventory Valuation for a Not-for-Profit Scientific Entity

Inquiry—A not-for-profit scientific entity produces products that are sold at a price less than cost. The difference between cost and sale proceeds is covered by contributions. The not-for-profit entity reports inventories in its financial statements at an arbitrary amount and discloses that fact on the face of the financial statements. Is this accounting appropriate?

Reply—No. Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 330-10-35-1 states

A departure from the cost basis of pricing the inventory is required when the utility of the goods is no longer as great as their cost. Where there is evidence that the utility of goods, in their disposal in the ordinary course of business, will be less than cost, whether due to physical deterioration, obsolescence, changes in price levels, or other causes, the difference shall be recognized as a loss of the current period. This is generally accomplished by stating such goods at a lower level commonly designated as *market*.

Accordingly, inventories should be valued at lower of cost or market and not at an arbitrary amount. The fact that the difference between the sales proceeds and the costs is covered by contributions does not change the application of the requirements of FASB ASC 330-10.

[Amended, June 1995; Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.02 Income Recognition of Membership Dues by Not-for-Profit Entity

Inquiry—A local not-for-profit entity collects membership dues and does not provide any services to its members in return for the dues. It records the dues as contributions and recognizes them as revenue in the period they are received. The entity provides services, such as seminars, group insurance, and so on., to its members at an extra cost.

Is this the appropriate accounting method?

Reply—Yes. This entity qualifies as a *not-for-profit entity* under the FASB ASC glossary definition. Accordingly, FASB ASC 958-605-25-2 would require that the dues be recognized as contributions revenue when received since the members receive no benefits from the dues. In accordance with FASB ASC 958-605-25-1, if the member did receive benefits from those dues, dues revenue would be recognized over the period of membership.

[Amended, June 1995; Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.03 Lapsing of Time Restrictions on Receivables That Are Uncollected at Their Due Date

Inquiry—FASB ASC 958-605-45-5 provides that “receipts of unconditional promises to give with payments due in future periods shall be reported as restricted support unless explicit donor stipulations or circumstances surrounding the receipt of a promise make clear that the donor intended it to be used to support activities of the current period. It is reasonable to assume that by specifying future payment dates donors indicate that their gift is to support

activities in each period in which a payment is scheduled. For example, receipts of unconditional promises to give cash in future years generally increase temporarily restricted net assets.”

Do time restrictions on contributions receivable lapse when the receivable is due or when it is collected?

Reply—Time restrictions on contributions receivable lapse when the receivable is due. (In some cases, the due date may be explicitly stated. In other cases, circumstances surrounding receipt of the contribution may make clear the implicit due date. In yet other cases, the due date may be unclear. NPEs should consider the facts and circumstances surrounding the promise to give to determine the due date, if any.)

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.04 Lapsing of Restrictions on Receivables if Purpose Restrictions Pertaining to Long-Lived Assets Are Met Before the Receivables Are Due

Inquiry—FASB ASC 958-605-45-4 provides, in part, that “a restriction on a not-for-profit entity’s use of the assets contributed results either from a donor’s explicit stipulation or from circumstances surrounding the receipt of the contribution that make clear the donor’s implicit restriction on use.” These are purpose restrictions. FASB ASC 958-605-45-5 provides that “receipts of unconditional promises to give with payments due in future periods shall be reported as restricted support unless explicit donor stipulations or circumstances surrounding the receipt of a promise make clear that the donor intended it to be used to support activities of the current period. It is reasonable to assume that by specifying future payment dates donors indicate that their gift is to support activities in each period in which a payment is scheduled. For example, receipts of unconditional promises to give cash in future years generally increase temporarily restricted net assets.” These are time restrictions. FASB ASC 958-205-45-9 provides, in part, as follows:

If two or more temporary restrictions are imposed on a contribution, the effect of the expiration of those restrictions shall be recognized in the period in which the last remaining restriction has expired.

FASB ASC 958-205-45-11 further provides, in part

Temporarily restricted net assets with time restrictions are not available to support expenses until the time restrictions have expired.

FASB ASC 958-205-45-12 further provides

Time restrictions implied on gifts of long-lived assets pursuant to paragraph 958-605-45-6 expire as the economic benefits of the acquired assets are used up; that is, over their estimated useful lives. In the absence of donor stipulations specifying how long donated assets must be used or a not-for-profit entity’s policy of implying time restrictions, restrictions on long-lived assets, if any, or cash to acquire long-lived assets expire when the assets are placed in service.

NPEs may receive promises to give contributions that are restricted by donors for investment in long-lived assets. In some circumstances, the assets may be placed in service, and the purpose restrictions met, prior to the due date of the contribution. For example, an NPE may have a capital campaign, asking for commitments to contribute over the next five years so the entity can build a new facility. A donor may promise to give \$100,000 in five years in response to that request.

Are the restrictions met when the assets are placed in service or when the receivable is due?

Reply—NPEs should consider the facts and circumstances surrounding the promise to give and whether those facts and circumstances indicate that the donor intended the contribution to be used to support activities of the current period, with constructing the building or placing it in service considered activities of the current period. If circumstances indicate that the donor intended to support activities of the current period, there is no time restriction and the preceding guidance in paragraphs 9 and 11–12 of FASB ASC 958-205-45 would not be applicable, unless a restriction was placed on the contribution other than constructing the building. If circumstances indicate that the donor's intent is not to support activities of the current period, there are both a time restriction and a purpose restriction. In accordance with FASB ASC 958-205-45-11, the effect of the expiration of restrictions is recognized in the period in which the last remaining restriction has expired.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

[.05] Reserved

.06 Functional Category of Cost of Sales of Contributed Inventory

Inquiry—How should the cost of sales of contributed inventory be reported? For example, should it be reported as a separate supporting service, as program, or as fund-raising?

Reply—Cost of sales of contributed inventory should be reported as the cost of a separate supporting service, unless the item sold is related to a program activity, in which case, cost of sales is reported as a cost of a program activity. Cost of sales of contributed inventory should not be reported as fund-raising.

.07 Functional Category of Costs of Special Events

Inquiry—FASB ASC 958-720-25-4 provides that “fundraising costs, including the cost of special fundraising events, are incurred to persuade potential donors to make contributions to a not-for-profit entity and shall be expensed as incurred.” The FASB ASC glossary defines the term fundraising activities as “activities undertaken to induce potential donors to contribute money, securities, services, materials, facilities, other assets, or time.” Chapter 13 of the AICPA Audit and Accounting Guide *Not-for-Profit Entities* provides guidance on accounting for special events and provides that not-for-profit entities may report the gross revenues of special events and other fund-raising activities with the cost of direct benefits to donors (for example, meals and facilities rental) displayed either (1) as a line item deducted from the special event revenues or (2) in the same section of the statement of activities as are other programs or supporting services and allocated, if necessary, among those various functions.

Should all costs of special fund-raising events, such as costs of direct donor benefits that are provided in exchange transactions, be reported as fund-raising?

Reply—The discussion of special fund-raising events in FASB ASC 958-720-25 and 958-720-45 provide that some, but not necessarily all, costs of special fund-raising events should be reported as fund-raising. Certain costs of special fund-raising events, such as costs of direct donor benefits that are provided in exchange transactions, should be reported in categories other than fund-raising.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.08 Functional Category of the Costs of Direct Donor Benefits

Inquiry—NPEs may hold special events that provide donor benefits. For example, an entity may hold a special event and provide a meal to donors, which would be a direct donor benefit. Paragraphs 10–15 of FASB ASC 958-720-55 provide guidance on reporting the costs of special events, including the costs of direct donor benefits. Paragraphs 20–22 of FASB ASC 958-720-45 provide that, if cost of sales relates to an item that is program related, cost of sales should be reported as program expense. Otherwise, cost of sales could be reported as a separate supporting service. Also, FASB ASC 958-720-45-19 provides that the cost of premiums provided that are greater than nominal in value should be reported as cost of sales. However, FASB ASC 958 provides no guidance concerning the functional category in which the costs of direct donor benefits should be reported in circumstances in which the benefits are not program related, beyond providing that they should be reported as a supporting service.

In which functional category should the costs of direct donor benefits that are not program related be reported?

Reply—The costs of donor benefits that are not program related and that are provided in exchange transactions should be reported as a separate supporting category, such as cost of sales, and should not be reported as fund-raising.

The costs of donor benefits that are not program related and that are provided in transactions that are other than exchange transactions, such as a fund-raising dinner for which there is no charge to attend, should be reported as fund-raising.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.09 Reporting Bad Debt Losses

Inquiry—FASB ASC 958-225-45-7 provides that expenses should be reported as decreases in unrestricted net assets.

FASB ASC 958-225-45-15 provides that “a statement of activities may report gains and losses as net amounts if they result from peripheral or incidental transactions or from other events and circumstances that may be largely beyond the control of the not-for-profit entity and its management.”

FASB ASC 958-310-35-7 provides that, if the fair value of contributions arising from unconditional promises to give cash or noncash assets decreases subsequent to initial measurement because of changes in the quantity or nature of assets expected to be received, the decrease should be recognized as expenses or losses (bad debt) in the period(s) in which the expectation changes.¹

May bad debt losses be netted against contribution revenue?

Reply—Bad debt losses are prohibited from being netted against contribution revenue under FASB ASC 958-225-45-15 because losses are permitted to be netted only against gains, and not against revenues.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

¹ The provision that certain decreases in the fair value of contributions arising from unconditional promises to give should be accounted for as losses, rather than as expenses, is an accounting convention. This convention provides that, in circumstances in which the net assets related to receivables are represented as restricted net assets, decreases in net assets should be reported as decreases in restricted net assets, rather than as decreases in unrestricted net assets.

.10 Consolidation of Political Action Committee

Inquiry—Some not-for-profit entities are related to other not-for-profit entities that perform political activities that the reporting entity does not wish to perform, perhaps because performing those activities may threaten the reporting entity's tax exempt status, the reporting entity is precluded from conducting such activities, or for other reasons. For example, a membership entity may establish and sponsor a political action committee (PAC) whose mission is to further the interests of the membership entity. The resources held by the PAC are used for the purposes of the membership entity and the governing board of the PAC is appointed by the board of the membership entity.

Does FASB ASC 958-810 require consolidation of PACs in the circumstances previously described?

Reply—FASB ASC 958-810 requires consolidating PACs in the circumstances described in the preceding. Under FASB ASC 958-810, the threshold issues pertaining to the circumstances previously described are whether there is (1) control through a majority voting interest in the board of the PAC and (2) an economic interest. In the circumstances described in the preceding, both are present. Control through a majority voting interest in the board of the PAC exists because the governing board of the PAC is appointed by the board of the membership entity. An economic interest exists because the PAC holds significant resources that must be used for the purposes of the membership entity.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.11 Costs of Soliciting Contributed Services and Time That Do Not Meet the Recognition Criteria in FASB ASC 958

Inquiry—Questions have arisen about the classification of costs of soliciting contributed services and time. The issue focuses on whether those costs should be reported as fundraising in all cases or whether, in circumstances in which the services or time do not meet the recognition criteria in FASB ASC 958-605-25-16, those costs should be reported in the functional category to which the solicited services or time pertain.

According to FASB ASC 958-720-45-9, fundraising activities include the following:

- a. Publicizing and conducting fundraising campaigns
- b. Maintaining donor mailing lists
- c. Conducting special fundraising events
- d. Preparing and distributing fundraising manuals, instructions, and other materials
- e. Conducting other activities involved with soliciting contributions from individuals, foundations, government agencies, and others.

The FASB ASC glossary defines *contribution* and provides as follows:

An unconditional transfer of cash or other assets to an entity or a settlement or cancellation of its liabilities in a voluntary nonreciprocal transfer by another entity acting other than as an owner. Those characteristics distinguish contributions from exchange transactions, which are reciprocal transfers in which each party receives and sacrifices approximately equal value; from investments by owners and distributions to owners, which are nonreciprocal transfers between an entity and its owners; and from other nonreciprocal transfers, such as impositions of taxes or fines and thefts, which are not voluntary transfers. In a contribution transaction, the value,

if any, returned to the resource provider is incidental to potential public benefits. In an exchange transaction, the potential public benefits are secondary to the potential proprietary benefits to the resource provider. The term contribution revenue is used to apply to transactions that are part of the entity's ongoing major or central activities (revenues), or are peripheral or incidental to the entity (gains).

The FASB ASC glossary defines the term *fundraising activities* as follows:

Activities undertaken to induce potential donors to contribute money, securities, services, materials, facilities, other assets, or time.

FASB ASC 958-605-25-16 discusses recognition criteria for contributed services and provides, in part, as follows:

Contributions of services shall be recognized if the services received meet any of the following criteria:

- a. They create or enhance nonfinancial assets
- b. They require specialized skills, are provided by individuals possessing those skills, and would typically need to be purchased if not provided by donation.

Contributed services that do not meet these criteria are prohibited from being recognized.

As previously mentioned, questions have arisen about the classification of the costs of soliciting contributed services and time that do not meet the recognition criteria in FASB ASC 958-605-25-16.

How should the costs of soliciting contributed services that do not meet the recognition criteria in FASB ASC 958-605-25-16 be reported?

Reply—FASB ASC 958-720-45-10 provides that fundraising activities include soliciting contributions of services from individuals, regardless of whether those services meet the recognition criteria for contributions in paragraphs 2–20 of FASB ASC 958-605-25.² For example, costs of soliciting contributed services to be used in program functions should be reported as fundraising, even if the services do not meet the recognition criteria. Similarly, costs of soliciting management and general services should be reported as fundraising, even if the management and general services do not meet the recognition criteria.

Certain contributed services are prohibited from being recognized for practical, rather than conceptual, reasons. Those services are nevertheless contributions, regardless of whether or not they are recognized. Therefore, soliciting those contributions meets the definition of *fundraising* in the FASB ASC glossary.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.12 Nondiscretionary Assistance Programs

Inquiry—FASB ASC 958 provides guidance for transactions in which an entity—the *donor*—makes a contribution by transferring assets to a not-for-profit entity—the *recipient entity*, as defined in the FASB ASC glossary—that accepts the assets from the donor and agrees to use those assets on behalf of or transfer those assets, the return on investment of those assets, or both to another entity—the *beneficiary*—that is specified by the donor. It also provides

² NPEs frequently incur other costs in connection with contributed services, such as costs of training and managing volunteers. Costs of training and managing volunteers should not be reported as fund-raising, unless those volunteers are performing fundraising functions.

guidance for transactions that take place in a similar manner but are not contributions because the transfers are revocable, repayable, or reciprocal. FASB ASC 958 provides that a recipient entity that (a) accepts assets from a donor without variance power and (b) agrees to use those assets on behalf of or transfer those assets, the return on investment of those assets, or both to a specified beneficiary that is not financially interrelated is not a donee. The recipient entity should recognize its liability to the specified beneficiary concurrent with its recognition of cash or other financial assets³ received from the donor. Further, FASB ASC 958 provides that a nondonee recipient entity that receives nonfinancial assets is permitted, but not required, to recognize its liability and those assets provided that the entity reports consistently from period to period and discloses its accounting policy.

FASB ASC 958-605-55-71 discusses transfers that are not contributions and provides as follows:

Receipts of resources as an agent, trustee, or intermediary of a donor are not contributions received to the agent because the recipient of assets who is an agent or trustee has little or no discretion in determining how the assets transferred will be used. For the same reason, deliveries of resources as an agent, trustee, or intermediary of a donor are not contributions made by the agent. Similarly, contributions of services (time, skills, or expertise) between donors and donees that are facilitated by an intermediary are not contributions received or contributions made by the intermediary.

Some NPEs participate in activities wherein the resource provider (donor) determines the eligibility requirements for the ultimate beneficiaries and the NPE must disburse to any who meet guidelines specified by the resource provider or return the assets. In some of those programs, the NPE receives assets, such as food, food vouchers, public transportation vouchers, and cash and distributes the assets on behalf of the resource provider (donor) in exchange for a fee for performing that service.

Should recipient entity NPEs report receipts and disbursements of assets under such programs (other than any fees for performing the service) as revenues and expenses?

Reply—Receipts and disbursements of assets under such programs (other than any fees for performing the service) are agency transactions, and are not contributions to the recipient entity NPE. A recipient entity that receives financial assets, such as cash or vouchers that can be exchanged for cash, should recognize its liability to the beneficiaries concurrent with its recognition of financial assets received from the donor. A recipient entity that receives nonfinancial assets, such as food vouchers or public transportation vouchers that are denominated in either dollar values or in nonfinancial terms, such as pounds of food or bus rides, but that will not be settled in cash, is permitted, but not required, to recognize its liability and those assets provided that the entity reports consistently from period to period and discloses its accounting policy.

³ The Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) glossary defines financial assets as

cash, evidence of an ownership interest in an entity, or a contract that conveys to one entity a right to do either of the following:

- a. Receive cash or another financial instrument from a second entity
- b. Exchange other financial instruments on potentially favorable terms with the second entity

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.13 Note to Sections 6140.14–.18—Implementation of FASB ASC 958—Classification of a Beneficiary’s Interest in the Net Assets of a Financially Interrelated Fund-Raising Foundation (in the Beneficiary’s Financial Statements)

Some not-for-profit entities have separate fund-raising foundations (commonly referred to as *institutionally related foundations*) that solicit contributions on their behalf. FASB ASC 958 provides guidance on (among other things) the accounting that should be followed by such institutionally related foundations and their related beneficiary entity(ies) with respect to contributions received by the foundation.

Some institutionally related foundations and their beneficiary entities meet the characteristics of financially interrelated entities provided in FASB ASC 958-20-15-2. If entities are financially interrelated, FASB ASC 958 provides that the balance sheet of the beneficiary entity(ies) should reflect that entity’s interest in the net assets of the foundation, and that interest should be periodically adjusted to reflect the beneficiary’s share of the changes in the net assets of the foundation. This accounting is similar to the equity method of accounting, which is described in FASB ASC 323, *Investments—Equity Method and Joint Ventures*.

FASB ASC 323-10-35-5 requires that the periodic adjustment of the investment be included in the determination of the investor’s net income. The purpose of sections 6140.14–.18 (applicable to NPEs other than health care [HC] entities) and sections 6400.36–.42 (applicable to not-for-profit HC entities) is to clarify that in circumstances in which the recipient and the beneficiary are financially interrelated:

- Beneficiary entities should segregate the adjustment into changes in restricted and unrestricted net assets. (NPE TPA [sections 6140.14–.16]; HC TPA [section 6400.36–37 and .39])
- In circumstances in which the beneficiary can influence the financial decisions of the recipient entity to such an extent that the beneficiary can determine the timing and amount of distributions from the recipient to the beneficiary, the existence of the recipient entity should be transparent in determining the net asset classifications in the beneficiary’s financial statements. In other words, the recipient cannot impose time or purpose restrictions beyond those imposed by the donor. (NPE TPA [sections 6140.14 and .16]; HC TPA [sections 6400.36 and .39])
- In circumstances in which the beneficiary cannot influence the financial decisions of the recipient entity to such an extent that the beneficiary can determine the timing and amount of distributions from the recipient to the beneficiary, the existence of the recipient entity creates an implied time restriction on the beneficiary’s net assets attributable to the beneficiary’s interest in the net assets of the recipient (in addition to any other restrictions that may exist). Accordingly, in recognizing its interest in the net assets of the recipient entity and the changes in that interest, the beneficiary should classify the resulting net assets and changes in those net assets as temporarily restricted (unless donors placed permanent restrictions on their contributions). (NPE TPA [section 6140.15]; HC TPA [section 6400.37])

- In circumstances in which the beneficiary can influence the financial decisions of the recipient entity to such an extent that the beneficiary can determine the timing and amount of distributions from the recipient to the beneficiary and some net assets held by the recipient for the benefit of the beneficiary are subject to purpose restrictions (for example, net assets of the recipient restricted to the beneficiary's purchase of property, plant, and equipment [PPE]), expenditures by the beneficiary that meet those purpose restrictions result in the beneficiary (and recipient) reporting reclassifications from temporarily restricted to unrestricted net assets (assuming that the beneficiary has no other net assets subject to similar purpose restrictions), unless those net assets are subject to time restrictions that have not expired, including time restrictions that are implied on contributed long-lived assets as a result of the beneficiary's accounting policy pursuant to FASB ASC 958-605-45-6. (If those net assets are subject to time restrictions that have not expired and the beneficiary has other net assets with similar purpose restrictions, the restrictions on those other net assets would expire in accordance with FASB ASC 958. These sections do not, however, establish a hierarchy pertaining to which restrictions are released first—restrictions on net assets held by the recipient or purpose restrictions on net assets held by the beneficiary.) (NPE TPA [section 6140.17]; HC TPA [section 6400.40])
- In circumstances in which the beneficiary cannot influence the financial decisions of the recipient entity to such an extent that the beneficiary can determine the timing and amount of distributions from the recipient to the beneficiary and some net assets held by the recipient for the benefit of the beneficiary are subject to purpose restrictions, though not subject to time restrictions other than the implied time restrictions that exist because the beneficiary cannot determine the timing and amount of distributions from the recipient to the beneficiary, expenditures by the beneficiary that are consistent with those purpose restrictions should not result in the beneficiary reporting a reclassification from temporarily restricted to unrestricted net assets, subject to the exceptions in the following sentence. Expenditures by the beneficiary that are consistent with those purpose restrictions should result in the beneficiary reporting a reclassification from temporarily restricted to unrestricted net assets if (a) the recipient has no discretion in deciding whether the purpose restriction is met⁴ or (b) the recipient distributes or obligates itself to distribute to the beneficiary amounts attributable to net assets restricted for the particular purpose, or otherwise indicates that the recipient intends for those net assets to be used to support the particular purpose as an activity of the current period. In all other circumstances, (a) purpose restrictions and (b) implied time restrictions on the net assets attributable to the interest in the recipient entity exist and have not yet expired. (However, if the beneficiary has other net assets with similar purpose

⁴ In some circumstances, the purpose restrictions may be so broad that the recipient entity has discretion in deciding whether expenditures by the beneficiary that are consistent with those purpose restrictions actually meet those purpose restrictions. For example, the recipient's net assets may have arisen from a contribution that was restricted for the beneficiary's purchase of research equipment, with no particular research equipment specified. Purchasing an XYZ microscope, which is consistent with that purpose restriction, may or may not meet that purpose restriction, depending on the decision of the recipient. In contrast, the net assets may have arisen from a contribution that was restricted for an XYZ microscope. Purchasing an XYZ microscope, which also is consistent with that purpose restriction, would result in the recipient having no discretion in determining whether that purpose restriction is met.

restrictions, those restrictions would expire in accordance with FASB ASC 958. These TPAs do not establish a hierarchy pertaining to which restrictions are released first—restrictions on net assets held by the recipient or restrictions on net assets held by the beneficiary.) (NPE TPA [section 6140.18]; HC TPA [section 6400.41])

- *For HC NPEs Only.* In circumstances in which the beneficiary can influence the financial decisions of the recipient to such an extent that the beneficiary can determine the timing and amount of distributions from the recipient to the beneficiary, changes in the beneficiary's interest in the net assets of a recipient entity attributable to unrealized gains and losses on investments should be included or excluded from the performance indicator in accordance with FASB ASC 954-10, FASB ASC 954-205-45, FASB ASC 954-320-45, FASB ASC 954-320-55, and FASB ASC 954-605 in the same manner that they would have been had the beneficiary had the transactions itself. Similarly, in applying this guidance, the determination of whether amounts are included or excluded from the performance measure should comprehend that if the beneficiary cannot influence the financial decisions of the recipient entity to such an extent that the beneficiary can determine the timing and amount of distributions from the recipient to the beneficiary, an implied time restriction exists on the beneficiary's net assets attributable to the beneficiary's interest in the net assets of the recipient (in addition to any other restrictions that may exist). Accordingly, in circumstances in which the beneficiary cannot influence the financial decisions of the recipient entity to such an extent that the beneficiary can determine the timing and amount of distributions from the recipient to the beneficiary, the beneficiary should classify the resulting net assets and changes in those net assets as temporarily restricted (unless donors placed permanent restrictions on their contributions) and therefore exclude those changes from the performance indicator. (HC TPA [section 6400.42])
- *For HC NPEs Only.* In circumstances in which the recipient entity and the beneficiary are both controlled by the same entity, entities should consider the specific facts and circumstances to determine whether the beneficiary can influence the financial decisions of the recipient entity to such an extent that the beneficiary can determine the timing and amount of distributions from the recipient to the beneficiary. (HC TPA [section 6400.38])

**Technical Practice Aids for Not-for-Profit Entities
Implementation of FASB ASC 958—Classification of a Beneficiary’s
Interest in the
Net Assets of a Financially Interrelated Fund-Raising Foundation
(in the Beneficiary’s Financial Statements)**

HC NPEs			
NPEs that are not HC NPEs			
<p>Can the beneficiary determine the timing and amount of distributions from the recipient to the beneficiary? [Not-for-profit health care entities (HC NPEs) under common control consider HC Technical Practice Aid (TPA) section 6400.38]</p>	<p>How does the existence of the recipient affect the beneficiary’s reporting of its interest?</p>	<p>Are any net assets held by the recipient for the benefit of the beneficiary subject to donor-imposed purpose restrictions and has the beneficiary made expenditures that meet those purpose restrictions (in circumstances in which the beneficiary can determine the timing and amount of distributions from the recipient to the beneficiary) or that are consistent with those purpose restrictions (in circumstances in which the beneficiary cannot determine the timing and amount of distributions from the recipient to the beneficiary)?</p>	<p>Are any changes in the beneficiary’s interest in the net assets of the recipient attributable to unrealized gains and losses on investments?</p>

(continued)

HC NPEs			
NPEs that are not HC NPEs			
Yes	Existence of recipient is transparent in determining net asset classifications. (NPE TPA [sections 6140.14 and .16]; HC TPA [sections 6400.36 and .39])	Reclass the applicable net assets from temporarily restricted (TR) to unrestricted (UR) unless those net assets are subject to time restrictions that have not expired. (NPE TPA [section 6140.17]; HC TPA [section 6400.40])	Changes in the beneficiary's interest in the net assets of a recipient entity attributable to unrealized gains and losses on investments should be included or excluded from the performance indicator in accordance with FASB ASC 954-10, FASB ASC 954-205-45, FASB ASC 954-320-45, FASB ASC 954-320-55, and FASB ASC 954-605 in the same manner that they would have been had the beneficiary had the transactions itself. (HC TPA [section 6400.42])
No	Existence of the recipient creates an implied time restriction on the beneficiary's net assets attributable to the beneficiary's interest in the net assets of the recipient. (NPE TPA [section 6140.15]; HC TPA [section 6400.37])	Reclass the applicable net assets from TR to UR only if the purpose restriction and the implied time restriction are met. Whether the purpose restriction is met depends in part on (1) whether the recipient has discretion in determining whether the purpose restriction is met and (2) the recipient's decision in exercising that discretion, if any. (NPE TPA [section 6140.18]; HC TPA [section 6400.41])	An implied time restriction exists on the beneficiary's net assets attributable to the beneficiary's interest in the net assets of the recipient. The beneficiary should classify the resulting net assets and changes in those net assets as temporarily restricted (unless donors placed permanent restrictions on their contributions) and therefore exclude those changes from the performance indicator. (HC TPA [section 6400.42])

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.14 Application of FASB ASC 958—Classification of a Beneficiary’s Interest in the Net Assets of a Financially Interrelated Fund-Raising Foundation (The beneficiary can influence the operating and financial decisions of the foundation to such an extent that the beneficiary can determine the timing and amount of distributions from the foundation.)

Inquiry—ABC Research Institute, a not-for-profit entity subject to FASB ASC 958⁵ and ABC Foundation are financially interrelated entities as described in FASB ASC 958-20-15-2. ABC Foundation’s bylaws state that it is organized for the purpose of stimulating voluntary financial support from donors for the sole benefit of ABC Research Institute. Assume that ABC Research Institute can influence the operating and financial decisions of ABC Foundation to such an extent that ABC Research Institute can determine the timing and amount of distributions from ABC Foundation to ABC Research Institute.

During its most recent fiscal year, ABC Foundation’s activities resulted in an increase in net assets (before distributions) of \$3,200, comprised of \$2,000 in unrestricted contributions, \$1,000 in temporarily restricted contributions (purpose restrictions), \$500 in unrestricted dividend and interest income, and \$300 in expenses. In addition, ABC Foundation distributed \$2,500 in cash representing unrestricted net assets to ABC Research Institute. How should this activity be reported in ABC Research Institute’s financial statements?

Reply—Because ABC Foundation (the recipient entity) and ABC Research Institute (the beneficiary) are financially interrelated, FASB ASC 958-20-25-2 requires ABC Research Institute to recognize its interest in the net assets of ABC Foundation and periodically adjust that interest for its share of the change in net assets of ABC Foundation. This is similar to the equity method of accounting described in FASB ASC 323.

In recognizing its interest in the net assets of ABC Foundation and the changes in that interest, ABC Research Institute should classify the resulting net assets as if contributions were received by ABC Research Institute directly from the donor, because ABC Research Institute can influence the operating and financial decisions of ABC Foundation to such an extent that ABC Research Institute can determine the timing and amount of distributions from ABC Foundation to ABC Research Institute. In other words, the existence of ABC Foundation should be transparent in determining the net asset classifications in ABC Research Institute’s financial statements because ABC Foundation cannot impose time or purpose restrictions beyond those imposed by the donor. (Any instructions given by ABC Foundation are designations, rather than restrictions.)

In the circumstances described in the preceding, ABC Research Institute would initially increase its asset, “Interest in Net Assets of ABC Foundation” for the change in ABC Foundation’s net assets (\$3,200). ABC Research Institute’s Statement of Activity would include “Change in Unrestricted Interest in ABC Foundation” of \$2,200, which would be reported as an increase in unrestricted net assets, and “Change in Temporarily Restricted Interest in ABC Foundation” of \$1,000 as an increase in temporarily restricted net assets.

The \$2,500 distribution from ABC Foundation to ABC Research Institute would not be reported as an increase in net assets on ABC Research Institute’s

⁵ This section addresses not-for-profit entities subject to FASB ASC 958. Section 6400.36, “Application of FASB ASC 958—Classification of a Beneficiary’s Interest in the Net Assets of a Financially Interrelated Fund-Raising Foundation (The beneficiary can influence the operating and financial decisions of the foundation to such an extent that the beneficiary can determine the timing and amount of distributions from the foundation.)” addresses a similar issue for not-for-profit health care entities subject to FASB ASC 954, *Health Care Entities*.

Statement of Activity. By analogy to equity method accounting, the \$2,500 would be reported in a manner similar to a distribution from a subsidiary to its parent (for example, a dividend). ABC Research Institute should report the distribution by increasing cash and decreasing its interest in the net assets of ABC Foundation.

If the distribution represented restricted net assets, ABC Research Institute would not reclassify the net assets from temporarily restricted to unrestricted at the time of the distribution. Instead, ABC Research Institute would reclassify the net assets from temporarily restricted to unrestricted when those restrictions were met.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.15 Application of FASB ASC 958—Classification of a Beneficiary’s Interest in the Net Assets of a Financially Interrelated Fund-Raising Foundation (The beneficiary cannot influence the operating and financial decisions of the foundation to such an extent that the beneficiary can determine the timing and amount of distributions from the foundation.)

Inquiry—ABC Research Institute, a not-for-profit entity subject to FASB ASC 958⁶ and ABC Foundation are financially interrelated entities as described in FASB ASC 958-20-15-2. ABC Foundation’s bylaws state that it is organized for the purpose of stimulating voluntary financial support from donors for the sole benefit of ABC Research Institute. Assume that ABC Research Institute cannot, however, influence the operating and financial decisions of ABC Foundation to such an extent that ABC Research Institute can determine the timing and amount of distributions from ABC Foundation to ABC Research Institute.

During its most recent fiscal year, ABC Foundation’s activities resulted in an increase in net assets (before distributions) of \$3,200, comprised of \$2,000 in unrestricted contributions, \$1,000 in temporarily restricted contributions (purpose restrictions), \$500 in unrestricted dividend and interest income, and \$300 in expenses. In addition, ABC Foundation elected to distribute \$2,500 in cash representing unrestricted net assets to ABC Research Institute. How should this activity be reported in ABC Research Institute’s financial statements?

Reply—Because ABC Foundation (the recipient entity) and ABC Research Institute (the beneficiary) are financially interrelated, FASB ASC 958-20-25-2 requires ABC Research Institute to recognize its interest in the net assets of ABC Foundation and periodically adjust that interest for its share of the change in net assets of ABC Foundation. This is similar to the equity method of accounting described in FASB ASC 323.

ABC Research Institute cannot influence the operating and financial decisions of ABC Foundation to such an extent that ABC Research Institute can determine the timing and amount of distributions from ABC Foundation to ABC Research Institute. Therefore, an implied time restriction exists on ABC Research Institute’s interest in the net assets of ABC Foundation (in addition to any other restrictions that may exist). Accordingly, in recognizing its interest in the net assets of ABC Foundation and the changes in that interest, ABC Research Institute should classify the resulting net assets as changes in

⁶ This section addresses not-for-profit entities subject to FASB ASC 958. Section 6400.37, “Application of FASB ASC 958—Classification of a Beneficiary’s Interest in the Net Assets of a Financially Interrelated Fund-Raising Foundation (The beneficiary cannot influence the operating and financial decisions of the foundation to such an extent that the beneficiary can determine the timing and amount of distributions from the foundation.),” addresses a similar issue for not-for-profit health care entities subject to FASB ASC 954.

temporarily restricted net assets (unless donors placed permanent restrictions on their contributions).

In the circumstances described in the preceding, ABC Research Institute would initially increase its asset, “Interest in Net Assets of ABC Foundation” for the change in ABC Foundation’s net assets (\$3,200). ABC Research Institute’s Statement of Activity would include “Change in Temporarily Restricted Interest in ABC Foundation” of \$3,200 as an increase in temporarily restricted net assets.

The \$2,500 distribution from ABC Foundation to ABC Research Institute would not be reported as an increase in net assets on ABC Research Institute’s Statement of Activity. By analogy to equity method accounting, the \$2,500 would be treated similar to a distribution from a subsidiary to its parent (for example, a dividend). ABC Research Institute should report the distribution by increasing cash and decreasing its interest in the net assets of ABC Foundation.

ABC Research Institute would reclassify the net assets from temporarily restricted to unrestricted at the time of the distribution, because the time restriction would expire at the time of the distribution. (If those net assets were subject to purpose or time restrictions that remained even after the net assets had been distributed to ABC Research Institute, ABC Research Institute would not reclassify the net assets from temporarily restricted to unrestricted at the time of the distribution. Instead, ABC Research Institute would reclassify the net assets from temporarily restricted to unrestricted when those restrictions were met.)

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.16 Application of FASB ASC 958—Classification of a Beneficiary’s Interest in the Net Assets of a Financially Interrelated Fund-Raising Foundation (More Than One Beneficiary—Some Contributions Are Designated)

Inquiry—DEF Arts Entity is the parent of three brother-sister not-for-profit entities: Ballet, Orchestra, a not-for-profit entity subject to FASB ASC 958⁷ and Foundation. Foundation is organized for the purpose of raising contributions for the benefit of both Ballet and Orchestra. The four entities are legally separate not-for-profit entities that are financially interrelated pursuant to the guidance in FASB ASC 958-20-15-2. Assume that Orchestra can influence the financial decisions of Foundation to such an extent that Orchestra can determine the timing and amount of distributions from Foundation to Orchestra.

A donor contributes \$5,000 cash to Foundation and stipulates that the contribution is for the benefit of Orchestra. Foundation would record the contribution as temporarily restricted revenue (because Foundation must use the contribution for the benefit of Orchestra). In its separately issued financial statements, Orchestra would recognize its interest in the net assets attributable to that contribution by debiting “Interest in Net Assets of Foundation” for \$5,000. Would the offsetting credit be reported as temporarily restricted revenue (because the net assets attributable to the contribution are restricted on Foundation’s Balance Sheet) or unrestricted revenue (because there are no

⁷ This section addresses not-for-profit entities subject to FASB ASC 958. Section 6400.39, “Application of FASB ASC 958—Classification of a Beneficiary’s Interest in the Net Assets of a Financially Interrelated Fund-Raising Foundation (More Than One Beneficiary—Some Contributions Are Designated),” addresses a similar issue for not-for-profit health care entities subject to FASB ASC 954.

donor-imposed time restrictions or purpose restrictions on how Orchestra must use the contribution)?

Reply—Orchestra should report the offsetting credit as unrestricted revenue. Because Orchestra can influence the financial decisions of Foundation to such an extent that Orchestra can determine the timing and amount of distributions from Foundation to Orchestra, no implied time restriction exists on Orchestra's net assets attributable to its interest in the net assets of Foundation. Accordingly, in recognizing its interest in the net assets of Foundation and the changes in that interest, Orchestra should classify the resulting net assets as if contributions were received by Orchestra directly from the donor. In other words, the existence of Foundation should be transparent in determining the net asset classifications in Orchestra's separately issued financial statements because Foundation cannot impose time or purpose restrictions beyond those imposed by the donor. (Any instructions given by Foundation are designations, rather than restrictions.)

Because there are no donor-imposed restrictions on how Orchestra must use the contribution, Orchestra should report the change in its interest in the net assets attributable to the contribution as an increase in unrestricted net assets in its separately issued Statement of Activity. When Foundation actually distributes the funds, Orchestra should increase cash and decrease its interest in net assets of Foundation; the distributions would have no effect on Orchestra's Statement of Activity.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.17 Application of FASB ASC 958—Classification of a Beneficiary's Interest in the Net Assets of a Financially Interrelated Fund-Raising Foundation (The beneficiary makes an expenditure that meets a purpose restriction on net assets held for its benefit by the recipient entity—The beneficiary can influence the operating and financial decisions of the recipient to such an extent that the beneficiary can determine the timing and amount of distributions from the recipient.)

Inquiry—ABC Research Institute, a not-for-profit entity subject to FASB ASC 958⁸ and ABC Foundation are financially interrelated entities as described in FASB ASC 958-20-15-2. ABC Foundation's bylaws state that it is organized for the purpose of stimulating voluntary financial support from donors for the sole benefit of ABC Research Institute. Assume that ABC Research Institute can influence the operating and financial decisions of ABC Foundation to such an extent that ABC Research Institute can determine the timing and amount of distributions from ABC Foundation to ABC Research Institute.

ABC Foundation's net assets consist of \$3,000,000 resulting from cash contributions restricted for the purchase of property, plant, and equipment (PPE) by ABC Research Institute. ABC Research Institute has recorded its interest in those net assets by debiting "Interest in net assets of ABC Foundation" and crediting "Change in interest in ABC Foundation," which is reported as an increase in temporarily restricted net assets. ABC Research

⁸ This section addresses not-for-profit entities subject to FASB ASC 958. Section 6400.40,"Application of FASB ASC 958—Classification of a Beneficiary's Interest in the Net Assets of a Financially Interrelated Fund-Raising Foundation (The beneficiary makes an expenditure that meets a purpose restriction on net assets held for its benefit by the recipient organization—The beneficiary can influence the operating and financial decisions of the recipient to such an extent that the beneficiary can determine the timing and amount of distributions from the recipient.)" addresses a similar issue for not-for-profit health care entities subject to FASB ASC 954.

Institute's accounting policy is to not imply a time restriction that expires over the useful life of the donated long-lived assets pursuant to FASB ASC 958-605-45-6 and it has no other net assets restricted for the purchase of PPE.⁹ ABC Research Institute subsequently purchased and placed into service \$3,000,000 of PPE that meets those donor restrictions prior to receiving a distribution from ABC Foundation. Should ABC Research Institute reclassify \$3,000,000 from temporarily-restricted net assets to unrestricted net assets as a result of building and placing into service the \$3,000,000 of PPE?

Reply—Because ABC Foundation (the recipient entity) and ABC Research Institute (the beneficiary) are financially interrelated, FASB ASC 958-20-25-2 requires ABC Research Institute to recognize its interest in the net assets of ABC Foundation and periodically adjust that interest for its share of the change in net assets of ABC Foundation. This is similar to the equity method of accounting described in FASB ASC 323.

In recognizing its interest in the net assets of ABC Foundation and the changes in that interest, ABC Research Institute should classify the resulting net assets as if contributions were received by ABC Research directly from the donor, because ABC Research Institute can influence the operating and financial decisions of ABC Foundation to such an extent that ABC Research Institute can determine the timing and amount of distributions from ABC Foundation to ABC Research Institute. Accordingly, the net assets representing contributions restricted for the purchase of PPE should be reported as temporarily restricted net assets (purpose restricted) in ABC Research Institute's financial statements. Upon purchasing and placing into service the PPE, ABC Research Institute (and ABC Foundation) should reclassify \$3,000,000 from temporarily restricted to unrestricted net assets.¹⁰ In other words, the existence of ABC Foundation should be transparent in determining the net asset classifications in ABC Research Institute's financial statements because ABC Foundation cannot impose time or purpose restrictions beyond those imposed by the donor. (Any instructions given by ABC Foundation are designations, rather than restrictions.)

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

⁹ The assumption that ABC Research Institute has no other net assets restricted for the purchase of PPE is intended to avoid establishing a hierarchy pertaining to which restrictions are released first—restrictions on net assets held by the recipient or restrictions on net assets held by the beneficiary. That issue is not addressed in this TPA.

¹⁰ In this fact pattern, ABC Research Institute's interest in the net assets of ABC Foundation is subject to only purpose restrictions because the net assets arose from cash contributions with no time restrictions. If instead the net assets arose from promises to give rather than from cash contributions, the net assets might be subject to time restrictions in addition to the purpose restrictions. In determining whether net assets that arose from promises to give are subject to time restrictions, NPEs should consider the guidance in section 6140.04, "Lapsing of Restrictions on Receivables if Purpose Restrictions Pertaining to Long-Lived Assets Are Met Before the Receivables Are Due," which discusses whether restrictions on net assets arising from promises to give that are restricted by donors for investments in long-lived assets are met when the assets are placed in service or when the receivables are due.

- .18 Application of FASB ASC 958—Classification of a Beneficiary’s Interest in the Net Assets of a Financially Interrelated Fund-Raising Foundation (The beneficiary makes an expenditure that is consistent with a purpose restriction on net assets held for its benefit by the recipient entity—The beneficiary cannot influence the operating and financial decisions of the recipient to such an extent that the beneficiary can determine the timing and amount of distributions from the recipient.)**

Inquiry—ABC Research Institute, a not-for-profit entity subject to FASB ASC 958¹¹ and ABC Foundation are financially interrelated entities as described in FASB ASC 958-20-15-2. ABC Foundation’s bylaws state that it is organized for the purpose of stimulating voluntary financial support from donors for the sole benefit of ABC Research Institute. Assume that ABC Research Institute cannot, however, influence the operating and financial decisions of ABC Foundation to such an extent that ABC Research Institute can determine the timing and amount of distributions from ABC Foundation to ABC Research Institute.

ABC Foundation’s net assets consist of \$3,000,000 resulting from cash contributions restricted for the purchase of property, plant, and equipment (PPE) by ABC Research Institute. ABC Research Institute has recorded its interest in those net assets by debiting “Interest in net assets of ABC Foundation” and crediting “Change in interest in ABC Foundation,” which is reported as an increase in temporarily restricted net assets. ABC Research Institute has no other net assets restricted for the purchase of PPE.¹²

ABC Research Institute subsequently built and placed into service the New Modern Wing of the Research Building prior to receiving a distribution from ABC Foundation or any indication that it intends to support building and placing into service the New Modern Wing of the Research Building. Should ABC Research Institute reclassify \$3,000,000 from temporarily-restricted net assets to unrestricted net assets as a result of building and placing into service the \$3,000,000 of PPE?

Reply—From ABC Research Institute’s perspective, its interest in the net assets of ABC Foundation has two restrictions—a purpose restriction (the purchase of the PPE) and an implied time restriction. (ABC Research Institute cannot influence the operating and financial decisions of ABC Foundation to such an extent that ABC Research Institute can determine the timing and amount of distributions from ABC Foundation to ABC Research Institute, including distributions pertaining to expenditures by ABC Research Institute that meet the donor-imposed purpose restrictions. Therefore, an implied time restriction exists on ABC Research Institute’s interest in the net assets of ABC Foundation.) FASB ASC 958-205-45-9 provides, in part, as follows:

If two or more temporary restrictions are imposed on a contribution, the effect of the expiration of those restrictions shall be recognized in the period in which the last remaining restriction has expired.

¹¹ This section addresses not-for-profit entities subject to FASB ASC 958. Section 6400.41, “Application of FASB Statement No. 136—Classification of a Beneficiary’s Interest in the Net Assets of a Financially Interrelated Fund-Raising Foundation (The beneficiary makes an expenditure that is consistent with a purpose restriction on net assets held for its benefit by the recipient organization—The beneficiary cannot influence the operating and financial decisions of the recipient to such an extent that the beneficiary can determine the timing and amount of distributions from the recipient.),” addresses a similar issue for not-for-profit health care entities subject to FASB ASC 954.

¹² The assumption that ABC Research Institute has no other net assets restricted for the purchase of PPE is intended to avoid establishing a hierarchy pertaining to which restrictions are released first—restrictions on net assets held by the recipient or restrictions on net assets held by the beneficiary. That issue is not addressed in this section.

FASB ASC 958-205-45-11 further provides, in part, as follows:

Temporarily restricted net assets with time restrictions are not available to support expenses until the time restrictions have expired.

In considering whether the purpose restriction on ABC Research Institute's interest in the net assets of ABC Foundation is met, ABC Research Institute should determine whether ABC Foundation has discretion in deciding whether an expenditure by ABC Research Institute that is consistent with the purpose restriction satisfies that purpose restriction. For example, if the restricted net assets arose from a contribution that was restricted for "building projects of ABC Research Institute," with no particular building project specified, purchasing and placing into service the New Modern Wing of the Research Building is consistent with the purpose restriction but may or may not meet it, because ABC Foundation has some discretion in deciding which building project releases the purpose restriction. In other words, ABC Foundation may, at its discretion, either release restricted net assets in support of building the New Modern Wing of the Research Building or not, because the purpose restriction imposed by the donor was broad enough to give ABC Foundation discretion in deciding which building projects meet the purpose restriction. If ABC Foundation has such discretion, a purpose restriction and an implied time restriction on ABC Research Institute's interest in the net assets of ABC Foundation exist. Therefore, ABC Research Institute should not reclassify \$3,000,000 from temporarily-restricted net assets to unrestricted net assets as a result of building and placing into service the New Modern Wing of the Research Building unless ABC Foundation distributes or obligates itself to distribute to ABC Research Institute amounts attributable to net assets restricted for the purchase of PPE by ABC Research Institute, or ABC Foundation otherwise indicates that it intends for those net assets to be used to support the building and placing into service the New Modern Wing of the Research Building as an activity of the current period (assuming that ABC Research Institute had no other net assets that were restricted for the purchase of PPE).^{13 14}

¹³ In this fact pattern, the expenditure is made prior to meeting the purpose restriction and the implied time restriction that exists because ABC Research Institute cannot determine the timing and amount of distributions from ABC Foundation to ABC Research Institute. FASB ASC 958-205-45-11 provides that in circumstances in which both purpose and time restrictions exist, expenditures meeting the purpose restriction must be made simultaneous with or after the time restriction has expired in order to satisfy both the purpose and time restriction and result in a reclassification of net assets from temporarily restricted to unrestricted. In other words, time restrictions, if any, must be met before expenditures can result in purpose restrictions being met. In this fact pattern, however, the time restriction is an implied time restriction that exists because the beneficiary cannot determine the timing and amount of distributions from the recipient to the beneficiary, rather than an implied time restriction that exists because a promise to give is due in a future period or because of an explicit donor stipulation. Accordingly, in this fact pattern, temporarily restricted net assets with implied time restrictions are available to support expenditures made before the expiration of the time restrictions and the net assets should be reclassified from temporarily restricted to unrestricted in the period in which the last remaining restriction has expired. In other words, in this fact pattern, if the expenditure that meets the purpose restriction is made before meeting the implied time restriction that exists because the beneficiary cannot determine the timing and amount of distributions from the recipient to the beneficiary, all the restrictions should be considered met once the implied time restriction is met.

¹⁴ In this fact pattern, ABC Research Institute's interest in the net assets of ABC Foundation is subject to an implied time restriction that exists because ABC Research Institute cannot determine the timing and amount of distributions from ABC Foundation to ABC Research Institute and a purpose restriction. Because the net assets arose from cash contributions with no other donor-imposed time restrictions, no time restrictions other than those imposed by ABC Foundation exist. If instead the net assets arose from promises to give rather than from cash contributions, the net assets might be subject to donor-imposed time restrictions in addition to the time restriction imposed by ABC Foundation and the purpose restriction. In determining whether net assets that arose from promises to give are subject to donor-imposed

In contrast to the example in the previous paragraph, if the restricted net assets arose from a contribution that was restricted for “building and placing into service the New Modern Wing of the Research Building,” ABC Foundation has no discretion in deciding whether that purpose restriction is met by building and placing into service the New Modern Wing of the Research Building. Therefore, if ABC Research Institute builds and places into service the New Modern Wing of the Research Building, the purpose restriction is met (assuming that ABC Research Institute had no other net assets that were restricted for building and placing into service the New Modern Wing). In addition, the implied time restriction is met because ABC Foundation is required to distribute the funds to ABC in order to meet the donor’s stipulations. Therefore, ABC Research Institute (and ABC Foundation) should reclassify \$3,000,000 from temporarily-restricted net assets to unrestricted net assets as a result of building and placing into service the New Modern Wing of the Research Building.

In summary, ABC Research Institute should not reclassify \$3,000,000 from temporarily-restricted net assets to unrestricted net assets as a result of building and placing into service the New Modern Wing of the Research Building until both the purpose restriction and the implied time restriction are met. If both the purpose restriction and the implied time restriction are met, ABC Research Institute should decrease its interest in the net assets of ABC Foundation and increase cash (or a receivable, if the Foundation has merely obligated itself to make the distribution) by the amount of the distribution, and simultaneously reclassify the same amount from temporarily restricted net assets to unrestricted net assets.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.19 Application of FASB ASC 958—Classification of Distributions From a Financially Interrelated Fund-Raising Foundation (Recipient Entity) to a Health Care Beneficiary

Inquiry—How should a fund-raising foundation (recipient), a not-for-profit entity subject to FASB ASC 958 report (in its separately issued financial statements) distributions to a financially interrelated beneficiary that is a health care entity? In other words, should such distributions be reported following (a) the guidance on reporting transfers among affiliated health care entities in FASB ASC 954-10, FASB ASC 954-205, FASB ASC 954-605, and FASB ASC 954-810, or (b) the guidance in FASB ASC 958.

Reply—FASB ASC 958 applies to all not-for-profit entities, except those that are providers of health care services (FASB ASC 958-10-15-3). Therefore, the guidance in FASB ASC 954 generally does not apply to financial statements of recipient entities that are financially interrelated fund-raising foundations. The foundation should follow the accounting and reporting requirements of FASB ASC 958 rather than FASB ASC 954 in the foundation’s separately issued financial statements. The foundation should report distributions to beneficiary

time restrictions in addition to the time restrictions imposed by ABC Foundation, NPEs should consider the guidance in section 6140.04, which discusses whether restrictions on net assets arising from promises to give that are restricted by donors for investments in long-lived assets are met when the assets are placed in service or when the receivables are due. In circumstances in which the net assets are subject to (a) donor-imposed time restrictions in addition to the (b) implied time restrictions that exist because ABC Research Institute cannot determine the timing and amount of distributions from ABC Foundation to ABC Research Institute and (c) purpose restrictions, the last remaining time restriction should be considered in applying the guidance in FASB ASC 958-205-45-11 that provides that temporarily restricted net assets with time restrictions are not available to support expenses until the time restrictions have expired.

entities as expenses or distributions to related entities. The guidance in the previous sentence applies regardless of whether the recipient entity and the beneficiary are under common control or whether one controls the other in a parent-subsidiary relationship.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.20 NPEs Reporting No Fund-Raising Expenses

Inquiry—Some NPEs with contributions report no fund-raising expense. FASB ASC 958-720-50-1 provides that the financial statements should disclose total fund-raising expense. Do circumstances exist in which an NPE could have contributions but minimal or no fund-raising expense?

Reply—It would be unusual for an NPE to have contributions but have minimal or no fund-raising expense. Examples of circumstances in which an NPE could have contributions but minimal or no fund-raising expense typically include those in which (a) because of name recognition or custom, donors contribute to the NPE without the NPE undertaking fund-raising activities,¹⁵ (b) fund-raising activities related to those contributions are conducted entirely or almost entirely by volunteers whose contributed services do not meet the recognition criteria for contributed services in FASB ASC 958-605-25-16 or (c) other entities that the NPE does not control¹⁶ contribute to the NPE with the NPE undertaking minimal or no fund-raising activity or other participation in relation to those contributions.¹⁷ ¹⁸ Examples of circumstances in which an NPE with contributions may have no fund-raising expense or minimal fund-raising expense in relation to contributions include:

- A religious entity obtains most or all of its contributions from member tithing.
- Most or all contributions arise from volunteers making phone calls or writing letters on the entity's behalf (and this volunteer activity does not meet the recognition criteria for contributed services in FASB ASC 958-605-25-16).
- An entity has no paid staff, and most or all contributions arise from uncompensated board members soliciting contributions (and this

¹⁵ Fund-raising activities include, but are not limited to, compensating another entity for raising funds on behalf of the NPE, such as circumstances in which the fund-raising entity retains an administrative fee for raising funds on behalf of the NPE.

¹⁶ The FASB ASC glossary defines *control* as “the possession, direct or indirect, of the power to direct or cause the direction of the management and policies of an entity through ownership, by contract, or otherwise.”

¹⁷ As discussed in FASB ASC 958-720-45-27, “Federated fundraising entities solicit and receive designated and undesignated contributions and make grants and awards to other not-for-profit entities. The fundraising activities of federated fundraising entities, including activities related to fundraising on behalf of others, shall be reported as fundraising expenses.”

¹⁸ As discussed in section 6140.22, “In Circumstances in Which the Reporting NPE Undertakes a Transaction in Which Another NPE (Fund-Raising NPE) Raises Contributions on Behalf of the Reporting NPE, and the Reporting NPE Compensates the Fund-Raising NPE for Raising Those Contributions (Compensation Including, But Not Limited to, an Administrative Fee), Should the Reporting NPE Report the Fund-Raising NPE's Compensation Gross as Fund-Raising Expenses, or Net, as a Reduction of Contributions?,” reporting NPEs should report fund-raising expenses for compensation to a fund-raising NPE acting as an agent or intermediary in circumstances in which the fund-raising NPE acting as an agent or intermediary retains an administrative fee that will be deducted from all contributions that are to be transferred to the donor's chosen entity. That fact pattern is an example of a circumstance in which other entities that the NPE does not control contribute to the NPE (through an agent or intermediary) with the NPE undertaking minimal or no fund-raising activity or other participation in relation to those contributions, and the NPE would report fund-raising expense.

board member activity does not meet the recognition criteria for contributed services in FASB ASC 958-605-25-16).

- The reporting entity is a private foundation or is supported by a private foundation, and the reporting entity expends no or minimal resources in soliciting those contributions.
- The reporting entity obtains most or all of its contributions from one or more entities that it does not control (fund-raising NPE), expends minimal resources, and has minimal participation in soliciting those contributions.¹⁹ For example:
 - NPE Relief and Development Entity is one of many entities devoted to cause ABC. NPE Relief and Development Entity receives most or all of its contributions from Relief and Development Entities in the USA, Canada, and the United Kingdom that raise support for cause ABC throughout the world.
 - NPE Religious Entity Denomination International Mission Board receives a substantial portion of its support from the NPE Religious Entity Denomination, which supports various entities and causes, including but not limited to NPE Religious Entity Denomination International Mission Board. NPE Religious Entity Denomination allocates, at its discretion, X percent of its contributions from supporting churches and individuals to NPE Religious Entity Denomination International Mission Board.

The reporting NPE should consider, however, whether it is required to make financial statement disclosures required by FASB ASC 850, *Related Party Disclosures*, and FASB ASC 275, *Risks and Uncertainties*.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.21 Should an NPE Report Amounts Charged to the NPE by a Professional Fund-Raiser Gross, as Fund-Raising Expenses, or Net, as a Reduction of Contributions?

Inquiry—In circumstances in which a professional fund-raiser charges an NPE for soliciting contributions on the NPE's behalf, should the NPE report amounts charged to the NPE by the professional fund-raiser gross, as fund-raising expense, or net, as a reduction of contributions?

Reply—In circumstances in which a professional fund-raiser charges an NPE for soliciting contributions on the NPE's behalf, the NPE should report the amounts charged to the NPE by the professional fund-raiser gross, as fund-raising expense. As discussed in paragraphs 14–15 of FASB ASC 958-225-45, revenues and expenses should be reported gross (except for investment revenues and related expenses, which are permitted to be reported net of related expenses), while gains and losses may be reported net. Accordingly, in circumstances in which an NPE incurs expenses by hiring a professional fund-raiser to solicit contributions on its behalf, the NPE should report those contributions and expenses gross, rather than net. For example, assume NPE A enters into a transaction with Professional Fund-Raiser B, whereby Professional Fund-Raiser B solicits contributions on behalf of NPE A, for a fee of 20 percent of contributions raised. Professional Fund-Raiser B raises \$100,000 and remits

¹⁹ Footnote 18, in referring to section 6140.22, discusses a circumstance in which other entities that the NPE does not control contribute to the NPE (through an agent or intermediary) with the NPE undertaking minimal or no fund-raising activity or other participation in relation to those contributions, and the NPE would report fund-raising expense.

\$80,000 to NPE A after retaining its fee of \$20,000. NPE A should report \$100,000 contribution revenue and \$20,000 fund-raising expense.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.22 In Circumstances in Which the Reporting NPE Undertakes a Transaction in Which Another NPE (Fund-Raising NPE) Raises Contributions on Behalf of the Reporting NPE, and the Reporting NPE Compensates the Fund-Raising NPE for Raising Those Contributions (Compensation Including, But Not Limited to, an Administrative Fee), Should the Reporting NPE Report the Fund-Raising NPE's Compensation Gross, as Fund-Raising Expenses, or Net, as a Reduction of Contributions?

Inquiry—In some circumstances, a federated fund-raising entity (or other NPE) (fund-raising NPE) acts as an agent or intermediary rather than a donee. For example, in circumstances in which the fund-raising NPE receives resources from donors who stipulate that those resources should be transferred to a specified NPE, the fund-raising NPE acts as an agent or intermediary rather than a donee.²⁰ The NPE compensates the fund-raising NPE acting as an agent or intermediary. (Such compensation includes, but is not limited to, the fund-raising NPE retaining an administrative fee that will be deducted from all contributions that are to be transferred to the donor's chosen entity.) Should the reporting NPE report the compensation to the fund-raising NPE acting as an agent or intermediary gross, as fund-raising expenses, or net, as a reduction of contributions?

Reply—The reporting NPE should report fund-raising expenses for the compensation to the fund-raising NPE acting as an agent or intermediary in circumstances in which the reporting NPE compensates the fund-raising NPE acting as an agent or intermediary for raising contributions on behalf of the reporting NPE. (Such compensation includes, but is not limited to, the fund-raising NPE acting as an agent or intermediary retaining an administrative fee that will be deducted from all contributions that are to be transferred to the donor's chosen entity.) Accordingly, the reporting NPE should report the amount retained as compensation by the fund-raising NPE acting as an agent or intermediary gross as fund-raising expenses and report contributions for the gross amount contributed from the donor to the fund-raising NPE acting as an agent or intermediary for the benefit of the reporting NPE.

Paragraphs 84–87 of FASB ASC 958-605-55 discuss, among other matters, circumstances in which a federated fund-raising entity acts as an agent or intermediary, rather than a donee, in raising contributions in which the donor specifies the entity to which the contribution should be transferred. As discussed in FASB ASC 958-605-55-86, in circumstances in which the federated fund-raising entity charges an administrative fee that will be deducted from all contributions that are to be transferred to the donor's chosen entity, the beneficiaries should report the gross amount of the contributions as contribution revenue and the administrative fees withheld by the federated fund-raising entity as expenses. The guidance in paragraphs 84–87 of FASB ASC 958-605-55 would also apply if the fund-raising NPE were other than a federated fund-raising entity. Also, in functionalizing the administrative fees reported as expenses, the reporting NPE beneficiary would classify those expenses as fund-raising.

²⁰ In some circumstances, the fund-raising NPE receives resources from donors without stipulations or with stipulations sufficiently broad such that the fund-raising NPE acts as a donee, rather than as an agent or intermediary.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.23 Changing Net Asset Classifications Reported in a Prior Year

Inquiry—In some circumstances, not-for-profit organizations (NFPs) correct net asset classifications previously reported in prior years' financial statements.

The FASB ASC glossary defines an *error in previously issued financial statements* as follows:

An error in recognition, measurement, presentation, or disclosure in financial statements resulting from mathematical mistakes, mistakes in the application of generally accepted accounting principles (GAAP), or oversight or misuse of facts that existed at the time the financial statements were prepared. A change from an accounting principle that is not generally accepted to one that is generally accepted is a correction of an error.

Are individual net asset classes, rather than net assets in the aggregate (total net assets), relevant in determining whether an NFP's correction of net asset classifications previously reported in prior years' financial statements is an error in previously issued financial statements?

Reply—Individual net asset classes, rather than net assets in the aggregate (total net assets), are relevant in determining whether an NFP's correction of net asset classifications previously reported in prior years' financial statements is an error in previously issued financial statements.

FASB ASC 958-205-45-2, in discussing the financial statement presentation of net asset classes, provides, in part, as follows:

The usefulness of information provided by financial statements of NFPs can be vastly improved if certain basic information is classified in comparable ways. All NFPs shall ... classify and report net assets in three groups—permanently restricted, temporarily restricted, and unrestricted—based on the existence or absence of donor-imposed restrictions and the nature of those restrictions. Information about the nature and amount of restrictions imposed by donors on the use of contributed assets, including their potential effects on specific assets and on liabilities or classes of net assets, is helpful in assessing the financial flexibility of an NFP.

FASB ASC 958-225-45-13, in discussing the circumstances in which net assets should be reclassified, provides as follows:

Reclassifications of net assets—that is, simultaneous increases in one net asset class and decreases in another—shall be made if any of the following events occur:

- a. The NFP fulfills the purposes for which the net assets were restricted.
- b. Donor-imposed restrictions expire with the passage of time or with the death of a split-interest agreement beneficiary (if the net assets are not otherwise restricted).
- c. A donor withdraws, or court action removes, previously imposed restrictions.
- d. A donor imposes restrictions on otherwise unrestricted net assets. For example, a donor may make a restricted contribution that is

conditioned on the NFP restricting a stated amount of its unrestricted net assets. Such restrictions that are not reversible without donors' consent result in a reclassification of unrestricted net assets to restricted net assets.

Paragraph 74 of FASB Statement No. 117, *Financial Statements of Not-for-Profit Organizations*, which was part of appendix B, "Basis for Conclusions," of FASB Statement No. 117 and not included in FASB ASC, discusses, among other matters, the importance of reporting information beyond totals for the organization as a whole, such as information about which net assets are subject to donor restrictions, and provides as follows:

In assessing the financial position or performance of a not-for-profit organization, however, the Board believes it is important to avoid focusing attention almost exclusively on net assets, change in net assets, total assets, or other highly simplified and aggregated amounts. For example, in Concepts Statement No. 6, *Elements of Financial Statements*, paragraph 106, the Board says, "Since donor-imposed restrictions affect the types and levels of service a not-for-profit organization can provide, whether an organization has maintained certain classes of net assets may be more significant than whether it has maintained net assets in the aggregate." Similarly, it is important to avoid focusing attention almost exclusively on "the bottom line" or other highly simplified and condensed information about business enterprises. Accordingly, this Statement requires not only summary amounts that focus on a not-for-profit organization as a whole but also information about items and components of those amounts; for example, it generally requires reporting information about the gross amounts of items of revenues and expenses and of cash receipts and cash payments.

[Issue Date: May 2010.]

.24 Contributions of Certain Nonfinancial Assets, Such as Fundraising Material, Informational Material, or Advertising, Including Media Time or Space for Public Service Announcements or Other Purposes

Inquiry—In some circumstances, entities other than an NFP use for the NFP's benefit (or provide at no charge to the NFP) certain nonfinancial assets that encourage the public to contribute to the NFP or help the NFP communicate its message or mission. Examples of such activities include the following:

- An advertising agency, television station, or newspaper provides design services or professional talent services.
- A radio or television station gives an NFP (or uses for the NFP's benefit) commercial air time at no charge.
- An NFP distributes a public service announcement to several radio or television stations and asks the stations to air the announcement. (Some stations air the announcement and report information about the airings to the NFP.)
- A magazine, newspaper, or other print media gives an NFP (or uses for the NFP's benefit) advertising space at no charge.
- An Internet site gives an NFP (or uses for the NFP's benefit) advertising space at no charge.

In circumstances in which fundraising material, informational material, or advertising, including media time or space for public service announcements or other purposes, is used for the NFP's benefit (or provided to the NFP at no charge) and encourages the public to contribute to an NFP or help the NFP

communicate its message or mission, should the NFP report a contribution? If so, how should that contribution be measured and reported?

Reply—In circumstances in which fundraising material, informational material, or advertising, including media time or space for public service announcements or other purposes, is used for the NFP's benefit (or provided to the NFP at no charge) and encourages the public to contribute to an NFP or help the NFP communicate its message or mission, NFPs should consider whether they have received a contribution. If they have received a contribution, it should be measured at fair value, pursuant to FASB ASC 958-605-30-2, and the related expense, at the time the expense is recognized, should be reported by function, based on the nature of the contributed item.

As noted in paragraph 5.02 of the AICPA Audit and Accounting Guide *Not-for-Profit Entities*, the FASB ASC glossary defines a *contribution*, in part, as “an unconditional transfer of cash or other assets to an entity or a settlement or cancellation of its liabilities in a voluntary nonreciprocal transfer by another entity acting other than as an owner.” As noted in paragraph 5.01 of the Audit and Accounting Guide *Not-for-Profit Entities*, other assets include securities, land, buildings, use of facilities or utilities, material and supplies, intangible assets, and unconditional promises to give in the future.

Paragraph 25 of FASB Concepts Statement No. 6, *Elements of Financial Statements—a replacement of FASB Concepts Statement No. 3 (incorporating an amendment of FASB Concepts Statement No. 2)*, defines *assets* as “probable future economic benefits obtained or controlled by a particular entity as a result of past transactions or events.” Paragraph 26 of FASB Concepts Statement No. 6, in discussing the characteristics of assets, provides, in part, as follows:

An asset has three essential characteristics: (a) it embodies a probable future benefit that involves a capacity, singly or in combination with other assets, to contribute directly or indirectly to future net cash inflows, (b) a particular entity can obtain the benefit and control others' access to it, (c) the transaction or other event giving rise to the entity's right to or control of the benefit has already occurred. ... [A]lthough the ability of an entity to obtain benefit from an asset and to control others' access to it generally rests on a foundation of legal rights, legal enforceability of a claim to the benefit is not a prerequisite for a benefit to qualify as an asset if the entity has the ability to obtain and control the benefit in other ways.

Paragraph 28 of FASB Concepts Statement No. 6 elaborates further on the economic benefits of assets, noting that for NFPs, such benefits may be realized in the form of service potential rather than cash inflows, as follows:

The common characteristic possessed by all assets (economic resources) is “service potential” or “future economic benefit,” the scarce capacity to provide services or benefits to the entities that use them. ... In a not-for-profit organization, that service potential or future economic benefit is used to provide desired or needed goods or services to beneficiaries or other constituents, which may or may not directly result in net cash inflows to the organization.

Paragraph 31 of FASB Concepts Statement No. 6, in discussing the momentary nature of certain assets, provides as follows:

Services provided by other entities, including personal services, cannot be stored and are received and used simultaneously. They can be assets of an entity only momentarily—as the entity receives and uses them—although their use may create or add value to other assets of the entity. Rights to

receive services of other entities for specified or determinable future periods can be assets of particular entities.

Accordingly, in circumstances in which fundraising material, informational material, or advertising, including media time or space for public service announcements or other purposes, is used for the NFP's benefit (or provided to the NFP at no charge) and encourages the public to contribute to an NFP or help the NFP communicate its message or mission, the NFP may have received an unconditional transfer of other assets in a voluntary nonreciprocal transfer from another entity acting other than as an owner.

Paragraphs 5.56–.57 of the Audit and Accounting Guide *Not-for-Profit Entities*, in discussing reporting contributions received, provide as follows:

FASB ASC 958-605-25-2 states that except as provided (for contributed services and collections), contributions received shall be recognized as revenues or gains in the period received and as assets, decreases of liabilities, or expenses depending on the form of the benefits received. [FN omitted]

Depending on the kind of benefit received, in addition to recognizing contribution revenue, the NFP should also recognize (a) an increase in assets (for example, cash, securities, contributions receivable, collections [if capitalized, see chapter 7, “Other Assets,” of this guide], and property and equipment); (b) a decrease in liabilities (for example, accounts payable or notes payable); or (c) an expense (for example, donated legal services).

FASB ASC 958-720-45-2, in discussing reporting expenses, provides as follows:

To help donors, creditors, and others in assessing an NFP's service efforts, including the costs of its services and how it uses resources, a statement of activities or notes to financial statements shall provide information about expenses reported by their functional classification, such as major classes of program services and supporting activities, for example:

- a. Program services
- b. Supporting activities
- c. Management and general activities
- d. Fundraising activities
- e. Membership development activities

Accordingly, expenses related to such fundraising material, informational material, or advertising, including media time or space for public service announcements or other purposes, used for the NFP's benefit (or provided to the NFP at no charge) that encourages the public to contribute to an NFP or help the NFP communicate its message or mission should be reported by function at the time the expense is recognized, based on the nature of the contributed item.

[Issue Date: May 2010.]

.25 Multiyear Unconditional Promises to Give—Measurement Objective and the Effect of Changes in Interest Rates

Inquiry—FASB ASC 958-605-25-8 provides that promises to give should be recognized when received.

What is the measurement objective for multiyear unconditional promises to give, and what is the effect of changes in interest rates on that objective?

Reply—The measurement objective for multiyear unconditional promises to give (both the revenue and contribution receivable) is fair value at initial recognition, consistent with FASB ASC 958-605-30-2. The measurement objective for contributions receivable at subsequent measurement depends on whether the NFP has elected the fair value option, pursuant to FASB ASC 825-10. If the NFP has elected the fair value option, pursuant to FASB ASC 825-10, the measurement objective for contributions receivable at subsequent measurement is fair value. If the NFP has not elected the fair value option, pursuant to FASB ASC 825-10, the measurement objective for contributions receivable at subsequent measurement is as described in FASB ASC 958-310-35-4.

The model in FASB ASC 825-10-50-3 is not a fair value model.²¹

As discussed in paragraph 5.20 of the Audit and Accounting Guide *Not-for-Profit Entities*, “[p]resent value techniques are one valuation technique for measuring the fair value of the contribution ... or receivable; other valuation techniques also are available, as described in FASB ASC 820, *Fair Value Measurements and Disclosures*.”

Paragraph 5.112 of the Audit and Accounting Guide *Not-for-Profit Entities*, in discussing the discount rate to be used if present value techniques are used to measure fair value, provides, in part, as follows:

FASB ASC 958-605-30-5 discusses the determination of the discount rate if present value techniques are used to measure fair value. The present value of unconditional promises to give should be measured using a discount rate that is consistent with the general principles for present value measurement discussed in paragraphs 5–9 of FASB ASC 820-10-55-5. In conformity with FASB ASC 835-30-25-11, the discount rate should be determined at the time the unconditional promise to give is initially recognized and should not be revised subsequently unless the NFP has elected to measure the promise to give at fair value in conformity with the “Fair Value Option” subsections of FASB ASC 825-10.

Accordingly, in circumstances in which the NFP

- has not elected the fair value option, pursuant to FASB ASC 825-10, and market interest rates change in periods subsequent to initial recognition, the discount rate used in a present value technique should not be revised to reflect such changes in market rates.
- has elected the fair value option, pursuant to FASB ASC 825-10, and market interest rates change in periods subsequent to initial recognition, the discount rate used in a present value technique should be revised to reflect such changes in market rates.

[Issue Date: May 2010.]

[The next page is 5521.]

²¹ FASB ASC 825-10-50 requires various disclosures, including disclosures of fair value and carrying amounts for all financial instruments (which include contributions receivable) for which it is practicable to estimate that value and the method(s) and significant assumptions used to estimate the fair value of financial instruments. FASB ASC 825-10-55-3 states that disclosures required by the “General” subsection of FASB ASC 825-10-50 are optional if an entity meets all of the following 3 criteria: (a) the entity is a nonpublic entity; (b) the entity’s total assets are less than \$100 million on the date of the financial statements; and (c) the entity has no instrument that, in whole or in part, is accounted for as a derivative instrument.

Section 6300

Insurance Companies

.01 Recognition of Commission Income by Insurance Agency

Inquiry—Insurance agents and brokers receive commissions on the insurance policies that they place for their clients with insurance companies. Commissions consist of a percentage of the premiums that the clients pay for the policies. On policies that are cancelled before the end of their term, usually one year, the insurance company charges back the portion of the commissions related to the unearned premiums to the originating agent or broker. In addition, some brokers may receive contingent commissions from underwriters based on the profitability of policies placed with an underwriter. How should an insurance agent or broker account for revenue from such commissions?

Reply—Commissions should be recognized on the date on which (a) the client is afforded protection under the policy (effective date), (b) the premium due under the policy can be reasonably estimated, and (c) the premium is billable to the client. A provision should be made for expected adjustments relating to policy cancellations when they can be reasonably estimated in accordance with Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 450, *Contingencies*. Contingent commissions should generally be recognized when the insurance agent or broker is notified by the underwriter of the amount to be received.

[Amended; Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.02 Method of Recognizing Revenue From Commissions on Credit Life Insurance

Inquiry—Under arrangements with a lending institution, an insurance agency provides credit life insurance to mortgagors. The borrower pays the premium for the entire term of the insurance (as much as eight years) when the loan is made, and the insurance agency remits to the insurance company this entire sum less a commission.

Should this commission income be recognized when it is received, or should it be recognized over the term of the policy?

Reply—Generally, credit life insurance appears to have more of the characteristics of casualty insurance than it does of life insurance. In particular, from the agent's viewpoint, payment for the policy usually occurs in a lump sum from which agent commissions are deducted. Generally, the efforts of the agency in connection with any individual policy terminate when collection is made or, at least, when the proceeds from the collections are remitted to the insurance company. It would therefore seem that the recognition of income should occur when proceeds of the policy are received.

However, as there is a potential liability for returned premiums, it would appear that a reasonable allowance should be provided at this time for estimated commissions on the portion of the policies that may be cancelled in future years. Most finance companies should have adequate statistics upon which to base such estimates. If the finance company is new, there may be statistics available from similar enterprises.

.03 Recognition of Income on Unclaimed Refunds Due Policyholders on Policy Cancellations

Inquiry—An insurance agency has a material amount of accounts payable legally due to policyholders who have cancelled their insurance prior to the end of the policy term. The company does not notify these policyholders that these amounts are due them. When, if ever, should these credits be taken into income?

Reply—These accounts payable should continue to be reported as liabilities until such time as the individuals involved legally lose their claim to these amounts. Legal counsel should be consulted for an opinion as to whether these amounts would have to be paid over to the state under an escheat law.

Consideration should also be given to the appropriateness of notifying these policyholders that this money is due them.

.04 Reserve for Future Claims of Title Insurance Company

Inquiry—A title insurance company must place part of its premiums in a reserve for future claims. When should this reserve be recognized as income?

Reply—The jurisdiction under which a title insurance company operates usually requires that a stipulated percentage of premiums collected must be deferred in an unearned premium account. Generally, the unearned premium is taken into income over a ten-year period since most claims against title policies tend to occur during this ten-year period. However, actual claims are not charged to the unearned premium account. Actual claims are charged against income (title claims account) with the credit to “Reserve for Claims.” The reserve for claims represents reported claims that have surfaced. The unearned premium account is intended to cover unsurfaced claims.

[.05] Reserved

[.06] Reserved

[.07] Reserved

.08 Definition of an Insurance Benefit Feature

Inquiry—FASB ASC 944-605-25-8 states “If the amounts assessed against the contract holder each period for the insurance benefit feature of an insurance contract are assessed in a manner that is expected to result in profits in earlier years and losses in subsequent years from the insurance benefit function, a liability for unearned revenue shall be recognized in addition to the account balance.” What constitutes the *insurance benefit function* in performing the test described previously?

Reply—The test should be applied separately to the base mortality or morbidity feature and, in addition, separately to each other individual mortality or morbidity feature. Other individual mortality or morbidity features that would need to be tested separately are those features that create incremental mortality or morbidity risk to the base contract (for example, no lapse guarantees or long term care riders in a universal life insurance contract). Indicators that a mortality or morbidity feature should be evaluated separately may include

- explicit incremental charges,
- offered separately in the market place,
- described in the contract as a separate benefit, or
- the contract holder has a choice to accept or reject the additional benefit without rejecting the base contract.

Other insurance benefit features that provide for fixed and guaranteed benefits and premiums, and offered as a rider or an addition to a universal life contract, in practice typically would have been and should continue to be, separately accounted for under FASB ASC 944. Those features that have not been accrued for under FASB ASC 944 should be evaluated under the guidance of FASB ASC 944-20-10-2, paragraphs 20–25 of FASB ASC 944-40-30, and paragraphs 1–2 of FASB ASC 944-605-30.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.09 Definition of an Assessment

Inquiry—In performing the test in FASB ASC 944-605-25-8 (that is, have amounts assessed against the contract holder in a manner that is expected to result in profits in earlier years and losses in subsequent years from the insurance benefit function), what assessments should be used in the comparison of the amount and timing of expected assessments and the related benefits for determining whether amounts are assessed in a manner that is expected to result in profits in earlier years and losses in subsequent years from the insurance benefit function?

Reply—If an insurance benefit function has an explicit fee, there is a presumption that the terms and conditions of a contract entered into between two parties dealing at arms length are representative of their agreement. Therefore, there is a rebuttable presumption that the explicit fee should be used for the test in FASB ASC 944-605-25-8. However, there may be circumstances where the presumption may be overcome if evidence indicates that the substance of the agreement is not captured in the explicit terms of the contract. It is unlikely the presumption can be rebutted in the situation in which the assessment is explicitly incremental upon election of a separate insurance benefit feature and for which the policyholder has the choice to not pay if the election is not made.

In circumstances in which an insurance benefit function has no corresponding explicit fee or if the explicit fee does not capture the substance of the agreement, another method of determining assessments should be used for the test in FASB ASC 944-605-25-8. For example, in some universal life policies, the product's base mortality function may have been designed and priced on an integrated basis with the other functions, such as, administration and asset management. In such products, while the explicit cost of insurance charge is not expected to be sufficient to cover the death benefit risk in all periods, the product may be designed such that other assessments, including administrative fees, asset management fees, and investment margins, are expected to result in profits in subsequent years sufficient to offset the losses from the explicit cost of insurance charges designed shortfalls. In this example, it may be appropriate to include such additional implicit assessments in the test in FASB ASC 944-605-25-8 for the base mortality function. The analysis of implicit assessments would need to appropriately consider the pricing and cost of all components of the product. Indicators that implicit assessments are appropriately allocated to product components are

- allocation is not inconsistent with documentation, if any, of pricing at contract inception,
- assessments are allocated considering the recovery of all costs of each product component,

- allocation does not contradict external information on the market value of an individual product component on a stand-alone basis, and
- allocation method is applied consistently.

There is a presumption that the minimum guaranteed death benefit of a variable annuity and the no-lapse guarantee mortality feature of a universal life or a variable universal life contract will result in profits in earlier years and losses in subsequent years. This pattern of profits followed by losses results from the design and capital markets risks of these benefit features.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.10 Level of Aggregation of Additional Liabilities Determined Under FASB ASC 944

Inquiry—At what level of aggregation should additional liabilities, determined in accordance with FASB ASC 944-40-30-20, be calculated?

Reply—It is presumed that the level of aggregation generally should be consistent with the level at which the entity's DAC amortization ratios and associated DAC balances are calculated. This is the level at which products with common features have been aggregated. It is not appropriate to combine DAC-level groups for aggregation purposes in FASB ASC 944-40-30-20. Aggregation at a more detailed level than the level at which the entity's DAC amortization ratios and associated DAC balances are calculated may be warranted based on an individual entity's facts and circumstances including, but not limited to, the risk characteristics of the corresponding insurance benefit features, such as, variable annuities with a ratchet minimum guaranteed death benefit (MGDB) and variable annuities with a return of premium MGDB, or universal life products with and without secondary guarantees.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.11 Losses Followed by Losses

Inquiry—Should the guidance in FASB ASC 944-605-25-8 be applied if amounts assessed against the contract holder for an insurance benefit feature are expected to result in losses in earlier and subsequent years?

Reply—Yes, the concept underlying FASB ASC 944-605-25-8 is that the insurance entity may be required to establish a liability if it provides an insurance benefit in future periods for which it charges amounts in such periods that are less than the expected value of the insurance benefits to be provided. Consequently, the insurance enterprise should recognize a liability. This concept is applicable in situations in which charges attributable to an insurance benefit feature are less than the expected cost of the insurance benefit in all periods.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.12 Reinsurance

Inquiry—How should a ceding entity account for reinsurance contracts that meet the risk transfer criteria of FASB ASC 944 and that reinsure the insurance benefit features accounted for under FASB ASC 944-20-10-2, paragraphs 20–25 of FASB ASC 944-40-30, and paragraphs 1–2 of FASB ASC 944-605-30?

Reply—The accounting for reinsurance should be separate from the accounting for the direct contracts of the ceding entity in accordance with paragraphs 3–4 of FASB ASC 944-20-40, FASB ASC 944-310-25-2, FASB ASC 944-310-45-7, FASB ASC 944-340-25-1, FASB ASC 944-605-45-1, and FASB ASC 944-605-50-1. Reinsurance recoverables arising from the reinsurance contract should be reported as assets. As stated in FASB ASC 944-40-25-34, the recoverable should be calculated using methods and assumptions consistent with those used to establish the direct contract holder’s liability. Therefore, a benefit ratio using the same assumptions and scenarios used to establish the direct contract liability, as required in FASB ASC 944-40-30-20 should be used to establish a reinsurance recoverable with excess benefit payments ceded under the terms of the reinsurance contract as the numerator and direct assessments as the denominator. As required by FASB ASC 944-605-35-14, the cost of reinsurance shall be amortized over the remaining life of the underlying reinsured contracts if the reinsurance contract is long-duration, or over the contract period of the reinsurance if the reinsurance contract is short-duration. The cost of reinsurance may be recognized based on total direct assessments or on another reasonable manner such as estimated gross profits.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.13 Accounting for Contracts That Provide Annuitization Benefits

Inquiry—Are the provisions of paragraphs 26–27 and 40–41 of FASB ASC 944-40-25, paragraphs 26–29 of FASB ASC 944-40-30, paragraphs 10 and 12–16 of FASB ASC 944-40-35, and FASB ASC 944-40-45-2, dealing with accounting for contracts that provide annuitization benefits, limited only to universal life-type, limited-payment, and investment contracts?

Reply—No. The provisions of FASB ASC 944 relating to accounting for contracts that provide annuitization benefits applies to all insurance and investment contracts that have annuitization benefits. Therefore, any product that includes an annuitization benefit should be evaluated. This includes, but is not limited to, products where the base contracts are accounted for under FASB ASC 944 and where the annuitization benefit has not already been included in establishing the liability. To the extent annuitization benefits features have not already been included in benefit or premium deficiency liabilities, the provisions of paragraphs 26–27 and 40–41 of FASB ASC 944-40-25, paragraphs 26–29 of FASB ASC 944-40-30, paragraphs 10 and 12–16 of FASB ASC 944-40-35, and FASB ASC 944-40-45-2 should be applied.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.14 Note to Sections 6300.15–.24—Accounting by Noninsurance Enterprises for Property and Casualty Insurance Arrangements That Limit Insurance Risk

Insurance enables a company (the insured) to transfer insurance risk to an insurer for a specified premium. Insurance may be purchased for a number of economic reasons generally with the underlying goal of transferring insurance risk, including property damage, injury to others, and business interruption.

The following series of questions and answers (sections 6300.15–.24) focus on certain aspects of finite insurance products that are utilized by noninsurance enterprises. Due to the diverse nature of contracts in the marketplace, the guidance in these questions and answers is designed to assist practitioners in identifying the relevant literature to consider in addressing their specific facts and circumstances. The sections contain many excerpts of applicable guidance,

but readers should be familiar with all the guidance contained in that literature not only the specific paragraphs listed.

GAAP guidance for an insurance enterprise's purchase of reinsurance is more extensive than guidance on accounting by noninsurance enterprises for insurance contracts. The accounting guidance for reinsurance addresses transactions between an insurer (the contract holder) and a reinsurer (the issuer of the contract). Sections 6300.15–.24 address property and casualty insurance contracts between a policyholder and an insurance enterprise, which is similar to the relationship between an insurer and a reinsurer.

.15 Finite Insurance

Inquiry—What are “finite” insurance transactions?

Reply—Finite insurance contracts are contracts that transfer a clearly defined and restricted amount of insurance risk from the policyholder to the insurance company, and the policyholder retains a substantial portion of the related risks under most scenarios. Nevertheless, under certain finite contracts there may be a reasonable possibility that the insurance company will incur a loss on the contract.

.16 Insurance Risk Limiting Features

Inquiry—What types of insurance risk limiting features do finite insurance contracts normally contain?

Reply—Contractual features that serve to limit insurance risk transfer are found in both traditional and finite insurance contracts; however, the degree to which these features limit risk is relatively higher in finite insurance. All contractual provisions that limit risk transfer need to be considered when reviewing insurance contracts. Common features that may limit the transfer of insurance risk include:

- *Sliding scale fees and profit sharing formulae.* These features adjust cash flows between the policyholder and insurance company based on loss experience (for example, increasing payments from the insured enterprise as losses increase and decreasing payments as losses decrease, subject to maximum and minimum limits).
- *Experience refunds.* These arrangements allow the policyholder to share in the favorable experience of the underlying contracts by reference to an “experience account” that typically tracks premiums paid, less fees, less losses incurred, plus interest. Experience provisions also can require the policyholder to share in unfavorable experience by requiring additional payments to the insurer in the event that the experience account is negative.
- *Caps.* Caps are used to limit the insurer's aggregate exposure by imposing a dollar limit, or a limit expressed as a percentage of premiums paid, on the amount of claims to be paid by the insurer. For example, the insurer will not be responsible for losses beyond 150 percent of the premiums paid. While commercial insurance policies usually have limits on the amount of coverage provided, there may be significant risk mitigation for the insurer if the premium paid is a substantial percentage of the maximum coverage provided.
- *Loss Corridors.* This feature, which may exist in various forms, serves to eliminate or limit the risk of loss for a specified percentage or dollar amount of claims within the contract coverage. For example, in a contract providing coverage for a policyholder's first \$3,000,000 of

losses, the insurer will pay the first million and last million of losses but will exclude the corridor from \$1,000,000 to \$2,000,000.

- *Dual-triggers.* This feature requires the occurrence of both an insurable event and changes in a separate pre-identified variable to trigger payment of a benefit/claim. An example is a policy entered into by a trucking company that insures costs associated with rerouting trucks over a certain time period if snowfall exceeds a specified level during that time period.
- *Retrospectively-Rated Premiums.* Such premiums are determined after the inception of the policy based on the loss experience under the policy.
- *Reinstatement Premiums.* To the extent the coverage provided by a contract is absorbed by losses incurred, the contract provides for the policyholder to reinstate coverage for the balance of the contract period for a stated additional premium. To the extent reinstatement is required rather than optional, the additional premium may mitigate risk to the insurer.
- *Termination Provisions.* These provisions can be structured to reduce the risk of the insurer, for example, by allowing for termination by the insurer at a discounted amount under certain circumstances.
- *Payment Schedules.* Features that delay timely reimbursement of losses by the insurer prevent the transfer of insurance risk.

There may be other features and provisions, in addition to the list of common insurance risk transfer limiting features in the preceding, that exist in a contract. Determining the appropriate accounting requires a full understanding of all of the features and provisions of the contract.

.17 Transfer of Insurance Risk

Inquiry—Why is transfer of insurance risk important under GAAP?

Reply—If a contract does not provide for the indemnification of the insured by the insurer, it is accounted for as a deposit (financing) rather than as insurance as noted in FASB ASC 720-20-25-1.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.18 Accounting Guidance for Transfer of Insurance Risk

Inquiry—What GAAP accounting literature provides guidance related to transfer of insurance risk?

Reply—The assessment of transfer of insurance risk requires significant judgment and a complete understanding of the insurance contract and other related contracts between the parties. The greater the number, or degree, or both, of insurance risk limiting features that exist in a contract, the more difficult it becomes to assess whether or not the insurance risk transferred is sufficient to permit the contract to be accounted for as insurance rather than as a deposit.

FASB ASC 720-20-25-1 provides the following guidance on insurance contracts that do not provide for indemnification of the insured by the insurer against loss or liability:

To the extent that an insurance contract or reinsurance contract does not, despite its form, provide for indemnification of the insured or the ceding entity by the insurer or reinsurer against loss or liability, the premium paid less the amount of the premium to be retained by the insurer or reinsurer

shall be accounted for as a deposit by the insured or the ceding entity. Those contracts may be structured in various ways, but if, regardless of form, their substance is that all or part of the premium paid by the insured or the ceding entity is a deposit, it shall be accounted for as such.

FASB ASC 944 establishes the conditions required for a contract between an insurer and a reinsurer to be accounted for as reinsurance and prescribes accounting and reporting standards for those contracts. FASB ASC 944-20-15-41 notes, in part, the following:

Unless the condition in paragraph 944-20-15-53 is met, indemnification of the ceding entity against loss or liability relating to insurance risk in reinsurance of short-duration contracts exists under paragraph 944-20-15-37(a) only if both of the following conditions are met:

- a. Significant insurance risk. The reinsurer assumes significant insurance risk under the reinsured portions of the underlying insurance contracts. Implicit in this condition is the requirement that both the amount and timing of the reinsurer's payments depend on and directly vary with the amount and timing of claims settled under the reinsured contracts.
- b. Significant loss. It is reasonably possible that the reinsurer may realize a significant loss from the transaction.

FASB ASC 944 looks to the present value of all cash flows between the parties, however characterized, under reasonably possible outcomes in determining whether it is reasonably possible that the reinsurer may realize a significant loss from the contract.

FASB ASC 720-20-25-2 suggests that noninsurance entities look to the risk transfer guidance in FASB ASC 944, and states, in part, the following:

Entities may find the conditions in Section 944-20-15 useful in assessing whether an insurance contract transfers risk.

FASB ASC 944-20-25-1 states that a multiple-year retrospectively rated insurance contract must indemnify the insured as required by FASB ASC 944-20-15-36 to be accounted for as insurance. FASB ASC 944-20 also indicates that there may be certain situations in which the guarantee accounting in accordance with FASB ASC 460, *Guarantees*, is applicable.

FASB ASC 815, *Derivatives and Hedging*, addresses scenarios where there are dual-triggers and includes a number of relevant examples.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.19 Differences Between Retroactive and Prospective Insurance

Inquiry—What are the differences between retroactive and prospective insurance?

Reply—FASB ASC 944-605-05-7 states that for property and casualty insurance: The distinction between prospective and retroactive reinsurance contracts is based on whether the contract reinsures future or past insured events covered by the underlying contracts.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.20 Accounting for Prospective Insurance

Inquiry—How does a noninsurance enterprise account for prospective insurance contracts that qualify for insurance accounting?

Reply—A noninsurance enterprise amortizes the premiums over the contract period in proportion to the amount of insurance protection provided. If an insured loss occurs, and if it is probable that the policy will provide reimbursement for the loss and the amount of the loss can be reasonably estimated, the noninsurance enterprise records a receivable from the insurance enterprise and a recovery of the incurred loss in the income statement. If it is not probable¹ that the policy will provide reimbursement, then the receivable and recovery are not recorded.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.21 Accounting for Retroactive Insurance

Inquiry—How does a noninsurance enterprise account for retroactive insurance contracts that qualify for insurance accounting?

Reply—Paragraphs 3–4 of FASB ASC 720-20-25 state the following:

Notwithstanding that Topic 944 applies only to insurance entities, purchased retroactive insurance contracts that indemnify the insured shall be accounted for in a manner similar to the manner in which retroactive reinsurance contracts are accounted for under Subtopic 944-605. The guidance in that Subtopic shall be applied, as appropriate, based on the facts and circumstances of the particular transaction. That is, amounts paid for retroactive insurance shall be expensed immediately. Simultaneously, a receivable shall be established for the expected recoveries related to the underlying insured event.

If the receivable established exceeds the amounts paid for the insurance, the resulting gain is deferred. Immediate gain recognition and liability derecognition are not appropriate because the liability has not been extinguished (the entity is not entirely relieved of its obligation). Additionally, the liability incurred as a result of a past insurable event and amounts receivable under the insurance contract do not meet the criteria for offsetting under paragraph 210-20-45-1.

FASB ASC 720-20-35-2 further states the following:

If the amounts and timing of the insurance recoveries can be reasonably estimated, the deferred gain shall be amortized using the interest method over the estimated period over which the entity expects to recover substantially all amounts due under the terms of the insurance contract. If the amounts and timing of the insurance recoveries cannot be reasonably estimated, then the proportion of actual recoveries to total estimated recoveries shall be used to determine the amount of the amortization.

Paragraphs 22–23 of FASB ASC 944-605-25 state the following:

Amounts paid for retroactive reinsurance of short-duration contracts that meets the conditions for reinsurance accounting shall be reported as reinsurance receivables to the extent those amounts do not exceed the recorded liabilities relating to the underlying reinsured contracts. If the recorded liabilities exceed the amounts paid, reinsurance receivables shall be increased to reflect the difference and the resulting gain deferred.

If the amounts paid for retroactive reinsurance for short-duration contracts exceed the recorded liabilities relating to the underlying reinsured short-duration contracts, the ceding entity shall increase the related liabilities or

¹ According to the Financial Accounting Standards Board (FASB) *Accounting Standards Codification (ASC)* glossary, *probable* means that the future event or events are likely to occur.

reduce the reinsurance receivable or both at the time the reinsurance contract is entered into, so that the excess is charged to earnings.

FASB ASC 944-605-35-9 further states the following:

Any gain deferred under paragraph 944-605-25-22 shall be amortized over the estimated remaining settlement period. If the amounts and timing of the reinsurance recoveries can be reasonably estimated, the deferred gain shall be amortized using the effective interest rate inherent in the amount paid to the reinsurer and the estimated timing and amounts of recoveries from the reinsurer (the interest method). Otherwise, the proportion of actual recoveries (the recovery method) shall determine the amount of amortization.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.22 Accounting for Multiple-Year Retrospectively Rated Insurance

Inquiry—How does a noninsurance enterprise account for a multiple-year retrospectively rated insurance contract?

Reply—As noted in FASB ASC 720-20-05-10, multiple-year retrospectively rated contracts

include a “retrospective rating” provision that provides for at least one of the following based on contract experience:

- a. Changes in the amount or timing of future contractual cash flows, including premium adjustments, settlement adjustments, or refunds to the noninsurance entity
- b. Changes in the contract’s future coverage

FASB ASC 720-20-05-9 also states, in part:

A critical feature of these contracts is that part or all of the retrospective rating provision is obligatory such that the retrospective rating provision creates for each party to the contract future rights and obligations as a result of past events.

FASB ASC 944-20-25-2 also discusses the accounting for retrospective adjustments and states:

For a multiple-year retrospectively rated insurance contract accounted for as insurance, the insurer shall both:

- a. Recognize an asset to the extent that the insured has an obligation to pay cash (or other consideration) to the insurer that would not have been required absent experience under the contract
- b. Recognize a liability to the extent that any cash (or other consideration) would be payable by the insurer to the insured based on experience to date under the contract.

Paragraphs 3–4 of FASB ASC 944-20-35 further state:

The amount recognized under paragraph 944-20-25-4 in the current period shall be computed, using a with-and-without method, as the difference between the ceding entity’s total contract costs before and after the experience under the contract as of the reporting date, including costs such as premium adjustments, settlement adjustments, and impairments of coverage.

The amount of premium expense related to impairments of coverage shall be measured in relation to the original contract terms. Future experience

under the contract (that is, future losses and future premiums that would be paid regardless of past experience) shall not be considered in measuring the amount to be recognized.

FASB ASC 944-20-25-4 also further states:

For contracts that meet all of the conditions described in paragraph 944-20-15-55:

- a. The ceding entity shall recognize a liability and the assuming entity shall recognize an asset to the extent that the ceding entity has an obligation to pay cash (or other consideration) to the reinsurer that would not have been required absent experience under the contract (for example, payments that would not have been required if losses had not been experienced).
- b. The ceding entity shall recognize an asset and the assuming entity shall recognize a liability to the extent that any cash (or other consideration) would be payable from the assuming entity to the ceding entity based on experience to date under the contract.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.23 Deposit Accounting

Inquiry—What is deposit accounting?

Reply—Deposit accounting essentially treats the contract as a financing transaction similar to a loan taking into account the time value of money. FASB ASC 340 provides guidance on how to account for insurance and reinsurance contracts that do not transfer insurance risk.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.24 Identifying Accounting Model for Insurance Transactions

The accompanying chart depicts the basic decision process in identifying the appropriate accounting model for insurance transactions.

*The insurance model discussed in this series of technical practice aids is based on property and casualty and other short-duration contracts, as defined in Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 944, *Financial Services—Insurance*.

† FASB ASC-944-20 should also be considered in determining the accounting for multiple-year retrospectively rated contracts that do not transfer risk.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.25 Integrated/Nonintegrated Contract Features in Applying FASB ASC 944-30

Inquiry—If there are contract features that do not meet the definition of nonintegrated contract features contained in the FASB ASC glossary, how should the contract features be evaluated under FASB ASC 944-30?

Reply—The flowchart in FASB ASC 944-30-55-11, titled “Summary of Internal Replacement Transactions Accounting Model,” asks the question, “Does the contract modification involve the addition of or changes to a nonintegrated contract feature?” If the answer is *Yes*, the nonintegrated contract feature is evaluated separately from the base contract. All other modifications need to be evaluated to determine if the contract modification results in a substantially changed replacement contract in accordance with the criteria in FASB ASC 944-30-35-37.

When applying the guidance in FASB ASC 944-30 to determine whether a feature is integrated or nonintegrated, one indicator of a nonintegrated contract feature is that it is distinguishable as a separate component from the base contract.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.26 Evaluation of Significance of Modification in Applying FASB ASC 944-30

Inquiry—When analyzing a contract feature under FASB ASC 944-30-35-37(a), how should the significance of the change in the degree of mortality risk, morbidity risk, or other insurance risk be determined?

Reply—In assessing the significance of a change in the degree of mortality, morbidity, or other insurance risk, the insurance enterprise should consider the specific facts and circumstances of the modification as well as which approach or approaches it considers most appropriate to analyze the substance of the change. It is the substance of the contract between the insurance enterprise and the contract holder that is to be evaluated, and not just the economics to the insurance enterprise that is critical to determining whether an internal replacement results in a substantially changed contract.

FASB ASC 944-30 does not require any one specific approach for analyzing the significance of a change in insurance risk; rather, it provides examples of several approaches that may be used in assessing changes in the degree of insurance risk. Factors to consider in determining whether there are significant changes in insurance risks may include changes in actuarially estimated costs for that benefit feature (for example, changes in the death benefit provided) or, alternatively, changes in the FASB ASC 944 benefit ratio related to that benefit feature (for example, giving consideration to the change in the relationship between the actuarially estimated future costs of the benefit feature and estimated total future fees to be charged for the contract). Another example of assessing the significance of a change for a universal life contract is by comparing the change in the relationship between the expected cost of the benefit and the charges for the benefit. Another potential comparison would be the change in the net amount at risk before and after the modification. Reunderwriting an entire contract generally would indicate a significant change in the kind or degree of insurance risk.

Different approaches utilized to assess the significance of a change in the degree of mortality, morbidity, or other insurance risk could result in different conclusions. Therefore, it may be necessary to consider multiple approaches to evaluate the significance of a change. For example, a change from a 20-pay life insurance contract to a 10-pay life insurance contract, where the two premiums are determined to be actuarially equivalent amounts, is an internal replacement that may or may not result in the replacement contract being determined to be substantially changed from the replaced contract. Using actuarially estimated cost before and after the modification would not result in a significant change (for example, the death benefit remains the same, only the premium payment period is changing). Comparing the relationship of the present value of estimated cost and the present value of the actuarially equivalent premiums also would not result in a significant change. However, if one used the net amount at risk as the basis for comparison, the change could be considered significant, given that the net amount at risk would differ for contracts with different premium collection periods.

While all these approaches, and perhaps others, would be appropriate in analyzing the significance of the change in this specific example, not all of these approaches would be appropriate in all circumstances. Any approach utilized should consider the substance of the change between the insurance enterprise and the contract holder. For instance, a minimum guaranteed death benefit (MGDB) is essentially a combination of mortality and investment risk and, therefore, it generally would not be appropriate to analyze the change in a MGDB based on a comparison of net expected cost (expected costs net of expected charges for the MGDB benefit) or the change in the relationship

between the expected cost and charges for the MGDB benefit due to the interaction of the mortality and investment risk.

The approach or approaches determined to be appropriate to evaluate the substance of a change should be applied consistently in analyzing similar types of modifications for similar contracts.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.27 Changes in Investment Management Fees and Other Administrative Charges in Applying FASB ASC 944-30

Inquiry—How should changes in investment management fees and other administrative charges be evaluated under the guidance in FASB ASC 944-30?

Reply—Changes in accordance with terms and within ranges specified in the contract, without any other change in benefits or coverages, are not modifications to the contract.

Changes in investment management fees and charges that are not in accordance with terms specified in the contract should be evaluated under the guidance in FASB ASC 944-30-35-37(b) based on the substance of the fees and consider whether the change in fees is significant in the context of the overall investment return rights. Changes in the structure of investment management fees and charges (for example, between flat fee, sliding scale, or percentage of assets), whether made by the insurance entity or investment advisor, may or may not result in a significant change to the nature of investment return rights.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.28 Definition of Reunderwriting for Purposes of Applying FASB ASC 944-30

Inquiry—Is the performance of limited examination procedures in conjunction with the election of a benefit, feature, right, or coverage by the contract holder considered underwriting or reunderwriting as contemplated by FASB ASC 944-30-35-26(b)?

Reply—It depends. The performance of examination procedures with respect to specific risks or components of a contract would not represent underwriting or reunderwriting as long as the procedures are limited in nature and do not involve judgment or discretion with respect to acceptance or price. For example, examination procedures undertaken to confirm data used to calculate benefit amounts, such as the income verification procedures undertaken as part of a benefit step-up in a disability policy, or to gather information to verify representations made by the contract holder with respect to the election being made, such as limited procedures to validate an insured's claim of currently being a nonsmoker, would not be considered underwriting or reunderwriting.

The lack of underwriting is not, by itself, determinative that an election is not a modification or that a change is not substantial. The election should be evaluated against the other conditions of FASB ASC 944-30.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.29 Contract Reinstatements in Applying FASB ASC 944-30

Inquiry—How should insurance enterprises apply the guidance in FASB ASC 944-30 to contract reinstatements?

Reply—If an insurance enterprise determines it has no further obligation to pay claims due to the lapse of a contract, the related contract would be

considered extinguished. If the insurance contract is later reinstated, it would be accounted for as a newly issued contract in the period in which the reinstatement occurs. Unamortized deferred acquisition costs, unearned revenue liabilities, and deferred sales inducement assets related to the terminated contract should not be reestablished in connection with the newly issued contract.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.30 Commissions Paid on an Increase in Insurance Coverage or Incremental Deposits in Applying FASB ASC 944-30

Inquiry—Should additional commissions incurred on either an increase in insurance coverage or incremental deposits not provided for in the replaced contract, related to a contract modification determined to result in a substantially unchanged replacement contract under FASB ASC 944-30, be accounted for as maintenance costs?

Reply—No. If commissions are paid on either an increase in insurance coverage or incremental deposit, not previously provided for in the contract, related to a contract modification determined to result in a substantially unchanged replacement contract, the commissions should be accounted for as acquisition costs in accordance with the provisions of FASB ASC 944, as appropriate.

For example, an increase in face amount of a universal life-type contract results in a replacement contract that is determined to be substantially unchanged. The modification is an integrated feature because the universal life-type contract has only a single account value and the death benefit is the excess of face amount over account value. In this situation, the commission incurred on what is essentially the sale of new insurance coverage should not be considered maintenance expense, but rather should be accounted for as acquisition costs in accordance with the provisions of FASB ASC 944. The substance of the modification in this example is the sale of additional insurance.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.31 Participating Dividends and the Interaction of Guidance in FASB ASC 944

Inquiry—How are paid up additions funded by dividends on participating policies evaluated under FASB ASC 944-30, and what is the impact on estimated gross margins?

Reply—Paid up additions funded by dividends on participating policies that meet the conditions of FASB ASC 944-30-35-26 would not be considered internal replacements subject to the guidance in FASB ASC 944-30. Paid up additions that do not meet the conditions of FASB ASC 944-30-35-26 would be considered nonintegrated contract features under FASB ASC 944-30.

For paid up additions that do not meet the conditions of FASB ASC 944-30-35-26, FASB ASC 944 addresses the accounting and the impact of various dividend options, including paid up additions, on estimated gross margins. Under FASB ASC 944-30-35-15, the estimated gross margins should include an insurance company's best estimate of the dividend options that policyholders will elect, which would include the option to use dividends to fund paid up additions. FASB ASC 944-30 does not amend or affect that guidance in FASB ASC 944.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.32 Premium Changes to Long Duration Contracts in Applying FASB ASC 944-30

Inquiry—Are changes in premiums to long-duration insurance contracts for which the insurer has the right to make changes in premium rates considered modifications as contemplated in FASB ASC 944-30?

Reply—It depends.

FASB ASC 944-20-55-5 states:

. . . individual and group insurance contracts that are . . . guaranteed renewable (renewable at the option of the insured), or collectively renewable (individual contracts within a group are not cancelable), ordinarily are long-duration contracts.

The AICPA Audit and Accounting Guide *Life and Health Insurance Entities* defines a guaranteed renewable contract as:

An insurance contract whereby the insured has the right to continue in force by the timely payment of premiums for a period that coincides approximately with the average working lifetime (for federal income tax purposes at least until age sixty), with the right reserved by the insurer to make changes in premium rates by classes.

The right to adjust premium rates for group long-duration insurance contracts generally would not meet the characteristics of a modification under FASB ASC 944-30 as long as all of the following conditions are met:

- The right to adjust premium rates is provided for under the terms of the insurance contract,
- The change to premium rates for a contract holder is the same change in premium rates that is applicable to the entire class of contract holders,
- Changes to premium rates do not involve consideration by the insurer of specific experience of the contract holder, and
- No other changes in benefits or coverages occur.

Further, the determination of rates based on a formula specified within the contract that does not involve insurer discretion would not be considered a modification as contemplated under FASB ASC 944-30.

Changes to a contract that involve the adjustment of rates or benefits based on a judgmental review of actual experience of the contract holder or the renegotiation of rates or benefits with that contract holder, even if no reunderwriting has occurred, generally would be considered a modification that is subject to the guidance in FASB ASC 944-30.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.33 Evaluation of Changes Under FASB ASC 944-30-35-37(a)

Inquiry—How should changes in the period of coverage or insured risk under FASB ASC 944-30-35-37(a) be evaluated?

Reply—A change in the period of coverage should be evaluated based on a comparison of the remaining period of coverage of the replaced contract to the remaining period of coverage of the replacement contract when assessing the significance of that change. Similarly, when determining whether there are

significant changes in insurance risk under FASB ASC 944-30-35-37(a) the evaluation should be based on a comparison of the remaining insurance coverage of the replaced contract to the remaining insurance coverage of the replacement contract.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.34 Nature of Investment Return Rights in FASB ASC 944-30-35-37(b)

Inquiry—What constitutes the *nature of the investment return rights* in FASB ASC 944-30-35-37(b)?

Reply—The phrase *nature of the investment return rights* encompasses the manner in which the contract's investment return is determined. For pass-through contracts, the addition of a floor or the capping of the returns, such that actual returns (net of fees and charges) are not passed through to the policyholder, fundamentally changes the nature of the investment return rights.

If the contract is referenced to a pool of assets or otherwise indexed (for example, S&P 500 or LIBOR), the underlying referenced pool of assets or index is an inherent component of the nature of investment return rights, and changes in these provisions would result in a change to the nature of investment return rights between the insurance enterprise and the contract holder under FASB ASC 944-30-35-37(b). This differs from a contract holder reallocation of funds among multiple investment alternatives provided for in the contract in which the investment performance of the investments passes through to the contract holder.

Contract holder liquidity rights related to investment guarantees (for example, variable annuity guaranteed minimum accumulation benefits, guaranteed minimum income benefits, and guaranteed minimum withdrawal benefits) are inherent components of the nature of investment return rights, and the addition of a different investment guarantee with substantively different timing of cash flow accessibility to the contract holder would result in a change to the nature of investment return rights between the insurance enterprise and the contract holder under FASB ASC 944-30-35-37(b).

Changes to a component (or components) of an investment return formula (for example, the strike price of the guarantee for a variable annuity with a guaranteed minimum accumulation benefit or other modification to an existing investment guarantee) should be evaluated in a manner similar to changes in minimum guarantees for contracts subject to periodic discretionary declaration.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

[.35] Reserved

.36 Prospective Unlocking

Inquiry—Certain insurance contracts classified as long-duration insurance contracts under FASB ASC 944, may include provisions that allow for premium rate increases by class of customer, subject to regulatory approval. Policies with these provisions may include long-term care, Medicare supplements, and certain other guaranteed renewable contracts.

Is an insurance company permitted to “unlock” its original FASB ASC 944 assumptions after contract inception for collected, approved, or expected premium rate increases for the contracts previously described in situations other than in premium deficiency?

Reply—No, FASB ASC 944 policyholder benefit liability assumptions cannot be unlocked for collected, approved, or expected premium rate increases for the contracts described in situations other than in the premium deficiency situations described in paragraphs 7–9 of FASB ASC 944-60-25.

FASB ASC 944 requires that best estimate assumptions (with a provision for adverse deviation) be determined at contract inception and used to calculate the long duration policy benefit liability. Paragraphs 5–6 of FASB ASC 944-40-35 state the following:

Original assumptions shall continue to be used in subsequent accounting periods to determine changes in the liability for future policy benefits (often referred to as the lock-in concept) unless a premium deficiency exists subject to paragraphs 944-60-25-7 through 25-9.

Changes in the liability for future policy benefits that result from its periodic estimation for financial reporting purposes shall be recognized in income in the period in which the changes occur.

FASB ASC 944-60-25-7 describes the premium deficiency situations that can exist. As FASB ASC 944-60-30-1 describes, the first situation occurs when the present value of future payments for benefits and related expenses less the present value of future gross premiums (both determined using revised assumptions based on actual and expected experience) exceed the existing liability for future policy benefits reduced by unamortized acquisition costs. As FASB ASC 944-60-25-9 describes, a premium deficiency can also exist when the liability on a particular line of business is not deficient in the aggregate, but circumstances are such that profits would be recognized in early years and losses in later years.

[Issue Date: December 2008; Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.37 Application of Accounting Standards Update No. 2010-26, *Financial Services—Insurance (Topic 944): Accounting for Costs Associated with Acquiring or Renewing Insurance Contracts (a consensus of the FASB Emerging Issues Task Force)*

Inquiry—How should Accounting Standards Update (ASU) No. 2010-26, *Financial Services—Insurance (Topic 944): Accounting for Costs Associated with Acquiring or Renewing Insurance Contracts (a consensus of the FASB Emerging Issues Task Force)*, be applied?

Reply—The application of ASU No. 2010-26 will be based on an election of the entity and could be applied in either of the following ways:

- a. Prospectively
- b. Retrospectively, as described in FASB ASC 250-10

If an entity decides to retrospectively apply, paragraph BC16 of ASU No. 2010-26 discusses that the task force did not believe that an entity is necessarily expected to reperform its detailed capitalization, amortization, and premium deficiency calculations for every prior year that is restated. Specifically, paragraph BC16 states that the

Task Force members stated that an entity may need to make reasonable estimates of the effect on prior years on the basis of its specific circumstances in order to adopt the amendments retrospectively. In electing retrospective application, the Task Force did not believe that an entity is necessarily expected to reperform its detailed capitalization, amortization, and premium deficiency calculations for every prior year if it has ways to

reasonably estimate those amounts in accordance with Subtopic 250-10, *Accounting Changes and Error Corrections—Overall*.

[Issue Date: July 2011.]

.38 Retrospective Application of ASU No. 2010-26

Inquiry—If different levels of historical information are available for various products, how should this information be included when retrospectively applying ASU No. 2010-26? Can ASU No. 2010-26 be applied retrospectively to different points in time for various products?

Reply—If the entity has determined that it is impracticable to determine the cumulative effect of applying a change in accounting principle to all prior periods (as discussed in paragraphs 5–7 of FASB ASC 250-10-45) for all contracts subject to ASU No. 2010-26 and is applying the new accounting principle as if the change was made prospectively as of the earliest date practicable (in accordance with FASB ASC 250-10), the effect of applying a change in accounting principle for deferral of acquisition costs should be applied at a single point in time to contracts that were entered into from the point of retrospective application and forward.

Determining the earliest practicable date of retrospective application of ASU No. 2010-26 is a matter of judgment. Accordingly, the entity will need to make a determination, based on individual facts and circumstances, about what single point in time to use as a starting point for retrospective application for all products. The guidance on reporting a change in accounting principle made in an interim period in FASB ASC 250-10-45-14 should also be considered.

The entity will adopt the deferral guidance in ASU No. 2010-26 for contracts entered into from the date of retrospective application and forward. Therefore, the acquisition costs that were previously deferred relating to periods prior to the date of retrospective application will be based upon the previous applicable guidance under FASB ASC 944-30 for deferral of acquisition costs. It is recommended that the entity disclose the types of costs deferred under ASU No. 2010-26 and whether differences exist in the costs deferred under the previous guidance of FASB ASC 944-30 and ASU No. 2010-26.

For example, an insurance entity only sells product A and product B, and they are both material to the entity for all prior periods. For product A, the entity has sufficient information going back three years; however, for product B, the entity has sufficient information going back seven years. In this example, the entity would be limited to three years of retrospective application (that is, the earliest date practicable) of ASU No. 2010-26, and all years prior to the three years that would be retrospectively adjusted would continue to follow the previous accounting policy used to defer acquisition costs.

The guidance in ASU No. 2010-26 does not change the required amortization methods for acquisition costs that are deferrable; therefore, all deferrable cost will be amortized in the same manner, notwithstanding that the types of cost deferred for certain periods may be different. However, ASU No. 2010-26 requires that advertising costs that meet the capitalization criteria for direct-response advertising in FASB ASC 340-20 should be included in deferred acquisition costs and amortized in the same manner as all other deferred acquisition costs.

[Issue Date: July 2011.]

.39 Cumulative Effect of Change in Accounting Principle — ASU No. 2010-26

Inquiry—If an entity is retrospectively applying the guidance in ASU No. 2010-26, what effects of a change in accounting principle should be included in the cumulative effect?

Reply—As stated in FASB ASC 250-10-45-8:

Retrospective application shall include only the direct effects of a change in accounting principle, including any related income tax effects. Indirect effects that would have been recognized if the newly adopted accounting principle had been followed in prior periods shall not be included in the retrospective application. If indirect effects are actually incurred and recognized, they shall be reported in the period in which the accounting change is made.

In addition to the impact on deferrals and amortization of acquisition costs, including any impact to income taxes, the following are some items to consider when evaluating the direct effects of retrospective application of ASU No. 2010-26:

- *Premium deficiency (loss recognition).* If a premium deficiency was recognized in prior financial statements, an entity should determine whether the amount of the premium deficiency loss that was recognized would change if deferred acquisition costs had been measured based on the guidance in ASU No. 2010-26. In those situations when the application of this accounting change results in additional acquisition costs being deferred in prior periods, entities should evaluate whether a premium deficiency is needed based on the revised DAC amount.
- *Shadow accounts.* Adjustments made to DAC as a result of ASU No. 2010-26 may also require adjustments to shadow DAC² or shadow premium deficiency amounts.
- *Limited payment contracts.* For limited pay contracts, the calculation of deferred profit liability includes capitalizable acquisition costs.³ Therefore, changes in the amount of DAC due to the adoption of ASU No. 2010-26 will result in changes to the deferred profit liability.
- *Equity method investee that is an insurance entity.* The amount recognized relating to an equity method investment in an insurance entity may be affected by an investee's retrospective adoption of ASU No. 2010-26.
- *Noncontrolling interest of an insurance subsidiary.* The noncontrolling interest balance should be adjusted to reflect the adoption of ASU No. 2010-26 to the extent that the noncontrolling interest relates to an entity with DAC.

² As discussed in FASB ASC 320-10-S99-2:

[A]sset amounts that are amortized using the gross-profits method, such as deferred acquisition costs accounted for under FASB ASC 944-30-35-4 and certain intangible assets arising from insurance contracts acquired in business combinations, should be adjusted to reflect the effects that would have been recognized had the unrealized holding gains and losses actually been realized.

Also, loss recognition assessments due to the impact of unrealized gains or losses may need to be adjusted to reflect the revised deferred cost. These adjustments, due to the unrealized investment gains and losses, are commonly referred to in practice as *shadow deferred acquisition cost* or *shadow premium deficiency adjustments*.

³ As discussed in paragraph 9 of FASB ASC 944-30-25, capitalizable acquisition costs should be included in the calculation of net premiums and for purposes of determining the deferred profit for limited payment contracts.

- *Divested operations.* Adjustments made to DAC of a divested entity may affect a gain or loss previously recorded on the sale of an insurance entity, as well as the amounts reported in the financial statements prior to sale (for example, assets and liabilities held for sale, income (loss) from discontinued operations).
- *Reinsurance.* Adjustments made to DAC due to the adoption of ASU No. 2010-26 may also require adjustments to amounts related to reinsurance transactions involving long duration reinsurance contracts.⁴
- *Foreign exchange.* Entities that conduct business in multiple currencies should consider the impact of ASU No. 2010-26 on foreign exchange translation adjustments, as well as foreign exchange transactions (for example, the remeasurement of DAC from nonfunctional currency to functional currency).⁵

[Issue Date: October 2012.]

.40 Deferrable Commissions and Bonuses Under ASU No. 2010-26

Inquiry—Under the guidance of ASU No. 2010-26, are all commissions and bonuses deferrable?

Reply—Commissions and bonuses are not deferrable solely due to an insurance entity having a sales transaction. To be deferrable as an incremental direct acquisition cost, the costs must result directly from, and be essential to, the sales transaction(s) and would not have been incurred by the insurance entity had the sales transaction(s) not occurred.

Entities will need to use judgment to determine whether acquisition costs related to commissions and bonuses for employees or nonemployees meet the criterion to be deferrable under ASU No. 2010-26 of resulting directly from, and being essential to, the sale transaction.

FASB ASC 944-30-55-1F and 944-30-55-1G provide examples of some of the types of activities for which related costs are deferrable and those that are not. Chapter 10, “Commissions, General Expenses, and Deferred Acquisition Costs,” of the AICPA Audit and Accounting Guide *Life and Health Insurance Entities* contains discussion of the guidance in ASU No. 2010-26.

[Issue Date: October 2012.]

[The next page is 5641.]

⁴ FASB ASC 944-30-35-64 provides that “proceeds from reinsurance transactions that represent recovery of acquisition costs shall reduce applicable unamortized acquisition costs in such a manner that net acquisition costs are capitalized and charged to expense in proportion to net revenue recognized.” The remainder is deferred and amortized as part of the estimated cost of reinsurance under FASB ASC 944-605-30-4. Changes to deferrable amounts will, therefore, affect the estimated cost of reinsurance.

⁵ FASB ASC 830-10-45-18 describes nonmonetary items as being “[o]ther intangible assets, deferred charges and credits, except policy acquisition costs for life insurance companies,” thus, requiring that in remeasurements to functional currency, capitalized acquisition costs of life insurance companies should be accounted for as if they were monetary. FASB ASC 255-10-55-1 notes that deferred property and casualty insurance policy acquisition costs related to unearned premiums should be accounted for as nonmonetary items.

.04 Hospital as Collecting Agent for Physicians [Amended]

Inquiry—Under an agreement with several physicians, a hospital acts as collecting agent for the physicians' fees, and the physicians, in return, provide professional services at the hospital. These physicians are not employees; payroll taxes are not paid for them, and the hospital cannot exercise any of the prerogatives of an employer. To enable it to collect the physicians' Medicare fees, the hospital holds valid assignments. Should the amounts collected as physicians' fees be included in the income and expenses of the provider hospital?

Reply—No. As discussed in Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 954-305-45-4, health care entities may receive and hold assets owned by others under agency relationships; for example, they may perform billing and collection services for physicians. In accepting responsibility for those assets, an entity incurs a liability to the principal under the agency relationship to return the assets in the future. In the preceding example, the hospital is functioning as a conduit with respect to the physicians' fees. As a result, the fees should be reported as a liability to the physicians and not recognized in the statement of revenues and expenses. Agency funds are reported as unrestricted assets.

.12 General Obligation Bonds Issued for Current Use by City Owned Hospital [Amended]

Inquiry—A hospital is a city municipal enterprise. The city council issued general obligation bonds to provide funds for the hospital's operations, without restriction. The hospital's assets will not be used to pay principal or interest on the bonds. Should the general obligation bond liability be reported in the hospital's financial statements?

Reply—No. FASB ASC 954-470-25-1 states that if a health care entity has no obligation to make payments of principal and interest on the debt, the entity should not reflect the liability on its balance sheet. The proceeds from the bond

issue are contributions from the city. Therefore, the hospital should not report the bonds as a liability in its financial statements.

.17 Elimination of Profit on Intercompany Sales

Inquiry—FASB ASC 810-10-45-1 addresses the elimination of intercompany profit or loss on assets remaining within a combined or consolidated group. FASB ASC 980-810-45-1 indicates the following with regard to intercompany profit:

Profit on sales to regulated affiliates shall not be eliminated in general-purpose financial statements if both of the following criteria are met:

- a. The sales price is reasonable.
- b. It is probable that, through the rate-making process, future revenue approximately equal to the sales price will result from the regulated affiliate's use of the products.

Because health care providers are, in certain cases, reimbursed for operating costs, it is possible that, assuming they meet certain related party tests under third-party regulations, an entity could receive reimbursement on intercompany sales that include a profit. Thus, one could argue that under that circumstance, it would not be appropriate to eliminate profit on intercompany sales using the criteria set forth in FASB ASC 980, *Regulated Operations*.

Reply—In some instances health care entities may encounter situations where they fall under FASB ASC 980-10-15-2. Generally, however, as explained in FASB ASC 980-10-15-7, the normal Medicare and Medicaid arrangements are excluded from the scope of FASB ASC 980 on the basis that the “regulator” is also a party to the contract. Accordingly, gains or losses on sale of assets within the group should be eliminated in combined or consolidated financial statements. However, these gains or losses would be recognized and disclosed as appropriate in the separate financial statements of the members of the group.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

[.18] Reserved

.19 Offsetting of Limited Use Assets

Inquiry—Can limited-use assets of one entity be offset against the related liability of another entity in combined or consolidated financial statements?

Reply—Unless a *right of setoff* exists as defined in the FASB ASC glossary, assets, in general, should not be offset against related liabilities in any financial statement presentation.

[Amended; Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.20 Format of Combined or Consolidated Financial Statements

Inquiry—When presenting combined or consolidated financial statements of various health care entities, is there a prescribed or recommended presentation format?

Reply—No. The sample financial statements contained in FASB ASC 954, *Health Care Entities*, do not prescribe the format of statements. In addition, no single format for combined or consolidated financial statements has been considered appropriate in all circumstances.

.25 Accounting for Transfer of Assets From Not-for-Profit to For-Profit Entities

Inquiry—How should subsequent transfers of assets, evidenced as additional investment, from not-for-profit entities to for-profit entities be accounted for by the transferee and transferor?

Reply—Additional investments in for-profit entities (subsequent to the original transfer of assets) should be reflected by the transferee as an increase in capital stock or paid-in capital, or both. The transferor would record a corresponding increase in its investment account in the for-profit entity, if a financial interest was received (for example, additional capital stock).

.26 Transfer of Assets From Subsidiary For-Profit Entity to Not-for-Profit Stockholder Parent

Inquiry—How should transfers of assets from a “subsidiary” for-profit entity (F) to a not-for-profit entity (N) that is a minority stockholder of F be recorded?

Reply—This transaction would generally be recorded as a dividend, which would be reported as a reduction in F’s retained earnings. Any dividend in excess of retained earnings is a “liquidating” dividend; as such, it would be reported as a reduction in F’s paid-in capital account. If N accounts for its investment in F using the equity method, then the not-for-profit entity would report all dividends received as a reduction of its investment account, in accordance with FASB ASC 323, *Investments—Equity Method and Joint Ventures*. If N’s investment in F is accounted for using the cost method, because the conditions for applying the equity method are not met, the dividends would be reported as income.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

[.27] Reserved

[.28] Reserved

.29 Timing of Recording Transfers Between Related Entities

Inquiry—When should a transfer of assets between related entities be recorded—only when the transfer is actually made, or at some earlier point?

Reply—In most situations, transfers should be recorded at the time they are formally obligated to occur (formal board resolutions, legal notes, passage of title to real estate, and so on). This would be the case when each of the entities have independent governance, and the timing of the transfer is controlled by the governing board of the transferor. Yet, in situations where there is clear, common control of the related entities, it would be appropriate to record transfers at the time when both (a) the transfer amount is known and (b) the receiving entity is given control over the timing of the transfer.

.30 Accounting for Transactions Involving Medicaid Voluntary Contribution or Taxation Programs [Amended]

Inquiry—The Medicaid program is set up on a state-by-state basis to provide medical assistance to the indigent. Although state-administered, the program is actually a joint federal and state program for which the federal government picks up a portion of the cost. Under this arrangement, the federal government “matches” a percentage of the total amount paid by the state to health care providers. This matching is referred to as federal financial participation.

States have attempted to increase the amount of federal matching funds for which they are eligible by increasing the amount of medical assistance they provide. In order to pay for the increased medical assistance, some states have imposed a tax on health care entities, sought donations or other voluntary payments from them, or both. As a result, the states have been able to generate additional federal matching funds without expending additional state funds. How should a health care entity account for these taxes or donations made to the state?

Reply—Congress has passed legislation prohibiting the use of health care entity taxes or donations except in limited situations.

The accounting for these types of programs is dependent on the individual facts and circumstances. For example, if there is a guarantee that specific monies given to the state by the health care entity will be ‘returned’ to the entity from the state, those amounts should be recorded as receivables. In addition, if the health care entity has met all requirements to be legally entitled to additional funds from the state, the revenue/gain should be recognized.

However, if the monies go into a pool with other contributions which are then disbursed based on factors over which the health care entity has little or no control, the payments should be recognized as an expense. Any subsequent reimbursements would be recognized as revenue/gain when the provider is entitled to them and payment is assured.

Care should be taken to avoid delayed recognition of expenses or to improperly recognize contingent gains. Because of complexities involved, it may be necessary to consult with legal counsel.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

[.31] Reserved

[.32] Reserved

.33 Accounting for a Joint Operating Agreement

Inquiry—Two not-for-profit health care systems enter into a Joint Operating Agreement whereby both (the Venturers) agree to jointly operate and control certain of their hospitals while sharing in the operating results and residual interest upon dissolution based upon an agreed-upon ratio. Neither of

the Venturers receives cash or other monetary assets as part of entering into the Agreement. How should the Venturers account for the Agreement?

Reply—Joint Operating Agreements are similar to joint ventures and typically are characterized by factors such as:

- Common purpose (for example, to share risks and rewards; to develop a new market, health service or program; to pool resources)
- Joint funding: all parties contribute resources toward its accomplishment
- Defined relationship: typically governed by an agreement
- Joint control: control is not derived from holding a majority of the voting interest

Even though the Agreement does not provide for a separate legal entity (such as a corporation or partnership), the same principles apply. For example, because there is joint control (that is, neither party controls the venture), consolidation would not be appropriate. Instead, such agreements should be accounted for similar to a corporate joint venture using the equity method of accounting (see FASB ASC 323). Because the transaction did not reflect the culmination of the earnings process, the Venturers' basis in the investment would be recorded at net book value.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.34 Accounting for Computer Systems Costs Incurred in Connection With the Health Insurance Portability and Accountability Act of 1996 (HIPAA)

Inquiry—The Health Insurance Portability and Accountability Act of 1996 (HIPAA) was enacted by the federal government with the intent to assure health insurance portability, improve the efficiency and effectiveness of the health care system, reduce health care fraud and abuse, help ensure security and privacy of health information, and enforce standards for transacting health information. HIPAA addresses issues of security and confidentiality in the transfer of electronic patient information and facilitates the reduction of administrative costs by standardizing health care electronic transactions.

How should health care entities account for computer systems costs incurred in connection with HIPAA?

Reply—Costs associated with upgrading and improving computer systems to comply with HIPAA should follow the guidance set forth in FASB ASC 350-40. The accounting for specific compliance costs depends on whether the costs relate to “upgrades and enhancements” or maintenance. The following summarizes the financial reporting requirements for each type of cost:

- *Upgrades* are defined in the FASB ASC glossary as, “an improvement to an existing product that is intended to extend the life or improve significantly the marketability of the original product through added functionality, enhanced performance, or both. The terms upgrade and enhancement are used interchangeably to describe improvements to software products; however, in different segments of the software industry, those terms may connote different levels of packaging or improvements. This definition does not include platform-transfer rights.” For example, if the changes increase the security of the data from tampering or alteration or reduce the ability of unauthorized persons to gain access to the data, those changes would be tasks that

the software previously could not perform and the associated qualifying costs of application development stage activities should be capitalized. Conversely, if the changes merely reconfigure existing data to conform to the HIPAA standard or regulatory requirements, such changes would not result in the capability to perform of additional tasks and the associated costs therewith should be expensed as incurred. Because many of the costs associated with HIPAA relate to compliance with the Act and do not result in “additional functionality,” those costs should be expensed as incurred.

- *Maintenance costs* should be expensed as incurred. Training costs and data conversion costs, except for costs to develop or obtain software that allows for access or conversion of old data by new systems, should also be expensed as incurred.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.35 Note to Sections 6400.36–.42—Implementation of FASB ASC 958—Classification of a Beneficiary’s Interest in the Net Assets of a Financially Interrelated Fund-Raising Foundation (in the Beneficiary’s Financial Statements)

Some not-for-profit entities have separate fund-raising foundations (commonly referred to as “institutionally related foundations”) that solicit contributions on their behalf. FASB ASC 958, *Not-for-Profit Entities*, provides guidance on (among other things) the accounting that should be followed by such institutionally related foundations and their related beneficiary entity(ies) with respect to contributions received by the foundation.

Some institutionally related foundations and their beneficiary entities meet the characteristics of financially interrelated entities provided in FASB ASC 958-20-15-2. If entities are financially interrelated, FASB ASC 958 provides that the balance sheet of the beneficiary entity(ies) should reflect that entity’s interest in the net assets of the foundation, and that interest should be periodically adjusted to reflect the beneficiary’s share of the changes in the net assets of the foundation. This accounting is similar to the equity method of accounting, which is described in FASB ASC 323.

FASB ASC 323-10-35-5 requires that the periodic adjustment of the investment be included in the determination of the investor’s net income. The purpose of sections 6140.14–.18 (applicable to not-for-profit entities [NPEs] other than health care [HC] entities) and sections 6400.36–.42 (applicable to not-for-profit health care entities) is to clarify that in circumstances in which the recipient and the beneficiary are financially interrelated:

- Beneficiary entities should segregate the adjustment into changes in restricted and unrestricted net assets. (NPE TPA [sections 6140.14–.16]; HC TPA [sections 6400.36–.37 and .39])
- In circumstances in which the beneficiary can influence the financial decisions of the recipient entity to such an extent that the beneficiary can determine the timing and amount of distributions from the recipient to the beneficiary, the existence of the recipient entity should be transparent in determining the net asset classifications in the beneficiary’s financial statements. In other words, the recipient cannot impose time or purpose restrictions beyond those imposed by the donor. (NPE TPA [section 6140.14 and .16]; HC TPA [sections 6400.36 and .39])

- In circumstances in which the beneficiary cannot influence the financial decisions of the recipient entity to such an extent that the beneficiary can determine the timing and amount of distributions from the recipient to the beneficiary, the existence of the recipient entity creates an implied time restriction on the beneficiary's net assets attributable to the beneficiary's interest in the net assets of the recipient (in addition to any other restrictions that may exist). Accordingly, in recognizing its interest in the net assets of the recipient entity and the changes in that interest, the beneficiary should classify the resulting net assets and changes in those net assets as temporarily restricted (unless donors placed permanent restrictions on their contributions). (NPE TPA [section 6140.15]; HC TPA [section 6400.37])
- In circumstances in which the beneficiary can influence the financial decisions of the recipient entity to such an extent that the beneficiary can determine the timing and amount of distributions from the recipient to the beneficiary and some net assets held by the recipient for the benefit of the beneficiary are subject to purpose restrictions [for example, net assets of the recipient restricted to the beneficiary's purchase of property, plant, and equipment (PPE)], expenditures by the beneficiary that meet those purpose restrictions result in the beneficiary (and recipient) reporting reclassifications from temporarily restricted to unrestricted net assets (assuming that the beneficiary has no other net assets subject to similar purpose restrictions), unless those net assets are subject to time restrictions that have not expired, including time restrictions that are implied on contributed long-lived assets as a result of the beneficiary's accounting policy pursuant to FASB ASC 958-605-45-6. (If those net assets are subject to time restrictions that have not expired and the beneficiary has other net assets with similar purpose restrictions, the restrictions on those other net assets would expire in accordance with FASB ASC 958. These TPAs do not, however, establish a hierarchy pertaining to which restrictions are released first—restrictions on net assets held by the recipient or purpose restrictions on net assets held by the beneficiary.) (NPE TPA [section 6140.17]; HC TPA [section 6400.40])
- In circumstances in which the beneficiary cannot influence the financial decisions of the recipient entity to such an extent that the beneficiary can determine the timing and amount of distributions from the recipient to the beneficiary and some net assets held by the recipient for the benefit of the beneficiary are subject to purpose restrictions, though not subject to time restrictions other than the implied time restrictions that exist because the beneficiary cannot determine the timing and amount of distributions from the recipient to the beneficiary, expenditures by the beneficiary that are consistent with those purpose restrictions should not result in the beneficiary reporting a reclassification from temporarily restricted to unrestricted net assets, subject to the exceptions in the following sentence. Expenditures by the beneficiary that are consistent with those purpose restrictions should result in the beneficiary reporting a reclassification from temporarily restricted to unrestricted net assets if (a) the recipient has no discretion in deciding whether the purpose restriction is met¹ or (b) the

¹ In some circumstances, the purpose restrictions may be so broad that the recipient entity has discretion in deciding whether expenditures by the beneficiary that are consistent with those purpose restrictions actually meet those purpose restrictions. For example, the recipient's net assets may have arisen from a contribution that was restricted for the beneficiary's

recipient distributes or obligates itself to distribute to the beneficiary amounts attributable to net assets restricted for the particular purpose, or otherwise indicates that the recipient intends for those net assets to be used to support the particular purpose as an activity of the current period. In all other circumstances, (a) purpose restrictions and (b) implied time restrictions on the net assets attributable to the interest in the recipient entity exist and have not yet expired. (However, if the beneficiary has other net assets with similar purpose restrictions, those restrictions would expire in accordance with FASB ASC 958. These TPAs do not establish a hierarchy pertaining to which restrictions are released first—restrictions on net assets held by the recipient or restrictions on net assets held by the beneficiary.) (NPE TPA [section 6140.18]; HC TPA [section 6400.41])

- *For HC NPEs Only.* In circumstances in which the beneficiary can influence the financial decisions of the recipient to such an extent that the beneficiary can determine the timing and amount of distributions from the recipient to the beneficiary, changes in the beneficiary's interest in the net assets of a recipient entity attributable to unrealized gains and losses on investments should be included or excluded from the performance indicator in accordance with FASB ASC 954-10, FASB ASC 954-205-45, FASB ASC 954-320-45, FASB ASC 954-320-55, and FASB ASC 954-605, in the same manner that they would have been had the beneficiary had the transactions itself. Similarly, in applying this guidance, the determination of whether amounts are included or excluded from the performance measure should comprehend that if the beneficiary cannot influence the financial decisions of the recipient entity to such an extent that the beneficiary can determine the timing and amount of distributions from the recipient to the beneficiary, an implied time restriction exists on the beneficiary's net assets attributable to the beneficiary's interest in the net assets of the recipient (in addition to any other restrictions that may exist). Accordingly, in circumstances in which the beneficiary cannot influence the financial decisions of the recipient entity to such an extent that the beneficiary can determine the timing and amount of distributions from the recipient to the beneficiary, the beneficiary should classify the resulting net assets and changes in those net assets as temporarily restricted (unless donors placed permanent restrictions on their contributions) and therefore exclude those changes from the performance indicator. (HC TPA [section 6400.42])
- *For HC NPEs Only.* In circumstances in which the recipient entity and the beneficiary are both controlled by the same entity, entities should consider the specific facts and circumstances to determine whether the beneficiary can influence the financial decisions of the recipient entity to such an extent that the beneficiary can determine the timing and amount of distributions from the recipient to the beneficiary. (HC TPA [section 6400.38])

(footnote continued)

purchase of research equipment, with no particular research equipment specified. Purchasing an XYZ microscope, which is consistent with that purpose restriction, may or may not meet that purpose restriction, depending on the decision of the recipient. In contrast, the net assets may have arisen from a contribution that was restricted for an XYZ microscope. Purchasing an XYZ microscope, which also is consistent with that purpose restriction, would result in the recipient having no discretion in determining whether that purpose restriction is met.

<p>Can the beneficiary determine the timing and amount of distributions from the recipient to the beneficiary? [Not-for-profit health care entities (HC NPEs) under common control consider HC Technical Practice Aid (TPA) section 6400.38]</p>	<p>How does the existence of the recipient affect the beneficiary’s reporting of its interest?</p>	<p>Are any net assets held by the recipient for the benefit of the beneficiary subject to donor-imposed purpose restrictions and has the beneficiary made expenditures that meet those purpose restrictions (in circumstances in which the beneficiary can determine the timing and amount of distributions from the recipient to the beneficiary) or that are consistent with those purpose restrictions (in circumstances in which the beneficiary cannot determine the timing and amount of distributions from the recipient to the beneficiary)?</p>	<p>Are any changes in the beneficiary’s interest in the net assets of the recipient attributable to unrealized gains and losses on investments?</p>

(continued)

HC NPEs			
NPEs that are not HC NPEs			
Yes	Existence of recipient is transparent in determining net asset classifications. (NPE TPA [sections 6140.14 and .16]; HC TPA [sections 6400.36 and .39])	Reclass the applicable net assets from temporarily restricted (TR) to unrestricted (UR) unless those net assets are subject to time restrictions that have not expired. (NPE TPA [section 6140.17]; HC TPA [section 6400.40])	Changes in the beneficiary's interest in the net assets of a recipient entity attributable to unrealized gains and losses on investments should be included or excluded from the performance indicator in accordance with FASB ASC 954-10, FASB ASC 954-205-45, FASB ASC 954-320-45, FASB ASC 954-320-55, and FASB ASC 954-605, in the same manner that they would have been had the beneficiary had the transactions itself. (HC TPA [section 6400.42])
No	Existence of the recipient creates an implied time restriction on the beneficiary's net assets attributable to the beneficiary's interest in the net assets of the recipient. (NPE TPA [section 6140.15]; HC TPA [section 6400.37])	Reclass the applicable net assets from TR to UR only if the purpose restriction and the implied time restriction are met. Whether the purpose restriction is met depends in part on (1) whether the recipient has discretion in determining whether the purpose restriction is met and (2) the recipient's decision in exercising that discretion, if any. (NPE TPA [section 6140.18]; HC TPA [section 6400.41])	An implied time restriction exists on the beneficiary's net assets attributable to the beneficiary's interest in the net assets of the recipient. The beneficiary should classify the resulting net assets and changes in those net assets as temporarily restricted (unless donors placed permanent restrictions on their contributions) and therefore exclude those changes from the performance indicator. (HC TPA [section 6400.42])

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.36 Application of FASB ASC 958—Classification of a Beneficiary's Interest in the Net Assets of a Financially Interrelated Fund-Raising Foundation (The beneficiary can influence the operating and financial decisions of the foundation to such an extent that the beneficiary can determine the timing and amount of distributions from the foundation.)

Inquiry—ABC Hospital, a not-for-profit health care entity subject to FASB ASC 954,² and ABC Foundation are financially interrelated entities as described in FASB ASC 958-20-15-2. ABC Foundation's bylaws state that it is organized for the purpose of stimulating voluntary financial support from donors for the sole benefit of ABC Hospital. Assume that ABC Hospital can influence the operating and financial decisions of ABC Foundation to such an extent that ABC Hospital can determine the timing and amount of distributions from ABC Foundation to ABC Hospital.

During its most recent fiscal year, ABC Foundation's activities resulted in an increase in net assets (before distributions) of \$3,200, comprised of \$2,000 in unrestricted contributions, \$1,000 in temporarily restricted contributions (purpose restrictions), \$500 in unrestricted dividend and interest income, and \$300 in expenses. In addition, ABC Foundation distributed \$2,500 in cash representing unrestricted net assets to ABC Hospital. How should this activity be reported in ABC Hospital's financial statements?

Reply—Because ABC Foundation (the recipient entity) and ABC Hospital (the beneficiary) are financially interrelated, FASB ASC 958-20-25-2 requires ABC Hospital to recognize its interest in the net assets of ABC Foundation and periodically adjust that interest for its share of the change in net assets of ABC Foundation. This is similar to the equity method of accounting described in FASB ASC 323.

In recognizing its interest in the net assets of ABC Foundation and the changes in that interest, ABC Hospital should classify the resulting net assets as if contributions were received by ABC Hospital directly from the donor, because ABC Hospital can influence the operating and financial decisions of ABC Foundation to such an extent that ABC Hospital can determine the timing and amount of distributions from ABC Foundation to ABC Hospital. In other words, the existence of ABC Foundation should be transparent in determining the net asset classifications in ABC Hospital's financial statements because ABC Foundation cannot impose time or purpose restrictions beyond those imposed by the donor. (Any instructions given by ABC Foundation are designations, rather than restrictions.)

In the circumstances described previously, ABC Hospital would initially increase its asset, "Interest in Net Assets of ABC Foundation" for the change in ABC Foundation's net assets (\$3,200). ABC Hospital's Statement of Operations would include "Change in Unrestricted Interest in ABC Foundation" of \$2,200 (which would be included in the performance indicator in accordance with FASB ASC 954-10, FASB ASC 954-205, FASB ASC 954-310, 954-405, and FASB ASC 954-605) and "Change in Temporarily Restricted Interest in ABC Foundation" of \$1,000 which would be reported in the Statement of Changes in Net Assets.

² This section addresses not-for-profit health care entities subject to Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 954, *Health Care Entities*. Section 6140.14, "Application of FASB ASC 958—Classification of a Beneficiary's Interest in the Net Assets of a Financially Interrelated Fund-Raising Foundation (The beneficiary can influence the operating and financial decisions of the foundation to such an extent that the beneficiary can determine the timing and amount of distributions from the foundation.)," addresses a similar issue for not-for-profit entities subject to FASB ASC 958, *Not-for-Profit Entities*.

The \$2,500 distribution from ABC Foundation to ABC Hospital would not be reported as an increase in net assets on ABC Hospital's Statement of Operations or its Statement of Changes in Net Assets. By analogy to equity method accounting, the \$2,500 would be reported in a manner similar to a distribution from a subsidiary to its parent (for example, a dividend). ABC Hospital should report the distribution by increasing cash and decreasing its interest in the net assets of ABC Foundation.

If the distribution represented restricted net assets, ABC Hospital would not reclassify the net assets from temporarily restricted to unrestricted at the time of the distribution. Instead, ABC Hospital would reclassify the net assets from temporarily restricted to unrestricted when those restrictions were met.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.37 Application of FASB ASC 958—Classification of a Beneficiary's Interest in the Net Assets of a Financially Interrelated Fund-Raising Foundation (The beneficiary cannot influence the operating and financial decisions of the foundation to such an extent that the beneficiary can determine the timing and amount of distributions from the foundation.)

Inquiry—ABC Hospital, a not-for-profit health care entity subject to FASB ASC 954,³ and ABC Foundation are financially interrelated entities described in FASB ASC 958-20-15-2. ABC Foundation's bylaws state that it is organized for the purpose of stimulating voluntary financial support from donors for the sole benefit of ABC Hospital. Assume that ABC Hospital cannot, however, influence the operating and financial decisions of ABC Foundation to such an extent that ABC Hospital can determine the timing and amount of distributions from ABC Foundation to ABC Hospital.

During its most recent fiscal year, ABC Foundation's activities resulted in an increase in net assets (before distributions) of \$3,200, comprised of \$2,000 in unrestricted contributions, \$1,000 in temporarily restricted contributions (purpose restrictions), \$500 in unrestricted dividend and interest income, and \$300 in expenses. In addition, ABC Foundation elected to distribute \$2,500 in cash representing unrestricted net assets to ABC Hospital. How should this activity be reported in ABC Hospital's financial statements?

Reply—Because ABC Foundation (the recipient entity) and ABC Hospital (the beneficiary) are financially interrelated, FASB ASC 958-20-25-2 requires ABC Hospital to recognize its interest in the net assets of ABC Foundation and periodically adjust that interest for its share of the change in net assets of ABC Foundation. This is similar to the equity method of accounting described in FASB ASC 323.

ABC Hospital cannot influence the operating and financial decisions of ABC Foundation to such an extent that ABC Hospital can determine the timing and amount of distributions from ABC Foundation. Therefore, an implied time restriction exists on ABC Hospital's interest in the net assets of ABC Foundation (in addition to any other restrictions that may exist). Accordingly, in recognizing its interest in the net assets of ABC Foundation and the changes in that interest, ABC Hospital should classify the resulting net assets as

³ This section addresses not-for-profit health care entities subject to FASB ASC 954. Section 6140.15, "Application of FASB ASC 958—Classification of a Beneficiary's Interest in the Net Assets of a Financially Interrelated Fund-Raising Foundation (The beneficiary cannot influence the operating and financial decisions of the foundation to such an extent that the beneficiary can determine the timing and amount of distributions from the foundation.)," addresses a similar issue for not-for-profit entities subject to FASB ASC 958.

changes in temporarily restricted net assets (unless donors placed permanent restrictions on their contributions).

In the circumstances previously described, ABC Hospital would initially increase its asset, "Interest in Net Assets of ABC Foundation" for the change in ABC Foundation's net assets (\$3,200). ABC Hospital's Statement of Changes in Net Assets would include "Change in Temporarily Restricted Interest in ABC Foundation" of \$3,200 as an increase in temporarily restricted net assets.

The \$2,500 distribution from ABC Foundation to ABC Hospital would not be reported as an increase in net assets on ABC Hospital's Statement of Operations or its Statement of Changes in Net Assets. By analogy to equity method accounting, the \$2,500 would be treated similar to a distribution from a subsidiary to its parent (for example, a dividend). ABC Hospital should report the distribution by increasing cash and decreasing its interest in the net assets of ABC Foundation.

ABC Hospital would reclassify the net assets from temporarily restricted to unrestricted at the time of the distribution, because the time restriction would expire at the time of the distribution. The reclassification would be reported as "net assets released from restrictions" and included in the performance indicator in the statement of operations. (If those net assets were subject to purpose or time restrictions that remained even after the net assets had been distributed to ABC Hospital, ABC Hospital would not reclassify the net assets from temporarily restricted to unrestricted at the time of the distribution. Instead, ABC Hospital would reclassify the net assets from temporarily restricted to unrestricted when those restrictions were met and the reclassification would be included in or excluded from the performance indicator in accordance with FASB ASC 954-10, FASB ASC 954-205, FASB ASC 954-310, FASB ASC 954-405, and FASB ASC 954-605.)

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.38 Application of FASB ASC 958—Classification of a Beneficiary's Interest in the Net Assets of a Financially Interrelated Fund-Raising Foundation—Does Common Control Lead to the Conclusion That the Beneficiary Can Determine the Timing and Amount of Distributions from the Recipient?

Inquiry—ABC Holding Company (a not-for-profit entity) has two not-for-profit subsidiaries (ABC Hospital and ABC Foundation) that it controls and consolidates in accordance with the guidance in FASB ASC 954-10, FASB ASC 954-205, FASB ASC 954-605, and FASB ASC 954-810. ABC Hospital and ABC Foundation are brother-sister entities that are financially interrelated entities as described in FASB ASC 958-20-15-2. ABC Hospital issues separate financial statements in connection with a loan agreement. ABC Foundation's bylaws state that it is organized for the purpose of stimulating voluntary financial support from donors for the sole benefit of ABC Hospital.

Because ABC Hospital and ABC Foundation are under common control, does that lead to the conclusion that ABC Hospital can influence the financial decisions of ABC Foundation (either directly or indirectly) to such an extent that ABC Hospital can determine the timing and amount of distributions from ABC Foundation to ABC Hospital?

Reply—In some circumstances ABC Hospital, though a subsidiary of ABC Holding Company, may be able to influence the financial decisions of ABC Foundation (either directly or indirectly) to such an extent that ABC Hospital can determine the timing and amount of distributions from ABC Foundation to ABC Hospital. For example, if ABC Hospital formed ABC Holding Company as

a nominally-capitalized shell with no real operating powers, a rebuttable presumption exists that ABC Hospital can influence the financial decisions of ABC Foundation (either directly or indirectly) to such an extent that ABC Hospital can determine the timing and amount of distributions from ABC Foundation to ABC Hospital. On the other hand if, for example, ABC Hospital formed ABC Holding Company to be an operating entity with substance, other factors would need to be considered in determining whether ABC Hospital can influence the financial decisions of ABC Foundation (either directly or indirectly) to such an extent that ABC Hospital can determine the timing and amount of distributions from ABC Foundation to ABC Hospital. Therefore, it is necessary to consider the facts and circumstances surrounding the relationships between ABC Holding Company and ABC Hospital, and ABC Hospital and ABC Foundation, to determine whether ABC Hospital exerts enough influence over ABC Foundation to determine the timing and amount of distributions from ABC Foundation to ABC Hospital. Indicators to consider may include, but are not limited to, the following:

- What is the extent of overlap among the boards of ABC Hospital, ABC Holding Company, and ABC Foundation (for example, do a majority of the individuals who govern ABC Hospital also govern ABC Foundation; do a majority of the individuals who govern ABC Hospital also govern ABC Holding Company; are the boards of ABC Hospital, ABC Foundation and ABC Holding Company substantially independent of one another)? The greater the overlap among the boards of ABC Hospital and either ABC Holding Company or ABC Foundation, the more likely that ABC Hospital can influence the financial decisions of ABC Foundation (either directly or indirectly) to such an extent that ABC Hospital can determine the timing and amount of distributions from ABC Foundation to ABC Hospital.
- What is the extent of overlap among management teams of ABC Hospital, ABC Holding Company, and ABC Foundation (for example, do the individuals who manage ABC Hospital also manage ABC Foundation; do the individuals who manage ABC Hospital also manage ABC Holding Company; does ABC Holding Company have a separate management team that exercises significant authority over both ABC Hospital and ABC Foundation)? The greater the overlap between ABC Hospital's management and management of either ABC Holding Company or ABC Foundation, the more likely that ABC Hospital can influence the financial decisions of ABC Foundation (either directly or indirectly) to such an extent that ABC Hospital can determine the timing and amount of distributions from ABC Foundation to ABC Hospital.
- What are the origins of the parent/holding company structure? For example, were ABC Holding Company and ABC Foundation created by ABC Hospital through a corporate restructuring, which may indicate that ABC Hospital, as the original entity, can influence the financial decisions of ABC Foundation (either directly or indirectly) to such an extent that ABC Hospital can determine the timing and amount of distributions from ABC Foundation to ABC Hospital. Alternatively, were ABC Hospital and ABC Foundation independent entities that merged and created ABC Holding Company to govern the combined entity, which may indicate that ABC Hospital cannot influence the financial decisions of ABC Foundation (either directly or indirectly) to such an extent that ABC Hospital can determine the timing and amount of distributions from ABC Foundation to ABC Hospital.

- What is the number of entities under common control? The greater the number of entities under ABC Holding Company's control, the less likely it is that any one subsidiary, such as ABC Hospital, can influence the financial decisions of another brother-sister subsidiary, such as ABC Foundation, (either directly or indirectly) to such an extent that ABC Hospital can determine the timing and amount of distributions from ABC Foundation to ABC Hospital

Other relevant facts and circumstances should also be considered.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.39 Application of FASB ASC 958—Classification of a Beneficiary's Interest in the Net Assets of a Financially Interrelated Fund-Raising Foundation (More Than One Beneficiary—Some Contributions Are Designated)

Inquiry—DEF Health Entity is the parent company of three brother-sister not-for-profit entities: Health A, a not-for-profit health care entity subject to FASB ASC 954⁴ Health B, and Foundation. Foundation is organized for the purpose of raising contributions for the benefit of both Health A and Health B. The four entities are legally separate not-for-profit entities that are financially interrelated pursuant to the guidance in FASB ASC 958-20-15-2. Assume that Health A can influence the financial decisions of Foundation to such an extent that Health A can determine the timing and amount of distributions from Foundation to Health A.

A donor contributes \$5,000 cash to Foundation and stipulates that the contribution is for the benefit of Health A. Foundation would record the contribution as temporarily restricted revenue because Foundation must use the contribution for the benefit of Health A. In its separately issued financial statements, Health A would recognize its interest in the net assets attributable to that contribution by debiting "Interest in Net Assets of Foundation" for \$5,000. Would the offsetting credit be reported as temporarily restricted revenue (because the net assets attributable to the contribution are restricted on Foundation's Balance Sheet) or unrestricted revenue (because there are no donor-imposed time restrictions or purpose restrictions on how Health A must use the contribution)?

Reply—Health A should report the offsetting credit as unrestricted revenue. Because Health A can influence the financial decisions of Foundation to such an extent that Health A can determine the timing and amount of distributions from Foundation to Health A, no implied time restriction exists on Health A's net assets attributable to its interest in the net assets of Foundation. Accordingly, in recognizing its interest in the net assets of Foundation and the changes in that interest, Health A should classify the resulting net assets as if contributions were received by Health A directly from the donor. In other words, the existence of Foundation should be transparent in determining the net asset classifications in Health A's separately issued financial statements because Foundation cannot impose time or purpose restrictions beyond those imposed by the donor. (Any instructions given by Foundation are designations, rather than restrictions.)

⁴ This section addresses not-for-profit health care entities subject to FASB ASC 954. Section 6140.16, "Application of FASB ASC 958—Classification of a Beneficiary's Interest in the Net Assets of a Financially Interrelated Fund-Raising Foundation (More Than One Beneficiary—Some Contributions Are Designated)," addresses a similar issue for not-for-profit entities subject to FASB ASC 958.

Because no donor-imposed restrictions exist on how Health A must use the contribution, Health A should report the change in its interest in the net assets attributable to the contribution as an increase in unrestricted net assets that is included in its performance indicator (in accordance with FASB ASC 954-10, FASB ASC 954-205, FASB ASC 954-310, FASB ASC 954-405, and FASB ASC 954-605) in its separately issued Statement of Operations. When Foundation actually distributes the funds, Health A should increase cash and decrease its interest in net assets of Foundation; the distributions would have no effect on Health A's Statement of Operations or its Statement of Changes in Net Assets.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.40 Application of FASB ASC 958—Classification of a Beneficiary's Interest in the Net Assets of a Financially Interrelated Fund-Raising Foundation (The beneficiary makes an expenditure that meets a purpose restriction on net assets held for its benefit by the recipient entity—The beneficiary can influence the operating and financial decisions of the recipient to such an extent that the beneficiary can determine the timing and amount of distributions from the recipient.)

Inquiry—ABC Hospital, a not-for-profit health care entity subject to FASB ASC 954,⁵ and ABC Foundation are financially interrelated entities as described in FASB ASC 958-20-15-2. ABC Foundation's bylaws state that it is organized for the purpose of stimulating voluntary financial support from donors for the sole benefit of ABC Hospital. Assume that ABC Hospital can influence the operating and financial decisions of ABC Foundation to such an extent that ABC Hospital can determine the timing and amount of distributions from ABC Foundation to ABC Hospital.

ABC Foundation's net assets consist of \$3,000,000 resulting from cash contributions restricted for the purchase of PPE by ABC Hospital. ABC Hospital has recorded its interest in those net assets by debiting "Interest in net assets of ABC Foundation" and crediting "Change in interest in ABC Foundation," which is reported as an increase in temporarily restricted net assets. ABC Hospital's accounting policy is to not imply a time restriction that expires over the useful life of the donated long-lived assets pursuant to FASB ASC 958-605-45-6 and it has no other net assets restricted for the purchase of PPE.⁶ ABC Hospital subsequently purchased and placed into service \$3,000,000 of PPE that meets those donor restrictions prior to receiving a distribution from ABC Foundation. Should ABC Hospital reclassify \$3,000,000 from temporarily-restricted net assets as a result of building and placing into service the \$3,000,000 of PPE?

Reply—Because ABC Foundation (the recipient entity) and ABC Hospital (the beneficiary) are financially interrelated, FASB ASC 958-20-25-2 requires ABC Hospital to recognize its interest in the net assets of ABC Foundation and periodically adjust that interest for its share of the change in net assets of ABC

⁵ This section addresses not-for-profit health care entities subject to FASB ASC 954. Section 6140.17, "Application of FASB ASC 958—Classification of a Beneficiary's Interest in the Net Assets of a Financially Interrelated Fund-Raising Foundation (The beneficiary makes an expenditure that meets a purpose restriction on net assets held for its benefit by the recipient entity—The beneficiary can influence the operating and financial decisions of the recipient to such an extent that the beneficiary can determine the timing and amount of distributions from the recipient.)," addresses a similar issue for not-for-profit entities subject to FASB ASC 958.

⁶ The assumption that ABC Hospital has no other net assets restricted for the purchase of PPE is intended to avoid establishing a hierarchy pertaining to which restrictions are released first—restrictions on net assets held by the recipient or restrictions on net assets held by the beneficiary. That issue is not addressed in this TPA.

Foundation. This is similar to the equity method of accounting described in FASB ASC 323.

In recognizing its interest in the net assets of ABC Foundation and the changes in that interest, ABC Hospital should classify the resulting net assets as if contributions were received by ABC Hospital directly from the donor, because ABC Hospital can influence the operating and financial decisions of ABC Foundation to such an extent that ABC Hospital can determine the timing and amount of distributions from ABC Foundation to ABC Hospital. Accordingly, the net assets representing contributions restricted for the purchase of PPE should be reported as temporarily restricted net assets (purpose restricted) in ABC Hospital's financial statements. Upon purchasing and placing into service the PPE, ABC Hospital (and ABC Foundation) should reclassify \$3,000,000 from temporarily restricted to unrestricted net assets,⁷ reported separately from the performance indicator in the statement of operations in accordance with the guidance in FASB ASC 954-10, FASB ASC 954-205, FASB ASC 954-310, FASB ASC 954-405, and FASB ASC 954-605. In other words, the existence of ABC Foundation should be transparent in determining the net asset classifications in ABC Hospital's financial statements because ABC Foundation cannot impose time or purpose restrictions beyond those imposed by the donor. (Any instructions given by ABC Foundation are designations, rather than restrictions.)

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.41 Application of FASB ASC 958—Classification of a Beneficiary's Interest in the Net Assets of a Financially Interrelated Fund-Raising Foundation (The beneficiary makes an expenditure that is consistent with a purpose restriction on net assets held for its benefit by the recipient entity—The beneficiary cannot influence the operating and financial decisions of the recipient to such an extent that the beneficiary can determine the timing and amount of distributions from the recipient.)

Inquiry—ABC Hospital, a not-for-profit health care entity subject to FASB ASC 954,⁸ and ABC Foundation are financially interrelated entities as described in FASB ASC 958-20-15-2. ABC Foundation's bylaws state that it is organized for the purpose of stimulating voluntary financial support from donors for the sole benefit of ABC Hospital. Assume that ABC Hospital cannot, however, influence the operating and financial decisions of ABC Foundation to such an extent that ABC Hospital can determine the timing and amount of distributions from ABC Foundation to ABC Hospital.

⁷ In this fact pattern, ABC Research Institute's interest in the net assets of ABC Foundation is subject to only purpose restrictions because the net assets arose from cash contributions with no time restrictions. If instead the net assets arose from promises to give rather than from cash contributions, the net assets might be subject to time restrictions in addition to the purpose restrictions. In determining whether net assets that arose from promises to give are subject to time restrictions, NPEs should consider the guidance in section 6140.04, *Lapsing of Restrictions on Receivables if Purpose Restrictions Pertaining to Long-Lived Assets are Met Before the Receivables are Due*, which discusses whether restrictions on net assets arising from promises to give that are restricted by donors for investments in long-lived assets are met when the assets are placed in service or when the receivables are due.

⁸ This section addresses not-for-profit health care entities subject to FASB ASC 954. Section 6140.18, "Application of FASB ASC 958—Classification of a Beneficiary's Interest in the Net Assets of a Financially Interrelated Fund-Raising Foundation (The beneficiary makes an expenditure that is consistent with a purpose restriction on net assets held for its benefit by the recipient entity—The beneficiary cannot influence the operating and financial decisions of the recipient to such an extent that the beneficiary can determine the timing and amount of distributions from the recipient.)" addresses a similar issue for not-for-profit entities subject to FASB ASC 958.

ABC Foundation's net assets consist of \$3,000,000 resulting from cash contributions restricted for the purchase of PPE ABC Hospital. ABC Hospital has recorded its interest in those net assets by debiting "Interest in net assets of ABC Foundation" and crediting "Change in interest in ABC Foundation," which is reported as an increase in temporarily restricted net assets. ABC Hospital has no other net assets restricted for the purchase of PPE.⁹

ABC Hospital subsequently built and placed into service the New Modern Hospital Wing (at a cost of \$3,000,000) prior to receiving a distribution from ABC Foundation or any indication from ABC Foundation that it intends to support building and placing into service the New Modern Hospital Wing. Should ABC Hospital reclassify \$3,000,000 from temporarily-restricted net assets to unrestricted net assets as a result of building and placing into service the New Modern Hospital Wing?

Reply—From ABC Hospital's perspective, its interest in the net assets of ABC Foundation has two restrictions—a purpose restriction (the purchase of the PPE) and an implied time restriction. (ABC Hospital cannot influence the operating and financial decisions of ABC Foundation to such an extent that ABC Hospital can determine the timing and amount of distributions from ABC Foundation to ABC Hospital, including distributions pertaining to expenditures by ABC Hospital that meet the donor-imposed purpose restrictions. Therefore, an implied time restriction exists on ABC Hospital's interest in the net assets of ABC Foundation.) FASB ASC 958-205-45-9 provides, in part, as follows:

If two or more temporary restrictions are imposed on a contribution, the effect of the expiration of those restrictions is recognized in the period in which the last remaining restriction has expired.

FASB ASC 958-205-45-11 further provides, in part:

Temporarily restricted net assets with time restrictions are not available to support expenses until the time restrictions have expired.

In considering whether the purpose restriction on ABC Hospital's interest in the net assets of ABC Foundation is met, ABC Hospital should determine whether ABC Foundation has discretion in deciding whether an expenditure by ABC Hospital that is consistent with the purpose restriction satisfies that purpose restriction. For example, if the restricted net assets arose from a contribution that was restricted for "building projects of ABC Hospital," with no particular building project specified, purchasing and placing into service the New Modern Hospital Wing is consistent with the purpose restriction but may or may not meet it, because ABC Foundation has some discretion in deciding which building project releases the purpose restriction. In other words, ABC Foundation may, at its discretion, either release restricted net assets in support of building the New Modern Hospital Wing or not, because the purpose restriction imposed by the donor was broad enough to give ABC Foundation discretion in deciding which building projects meet the purpose restriction. If ABC Foundation has such discretion, a purpose restriction and an implied time restriction on ABC Hospital's interest in the net assets of ABC Foundation exist. Therefore, ABC Hospital should not reclassify \$3,000,000 from temporarily-restricted net assets to unrestricted net assets as a result of building and placing into service the New Modern Hospital Wing unless ABC Foundation distributes or obligates itself to distribute to ABC Hospital amounts

⁹ The assumption that ABC Hospital has no other net assets restricted for the purchase of PPE is intended to avoid establishing a hierarchy pertaining to which restrictions are released first—restrictions on net assets held by the recipient or restrictions on net assets held by the beneficiary. That issue is not addressed in this TPA.

attributable to net assets restricted for the purchase of PPE by ABC Hospital, or ABC Foundation otherwise indicates that it intends for those net assets to be used to support the building and placing into service the New Modern Hospital Wing as an activity of the current period (assuming that ABC Hospital had no other net assets that were restricted for the purchase of PPE).^{10 11}

In contrast to the example in the previous paragraph, if the restricted net assets arose from a contribution that was restricted for “building and placing into service the New Modern Hospital Wing,” ABC Foundation has no discretion in deciding whether that purpose restriction is met by building and placing into service the New Modern Hospital Wing. Therefore, if ABC Hospital builds and places into service the New Modern Hospital Wing, the purpose restriction is met (assuming that ABC Hospital had no other net assets that were restricted for building and placing into service the New Modern Hospital Wing). In addition, the implied time restriction is met because ABC Foundation is required to distribute the funds to ABC Hospital in order to meet the donor’s stipulation. Therefore, ABC Hospital (and ABC Foundation) should reclassify \$3,000,000 from temporarily-restricted net assets as a result of building and placing into service the New Modern Hospital Wing.

In summary, ABC Hospital should not reclassify \$3,000,000 from temporarily-restricted net assets to unrestricted net assets as a result of building and placing into service the New Modern Hospital Wing until both the

¹⁰ In this fact pattern, the expenditure is made prior to meeting the purpose restriction and the implied time restriction that exists because ABC Hospital cannot determine the timing and amount of distributions from ABC Foundation to ABC Hospital. FASB ASC 958-205-45-11 provides that in circumstances in which both purpose and time restrictions exist, expenditures meeting the purpose restriction must be made simultaneous with or after the time restriction has expired in order to satisfy both the purpose and time restriction and result in a reclassification of net assets from temporarily restricted to unrestricted. In other words, time restrictions, if any, must be met before expenditures can result in purpose restrictions being met. In this fact pattern, however, the time restriction is an implied time restriction that exists because the beneficiary cannot determine the timing and amount of distributions from the recipient to the beneficiary, rather than an implied time restriction that exists because a promise to give is due in a future period or because of an explicit donor stipulation. Accordingly, in this fact pattern, temporarily restricted net assets with implied time restrictions are available to support expenditures made before the expiration of the time restrictions and the net assets should be reclassified from temporarily restricted to unrestricted in the period in which the last remaining restriction has expired. In other words, in this fact pattern, if the expenditure that meets the purpose restriction is made before meeting the implied time restriction that exists because the beneficiary cannot determine the timing and amount of distributions from the recipient to the beneficiary, all the restrictions should be considered met once the implied time restriction is met.

¹¹ In this fact pattern, ABC Hospital’s interest in the net assets of ABC Foundation is subject to an implied time restriction that exists because ABC Hospital cannot determine the timing and amount of distributions from ABC Foundation to ABC Hospital and a purpose restriction. Because the net assets arose from cash contributions with no other donor-imposed time restrictions, no time restrictions other than those imposed by ABC Foundation exist. If instead the net assets arose from promises to give rather than from cash contributions, the net assets might be subject to donor-imposed time restrictions in addition to the time restriction imposed by ABC Foundation and the purpose restriction. In determining whether net assets that arose from promises to give are subject to donor-imposed time restrictions in addition to the time restrictions imposed by ABC Foundation, NPEs should consider the guidance in section 6140.04, *Lapsing of Restrictions on Receivables if Purpose Restrictions Pertaining to Long-Lived Assets are Met Before the Receivables are Due*, which discusses whether restrictions on net assets arising from promises to give that are restricted by donors for investments in long-lived assets are met when the assets are placed in service or when the receivables are due. In circumstances in which the net assets are subject to (a) donor-imposed time restrictions in addition to the (b) implied time restrictions that exist because ABC Hospital cannot determine the timing and amount of distributions from ABC Foundation to ABC Hospital and (c) purpose restrictions, the last remaining time restriction should be considered in applying the guidance in FASB ASC 958-205-45-11 that provides that temporarily restricted net assets with time restrictions are not available to support expenses until the time restrictions have expired.

purpose restriction and the implied time restriction are met. If both the purpose restriction and the implied time restriction are met, ABC Hospital should decrease its interest in the net assets of ABC Foundation and increase cash (or a receivable, if the Foundation has merely obligated itself to make the distribution) by the amount of the distribution, and simultaneously reclassify the same amount from temporarily restricted net assets to unrestricted net assets. The reclassification should be reported separately from the performance indicator in the statement of operations in accordance with the guidance in FASB ASC 954-10, FASB ASC 954-205, FASB ASC 954-310, FASB ASC 954-405, and FASB ASC 954-605.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.42 Application of FASB ASC 958—Classification of a Beneficiary’s Interest in the Net Assets of a Financially Interrelated Fund-Raising Foundation (Recipient Entity)—Accounting for Unrealized Gains and Losses on Investments Held by the Foundation

Inquiry—FASB ASC 958 provides that if entities are financially interrelated, the balance sheet of the beneficiary entity should reflect that entity’s beneficial interest in the net assets of the recipient entity, and that that interest should be adjusted periodically to reflect the changes in the net assets of the recipient entity. This accounting is similar to the equity method of accounting. FASB ASC 954-10, FASB ASC 954-205-45, FASB ASC 954-320-45, FASB ASC 954-320-55, and FASB ASC 954-605 provide guidance pertaining to the classification of investment returns in the financial statements of health care entities.

ABC Hospital and ABC Foundation are financially interrelated entities. How should changes in ABC Hospital’s interest in the net assets of ABC Foundation attributable to unrealized gains and losses on Foundation’s investments be classified in ABC Hospital’s financial statements?

Reply—In circumstances in which ABC Hospital can influence the financial decisions of ABC Foundation to such an extent that ABC Hospital can determine the timing and amount of distributions from Foundation to ABC Hospital, changes in ABC Hospital’s interest in the net assets of ABC Foundation attributable to unrealized gains and losses on investments should be classified in the same manner that they would have been had ABC Hospital held the investments and had the transactions itself. In accordance with the guidance in FASB ASC 954-10, FASB ASC 954-205-45, FASB ASC 954-320-45, FASB ASC 954-320-55, and FASB ASC 954-605, ABC Hospital should include in the performance indicator the portion of the change attributable to unrealized gains and losses on trading securities that are not restricted by donors or by law, and should exclude from the performance indicator the portion of the change attributable to all other unrealized gains and losses.

In circumstances in which ABC Hospital cannot influence the financial decisions of Foundation to such an extent that ABC Hospital can determine the timing and amount of distributions ABC Hospital receives from Foundation, an implied time restriction exists on ABC Hospital’s net assets attributable to its interest in the net assets of Foundation (in addition to any other restrictions that may exist). Accordingly, ABC Hospital should classify all changes in that interest, including the portion of the change attributable to unrealized gains and losses on investments, as changes in temporarily restricted net assets (unless donors placed permanent restrictions on investment gains and losses pertaining to their contributions) and therefore should exclude those changes from the performance indicator.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.43 Application of FASB ASC 958—Classification of Distributions From a Financially Interrelated Fund-Raising Foundation (Recipient Entity) to a Health Care Beneficiary

Inquiry—How should a fund-raising foundation (recipient), a not-for-profit entity subject to FASB ASC 958, report (in its separately issued financial statements) distributions to a financially interrelated beneficiary that is a health care entity? In other words, should such distributions be reported following (a) the guidance on reporting transfers among affiliated health care entities in FASB ASC 954-10, FASB ASC 954-205, FASB ASC 954-605, and FASB ASC 954-810 or (b) the guidance in FASB ASC 958.

Reply—FASB ASC 958 applies to all not-for-profit entities, except those that are providers of health care services (FASB ASC 958-10-15-3). Therefore, the guidance in FASB ASC 954 generally does not apply to financial statements of recipient entities that are financially interrelated fund-raising foundations. The foundation should follow the accounting and reporting requirements of FASB ASC 958 rather than FASB ASC 954 in the foundation's separately issued financial statements. The foundation should report distributions to beneficiary entities as expenses or distributions to related entities. The guidance in the previous sentence applies regardless of whether the recipient entity and the beneficiary are under common control or whether one controls the other in a parent-subsidary relationship.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

[.44] Reserved

.45 Applicability of FASB ASC 460—Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others

Inquiry—In order to attract a physician into a community to meet community needs, a hospital may loan the physician an amount to be forgiven over a set period as long as the physician remains in practice in the community. The hospital (generally a not-for-profit) is precluded from requiring the physician to refer patients to or treat patients at that facility, although the hospital hopes to be the primary referral location. Is this arrangement subject to FASB ASC 460, *Guarantees*?

Reply—No. The contract does not constitute a guarantee contract under FASB ASC 460-10-15-4.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.46 Applicability of FASB ASC 460—Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others—Mortgage Guarantees

Inquiry—In order to recruit a physician, a hospital may guarantee the physician's home mortgage. The physician may be recruited either as an employee of the hospital or as an independent contractor. Is this arrangement considered a guarantee under FASB ASC 460?

Reply—If the physician becomes an employee of the hospital, the arrangement is not covered by FASB ASC 460; see the discussion of "other employment-related costs" in FASB ASC 460-10-55-17. If the physician is not an employee, then the arrangement is considered a guarantee under FASB ASC 460. The

contract requires the guarantor (hospital) to make a payment (in cash) to the guaranteed party (mortgage lender) based on changes in an underlying (occurrence or nonoccurrence of a specified event such as a scheduled payment under mortgage contract not made by physician) that is related to an asset (mortgage loan) of the guaranteed party (mortgage lender).

As an example, a physician obtains a mortgage guarantee from a hospital. The presence of the hospital's guarantee, obtained through a local bank, reduces the interest rate on the physician's mortgage loan by one-half point. No loan default is expected to occur (and as a result, no cash is expected to be paid out). At inception, the hospital would record an obligation to stand ready to perform in an amount equal to the fair value of the guarantee. FASB ASC 460 does not prescribe where the offsetting debit should go (for example, expense, asset, or adjustment to a gain or loss on sale), instead stating that it depends on the circumstances in which the guarantee was issued (FASB ASC 460-10-55-23).

FASB ASC 460 does not describe in detail how the guarantor's liability for its obligations under the guarantee would be measured subsequent to initial recognition, but notes (paragraph 12) that the liability typically would be reduced by a credit to earnings as the guarantor is released from risk under the guarantee. In the situation described previously, the hospital would be released from risk as the physician's outstanding mortgage obligation is reduced.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.47 Application of Accounting Standards Update No. 2011-07, *Presentation and Disclosure of Patient Service Revenue, Provision for Bad Debts, and the Allowance for Doubtful Accounts for Certain Health Care Entities, in Consolidated Financial Statements*

Inquiry—Health System consists of a parent holding company and two operating subsidiaries. Subsidiary A is an acute care hospital that has a policy of providing services to patients regardless of their ability to pay. Subsidiary A records patient service revenue at the time services are rendered and, thus, typically recognizes significant amounts of patient service revenue associated with uninsured self-pay patients prior to assessing its collectability. Subsidiary B is an ambulatory surgery center that does not have a policy of providing services to patients regardless of their ability to pay; thus, its provision for bad debts is a reflection of its credit risk. Health System issues consolidated financial statements. In addition, each subsidiary issues standalone financial statements.

FASB Accounting Standards Update (ASU) No. 2011-07, *Health Care Entities (Topic 954): Presentation and Disclosure of Patient Service Revenue, Provision for Bad Debts, and the Allowance for Doubtful Accounts for Certain Health Care Entities (a consensus of the FASB Emerging Issues Task Force)*, amended FASB ASC 954-605-45 to require that a health care entity present all bad debts associated with patient service revenue as a deduction from revenue if a significant amount of patient service revenue is recognized at the time services are rendered and the entity does not assess the patient's ability to pay. Thus, in the separate subsidiary statements, Subsidiary A's statement of operations presents bad debts associated with patient service revenue as a deduction from patient service revenue, while Subsidiary B's statement of operations displays bad debts related to patient service revenue as an operating expense.

In determining how to present bad debts in Health System's consolidated statement of operations, should the assessment of significance be made at the

consolidated reporting entity level (regardless of the presentation in the separate subsidiary financial statements), or should the determinations made at the separate subsidiary reporting level be retained in consolidation?

Reply—Because ASU No. 2011-07 does not address this issue, the determination of whether the presentation of bad debts at the consolidated reporting entity level should be based on an entity-wide assessment of significance or on significance determined at the level of each individual subsidiary is an accounting policy election. If Health System decides to retain the presentations determined based on assessments made at the individual subsidiary reporting level (based on FASB ASC 810-10-25-15, which states that the application of guidance in an industry-specific topic of FASB ASC to a subsidiary within the scope of that topic shall be retained in consolidation), the consolidated statement of operations would reflect bad debts related to Subsidiary A's patient service revenue as a deduction from patient service revenue and the bad debts related to Subsidiary B's patient service revenue as an operating expense.

Alternatively, Health System may elect to assess "significance" at the consolidated reporting entity level regardless of the presentations used in the separate subsidiary financial statements. In that case, if consolidated patient service revenues are deemed to include a significant amount of revenue recognized under a policy in which services are provided to patients regardless of their ability to pay, then the entire provision for bad debts related to consolidated patient service (that is, the combined bad debts of Subsidiaries A and B) would be presented as a deduction from the consolidated net patient service revenues. If such revenues are not deemed to be significant at the consolidated reporting entity level, the entire provision for bad debts related to consolidated patient service revenues should be presented as an operating expense.

Application of the disclosure requirements would be consistent with the policy that is elected. Whichever policy is elected should be disclosed in the notes to the financial statements in accordance with FASB ASC 230-10-50-1 and consistently applied.

It is recommended that Securities and Exchange Commission (SEC) registrants consider consultations with the SEC staff if they are considering accounting for transactions similar to those described in this inquiry.

[Issue Date: February 2012. Revised, March 2012.]

.48 Accounting for Costs Incurred During Implementation of ICD-10

Inquiry—The U.S. health care system is scheduled to transition from the International Classification of Diseases, 9th Edition (ICD-9) code sets used to report medical diagnoses and inpatient procedures to the International Classification of Diseases, 10th Edition (ICD-10). ICD-10 expands the number of available codes from 24,000 to greater than 155,000. With its expanded capacity and complexity, ICD-10 enables the documentation of many different types of diseases and conditions and the capture of diagnostic information with a higher level of specificity. The transition from ICD-9 to ICD-10 is expected to produce several distinct benefits for health care entities, including the following:

- Improved precision in documentation of clinical care, which is expected to result in greater accuracy in the processing of claims and reimbursements
- Higher quality and more specific data that can be tracked and used to improve disease management programs and clinical outcomes

Implementing ICD-10 by October 1, 2013, is mandatory.¹² Health care entities that do not comply are expected to be unable to submit claims to third-party payors for payment. Costs expected to be incurred in connection with the conversion include those to (a) modify existing computer systems to accept the ICD-10 fields or to replace systems that cannot be made ICD-10 compliant, (b) enhance electronic medical records, (c) train clinical coders to use ICD-10, and (d) train clinicians to improve their documentation practices so that medical documentation contains the details necessary to support the higher level of specificity that ICD-10 enables.

How should a health care entity account for costs incurred in connection with the implementation of ICD-10?

Reply—ICD-10 conversion is expected to require changes to both business processes and information systems. When a project involves both process engineering and software development or modification, the guidance in FASB ASC 720-45 should be considered. FASB ASC 720-45 requires that project costs be segregated among process reengineering activities, activities that develop or modify software, and costs associated with acquisition of fixed assets. The costs associated with process reengineering (for example, assessing the current state of business processes, process redesign or reengineering, or work force restructuring) are expensed as incurred. The costs associated with developing or modifying internal-use software are capitalized or expensed based on FASB's internal-use software guidance (discussed further in the text that follows). Costs associated with acquisition of fixed assets are accounted for in accordance with an entity's policy for capitalizing long-lived productive assets. If an outside consultant is engaged to conduct the project, the total consulting contract price should be allocated among these activities based on the relative fair values of each component (which are not necessarily the separate prices stated within the contract for each element). FASB ASC 720-45-55-1 provides a helpful table that summarizes the accounting for typical components of a business process reengineering and information technology transformation project and the guidance that applies to each component.

Significant expenses also are likely to be incurred in connection with training coders and clinicians to comply with the ICD-10 requirements. According to paragraphs 4 and 6 of FASB ASC 350-40-25, all training costs should be expensed as incurred, even those that are incurred during the application development stage.

The guidance set forth in FASB ASC 350-40 should be followed when accounting for the portion of project costs associated with either acquisition of new ICD-10 compliant systems or modification of existing software to become ICD-10 compliant. Health care entities should determine the extent to which those modifications result in "additional functionality"—that is, whether the modifications enable the software to perform tasks that it was previously incapable of performing.

The specific facts and circumstances of each entity should be considered in evaluating whether any of the modifications result in additional functionality, and professional judgment should be applied in assessing whether modifications to an entity's system result in additional functionality beyond the original

¹² In April 2012, the U.S. Department of Health and Human Services officially proposed delaying the International Classification of Diseases, 10th Edition implementation deadline to October 1, 2014. More information on the proposed rule is available on fact sheets at www.cms.gov/apps/media/fact_sheets.asp. The proposed rule may be viewed at www.ofr.gov/inspection.aspx.

software's capabilities and qualify as an upgrade or enhancement. Factors to consider in the assessment might include, but are not limited to, the following:

- The extent and types of changes being made to the software design. A significant amount of changes may be indicative of additional functionality.
- The amount of additional software coding required and the new software processes developed. Less software coding or few additional software processes may point toward maintenance rather than additional functionality.
- The extent to which billing system data will be used for new purposes, including its ability to use the additional coding capabilities beyond submitting claims to Medicare (for example, to track data in order to improve disease management programs and clinical outcomes or to enhance the quality of patient care or pay-for-performance contracts), may be indicative of additional functionality.
- Whether the changes are part of normal maintenance provided by the vendor at no additional cost. If the entity was billed separately for an upgrade, or if the maintenance fee with the vendor significantly increased in the period of the change, that may be indicative of additional functionality.
- The entity's historical experience with clinical coding system upgrades (for example, the number of years since the last upgrade, the amount of changes made, whether that upgrade qualified for capitalization). An entity should consider the criteria applied to previous upgrades, including its experience to determine whether they resulted in additional functionality, and compare those criteria to the facts and circumstances associated with the proposed or planned upgrade.
- Increase in the number and complexity of the interfaces between the central billing system and downstream departmental systems. The greater the complexity of the system, the more likely that significant changes will be required, resulting in additional functionality.

Modifications of software that do not result in additional functionality are expensed as maintenance costs. Modifications that result in additional functionality are considered upgrades or enhancements of the existing system and are expensed or capitalized in accordance with the criteria set forth in paragraphs 1–6 of FASB ASC 350-40-25.

[Issue Date: July 2012.]

.49 Presentation of Claims Liability and Insurance Recoveries—Contingencies Similar to Malpractice

Inquiry—ASU No. 2010-24, *Health Care Entities (Topic 954): Presentation of Insurance Claims and Related Insurance Recoveries (a consensus of the FASB Emerging Issues Task Force)*, addressed the presentation of a health care entity's insurance claims and related insurance recoveries. The ASU specifically addressed malpractice claims but also referenced similar contingent liabilities. What is meant by *similar contingent liabilities*?

Reply—Similar contingent liabilities within the scope of ASU No. 2010-24 include liabilities of a similar nature, such as workers compensation and director and officers claims.

[Issue Date: October 2012.]

.50 Accrual of Legal Costs Associated With Contingencies Other Than Malpractice

Inquiry—FASB ASC 954-450 requires health care entities to estimate and accrue the legal costs that are expected to be incurred in connection with litigating a malpractice claim in the period the malpractice incident arises. In accounting for legal costs associated with contingency claims other than malpractice, some health care entities have followed guidance in FASB ASC 450-20-S99-2 that permits making a policy election to either expense claims-related legal fees in the period(s) in which the costs are actually incurred or to estimate and accrue them in the period in which the associated claim arises. Although that guidance specifically applies to entities required to apply the SEC's rules and regulations, other entities have also looked to that guidance as a basis for establishing an accounting policy election.

Health System GHI has contingent liabilities associated with workers compensation claims. Based on the guidance in FASB ASC 450-20-S99-2, Health System GHI established an accounting policy of expensing legal costs incurred in connection with its workers compensation claims in the periods in which the legal costs are actually incurred. Does the adoption of ASU No. 2010-24 require Health System GHI to change its method of accounting for legal costs incurred in connection with its workers compensation claims to be consistent with the method used for legal costs associated with its malpractice claims?

Reply—The adoption of ASU No. 2010-24 should not cause an entity to change its accounting for legal costs associated with contingencies other than medical malpractice liabilities. Because Health System GHI's established accounting policy is to expense such costs in the period(s) in which they are actually incurred, it would continue to apply that policy subsequent to its adoption of ASU No. 2010-24. Similarly, an entity that utilized FASB ASC 450-20-S99-2 as a basis for establishing a policy of estimating and accruing expected legal costs in the period in which the incident that gives rise to the claim occurs would continue to apply its policy election subsequent to adoption of the ASU. The appropriateness of any changes by an entity in its policy for accounting for legal costs incurred in connection with contingent liabilities other than malpractice would be evaluated in accordance with FASB ASC 250-10.

[Issue Date: October 2012.]

.51 Presentation of Insurance Recoveries When Insurer Pays Claims Directly

Inquiry—Prior to the issuance of ASU No. 2010-24, most health care entities that carried professional liability insurance only reported liabilities related to malpractice claims that were not covered by insurance (in effect, netting anticipated insurance recoveries against the related liability). ASU No. 2010-24 amended FASB ASC 954-450-25-2 to provide that a health care entity should not net insurance recoveries against related insurance claim liabilities and that the claim liability should be determined without consideration of insurance recoveries. The amendments are consistent with the guidance on netting receivables and payables in FASB ASC 210-20 that are more broadly applicable for other industries.

ABC Hospital's medical malpractice insurance policy provides that the insurer will handle all aspects of claims handling and settlement for ABC Hospital's covered malpractice claims, including making payments to plaintiffs directly on behalf of ABC Hospital. Thus, ABC Hospital neither pays its own malpractice claims nor receives insurance recoveries. How do the amendments

to FASB ASC 954-450-25-2 made by ASU No. 2010-24 apply to ABC Hospital's malpractice liabilities?

Reply—Unless ABC Hospital has a valid right of setoff (which is not common), as described in FASB ASC 210-20-45, ABC Hospital should report the gross amount of its claims liabilities (including legal costs) as its obligations, regardless of whether covered by insurance, and should record a receivable as if it were entitled to receive insurance recoveries to offset those obligations, as discussed in FASB ASC 954-450-25-2. It is expected that in most cases, this results in reporting a receivable that mirrors the amount of estimated losses accrued that are covered by insurance.

This situation is discussed in paragraph BC4 of ASU No. 2010-24. Despite the fact that an insurance entity is paying for the defense of the claim and ultimately paying for some or all of the award or settlement, ABC Hospital is the primary obligor for payment of the claim (because if the insurer was unable to pay, ABC Hospital would still be liable). Thus, the guidance in the amendments made by ASU No. 2010-24 applies to ABC Hospital's malpractice liabilities.

[Issue Date: October 2012.]

.52 Insurance Recoveries From Certain Retrospectively Rated Insurance Policies

Inquiry—GHI Health System's (GHI's) program of medical malpractice risk management includes a retrospectively rated insurance policy (that is, a policy with a premium that is adjustable based on actual claims experience during the policy term). The total annual premium consists of a minimum premium (representing the insurance company's expenses and profits) and an additional amount for estimated claims that is adjusted based on GHI's actual malpractice loss experience. The policy is also subject to a maximum premium amount. How would GHI apply the guidance in ASU No. 2010-24 to claims that are covered by an insurance policy with a retrospectively related premium that reflects GHI's own experience?

Reply—ASU No. 2010-24 requires GHI to report the gross amount of liability for its estimated malpractice claims without regard to any insurance coverage that may exist and to record a receivable to the extent it is indemnified against risk of financial loss through an insurance policy. The existence of an insurance policy, in itself, is no assurance that GHI has been indemnified against risk of financial loss. To the extent that an insurance contract does not, despite its form, provide for indemnification of the insured against loss, the insured entity must account for it as a deposit (financing) arrangement rather than insurance, as discussed in FASB ASC 720-20 and 340-30.

Therefore, at policy inception, GHI should determine the extent to which its retrospectively rated policy actually provides indemnification against risk of financial loss associated with malpractice claims. Because the premium is based on GHI's own loss experience, the economic substance of the arrangement may more closely resemble a claims funding mechanism than a contract that indemnifies GHI against risk of financial loss. The facts and circumstances of the terms of the insurance arrangement must be carefully evaluated in making this assessment. For example, a premium that adjusts dollar for dollar to ultimate loss experience during the coverage period and for which the loss experience has only a remote chance of exceeding the maximum premium is likely indicative of a self-insurance funding program and would be accounted for as a financing arrangement based on the guidance in FASB ASC 340-30. In that situation, there would typically be no insurance recoveries to record because claims are being paid from GHI's own resources on deposit with the

insurer. This is consistent with FASB ASC 954-720-25-1 that states that “[i]nsurance recoveries from a retrospectively rated insurance policy whose ultimate premium is based primarily on the health care entity’s loss experience shall not be recognized until the estimated losses exceed the stipulated maximum premium.” However, if it is reasonably possible that GHI’s ultimate loss experience will exceed the maximum premium, the policy is more likely to have indemnified GHI against a certain level of loss. In that situation, insurance recoveries associated with that indemnification, if any, would be determined and presented separately as a receivable.

Real Estate

.01 Method of Recognizing Revenue From Commissions by Real Estate Brokerage Firm

Inquiry—A client is a real estate broker and also manages real estate. The client is the exclusive broker for all its affiliates and acts as broker for outside parties as well. All of the affiliates invest in raw land for appreciation and occasionally improve and subdivide parcels. None of the properties are extensive enough to be considered “retail land sales companies.” Sales are probably half for second home sites and half for larger parcels bought for investment. Sales are usually for cash with an occasional mortgage taken by the seller. The client usually receives a gross brokerage commission of 10 percent to 15 percent, which is shared with its salesmen and cobrokers, retaining an average of 5 percent. Commissions are received at closing and cobrokers are paid shortly after the closing. Salesmen draw against firm purchase and sale agreements and are credited with the commission on closing. If a buyer fails to complete a purchase, his deposit is usually retained by the client in lieu of the brokerage commission, which legal counsel indicates is permitted under law.

The client records brokerage commission income when a firm purchase and sale agreement is accepted. This is an agreement which specifies price and all terms of sale, has no unusual or difficult conditions, and is secured by a deposit of 10 percent or more of the purchase price. This method was adopted by the client to more closely match revenues and expenses. Indirect selling expenses, including advertising, are treated as period costs. The costs of cobrokerage and salesmen’s commissions are also accrued at that time. The client’s contention is that the earnings process has been substantially completed, and the wait until closing (usually 30–90 days but occasionally longer) is a legal formality rather than an integral part of the broker’s work. Very few sales are not closed, and the price and terms of sale rarely change. From an audit point of view, many of the open sales at year-end have closed by completion of the audit field work. The client’s financial statements do disclose the method of accounting employed for brokerage commissions.

Is this present method of accounting for brokerage commissions considered acceptable?

Reply—Revenue recognition is discussed in Financial Accounting Standards Board (FASB) Concepts Statement No. 5, *Recognition and Measurement of Business Enterprises*, paragraphs 83–84. Paragraph 83 states in part:

“Revenues are not recognized until earned. An entity’s revenue-earning activities involve delivering or producing goods, rendering services, or other activities that constitute its ongoing major or central operations, and revenues are considered to have been earned when the entity has substantially accomplished what it must do to be entitled to the benefits represented by the revenues.”

Therefore, the client’s method of accounting for commission income at the time when a firm purchase and sale agreement is entered into would be acceptable. However, because of state laws governing real estate operations, recognition of commission income might have to be postponed, depending on the particular legal requirements of a given state, until such time as the broker is legally entitled to receive that commission.

[.02] Reserved**.03 Accounting for Sale of Property With Option to Repurchase**

Inquiry—A corporation sold a parcel of land to a bank. The corporation has an option to repurchase the land for a period of three years. The corporation received the full purchase price at the time of sale.

What is the proper accounting treatment for this transaction?

Reply—The conclusion in FASB *Accounting Standards Codification* (ASC) 360-20-40-38 is that a transaction whereby a seller has an obligation or an option to repurchase the property must be accounted for as a financing, leasing, or profit sharing arrangement. A right of first refusal based on a bona fide offer by a third party is ordinarily not an obligation or an option to repurchase.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.04 Method of Recognizing Profit on Sale of Undeveloped Land With a Release Provision

Inquiry—One hundred acres of undeveloped land was sold for \$10,000 per acre for a total consideration of \$1,000,000. The buyer made a cash down payment of \$250,000, and the balance of \$750,000 is payable in three annual installments of \$250,000. The agreement has a release provision that title to the acreage will be released to the buyer on a basis of 115 percent of the sales price. Therefore, of the \$250,000 down payment, \$217,000 would be applicable to the release of 21.7 acres, and the balance of \$33,000 would be applicable to the remaining acreage. At this point, there would be a balance due on the sales agreement of \$750,000 against which \$33,000 would apply. The buyer would have this privilege every year, and the only security would be the land underlying the agreement.

What is the proper accounting treatment?

Reply—FASB ASC 360-20-40-23 states the following:

If the amounts applied to unreleased portions do not meet the initial and-continuing-investment criteria as applied to the sales value of those unreleased portions, profit shall be recognized on each released portion when it meets the criteria in paragraph 360-20-40-5 as if each release were a separate sale.

FASB ASC 360-20-40-5 states, in part:

Profit on real estate sales transactions shall not be recognized by the full accrual method until all of the following criteria are met:

- a. A sale is consummated.
- b. The buyer's initial and continuing investments are adequate to demonstrate a commitment to pay for the property.
- c. The seller's receivable is not subject to future subordination.
- d. The seller has transferred to the buyer the usual risks and rewards of ownership in a transaction that is in substance a sale and does not have a substantial continuing involvement with the property.

Presumably, the tests referred to would have to be met continuously; that is, at the time of closing and at each release date.

The relationship of the \$33,000 to the \$750,000 is not sufficient "to constitute an adequate initial and continuing investment" related to the

unreleased property. Therefore, “profit shall be recognized on each released portion when it meets the criteria in paragraph 360-20-40-5 as if each release were a separate sale” as stated in FASB ASC 360-20-40-23.

Section 6700

Construction Contractors

.01 Distinction Between Long-Term and Short-Term Construction Contracts

Inquiry—A construction company considers all contracts that are less than one year in duration as short-term contracts and accounts for them on a completed contract method. Long-term contracts are accounted for on the completed-contract method or the percentage of completion method depending on other factors.

Does the distinction made by the company conform with generally accepted accounting principles?

Reply—Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 605-35-25-92 states that the completed-contract method may be used as the basic accounting method only if the financial position and results of operations reported on that basis would not vary from those resulting from the use of the percentage-of-completion method, “for example, in circumstances in which an entity has primarily short-term contracts.” FASB ASC 605-35-25-95 also states that an entity using the completed-contract method as its basic accounting method should depart from that policy for a single contract or a group of contracts not having the features described in paragraphs 92–93 of FASB ASC 605-35-25. Thus, it appears that the distinction made by the company conforms to generally accepted accounting principles.

[Amended; Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.10 Payments for Landfill Rights

Inquiry—A construction contractor pays for rights allowing the contractor to extract a specified volume of landfill from a third party’s property for a period of three years. How should the payment for landfill rights be classified in the contractor’s balance sheet?

Reply—Until the landfill is extracted, the contractor should classify the payment for landfill rights as a deferred charge. The portion of the landfill payment related to the volume of landfill extracted should be reclassified as project costs. A deferred charge remaining at the termination of the agreement should be written off as an expense.

.16 Presentation of Boxed Investment Positions in the Condensed Schedule of Investments of Nonregistered Investment Partnerships

Inquiry—Should long and short positions in the same security (*boxed positions*) be disclosed on a gross or net basis in the schedule of investments?

Reply—Although there may be a perfect economic hedge in boxed positions, the determination of which components of the boxed position would be required to be presented in the schedule of investments should be evaluated on a gross basis for the purposes of the 5 percent of net assets test as described in Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 946-210-50-6. To the extent that one (or both) of the components is (are) required to be disclosed, such component(s) should be disclosed on the schedule of investments because there may be market risk if one position is removed before the other or experiences settlement costs or losses upon disposition. In the event that only one of the positions is required to be disclosed, a nonregistered investment partnership is not precluded from disclosing both positions.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.17 Disclosure of Long and Short Positions

Inquiry—If a nonregistered investment partnership has a long position that exceeds 5 percent of net assets and a short position in the same issuer that is less than 5 percent of net assets, is the investment partnership required to

disclose both the long and short position in the condensed schedule of investments?

Reply—No. The guidance in FASB ASC 946-210-50-6 indicates that, in applying the 5 percent test to determine the investments to be disclosed in the condensed schedule of investments, total long and total short positions in any one issuer should be considered separately. Because the value of the long position exceeds 5 percent of net assets, disclosure of the long position is required; however, disclosure of the short position is not required because the short position does not exceed 5 percent of net assets. Although not required, a nonregistered investment partnership is not precluded from disclosing both positions

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.18 Disclosure of an Investment in an Issuer When One or More Securities or One or More Derivative Contracts Are Held—Nonregistered Investment Partnerships

Inquiry—A nonregistered investment partnership may hold one or more securities of the same issuer and one or more derivative contracts for which the underlying is a security of the same issuer. How should such securities and derivative contracts be presented in the condensed schedule of investments when applying FASB ASC 946-210-50-6?

Reply—When applying the guidance in FASB ASC 946-210-50-6, the disclosure on the condensed schedule of investments relating to securities should be consistent with the classification of the securities on the statement of assets and liabilities. It is important to note, however, that derivative contracts may be netted for statement of assets and liabilities presentation when the right of offset exists under FASB ASC 210-20 and FASB ASC 815-10, although the disclosures in the condensed schedule of investments should reflect all open contracts by their economic exposure (that is, long exposure derivative versus short exposure derivative). The netting concepts allowed by FASB ASC 210-20 and FASB ASC 815-10 are not considered for purposes of presentation in the condensed schedule of investments. Those securities (market value) and derivative contracts (appreciation or fair value) that are classified as period-end assets on a gross basis (for derivative contracts, regardless of whether they represent long or short exposures) should be aggregated. To the extent that the sum constitutes more than 5 percent of net assets, the positions should be disclosed in accordance with FASB ASC 946-210-50-6. The investment company should similarly sum all of the positions classified as liabilities on a gross basis and determine whether they exceed 5 percent of net assets. Separate computations should be performed for assets and liabilities. The following are illustrative examples of how to apply the disclosure guidelines. Positions representing gross liabilities are presented in parentheses.

Example 1:

- U.S. Treasury Bond (long)—4 percent of net assets
- U.S. Treasury Bond (short)—(1 percent) of net assets
- U.S. Treasury Bond futures contract—Appreciation equals 2 percent of net assets

In the preceding example, the investment company should present separately the long bond and the futures contract in the condensed schedule of investments because, in aggregate, the gross asset position for this issuer exceeds 5 percent of net assets. The short bond position, which represents the

only liability position associated with the issuer, is not required to be disclosed separately because the gross liability position is not more than 5 percent of net assets. This assessment for derivatives is made regardless of whether the exposure to the underlying is long or short. Assessments are based solely on the value of the derivative contract (that is, either a long or short position with depreciation or a negative fair value would be considered a liability and aggregated with other liabilities for the purpose of this test). The preparer may consider whether disclosure of all positions, including those 5 percent or less, would be appropriate or meaningful to the reader in the circumstances.

Example 2:

- Various bonds of X company (long)—4 percent of net assets
- Stock of X company (short)—(3 percent) of net assets
- Long exposure equity swap (X company is the underlying)—Fair value equals 2 percent of net assets
- Short exposure equity swap (X company is the underlying)—Fair value equals (1 percent) of net assets

The guidance in paragraphs 6(e)–6(f) of FASB ASC 946-210-50 relates to 5 percent disclosures for any derivative position. That guidance states, “In applying the 5-percent test, total long and total short positions in any one issuer shall be considered separately.” This guidance contemplates situations such as the preceding example 2 in which an investment company holds both a long and short exposure to the same derivative without closing out either derivative position. In such cases, the long and short exposure to the same derivative should be considered separately and should not be netted for the purpose of the 5 percent issuer exposure calculation. This is consistent with the approach for boxed security positions.

In the preceding example 2, the investment company should present separately the various long bond positions and the long exposure equity swap contract in the condensed schedule of investments because, in aggregate, the gross asset position for this issuer exceeds 5 percent of net assets. Because none of the long bond positions is individually more than 5 percent of net assets, FASB ASC 946-210-50-6(c)(2) permits the reporting of all the long bond positions of that issuer in the aggregate (that is, naming the issuer but showing a range of maturities, interest rates, and other applicable bond disclosures as opposed to individually listing out the details of each of the long bond positions), although the preparer may consider whether disclosure of individual positions provides more meaningful information to the reader of the financial statements. The short stock position and the short exposure equity swap contract are not required to be disclosed separately because the gross liability position is, in aggregate, not more than 5 percent of net assets. Again, the investment company is not precluded from disclosing separately the short stock position and the short exposure equity swap position if the disclosure of such positions is deemed to provide more meaningful information to the reader. The preparer should consider both the long exposure and short exposure in the equity swaps separately and should not net them for the purpose of the 5 percent exposure calculation if both equity swap contracts have not been closed out.

Example 3:

- Bond of X company (long)—3 percent of net assets
- Stock of X company (short)—(1 percent) of net assets
- Swap (X company is the underlying)—Fair value equals (2 percent) of net assets

In the preceding example 3, the investment company would not be required to present separately any of the positions in the condensed schedule of investments because the gross asset position of the issuer (represented by the bond) is not more than 5 percent of net assets, and the gross liability position (represented by the combined total values of the short stock position and the swap) is also not more than 5 percent of net assets.

Example 4:

- Bond of X company (long)—4 percent of net assets
- Stock of X company (short)—(2 percent) of net assets
- Swap (X company is the underlying)—Fair value equals 2 percent of net assets
- Swap (X company is the underlying)—Fair value equals (4 percent) of net assets

In the preceding example 4, the investment company should present separately each of the positions in the condensed schedule of investments because the gross asset position of the issuer (represented by the combined total values of the bond and the appreciated swap) and the gross liability position of the issuer (represented by the combined total values of the short stock position and the depreciated swap) are both greater than 5 percent of net assets.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC; Revised, October 2010, by the Planning Subcommittee of FinREC.]

.19 Information Required to Be Disclosed in Financial Statements When Comparative Financial Statements of Nonregistered Investment Partnerships Are Presented

Inquiry—When comparative financial statements of a nonregistered investment partnership are presented, should the schedule of investment be presented as of the end of each period presented, or only as of the most recent date of the statement of assets and liabilities? Additionally, when comparative financial statements of a nonregistered investment partnership are provided, should the financial highlights be presented for each period provided, or only for the most recent period?

Reply—FASB ASC 946 does not require comparative financial statements for nonregistered investment partnerships. However, if an entity elects to prepare comparative financial statements, the general guidance for the presentation of comparative financial statements as found in paragraphs 2 and 4 of FASB ASC 205-10-45 indicate the following:

In any one year it is ordinarily desirable that the statement of financial position, the income statement, and the statement of changes in equity be presented for one or more preceding years, as well as for the current year.

Notes to financial statements, explanations, and accountants' reports containing qualifications that appeared on the statements for the preceding years shall be repeated, or at least referred to, in the comparative statements to the extent that they continue to be of significance.

Because the schedule of investments would continue to be considered of significance relative to the statement of assets and liabilities for the prior year, the schedule of investments for the prior year should be included as a part of the comparative statements. Additionally, FASB ASC 946-205-45-1 states that "at a minimum, a condensed schedule of investments (as discussed in paragraphs 946-210-50-4 through 50-10) should be provided for each statement of

assets and liabilities.” Therefore, comparative schedules of investments are required to be presented when comparative statements of assets and liabilities are reported.

Consistent with the requirements of FASB ASC 205-10-45, comparative financial highlights should be presented when comparative statements of operations are provided because they would also be considered a significant disclosure for the prior periods of operation included in the financial statements.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.20 Presentation of Purchases and Sales/Maturities of Investments in the Statement of Cash Flows

Inquiry—Should the value of securities purchased by a nonregistered investment partnership during the period presented be reported in the statement of cash flows separately from the proceeds received on the sale/maturity of securities by the nonregistered investment partnership or may the nonregistered investment partnership report only the net difference?

Reply—In general, a nonregistered investment partnership should present purchases and sales/maturities of long-term investments (securities purchased with no stated maturity or with a stated maturity of greater than one year at the date of acquisition) on a gross basis in the statement of cash flows pursuant to FASB ASC 230, *Statement of Cash Flows*, although the nonregistered investment partnership may consider the provisions in FASB ASC 230-10-45-9 in determining whether or not certain purchases and sales/maturities qualify for net reporting. Purchases and sales/maturities of short-term investments (securities purchased with a stated remaining maturity of one year or less at the date of acquisition), however, may be presented on a net basis, as described in FASB ASC 230-10-45-18. Additionally, proceeds and costs reported for transactions in short positions are reflected separately from proceeds and costs associated with long positions.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.21 Recognition of Premium/Discount on Short Positions in Fixed-Income Securities

Inquiry—An investment company enters into short positions on various fixed-income securities, where the short sale price is at a premium or discount to the par value of the bond. The Audit and Accounting Guide *Investment Companies* discusses, in chapter 2, the requirement that an investment company amortize premiums/discounts on its investments, referring to long positions, but is silent as to whether similar accounting is required for short positions. The investment company currently recognizes all payments of coupon interest as interest expense on its short positions. Is the investment company also required under generally accepted accounting principles to amortize the premium and discount on the short position?

Reply—Yes. As when recognizing interest income on long positions, when recognizing interest expense on short positions, the investment company should recognize all economic elements of interest, including premium and discount.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.22 Presentation of Reverse Repurchase Agreements

Inquiry—An investment company enters into a *reverse repurchase agreement*, which is defined in chapter 3 of the Audit and Accounting Guide *Investment Companies* as “the sale of a security at a specified price with an agreement to purchase the same or substantially the same security from the same counterparty at a fixed or determinable price at a future date.” The investment company receives cash and initially records the amount payable as a liability. Should reverse repurchase agreements be presented in the financial statements of investment companies at the amount payable or at fair value?

Reply—Investment companies present their debt obligations at amounts payable. Because reverse repurchase agreements represent a fixed, determinable obligation of the investment company, such agreements should also be presented at amounts payable. A reverse repurchase agreement denominated in a currency that differs from the reporting currency should be translated at the current exchange rate.

.23 Accounting Treatment of Offering Costs Incurred by Investment Partnerships

Inquiry—According to FASB ASC 946-20-25-6 and FASB ASC 946-20-35-5, all open-end registered investment companies and those closed-end registered investment companies with a continuous offering period should defer offering costs and amortize them to expense over 12 months on a straight-line basis. However, FASB ASC 946-20-25 does not indicate whether an investment partnership should apply the same treatment. Should an investment partnership that continually offers its interests also defer and amortize such costs over 12 months?

Reply—Yes, an investment partnership that continually offers its interests should defer offering costs incurred prior to the commencement of operations and then amortize them to expense over the period that it continually offers its interests, up to a maximum of 12 months. The straight-line method of amortization should generally be used. If the offering period terminates earlier than expected, the remaining deferred balance should be charged to expense.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.24 Meaning of “Continually Offer Interests”

Inquiry—How should an investment partnership determine if it continually offers its interests?

Reply—An investment partnership is deemed to continually offer its interests if an eligible, new investor may enter into an agreement to purchase an interest in the partnership on any business day or on a series of specified business days over a continuous period of time. A new investor is one that does not already own any interest in the investment partnership at the time of purchase.

Some investment partnerships may offer their interests at a single point in time and require new investors to commit to providing capital contributions over a period of time. As interests are not available for purchase over a continuous period, such investment partnerships would not be deemed to have a continuous offering period.

.25 Considerations in Evaluating Whether Certain Liabilities Constitute “Debt” for Purposes of Assessing Whether an Investment Company Must Present a Statement of Cash Flows

Inquiry—FASB ASC 230-10-15-4 exempts investment companies (both registered and unregistered) from the requirement to provide a statement of cash flows, if all of the following conditions are met:

- a. During the period, substantially all of the entity’s investments were carried at fair value and classified as level 1 or level 2 measurements in accordance with FASB ASC 820.^[1]
- b. *The enterprise had little or no debt, based on the average debt outstanding² during the period, in relation to average total assets. (emphasis added)*
- c. The enterprise provides a statement of changes in net assets.³

Because FASB ASC 230-10-15-4(c)(3) specifically states that covered options written would generally not be considered debt for purposes of determining whether an investment company meets these conditions, does that imply that *uncovered options* and *short sales of securities and reverse repos* must, by inference, be treated as debt? If not, under what circumstances may they be excluded from *debt* in determining whether the investment company must present a statement of cash flows?

Reply—Although presented in the liabilities section of the statement of assets and liabilities, options sold/written (whether covered or uncovered), short sales of securities, and other liabilities recorded as a result of investment practices are not necessarily debt; rather, their classification depends on the nature of the activity. Certain transactions (for example, securities lending, mortgage dollar rolls, or short sale transactions) may have a practice of being entered into solely for operating purposes (similarly to unsettled purchases of securities) or as an investing strategy (similarly to covered options written), and the investment company either retains the proceeds in cash accounts or uses them to invest in securities that are cash equivalents under FASB ASC 230. In such cases, the proceeds from the transaction would not be considered debt for purposes of assessing whether the conditions in FASB ASC 230 are met.

[Issue Date: May 2008; Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC; Revised, October 2013, to reflect conforming changes necessary due to the issuance of FASB ASU No. 2012-04.]

^[1] [Footnote deleted, October 2013, to reflect conforming changes necessary due to the issuance of FASB ASU No. 2012-04.]

² Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 230-10-15-4(c)(3) states, “For the purpose of determining average debt outstanding, obligations resulting from redemptions of shares by the entity from unsettled purchases of securities or similar assets, or from covered options written generally may be excluded. However, any extension of credit by the seller that is not in accordance with standard industry practices for redeeming shares or for settling purchases of investments shall be included in average debt outstanding.”

³ FASB ASC 946-205-45-5 states, “For investment partnerships, the statement of changes in net assets may be combined with the statement of changes in partners’ capital if the information in paragraph 946-205-45-3 is presented.”

.26 Additional Guidance on Determinants of Net Versus Gross Presentation of Security Purchases and Sales/Maturities in the Statement of Cash Flows of a Nonregistered Investment Company

Inquiry—Under what circumstances, if any, may purchases and sales/maturities of securities presented in the operating section of the statement of cash flows of a nonregistered investment company be shown on a *net*, rather than a *gross*, basis?

Reply—Chapter 7 of the AICPA Audit and Accounting Guide *Investment Companies* states:

Cash flows from operating activities should include the fund's investing activities. Cash flows from operating activities include (***bold italic*** added for emphasis)—

- a. Interest and dividends received.
- b. Operating expenses paid.
- c. ***Purchases of long-term investments*** (at cost).
- d. ***Sales of long-term investments*** (proceeds).
- e. ***Net sales or purchases of short-term investments***.
- f. Cash flows for other types of investing activities related to changes in margin accounts and collateral status, such as written options, financial futures contracts, securities lending, and so forth.

Section 6910.20 provides the following guidance:

In general, a nonregistered investment partnership should present purchases and sales/maturities of long-term investments (securities purchased with no stated maturity or with a stated maturity of greater than one year at the date of acquisition) on a gross basis in the statement of cash flows pursuant to FASB ASC 230, *Statement of Cash Flows*, although the nonregistered investment partnership may consider the provisions in FASB ASC 230-10-45-9 in determining whether or not certain purchases and sales/maturities qualify for net reporting. Purchases and sales/maturities of short-term investments (securities purchased with a stated remaining maturity of one year or less at the date of acquisition), however, may be presented on a net basis, as described in FASB ASC 230-10-45-18. Additionally, proceeds and costs reported for transactions in short positions are reflected separately from proceeds and costs associated with long positions.

One of the requirements of FASB ASC 230-10-45-9 is that the original maturity of assets and liabilities qualifying for net reporting is 3 months or less. However, FASB ASC 230-10-45-18 permits “banks, brokers and dealers in securities, and other entities [that] carry securities and other assets in a trading account” to classify cash receipts and cash payments from such activities as operating cash flows, while cash flows from transactions in “available for sale” securities are reported gross as investing activities.⁴ In other industries, operating cash flows relating to trading account securities typically are reported on a net basis.

If a nonregistered investment company presents a statement of cash flows, the investment company's trading style, investment objectives stated in its offering memorandum, and portfolio turnover should be the primary determinants of net versus gross reporting. Where the investment company's overall

⁴ Refer to paragraphs 11 and 18–20 of FASB ASC 230-10-45 and FASB ASC 310-10-45-11 for additional guidance.

activities comport with *trading*, as discussed in FASB ASC 230 and FASB ASC 320, *Investments—Debt and Equity Securities*,⁵ netting is permissible; otherwise, gross reporting of purchases and sales/maturities is required.

Regardless of whether net or gross reporting is appropriate based on the stated criteria, an entity should separately report its activity related to long positions from activity related to short positions; that is, changes/activity in account balances reported as assets should not be netted against changes/activity in account balances reported as liabilities.

[Issue Date: May 2008; Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.27 Treatment of Deferred Fees

Inquiry—The governing documents of an offshore fund provide that the investment adviser may elect to defer payment of its management fee, incentive fee, or both. Based on the documents, the deferred fees that are payable to the investment adviser do not take the form of a legal capital account and are settled exclusively in cash. Under this arrangement, the fund retains the fee amount and is obligated to pay the investment adviser the deferred fees at a later date adjusted for the fund's rate of return (whether positive or negative). How should the deferred fees and the appreciation or depreciation on the deferred fees be presented on the statement of assets and liabilities, on the statement of operations, and on the financial highlights? What additional disclosures, if any, should be included in the financial statements or the notes to the financial statements?

Reply—In accordance with guidance from paragraph 35 of FASB Statement of Financial Accounting Concepts No. 6, *Elements of Financial Statements*, the fund should record the cumulative deferred fees as a liability. The indexing of this liability to the fund's rate of return represents a hybrid instrument that has a host debt instrument with an embedded derivative, which has attributes of a total return contract. Although FASB ASC 815-15-25-1 and FASB ASC 815-15-55-190 require the embedded total return contract to be bifurcated from the host debt instrument, the Securities and Exchange Commission staff has previously indicated⁶ that the bifurcation requirements of FASB ASC 815 do not extend beyond measurement to financial statement presentation, if the embedded derivative and host debt instrument, together, represent the principal and interest obligations of a debt instrument. While the fund should fair value the embedded return component of the deferral arrangement according to the guidance from FASB ASC 815-10-25-1, FASB ASC 815-10-30-1, and FASB ASC 815-10-35-1, generally, the fair value of such return component would be the same as the appreciated or depreciated return of the fund because (1) the fund fair values all of its investments, whether assets or liabilities, which generally represent substantially all of its net assets, and (2)

⁵ FASB ASC glossary defines *trading securities* as follows:

Securities that are bought and held principally for the purpose of selling them in the near term and therefore held for only a short period of time. Trading generally reflects active and frequent buying and selling, and trading securities are generally used with the objective of generating profits on short-term differences in price.

Although investment companies do not apply FASB ASC 320 and, therefore, do not normally categorize securities as trading, available for sale, or held to maturity, the concepts of whether the securities are held for trading purposes and whether the related cash flows would be classified as operating cash flows under paragraphs 11 and 18–20 of FASB ASC 230-10-45 and FASB ASC 310-10-45-11 are relevant in determining whether cash flows from purchases and sales of securities should be presented gross or net by investment companies.

⁶ Twenty-Eighth Annual National Conference on Current SEC Developments December 4–6, 2000. Remarks by E. Michael Pierce.

if the deferred fee liability was transferred, the transfer would likely be transacted at the current net asset value.⁷ The deferred fees and the embedded total return contracts associated with deferred fees that are at an appreciated or depreciated position as of the reporting date may be presented as one amount titled “Deferred incentive fees payable” on the statement of assets and liabilities.

FASB ASC 946-225-45-1 states, in part, “The objective of the statement of operations is to present the increase or decrease in net assets resulting from all of the company’s investment activities, by reporting investment income from dividends, interest, and other income less expenses, the amounts of realized gains or losses from investment and foreign currency transactions, and changes in unrealized appreciation or depreciation of investments and foreign-currency-denominated assets and liabilities for the period.” Because the fund directly earns or incurs the income, expenses, net realized gains or losses, and unrealized appreciation or depreciation on the deferred fee retained in the fund, such amounts should be presented within their respective line items in the investment company’s statement of operations. The net change in unrealized appreciation or depreciation on the total return contracts associated with the deferred fees should be reported in earnings; that is, reflected as an expense (appreciation of deferred fees) or negative expense (depreciation of deferred fees) of the fund rather than as an allocation of earnings or losses and, following the guidance from FASB ASC 850, *Related Party Disclosures*, should be presented separately from the current period management or incentive fee.

FASB ASC 946-205-50-7 states, in part, “the caption descriptions in the per-share data shall be the same captions used in the statement of operations . . . to allow the reader to determine which components of operations are included in or excluded from various per-share data.” FASB ASC 946-205-50-14 adds “generally, the determination of expenses for computing those ratios shall follow the presentation of expenses in the fund’s statement of operations.” The per share information, net investment income ratio, and net expense ratio included in the financial highlights should reflect the amounts presented on the statement of operations including the adjustment associated with the deferred fee amount. In order to reflect the effect of the adjustment on the fund’s expense ratio, the fund may also present an expense ratio that excludes the amount of deferred fee expense or negative expense reported in the statement of operations. Consistent with guidance from FASB ASC 946, *Financial Services—Investment Companies*, the fund should disclose the nature of the deferred fee arrangement, including the priority of claim in the event of liquidation, the current period and cumulative amounts deferred, the cumulative earnings or losses on the deferral, the terms of payment, the date that the deferral payments commence (or the next payment date), and the manner in which the deferral will be invested.

The following is an illustration of a deferred incentive fee presentation in the financial statements and the related disclosures:

⁷ All concepts of FASB ASC 820, *Fair Value Measurement*, should be considered.

Statement of Assets and Liabilities**Assets**

Cash and cash equivalents	\$206,000
Investments, at fair value	166,585,000
Total assets	<u>\$166,791,000</u>

Liabilities

Management fee payable	\$400,000
Redemptions payable	1,000,000
Accrued expenses	100,000
Deferred incentive fees payable	4,800,000
Total liabilities	<u>6,300,000</u>
Net assets	<u>\$160,491,000</u>

Statement of Operations**Investment income**

Interest income	\$5,576,000
Dividend income	1,766,000
Total investment income	<u>\$7,342,000</u>

Expenses

Incentive fee	\$2,680,000
Management fee	1,831,000
Change in net appreciation on deferred incentive fees	650,000
Administration fee	60,000
Professional fees and other	75,000
Total expenses	<u>5,296,000</u>
Net investment income	<u>\$2,046,000</u>

Realized and unrealized gains (losses) from investment activities

Net realized gain on securities	\$2,773,000
Net realized gain on swap and forward contracts	509,000
Net change in unrealized appreciation on securities	1,515,000
Net change in unrealized appreciation on swap and forward contracts	852,000
Net realized and unrealized gain from investment activities	<u>\$5,649,000</u>

Net increase in net assets resulting from operations \$7,695,000

Notes to Financial Statements**Note X—Investment Management and Incentive Fees**

Pursuant to an investment advisory agreement, the Fund pays to the Adviser a quarterly management fee of $\frac{1}{4}$ of 1 percent (1 percent per annum) of the net assets of the Fund on the last day of each quarter. The Adviser also is entitled to an annual incentive fee equal to 20 percent of the net profits attributable to each series of common shares, subject to a loss carry forward.

If there is a net loss for the year, the incentive fee will not apply to future years until such net loss has been recovered, adjusted for redemptions.

The Adviser may elect to defer receipt of all or a portion of the management or incentive fees earned for a particular fiscal year, and such amounts will be indexed to the Fund's return. In the event of liquidation of the Fund, any deferred amount, as adjusted for the appreciation or depreciation resulting from indexing, the deferred fee to the Fund's return has a priority claim over the interests of the equity holders of the Fund.

For the [year/period] ended December 31, 20XX, payment of 50 percent of the incentive fee incurred by the Fund was deferred for X years. Cumulative deferred incentive fees as of December 31, 20XX totaled \$3,850,000, and cumulative net appreciation on such amounts totaled \$950,000. The net change in appreciation or depreciation of deferred incentive fees is recorded on a separate line item under "Expenses" within the statement of operations. Distributions of 20XX and prior year deferred incentive fees are scheduled for the period from [DATE RANGE]. During the year ended December 31, 20XX, the distribution of previously deferred incentive fees amounted to \$500,000.

The following is an example disclosure of a roll forward of deferred incentive fees payable, which is a best practice disclosure.

The deferred incentive fees payable balance as of December 31, 20XX is comprised of the following:

Deferred incentive fees payable at January 1, 20XX	\$3,310,000
Appreciation on deferred incentive fees for the year ended December 31, 20XX	650,000
Incentive fees deferred for the year ended December 31, 20XX	1,340,000
Deferred incentive fees paid for the year ended December 31, 20XX	(500,000)
Deferred incentive fees payable at December 31, 20XX	<u>\$4,800,000</u>

Note X—Financial Highlights

The following represents the per share information, ratios to average net assets, and other supplemental information for the year ended December 31, 20XX:

	<i>Class A Initial series</i>	<i>Class B Initial series</i>
Per share operating performance:		
Beginning net asset value	\$1,130.35	\$1,123.80
Income from investment operations:		
Net investment income	11.01	6.76
Net realized and unrealized gain from investment activities	141.50	145.64
Total income from operations	<u>152.51</u>	<u>152.40</u>
Ending net asset value	<u>\$1,282.86</u>	<u>\$1,276.20</u>
Ratios to average net assets:		
Expenses other than incentive fee	1.43%	1.46%
Incentive fee	<u>1.46</u>	<u>1.49</u>
Total expenses	2.89	2.95

	<i>Class A</i> <i>Initial</i> <i>series</i>	<i>Class B</i> <i>Initial</i> <i>series</i>
Change in net appreciation on deferred incentive fees	(0.40)	(0.43)
Total expense excluding change in net appreciation on deferred incentive fees	2.49%	2.52%
Net investment income	1.12%	1.09%
Total return prior to incentive fee	17.07%	16.93%
Incentive fee	(3.58)	(3.37)
Total return after incentive fee	13.49%	13.56%

The per share operating performance and total return are calculated for the initial series of each share class. The ratios to average net assets are calculated for each class taken as a whole. An individual investor's per share operating performance, total return, and ratios to average net assets may vary from these per share amounts and ratios based on participation in new issues and different management fee and incentive fee arrangements and the timing and amount of capital transactions.

[Issue Date: May 2008; Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.28 Reporting Financial Highlights, Net Asset Value (NAV) Per Share, Shares Outstanding, and Share Transactions When Investors in Unitized Nonregistered Funds Are Issued Individual Classes or Series of Shares

Inquiry—Some unitized nonregistered funds issue a separate series of shares to each individual investor in the fund, which remains outstanding so long as the investor maintains its investment in the fund and is not closed until the investor fully redeems. These series may be issued within multiple classes of shares with each series within a class bearing the same economic characteristics. The shares are legally issued and outstanding until redemption (that is, they are not notional interests), but will not be converted or otherwise consolidated into an identifiable “permanent” series of shares in a “series roll-up.”⁸ Essentially, these unitized funds apply partnership accounting.

How should financial highlights (per share data, ratios, and total return) be presented in this situation, and how should each series of shares outstanding at period-end and share transactions during the period be disclosed in the financial statements?

Reply—

Presentation of Financial Highlights

The issuance of a separate series of shares to each individual investor is done for operational purposes because this enables a fund to allocate profit and loss to each investor in the same manner as a limited partnership allocates profit and loss to an individual partner's capital account. The definition of *nonregistered investment partnership—financial highlights* in the FASB ASC glossary—states, in part, that for unitized funds, “permanent series of a class of share shall be the basis for which that share's financial highlights are

⁸ A series roll up typically occurs at the end of the year when a temporary series of shares has increased above its high watermark (for example, the highest level in value a series has achieved, adjusted for subscriptions and redemptions) at which time the outstanding shares of a temporary series of shares are converted (or rolled up) into the permanent series of shares.

determined and presented.” When a separate series of shares is issued to each individual investor and remains outstanding until the investor fully redeems, reporting the financial highlights for each outstanding series of shares could result in financial highlights presented for up to 500 investors and would be the substantive equivalent of presenting the financial highlights in a limited partnership for each limited partner.

The financial highlights should be presented at the aggregate level for the entire permanent series of shares from which the individual series of shares has been issued. Because the fund operates like a partnership, the financial highlights should include only those financial highlights applicable to a partnership, which are the ratios to average net assets and total return, but not per share data.

When a separate series of shares is issued to each individual investor and remains outstanding until the investor fully redeems, the permanent series of shares will be the fund as a whole, excluding managing investor interests, if the shares otherwise have substantially similar terms. There are situations when a fund will issue multiple classes of shares, which contain multiple series of shares, due to differing fee arrangements or restrictions affecting an investor’s ability to participate in the profits and losses generated by “new issue” securities. When a fund issues multiple classes of shares, and in each class of shares, a series of shares is issued to each individual investor and remains outstanding until the investor fully redeems, financial highlights should be presented at the aggregate level for each permanent class of shares from which the individual series of shares have been issued. For example, if a fund has outstanding, at year-end, Class A shares, Series 1–40, which have a 1 percent management fee; Class B shares Series 1–300, which have a 2 percent management fee; and Class C shares, which are only held by the managing investor, the fund would present financial highlights information for Class A, taken as a whole and Class B, taken as a whole. There is no requirement to present financial highlights for Class C because FASB ASC 946-205-50-4 requires financial highlights to be presented only for nonmanaging investors.

It would be acceptable for a fund to present supplemental financial highlights data for a single series of shares, which the fund determines to be “representative.” Such financial highlights may be labeled as representing supplemental information and may only be presented in addition to those financial highlights that are required. Factors to consider when determining the representative series of shares include the following:

1. The series of shares was outstanding for the entire fiscal period (or, if all units of a series of shares outstanding at the beginning of the fiscal period were redeemed during the period, the series of shares at period-end outstanding for the longest period of time).
2. The fees and other offering terms of the series of shares most closely conform to those which may be described in the fund’s offering documents.
3. The series of shares represent the largest ownership interest in the fund.

The basis of presentation of the financial highlights and the criteria used to determine the most representative series of shares should be disclosed in a note to those highlights and should be consistently applied.

If appropriate, a fund may present other supplemental information if determined to be informative and not misleading.

Presentation of Shares Outstanding and Share Transactions

FASB ASC 946-210-45-4 indicates that net asset value per share and shares outstanding should be reported for each class. Because a fund which issues a separate series of shares to each investor operates like a partnership, presenting the net asset value per share and the shares outstanding for each series of shares would be the substantive equivalent of presenting each partner's capital balance in the financial statements of a partnership, which is not required by FASB ASC 946 for nonunitized partnership interests. Chapter 7 of the guide discusses the requirement for the unitized funds to disclose units of capital, including the title and par value of each class of shares, and the number of shares authorized, outstanding, and dollar amount of such shares. FASB ASC 946-505-50-2 requires disclosure of the number and value of shares sold, the number and value of shares issued in reinvestment of distributions, the number and cost of shares reacquired, and the net change in shares. For funds which issue a separate series of shares to each investor, such funds should satisfy the disclosure requirements in FASB ASC 946-210-45-4 and 946-505-50-2 by presenting such disclosures on an aggregate share basis. For funds which issue multiple classes of shares which contain multiple series of shares, such disclosure requirements should be presented at the aggregate level for each permanent class of shares from which the individual series of shares have been issued.

EXAMPLE

A fund issues Class A and Class B nonvoting shares to investors and, within each class, a separate series of shares is issued to each individual investor. Class A shares have a 1 percent management fee and a 20 percent incentive fee, while Class B shares are issued to related party investors and, therefore, are not charged a management fee or an incentive fee. Class C voting shares are management shares and do not participate in the profits or losses of the fund. As of December 31, 20X7, there are 15,100 total shares outstanding totaling \$1,517,600. The following shows such amounts outstanding as of December 31, 20X7 by class and series:

Class A Series 1–5,000 shares outstanding, NAV \$500,000

Class A Series 2–7,500 shares outstanding, NAV \$765,000

Class B Series 1–2,500 shares outstanding, NAV \$252,500

Class C–100 shares outstanding, NAV \$100

In the prior year, as of December 31, 20X6, there were 10,100 total shares outstanding totaling \$970,100. The following shows such amounts outstanding as of December 31, 20X6 by class and series:

Class A Series 1–6,000 shares outstanding, NAV \$588,000

Class B Series 1–3,000 shares outstanding, NAV \$288,000

Class B Series 2–1,000 shares outstanding, NAV \$94,000

Class C–100 shares outstanding, NAV \$100

Example Statement of Assets and Liabilities**Statement of Assets and Liabilities
December 31, 20X7****Assets**

Cash and cash equivalents	\$100,100
Investments, at fair value	<u>1,550,000</u>
Total assets	<u>\$1,650,100</u>

Liabilities

Redemptions payable	94,000
Management fees payable	4,000
Incentive fee payable	3,000
Accrued expenses	31,500
Total liabilities	<u>132,500</u>
Net assets (based on 12,500 Class A shares, 2,500 Class B shares, and 100 Class C shares outstanding)	<u>\$1,517,600</u>

Example Footnote Disclosures**Capital Share Transactions**

As of December 31, 20X7, 5,000,000 shares of capital stock were authorized. Class A and Class B shares have \$0.01 par value, and Class C shares have \$1.00 par value. Transactions in capital stock were as follows:

Class A	<i>Shares</i>		<i>Amount</i>	
	<i>20X7</i>	<i>20X6</i>	<i>20X7</i>	<i>20X6</i>
Shares sold	7,500	6,000	\$750,000	\$600,000
Shares redeemed	(1,000)	—	\$(99,500)	—
Net increase	<u>6,500</u>	<u>6,000</u>	<u>\$650,500</u>	<u>\$600,000</u>

Shares redeemed	—	—	—	—
Net increase	<u>—</u>	<u>100</u>	<u>—</u>	<u>\$100</u>

Financial Highlights

The ratios to average net assets and total return are presented below for each class taken as a whole, excluding managing shareholder interests, for the year ended December 31, 20X7. The ratios and total return are not annualized. The computation of similar financial information for other participating shareholders may vary based on the timing of their respective capital transactions.

Annual ratios to average net assets and total return for the year ended December 31, 20X7 are as follows:

	<i>Class A</i>	<i>Class B</i>
Ratios to average net assets:		
Expenses other than incentive fee	2.26%	1.26%
Incentive fee	0.31%	0.00%
Total expenses	<u>2.57%</u>	<u>1.26%</u>
Net investment income	<u>0.93%</u>	<u>1.93%</u>
Total return prior to incentive fee	3.48%	5.02 %
Incentive fee	<u>(0.40)%</u>	<u>(0.00)%</u>
Total return after incentive fee	<u>3.08%</u>	<u>5.02%</u>

[Issue Date: May 2008; Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.29 Allocation of Unrealized Gain (Loss), Recognition of Carried Interest, and Clawback Obligations

Inquiry—The governing documents of some nonregistered investment partnerships (as defined in chapter 7 of the AICPA Audit and Accounting Guide *Investment Companies*), may contain provisions which do not allow allocations of unrealized gains or losses, or do not require the recognition of carried interest (also referred to as *carry*, *incentive*, or *performance fees and allocations*), and clawback obligations (also referred to as *lookback*, *negative carried interest*, or *general partner⁹ giveback*) until a specified date or time (for example, at the time of the partnership's liquidation or termination), or until the occurrence of a specific event (such as the actual disposition of an investment). Often, in these cases, the partnership's investments are either not marketable or are of such limited liquidity that interim valuations are highly subjective, and the intent of the provision is to delay the general partner's receipt of incentive allocations in cash until the gains can be measured objectively. In preparing financial statements of an investment partnership in accordance with U.S. generally accepted accounting principles, in which capital is reported by investor class, how should cumulative unrealized gains (losses), carried interest, and clawback be reflected in the equity balances of each class of shareholder or partner at the balance sheet date? In particular, should cumulative period-end unrealized gains and losses, nonetheless, be allocated as if realized in accordance with the partnership's governing documents prior to the date, time, or event specified in the partnership agreement?

⁹ Various terms may be used by different legal structures as the equivalents of *general partner* and *limited partner* (for example, *managing member* and *member* for limited liability companies). For convenience, the terms *partnership*, *general partner*, and *limited partner* are used throughout, but are intended to refer to any equivalent structure.

Reply—If a nonregistered investment partnership reports capital by investor class, cumulative unrealized gains (losses), carried interest, and clawback provisions would be reflected in the equity balances of each class of shareholder or partner at the balance sheet date, as if the investment company had realized all assets and settled all liabilities at the fair values reported in the financial statements, and allocated all gains and losses and distributed the net assets to each class of shareholder or partner at the reporting date consistent with the provisions of the partnership’s governing documents. Further discussion of the presentation of each item follows.

Certain partnerships record an expense for fees (including incentive fees) due a general partner, whereas others allocate net income from limited partner capital accounts to the general partner capital account. These amounts could either be considered a disproportionate income allocation or a compensation arrangement, and the accounting should conform to the structure of the partnership agreement, with the financial statement disclosures set forth in FASB ASC 946.

A basic premise for the preparation and presentation of the financial statements of an investment company is to reflect each class of shareholders’ or partners’ interest in the net assets of the reporting entity as of the reporting date. Another objective is to present total return for nonmanaging investor classes after incentive allocations and fees, as expressed in FASB ASC 946.

Other accounting literature related to the presentation of data similar to total return is consistent with FASB ASC 946. FASB ASC 260, *Earnings per Share*, refers to allocating earnings or undistributed earnings for a period to participating securities “as if all of the earnings for the period had been distributed.”

Although this guidance does not relate specifically to the presentation of capital accounts, measuring period-end capital balances for those classes under the same methodology appears consistent with this guidance. Accordingly, if an entity reports capital by investor class, cumulative unrealized gains (losses), carried interest, and clawback provisions would be reflected in the equity balances of each class of shareholder or partner at the balance sheet date, as if the investment company had realized all assets and settled all liabilities at the fair values reported in the financial statements, and allocated all gains and losses and distributed the net assets to each class of shareholder or partner at the reporting date consistent with the provisions of the partnership’s governing documents. Further discussion of the presentation of each item follows.

Cumulative Unrealized Gains (Losses)

Cumulative unrealized gains (losses) would be included in the ending balances of each class of shareholders’ or partners’ interest in the reporting entity at the reporting date, and the changes in such amounts would be reported in the changes in net asset value and partners’ capital for the reporting period.

Carried Interest

The carried interest generally is due to the investment manager, an affiliated entity, or both, and is either in the form of a fee (usually for offshore funds) or as an allocation from the limited partners’ capital accounts, pro rata, to the general partner’s capital account (usually for domestic funds). Although many variations exist, the investment manager is often entitled to receive its carry on a “deal-by-deal” basis. On this basis, as individual investments are sold, the investment proceeds are allocated based on a specific methodology defined in the governing documents to determine the amount of carry, if any, to which the investment manager is entitled.

In presenting each class of shareholders' or partners' interest in the net assets as of the reporting date, the financial statements would consider the carry formula as if the investment company had realized all assets and settled all liabilities at their reported fair value, and allocated all gains and losses and distributed the net assets to each class of shareholder or partner at the reporting date.

Clawback

Although all classes of shareholder or partner may be subject to clawback provisions in the governing documents, a clawback most frequently involves an obligation on the part of the investment manager to return previously received incentive allocations to the investment fund due to subsequent losses. Such clawback amounts, when paid, are typically distributed to other investors.

Consistent with the previously discussed principle to reflect each class of shareholders' or partners' interest in the net assets of the reporting entity as of the reporting date, the impact of a clawback would be calculated as of each reporting date under the methodology specified in the fund's governing documents.

Consistent with FASB ASC 310-10-45-14, such an obligation would not be recognized as an asset (receivable) in the entity's financial statements unless substantial evidence exists of ability and intent to pay within a reasonably short period of time. Rather, in most instances, the obligation would be reflected as a deduction from the general partner's capital account.

The specific circumstances, including whether the clawback represents a legal obligation to return or contribute funds to the reporting entity, require consideration before determining whether a clawback, resulting in a negative general partner capital balance (that is, contra-equity), is recognized in the financial statements. A careful reading of the governing documents ordinarily is required. Additionally, it may not be appropriate to reflect a negative general partner capital balance (and a corresponding increase to limited partner capital balances) if the general partner does not have the financial resources to make good on its obligation. It may be helpful to consult with the entity's legal counsel for clarification before recording a negative general partner capital balance.

Even if not recognized within the capital accounts, at a minimum, it would be appropriate to disclose the existence of a clawback in the footnotes to the financial statements because in almost all cases, the existence of the clawback would modify the manner in which future distributions are made.

[Issue Date: January 2009; Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.30 Disclosure Requirements of Investments for Nonregistered Investment Partnerships When Their Interest in an Investee Fund Constitutes Less Than 5 Percent of the Nonregistered Investment Partnership's Net Assets

Inquiry—Nonregistered investment partnerships (as defined in the AICPA Audit and Accounting Guide *Investment Companies* [the guide]) are subject to the disclosure requirements of FASB ASC 946-210-50-6 related to investments in the partnership's portfolio. These disclosures require reporting investment partnerships to individually disclose an investment by name, type, and so on if the reporting investment partnership's investment constitutes more than 5 percent of its net assets. In accordance with paragraphs 8–9 of FASB ASC 946-210-50, nonregistered investment partnerships that own interests in another investment partnership¹⁰ (investee fund) are required to disclose the

¹⁰ Such investment partnerships include, but are not limited to, investment partnerships, funds of funds, special purpose vehicles, disregarded entities, and limited liability companies.

investment partnership's proportional share of any underlying investment owned (either directly or through an investee fund) in any issuer that exceeds 5 percent of the reporting investment partnership's net assets at the reporting date. If the nonregistered investment partnership owns an interest in an investee fund that constitutes less than 5 percent of the nonregistered investment partnership's net assets, should the reporting investment partnership apply the guidance in paragraphs 8–9 of FASB ASC 946-210-50?

Reply—Yes. Even though the amount of the investment in the investee fund does not exceed 5 percent of the reporting investment partnership's net assets, the reporting investment partnership's proportional share of the investee fund's investments in an individual issuer may nonetheless exceed 5 percent of the reporting investment partnership's net assets because an investee fund may have issued debt (recourse or nonrecourse) to purchase investments or may have significant short positions or other liabilities. Paragraphs 8–9 of FASB ASC 946-210-50 do not establish any minimum investment size below which a reporting investment company need not determine its proportional share of an investment owned by an individual investee. Rather, paragraph 9 states that if such proportional share “of *any* investment owned by any individual investee exceeds 5 percent of the reporting investment company's net assets at the reporting date, each such investment shall be named and categorized” (*emphasis added*). The intent of the disclosure of positions exceeding 5 percent of net assets, as documented in paragraph .18 of Statement of Position 95-2, *Financial Reporting by Nonpublic Investment Partnerships* (AICPA, *Technical Practice Aids*, ACC. sec. 10,660 par. .18), in which this guidance originally appears, and paragraph 7.17 of the guide, is to “enable users to make their decisions focusing on the risk and opportunities associated with the type of investment, a geographical area, and industry by investee.” In situations when the information about the investee fund's portfolio is not available, that fact shall be disclosed, which is consistent with the guidance in FASB ASC 946-210-50-10.

[Issue Date: July 2009.]

.31 The Nonregistered Investment Partnership's Method for Calculating Its Proportional Share of Any Investments Owned by an Investee Fund in Applying the “5 Percent Test” Described in TIS Section 6910.30

Inquiry—What method should a nonregistered reporting investment partnership (as defined in the AICPA Audit and Accounting Guide *Investment Companies*) use to calculate its proportional share of any investments owned by an investee fund in applying the “5 percent test” described in TIS section 6910.30, “Disclosure Requirements of Investments for Nonregistered Investment Partnerships When Their Interest in an Investee Fund Constitutes Less Than 5 Percent of the Nonregistered Investment Partnership's Net Assets,” and where should the disclosure be located within the financial statements?

Reply—The reporting investment partnership should calculate its proportional share of any investments owned by the investee fund as its percentage ownership of the investee fund. Additionally, consistent with the provisions related to direct investments, indirect long and short positions of the same issuer held by the investee fund should not be netted. The disclosure of investments in issuers exceeding 5 percent of reporting investment partnership net assets should be made either on the face of the (condensed) schedule of investments or within the financial statement footnotes.

[Issue Date: July 2009.]

.32 Additional Financial Statement Disclosures for Nonregistered Investment Partnerships When the Partnership Has Provided Guarantees Related to the Investee Fund's Debt

Inquiry—What additional disclosures should a nonregistered reporting investment partnership (as defined in the AICPA Audit and Accounting Guide *Investment Companies*) consider within the financial statements when the reporting investment partnership has provided guarantees related to the investee fund's debt (also see TIS section 6910.30)?

Reply—In addition to considering the recognition provisions described in FASB ASC 460-10-50, the reporting investment partnership should further disclose any guarantees it has provided on investee fund debt even though the risk of loss may be remote. These disclosure requirements are described in FASB ASC 460-10-50 and FASB ASC 946-20-50 and include the following:

- Loss contingencies, such as guarantees of indebtedness of others, including indirect guarantees of indebtedness of others and the nature and amount of the guarantee
- Guarantor's obligation, including the nature of the guarantee, the approximate term of the guarantee, the primary reasons for providing the guarantees, and the events or circumstances that would require the guarantor to perform under the guarantee

[Issue Date: July 2009; Revised, April 2014, to reflect conforming changes necessary due to revisions to FASB ASC.]

.33 Certain Financial Reporting, Disclosure, Regulatory, and Tax Considerations When Preparing Financial Statements of Investment Companies Involved in a Business Combination

Inquiry—FASB ASC 805-10-50 requires the following, among other things, when a transaction or other event meets the definition of a *business combination*:

- The identification of the acquiree
- Recognizing and measuring identifiable assets acquired and liabilities assumed, at the acquisition date, generally at their fair values
- Disclosure, by the acquirer, of information that enables users of its financial statements to evaluate the nature and financial effect of a business combination that occurs during the current reporting period

What are some of the financial reporting, disclosure, regulatory, and tax guidance that should be considered in preparing financial statements of investment companies involved in a business combination?

Reply—When investment companies engage in a business combination, shares of one company typically are exchanged for substantially all the shares or assets of another company (or companies). Most mergers of registered investment companies are structured as tax-free reorganizations. Following a business combination, portfolios of investment companies are often realigned, subject to tax limitations, to fit the objectives, strategies, and goals of the surviving company. Typically, shares of the acquiring fund are issued at an exchange ratio determined on the acquisition date, essentially equivalent to the acquiring fund's net asset value (NAV) per share divided by the NAV per share of the fund being acquired, both as calculated on the acquisition date. Adjusting the carrying amounts of assets and liabilities is usually unnecessary because virtually all assets of the combining investment companies (investments) are

stated at fair value, in accordance with FASB ASC 820, *Fair Value Measurement*, and liabilities are generally short-term so that their carrying values approximate their fair values.¹¹ However, conforming adjustments may be necessary when funds have different valuation policies (for example, valuing securities at the bid price versus the mean of the bid and asked price) in order to ensure that the exchange ratio is equitable to shareholders of both funds.

Only one of the combining companies can be the legal survivor. In certain instances, it may not be clear which of the two funds constitutes the acquirer for financial reporting purposes. Although the legal survivor would normally be considered the acquirer, continuity and dominance in one or more of the following areas might lead to a determination that the fund legally dissolved should be considered the acquirer for financial reporting purposes:

- Portfolio management
- Portfolio composition
- Investment objectives, policies, and restrictions
- Expense structures and expense ratios
- Asset size

A registration statement on Form N-14 is often filed in connection with a merger of management investment companies registered under the Investment Company Act of 1940 (the Act), or of business development companies as defined by the Act. Form N-14 is a proxy statement in that it solicits a vote from the (legally) acquired fund's shareholders to approve the transaction, and a prospectus, in that it registers the (legally) acquiring fund's shares that will be issued in the transaction. Form N-14 frequently requires the inclusion of pro forma financial statements reflecting the effect of the merger.

Tax implications must be considered and monitored carefully in the planning, execution, and postmerger stages of a business combination. The tax rules that must be considered include those related to the determination that the transaction is tax-free to the funds involved and their shareholders,¹² the qualification tests affecting regulated investment companies (RICs),¹³ and the accounting for tax attributes of specific accounts such as earnings and profits,¹⁴ capital loss carryforwards, and methods of tax accounting.¹⁵ Management may consider obtaining a private letter ruling from the IRS or an opinion of counsel on the tax-free treatment. Upon completion of the acquisition, the portfolio securities obtained from the acquiree generally should be monitored because substantial turnover of the acquiree's portfolio securities may jeopardize the tax-free status of the reorganization. There are important differences in the tax rules affecting business combinations of RICs and non-RIC investment companies.

Merger-related expenses (mainly legal, audit, proxy solicitation, and mailing costs) are addressed in the plan of reorganization and are often paid by the fund incurring the expense, although the adviser may waive or reimburse certain merger-related expenses. Numerous factors and circumstances should be considered in determining which entity bears merger-related expenses.

¹¹ If the carrying value of the acquired investment company's liabilities differs materially from fair value on the acquisition date, refer to FASB ASC 805-30-30-8 for guidance on recognition of the liabilities by the surviving entity.

¹² See Internal Revenue Code (IRC) Section 368(a) and IRS Notice 88-19.

¹³ See IRC Section 851.

¹⁴ See section 1.852-12(b) of Title 26, Internal Revenue, of U.S. *Code of Federal Regulations*.

¹⁵ See IRC Section 381.

In accordance with FASB ASC 805-10-25-23, acquisition related costs are accounted for as expenses in the periods in which the costs are incurred and the services are received, except that costs to issue equity securities are recognized in accordance with other applicable U.S. generally accepted accounting principles.

If the combination is a taxable reorganization, the fair value of the assets acquired on the date of the combination becomes the assets' new cost basis. For financial reporting purposes, assets acquired in a tax-free reorganization may be accounted for in the same manner as a taxable reorganization. However, investment companies carry substantially all their assets at fair value as an ongoing reporting practice and cost basis is principally used and presented solely for purposes of determining realized and unrealized gain and loss. Accordingly, an investment company, which is an acquirer in a business combination structured as a tax-free exchange of shares, may make an accounting policy election to carry forward the historical cost basis of the acquiree's investment securities for purposes of measuring realized and unrealized gain or loss for statement of operations presentation in order to more closely align the subsequent reporting of realized gains by the combined entity with tax-basis gains distributable to shareholders. The basis for such policy election should be disclosed in the notes to the financial statements, if material.

Instructions to Forms N-1A and N-2 state that, for registered investment companies, costs of purchases and proceeds from sales of portfolio securities that occurred in the effort to realign a combined fund's portfolio after a merger should be excluded in the portfolio turnover calculation. The amount of excluded purchases and sales should be disclosed in a note.¹⁶

FASB ASC 805-10-50-1 states that disclosures are required when business combinations occur during the reporting period or after the reporting date but before the financial statements are issued.

In accordance with FASB ASC 805-10-50, 805-20-50, and 805-30-50, disclosures for all business combinations should include a summary of the essential elements of the combination; that is, the name and description of the acquiree, the acquisition date, the percentage of voting equity interests acquired, the primary reasons for the combination and the manner in which control was obtained, the nature of the principal assets acquired, the number and fair value of shares issued by the acquiring company, and the exchange ratio. In addition, public business enterprises are required to disclose supplemental pro forma information consisting of the revenue and earnings of the combined entity for the current reporting period as though the acquisition date for all business combinations had been as of the beginning of the acquirer's annual reporting period.

Public business enterprises are also required to report, if practicable, the amounts of revenue and earnings of the acquiree since the acquisition date included in the combined entity's income statement for the reporting period. In many cases, investments acquired are absorbed into and managed as an integrated portfolio by an investment company upon completion of an acquisition; therefore, providing this information will not be practicable. That fact, along with an explanation of the circumstances, should be disclosed.

Because of the importance of investment company taxation to amounts distributable to shareholders, certain additional disclosures are recommended for combinations of investment companies, including the tax status and attributes of the merger. Additionally, if the merger is a tax-free exchange, separate disclosure of the amount of unrealized appreciation or depreciation and the

¹⁶ See Form N-1A, Item 13, Instruction 4(d)(iii) and Form N-2, Item 4, Instruction 17c.

amount of undistributed investment company income of the acquiree at the date of acquisition, if significant, may provide meaningful information about amounts transferred from the acquiree, which may be distributable by the combined fund in future periods.

See the following exhibits under “Illustrative Financial Statement Presentation for Tax-Free Business Combinations of Investment Companies” for an example of the calculation of an exchange ratio in an investment company merger, as well as merger-related financial statement disclosures.

Illustrative Financial Statement Presentation for Tax-Free Business Combinations of Investment Companies

The following financial statements and disclosures illustrate a tax-free business combination of an investment company. The illustrative notes are unique to a business combination. The exhibits assume that Fund B merges into Fund A as of the close of business on December 31, 20X4, and that both Fund A and Fund B have a January 31 fiscal year-end. Exhibit 1 presents the financial position of each fund immediately before the acquisition and of the combined fund immediately after the acquisition. Exhibit 2 presents the results of operations and changes in net assets of each fund for the 11-month fiscal period immediately before the acquisition, and the results of operations and summary changes in net assets information for the combined fund for the 1-month period subsequent to the acquisition. Exhibit 3 presents the statement of operations, statement of changes in net assets, and appropriate notes of the combined entity immediately after the acquisition. (The January 31, 20X5, statement of net assets of the combined entity is not presented as it will be identical in form to the December 31, 20X4, statement.)

Exhibit 1

Financial Position of Each Fund Immediately Before Acquisition

Statement of Net Assets December 31, 20X4

	<i>Fund A</i>	<i>Fund B</i>
Investments in securities, at fair value		
(Cost: Fund A—\$18,000,000		
Fund B—\$ 9,000,000)	\$20,000,000	\$10,000,000
Other assets	1,000,000	500,000
	<u>21,000,000</u>	<u>10,500,000</u>
Liabilities	1,000,000	500,000
Net assets	<u>\$20,000,000</u>	<u>\$10,000,000</u>
Shares outstanding	2,000,000	1,000,000
Net asset value per share	<u>\$ 10.00</u>	<u>\$ 10.00</u>

Calculation of Exchange Ratio:

Net assets of Fund B	\$10,000,000
Divided by Fund A net asset value per share	\$10.00
Fund A shares issuable	1,000,000
Fund B shares outstanding	1,000,000
Exchange ratio (Fund A shares issuable/Fund B shares outstanding)	1-for-1

Financial Position of Combined Entity Immediately After Acquisition
Statement of Net Assets

Notes to Financial Statements of the Combined Entity Immediately After Acquisition**Note 6—Acquisition of Fund B**

On December 31, 20X4, Fund A acquired all of the net assets of Fund B, an open-end investment company, pursuant to a plan of reorganization approved by Fund B shareholders on December 26, 20X4. The purpose of the transaction was to combine 2 funds managed by Investment Advisor C with comparable

investment objectives and strategies. The acquisition was accomplished by a tax-free exchange of 1 million shares of Fund A, valued at \$10 million, for 1 million shares of Fund B outstanding on December 31, 20X4. The investment portfolio of Fund B, with a fair value of \$10 million and identified cost of \$9 million at December 31, 20X4, was the principal asset acquired by Fund A. For financial reporting purposes, assets received and shares issued by Fund A were recorded at fair value; however, the cost basis of the investments received from Fund B was carried forward to align ongoing reporting of Fund A's realized and unrealized gains and losses with amounts distributable to shareholders for tax purposes.¹⁷ Immediately prior to the merger, the net assets of Fund A were \$20 million.

Note: The following paragraph is required for public business enterprises, as defined in the FASB ASC glossary, only. For purposes of this disclosure and consistent with FASB ASC 805-10-50-2(h), assume that, had the acquisition occurred February 1, 20X4, the beginning of Fund A's fiscal year, \$10,000 of the transfer agent fee and \$15,000 of other expenses—a total of \$25,000—would have been eliminated.

Assuming the acquisition had been completed on February 1, 20X4, the beginning of the annual reporting period of Fund A, Fund A's pro forma results of operations for the year ended January 31, 20X5,¹⁸ are as follows:

Net investment income	\$4,900,000 ¹⁹
Net gain (loss) on investments	\$3,200,000 ²⁰
Net increase (decrease) in net assets resulting from operations	\$8,100,000

Because the combined investment portfolios have been managed as a single integrated portfolio since the acquisition was completed, it is not practicable to separate the amounts of revenue and earnings of Fund B that have been included in Fund A's statement of operations since December 31, 20X4.

Note 7—Capital Share Transactions

As of January 31, 20X5, 100 million shares of \$1 par value capital stock were authorized. Transactions in capital stock were as follows:

	<i>Shares</i>		<i>Amount</i>	
	<i>20X5</i>	<i>20X4</i>	<i>20X5</i>	<i>20X4</i>
Shares sold	520,000	300,000	\$5,000,000	\$3,000,000
Shares issued in connection with acquisition of Fund B	1,000,000		10,000,000	

¹⁷ If material amounts of undistributed net investment income or undistributed realized gains are transferred to the acquirer (which the acquirer will be required to distribute), those amounts should also be disclosed. Material acquired loss carryovers should also be disclosed or cross-referenced to related income tax disclosures.

¹⁸ FASB ASC 805-10-50-2 states that, if comparative financial statements are presented, supplemental pro forma information should be presented as if the business combination had occurred as of the beginning of the comparable prior annual reporting period. Investment companies should base application of this provision on whether they are required to present comparative statements of operations in their financial statements. Typically, business development companies registered with the Securities and Exchange Commission are required to present comparative statements of operations, but other registered open-end and closed-end investment companies are not required to do so.

¹⁹ \$3,375,000 as reported, plus \$1,500,000 Fund B premerger, plus \$25,000 of pro-forma eliminated expenses.

²⁰ \$2,200,000 as reported plus \$1,000,000 Fund B premerger.

	Shares		Amount	
	20X5	20X4	20X5	20X4
Shares issued in reinvestment of dividends	300,000	250,000	3,000,000	2,400,000
	1,820,000	550,000	18,000,000	5,400,000
Shares redeemed	610,000	450,000	5,900,000	4,300,000
Net increase	1,210,000	100,000	\$12,100,000	\$1,100,000

[Issue Date: December 2009.]

.34 Application of the Notion of Value Maximization for Measuring Fair Value of Debt and Controlling Equity Positions

Inquiry—Private equity funds or business development companies (collectively, a fund) may hold a controlling interest in an investee company and hold both equity and debt instruments issued by the investee. From a business strategy perspective, in this circumstance, the fund's management generally views their investment in the debt and equity instruments as an aggregate position rather than as separate financial instruments. The fund's management rarely, if ever, exits an investment by selling an individual financial instrument (that is, debt separate from equity or vice versa); rather, the instruments are generally exited in their entirety as a group (and the debt is typically redeemed at the amount owed, which we will assume to be par). When a fund has a controlling²¹ interest in an investee and holds both debt and equity positions in that investee for which there are not observed trades,²² is it appropriate to apply the notion of value maximization discussed in paragraph BC49 of Accounting Standards Update (ASU) No. 2011-04, *Fair Value Measurement (Topic 820): Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs*, and, as a result, value the debt and equity positions together using an enterprise value approach?²³

Reply—This inquiry relates to the unit of account for investments within the scope of FASB ASC 946 and was discussed at a joint meeting between FASB and the International Accounting Standards Board during their deliberations of the fair value project.²⁴ Specifically, the boards considered whether to provide unit of account guidance for investments within the scope of FASB ASC 946. The boards concluded that unit of account guidance was outside the scope of the fair value project. However, the boards agreed to include language in paragraph BC49 of ASU No. 2011-04 that indicated that an entity assumes that

²¹ This question and answer does not address facts and circumstances in which an entity does not have a controlling financial interest in an investee company.

²² Observed trades would be an indicator that market participants may transact separately for the debt and equity; thus, further consideration of the facts and circumstances would be necessary to conclude whether the fair value maximization guidance is relevant. FASB ASC 820-10-35-41 indicates that "a quoted price in an active market provides the most reliable evidence of fair value and shall be used without adjustment to measure fair value whenever available."

²³ Such an approach might result in a fair value of the debt and equity positions that differs from the result from selling the debt and equity positions in separate transactions. See footnote 24 of this question and answer that references Agenda Paper 2E that includes an example that illustrates how fair value might differ.

²⁴ Refer to the International Accounting Standards Board (IASB)/FASB Agenda Paper 2E prepared for the October 2010 IASB/FASB joint meeting. (See www.ifs.org/Current-Projects/IASB-Projects/Fair-Value-Measurement/Summaries/Pages/IASB-October-2010.aspx.)

market participants seek to maximize the fair value of a financial or nonfinancial asset or to minimize the fair value of a financial or nonfinancial liability by acting in their economic best interest in a transaction to sell the asset or to transfer the liability in the principal (or most advantageous) market for the asset or liability. Such a transaction might involve grouping assets and liabilities in a way in which market participants would enter into a transaction, if the unit of account specified in other Topics does not prohibit that grouping.

This language provides fair value measurement guidance in situations when the unit of account is not specified. Because FASB ASC 946 does not specify the unit of account for measuring fair value, it might be appropriate to consider how fair value would be maximized, which may be in a transaction that involves both the debt and controlling equity position if this is how market participants would transact.²⁵ Consistent with the guidance in paragraph BC49 of ASU No. 2011-04, this transaction (and, thus, fair value) might be measured using an enterprise value approach measured in accordance with the guidance in FASB ASC 820 (that is, an exit price from the perspective of market participants under current conditions at the measurement date).

Because the enterprise value approach results in a fair value for the entire capital position (that is, both debt and equity), an allocation to the individual units of account would be necessary. FASB ASC 820 does not prescribe an allocation approach, but FASB ASC 820-10-35-18F discusses that a “reporting entity shall perform such allocations on a reasonable and consistent basis using a methodology appropriate in the circumstances.” Facts and circumstances, such as relevant characteristics of the debt and equity instruments, must be considered when making this allocation. Generally, the allocation method should be consistent with the overall valuation premise used to measure fair value.

[Issue Date: February 2013.]

.35 Assessing Control When Measuring Fair Value

Inquiry—Is it appropriate to aggregate positions across multiple reporting entities (multiple funds) to assess control²⁶ for purposes of whether a control premium might be appropriate in a fair value measurement, or does control have to reside in a single fund for the enterprise value approach to be acceptable? Also, is it appropriate to consider “club deals” in which a group of unrelated investors jointly make an investment when assessing control?

Reply—Control of an investee company may be achieved by virtue of a single fund holding a controlling financial interest, through multiple funds in the same fund complex²⁷ under common control being allocated financial interests in the investee company, or through “club deals” in which a group of unrelated investment managers jointly make controlling investments in a private company on behalf of funds they manage. For example, a single adviser may decide to make a controlling financial investment in an investee and then allocate that investment across multiple legal and reporting entities. Individually, no one entity may control the investee (this question and answer assumes

²⁵ This assessment would include a consideration of the entity’s prior history in selling similar investments. Consideration of specific terms of the instruments that are considered characteristics, as discussed in FASB ASC 820, is also necessary (for example, change in control provisions).

²⁶ This question and answer does not address consolidation matters. Control in this question and answer refers to the ability to cause a controlling financial interest in the investee to be sold.

²⁷ Fund complex refers to a group of funds managed by the same investment adviser.

this is the case); however, the entities in aggregate may have a controlling financial interest in the investee.

It is not consistent with the fair value measurement framework in FASB ASC 820 for a reporting entity to aggregate positions across multiple reporting entities (multiple related funds or unrelated club deals) to assess control²⁸ for purposes of whether a control premium might be appropriate in a fair value measurement. However, when determining the fair value of the position the reporting entity holds, that determination should consider whether other premiums and discounts (relative to the price of a noncontrolling interest) are appropriate. For example, observed transaction data for similar investments may indicate that market participants pay a premium multiple relative to the multiples observed for the guideline companies because some market participants place additional value on being part of the controlling group that has the right to determine the company's strategy.

A reporting entity should consider all available evidence about how a market participant would exit the investments (and the prices it would receive) in determining the principal (or most advantageous) market and whether premiums to noncontrolling interests are appropriate.

[Issue Date: February 2013.]

[The next page is 6471.]

²⁸ This is not consistent because it does not consider that, for example, kick-out rights may prevent a reporting entity from having unilateral control (even though the fund is part of a complex with the same adviser). Said another way, control is not a characteristic of the individual fund's investment in these assumed facts and circumstances.

Section 6930

Employee Benefit Plans

.01 When Does a Plan Have to File a Form 11-K?

Inquiry—When is a plan subject to the requirements of the Securities Act of 1933, thus requiring a Form 11-K filing under the Securities Exchange Act of 1934?

Reply—Section 3(a)(2) of the Securities Act of 1933 provides exemptions from registration requirements for defined benefit plans and defined contribution plans not involving the purchase of employer securities with employee contributions. All other plans are subject to the requirements, provided they are both voluntary and contributory. For further guidance, see the “Securities and Exchange Commission Reporting Requirements” section in chapter 12 of the AICPA Audit and Accounting Guide *Employee Benefit Plans*. Advice of ERISA counsel should be obtained to determine if the registration requirements apply to the plan.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature.]

.02 Defined Benefit Plan Measurement of a Life Insurance Policy

Inquiry—How should a defined benefit plan measure a cash value life insurance policy?

Reply—Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 715-30-35-60 indicates that for defined benefit plans, insurance contracts with insurance entities (other than those that are, in substance, annuities) should be accounted for as investments and measured at fair value.

FASB ASC 715-30-35-60 also states that for some contracts, the best available evidence of fair value may be contract value; if a contract has a determinable cash surrender value or conversion value, that is presumed to be its fair value.

[Issue Date: May 2010.]

[The next page is 6475.]

Section 6931

Financial Statement Reporting and Disclosure—Employee Benefit Plans

.01 Computation of Net Appreciation/Depreciation in Fair Value of Investments

Inquiry—Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 960-30-45-2 requires the statement of changes in net assets available for benefits to include separate disclosure of the net appreciation (depreciation) in fair value for each significant class of investments. FASB ASC 962-205-45-7 requires the same disclosure for defined contribution plans and employee health and welfare benefit plans. How can this amount be computed?

Reply—FASB ASC 960-30-45-2 states that the net appreciation (depreciation) in the fair value of investments should include both realized and unrealized gains (losses). This amount may be computed by aggregating the realized and unrealized gains and losses for each individual security. However, this would be quite time-consuming if the plan has a large portfolio of investments. As an alternative, the following formula may be used to compute the net appreciation (depreciation) in the fair value of each type of investment:

Market value at 12/31/X1.....	\$ XXX
Total proceeds of assets sold in 20X2.....	<XX>
Add: Total cost of assets purchased in 20X2.....	XX
Market value at 12/31/X2.....	<XXX>
Net appreciation/depreciation in fair value of investments ...	<u>\$ XXX</u>

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.02 Benefits Payable to Terminated Participants of a Defined Contribution Plan

Inquiry—Should benefits payable to terminated participants of a defined contribution [such as profit sharing or 401(k)] plan be classified as a liability in the plan financial statements?

Reply—No. Classifying benefits payable to participants as a liability is inappropriate because, by definition, net assets available for benefits (the difference between plan assets and liabilities) represent benefits owed to all participants—both active and terminated. Therefore, only amounts owed to nonparticipants (that is, third parties) should be classified as liabilities.

However, benefits payable to terminated participants should be disclosed in accordance with FASB ASC 962-205-50-1, which states the following, in part:

The financial statements shall also disclose, if applicable,

- i. Amounts allocated to accounts of persons who have elected to withdraw from the plan but have not yet been paid. These amounts shall not be reported as a liability on the statement of net assets available for benefits in financial statements prepared in accordance with generally accepted

accounting principles (GAAP). A footnote to reconcile the audited financial statements to Form 5500 may be necessary to comply with the Employee Retirement Income Security Act.

[Amended, June 1995; Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC; Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126; Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC; Revised, April 2014, to reflect conforming changes necessary due to revisions to FASB ASC.]

.03 Should the Sale of Real Estate Investments Held by Employee Benefit Plans Be Treated as Discontinued Operations?

Inquiry—Many employee benefit plans invest directly in real estate (for example, a building) that generates rental income and operating expenses for the plan. Generally, these plans are defined benefit plans but certain defined contribution plans may also hold these investments.

The FASB ASC glossary provides that a *component of an entity* comprises operations and cash flows that can be clearly distinguished, operationally and for financial reporting purposes, from the rest of the entity. A component of an entity may be a reportable segment or an operating segment, a reporting unit, a subsidiary, or an asset group.

FASB ASC 205-20-45-1 provides that the results of operations of a component of an entity that either has been disposed of or is classified as held for sale shall be reported in discontinued operations in accordance with FASB ASC 205-20-45-3 if both of the following are met:

- a. The operations and cash flows of the component have been (or will be) eliminated from the ongoing operations of the entity as a result of the disposal transaction and
- b. The entity will not have any significant continuing involvement in the operations of the component after the disposal transaction.

FASB ASC 205-20-45-3 states that in a period in which a component of an entity either has been disposed of or is classified as held for sale, the income statement of a business enterprise (or statement of activities of a not-for-profit entity) for current and prior periods shall report the results of operations of the component, including any gain or loss recognized in accordance with FASB ASC 360-10-35-40, in discontinued operations.

Because employee benefit plans are not specifically scoped out of FASB ASC 360, if an employee benefit plan invests in real estate that generates rental income and operating expenses for the plan and then sells that property, is the sale of the real estate investment considered a discontinued operation of the plan?

Reply—No. For many entities, an investment in real estate (such as a building) that generates rental income and operating expenses would meet the definition of a *component of an entity* (as defined in the FASB ASC glossary) and, therefore, any gains or losses relating to the disposal of that *component* would be reported in discontinued operations. However, employee benefit plan financial statements show financial status or net assets available for benefits and changes in financial status or net assets available for benefits. Because they do not show a statement of operations or activities, distinguishing between continuing and discontinued operations is not meaningful. Rather, real estate in an employee benefit plan should be treated as an investment carried at fair value and the related income/expenses and net appreciation/depreciation should be included in the statement of changes in financial status or statement

of changes in net assets available for benefits. No distinction should be made between continuing and discontinued operations.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.04 Depreciation of a Real Estate Investment Owned by a Defined Benefit Pension Plan

Inquiry—A defined benefit pension plan has invested in real estate which owns and receives rents from various stores in a shopping center. The financial statements include an expense for depreciation based on original cost. FASB ASC 960-325-35-1 requires that plan investments in real estate be presented at their fair value at the reporting date. Consequently, by providing for depreciation expense, the unrealized appreciation on this asset is increased.

Should depreciation expense be reflected for this plan investment?

Reply—No. Depreciation expense is normally an adjustment of the valuation of fixed assets reported at cost, in accordance with FASB ASC 960-360-35-1, which requires plan assets used in plan operations to be presented at cost less accumulated depreciation or amortization. Accordingly, since plan investments in real estate are to be reported at fair value, there is no requirement to provide for depreciation expense.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.05 Accounting and Disclosure Requirements for Single-Employer Employee Benefit Plans Related to the Medicare Prescription Drug, Improvement and Modernization Act of 2003

Inquiry—On December 8, 2003, the president signed into law the Medicare Prescription Drug, Improvement and Modernization Act of 2003 (the act) for employers that sponsor postretirement health care plans that provide prescription drug benefits. The act introduces a prescription drug benefit under Medicare (Medicare Part D) as well as a federal subsidy to sponsors of retiree health care benefit plans that provide a benefit that is at least actuarially equivalent to Medicare Part D.1. FASB ASC 715-60 and FASB ASC 740-10 address the issue of whether an employer that provides postretirement prescription drug coverage should recognize the effects of the act on its accumulated postretirement benefit obligation (APBO) and net postretirement benefit costs and, if so, when and how to account for those effects. FASB ASC 715-60 and FASB ASC 740-10 say that the APBO and net periodic postretirement benefit costs should reflect the effects of the act. FASB ASC 715-60 and FASB ASC 740-10 do not address accounting for the subsidy by health and welfare benefit plans.

For a single-employer health and welfare benefit plan, should the effects of the plan sponsor's (employer's) Medicare prescription drug subsidy (Medicare subsidy) be taken into consideration when calculating the health and welfare plan's postretirement benefit obligation?

Reply—No, the effects of the employer's Medicare subsidy should not be reflected in the plan's obligations. The primary objective of the financial statements of a health and welfare benefit plan is to provide financial information that is useful in assessing the plan's present and future ability to pay its benefit obligations when due. The Medicare subsidy amount is paid to the plan sponsor and does not flow into the plan. The plan sponsor is not required to use the subsidy amount to fund the postretirement benefits and may use the subsidy for any valid business purpose. As a result, the Medicare subsidy does not reduce the amount of benefits that need to be covered by plan assets and

future employer contributions. Therefore, the APBO, without reduction for the Medicare subsidy, is a more meaningful measure of the benefits. Further, the information necessary to calculate the gross measure should be readily available for sponsors who are subject to income taxes, because those plan sponsors should maintain gross and net measures of the APBO in order to properly account for income taxes under FASB ASC 740.

Disclosures

The plan should disclose the following:

- a. The existence of the act
- b. The fact that the APBO and the changes in the benefit obligation do not reflect any amount associated with the Medicare subsidy because the plan is not directly entitled to the Medicare subsidy
- c. Until the plan sponsor (employer) is able to determine whether benefits provided by its plan are actuarially equivalent to Medicare Part D.1, that the employer is not able to determine whether the benefits provided by its plan are actuarially equivalent to Medicare Part D.1. If the plan sponsor (employer) has included the effects of the Medicare subsidy in measuring its APBO and changes in benefit obligation, the plan should disclose the fact that the amount of the APBO differs from that disclosed by the plan sponsor (employer) because the plan sponsor's amounts are net of the Medicare subsidy.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.06 Accounting and Disclosure Requirements for Multiemployer Employee Benefit Plans Related to the Medicare Prescription Drug, Improvement and Modernization Act of 2003

Inquiry—On December 8, 2003, the president signed into law the Medicare Prescription Drug, Improvement and Modernization Act of 2003 (the act) for employers that sponsor postretirement health care plans that provide prescription drug benefits. The act introduces a prescription drug benefit under Medicare (Medicare Part D) as well as a federal subsidy to sponsors of retiree health care benefit plans that provide a benefit that is at least actuarially equivalent to Medicare Part D.1. FASB ASC 715-60 and FASB ASC 740-10 address the issue of whether an employer that provides postretirement prescription drug coverage should recognize the effects of the act on its APBO and net postretirement benefit costs and, if so, when and how to account for those effects. FASB ASC 715-60 and FASB ASC 740-10 say that the APBO and net periodic postretirement benefit costs should reflect the effects of the act. FASB ASC 715-60 and 740-10 do not address accounting for the subsidy by multiemployer health and welfare benefit plans or by the sponsors or participating employers of those plans.

For multiemployer health and welfare benefit plans, should the effects of the Medicare prescription drug subsidy (Medicare subsidy) be taken into consideration when calculating the health and welfare plan's postretirement benefit obligation?

Reply—Yes, the multiemployer plan's benefit obligations should be reduced by the effects of the Medicare subsidy because the multiemployer plan trust receives the subsidy amount directly and not the individual employers. Because the primary objective of the financial statements of a health and welfare benefit plan is to provide financial information that is useful in assessing the plan's present and future ability to pay its benefit obligations when due, and because

the Medicare subsidy amount flows into the multiemployer plan trust, the APBO net of the Medicare subsidy is a more meaningful measure of those benefits.

Disclosures

Until the multiemployer plan is able to determine whether benefits provided by its plan are at least actuarially equivalent to Medicare Part D.1, the plan should disclose the following in the notes to its financial statements:

- a. The existence of the act
- b. The fact that measures of the APBO and changes in the benefit obligation do not reflect any amount associated with the subsidy because the plan is unable to conclude whether the benefits provided by the plan are actuarially equivalent to Medicare Part D under the act.

If the multiemployer plan has included the effects of the Medicare subsidy in measuring its APBO and changes in the benefit obligation, the plan should disclose the following:

- a. The existence of the act
- b. The reduction in the APBO for the subsidy related to benefits attributed to past service
- c. The effect of the subsidy on the changes in the benefit obligation for the current period
- d. An explanation of any significant change in the benefit obligation or plan assets not otherwise apparent in the other disclosures
- e. The gross benefit payments (paid and expected, respectively) including prescription drug benefits, and separately the gross amount of the subsidy receipts (received and expected, respectively)

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.07 Financial Statement Presentation of Underwriting Deficits

Inquiry—The administrator of an employee health and welfare benefit plan has questioned an item on the plan’s statement of net assets available for benefits. The item appears in the liabilities section as follows:

Reserve for underwriting deficit—(Note 3) \$10,000

Note 3 reads as follows:

Reserve for underwriting deficit represents a liability with the XYZ Life Insurance Company for claims paid in excess of premiums during the current policy year. This liability will be applied to reduce any refunds which may accrue in the future. Such a refund was received during the current year.

The related debit to the credit setting up the liability was to “Underwriting Deficit,” and is included in health claims deductions in the “Statement of Changes in Net Assets Available for Benefits.”

The administrator takes the position that this item should be excluded entirely from the financial statements because:

1. The policy provides that any underwriting deficit in one policy year is not immediately recoverable by the insurance company but only recoverable against underwriting “gains” of succeeding years, if any.

2. Upon cancellation of the policy by the underwriter, the fund is relieved of any liability for any unrecovered underwriting deficit existing on date of cancellation.
3. Although there were usually underwriting “gains” in past years, there is no assurance that future underwriting “gains” will occur to permit recovery of the deficit.

Should the underwriting loss be reflected in the financial statements in the year in which it occurs?

Reply—Yes, if certain criteria are met. FASB ASC 965-30-25-5 states experience ratings determined by the insurance company or by estimates, may result in a premium deficit. Premium deficits should be included in the benefit obligations if (a) it is probable that the deficit will be applied against the amounts of future premiums or future experience-rating refunds and (b) the amount can be reasonably estimated. If no obligation is included for a premium deficit because either or both of the conditions are not met, or if an exposure to loss exists in excess of the amount accrued, disclosure of the premium deficit should be made if it is reasonably possible that a loss or an additional loss has been incurred. They should not be shown as liabilities on the plan’s statement of net assets available for benefits.

Considerations in determining whether it is probable that a premium deficit will be applied against future premiums or refunds include (a) the extent to which the insurance contract requires payment of such deficits and (b) the plan’s intention, if any, to transfer coverage to another insurance company.

[Amended, June 1995; Amended, June 2001; Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC; Revised, April 2014, to reflect conforming changes necessary due to revisions to FASB ASC.]

.08 Types of Investments Subject to FASB ASC 962

Inquiry—What types of investments are subject to the financial statement presentation and disclosure requirements of FASB ASC 962?

Reply—FASB ASC 946-210-45-10 refers to investment contracts as (a) a traditional or separate account guaranteed investment contract (GIC contract), (b) a bank investment contract (BIC contract), (c) a synthetic GIC contract composed of a wrapper contract and the underlying wrapped portfolio of individual investments, or (d) a contract with similar characteristics.

Plans may hold stable value investments through direct contracts with issuers or through a specifically plan-managed account. Plans may also hold stable value investments through beneficial ownership of bank collective funds (which own investment contracts). Insurance company pooled separate accounts that hold investment contracts also have similar characteristics.

It is important for the auditor to gain an understanding of the types of investments being held by the plan; this can be achieved by obtaining the underlying documents for the investments. Typically, investments have some form of underlying documentation to help determine the type of investment. For example, if a plan is invested in common collective trust funds (CCTs), then there should be a trust declaration for that CCT, which would generally have audited financial statements.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.09 Financial Statement Presentation When a Plan Invests in a Common Collective Trust Fund or in a Master Trust That Holds Fully Benefit-Responsive Investment Contracts

Inquiry—Do the financial statement presentation requirements in paragraphs 2–3 of FASB ASC 962-205-45 apply to a plan’s investment in a CCT, or master trust that holds fully benefit-responsive investment contracts?

Reply—Yes. Paragraphs 2–3 of FASB ASC 962-205-45 require the following presentation for fully benefit-responsive investment contracts:

The statement of net assets available for benefits of the plan shall present amounts for all of the following:

- a. Total assets
- b. Total liabilities
- c. Net assets reflecting all investments at fair value
- d. Net assets available for benefits.

The amount representing the difference between net assets reflecting all investments at fair value and net assets available for benefits shall be presented on the face of the statement of net assets available for benefits as a single amount, calculated as the sum of the amounts necessary to adjust the portion of net assets attributable to each fully benefit-responsive investment contract.

When the plan invests in a CCT (or similar vehicle), or a master trust that holds fully benefit-responsive investment contracts, the fair value of the investment in the CCT or master trust should be reported in investments on the face of the statement of net assets available for benefits. The amount representing the difference between the fair value and the contract value of the fully benefit-responsive investment contracts held by the CCT or master trust should be presented on the face of the statement of net assets available for benefits, and calculated as the sum of the amounts necessary to adjust the portion of net assets attributable to the plan’s investment in the CCT or master trust from fair value to contract value. For the master trust, the adjustment only relates to the plan’s portion of the master trust invested in the fully benefit-responsive investment contracts.

A CCT is a trust for a collective investment and reinvestment of assets contributed from employee benefit plans maintained by more than one employer or a controlled group of corporations that is maintained by a bank, trust company, or similar institution that is regulated, supervised, and subject to periodic examination by a state or federal agency. Such CCTs allow several smaller unaffiliated plans to gain the economies of scale necessary to participate in the stable value marketplace. These CCTs generally issue separate, stand-alone financial statements, and are considered investment companies subject to FASB ASC 946.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.10 Financial Statement Disclosure Requirements When a Plan Invests in a Common Collective Trust Fund or in a Master Trust That Holds Fully Benefit-Responsive Investment Contracts

Inquiry—Do plans that directly invest in CCTs, or in master trusts that hold fully benefit-responsive investment contracts, need to include in the plan’s financial statements, the disclosures in FASB ASC 962-325-50-3?

Reply—Plans that directly invest in CCTs, or similar vehicles that hold fully benefit-responsive investment contracts, do not need to include the disclosures detailed in the FSP in the plan's financial statements. Such disclosures would be included in the financial statements of the CCT, in accordance with FASB ASC 946-210-50-14.

For plans that invest in a master trust that holds fully benefit-responsive investment contracts, the notes to the financial statements should include the disclosures required in paragraphs 2–3 of FASB ASC 962-205-45 related to the fully benefit-responsive investment contracts held by the master trust. These disclosures are necessary because, unlike a CCT (as discussed in section 6931.09), master trust financial statements are not required, and the related disclosure information would not be readily available.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.11 Fair Value Measurement Disclosures for Master Trusts

Inquiry—Employee benefit plans often hold investments under master trust arrangements. According to the Department of Labor's Form 5500 instructions, a *master trust* is a trust for which a regulated financial institution serves as trustee or custodian and in which assets of more than one plan, sponsored by a single employer or by a group of employers under common control, are held.

In a typical master trust arrangement, the plan does not hold units or shares of the master trust but has an undivided interest in the assets of the master trust. However, for participant directed defined contribution plans, the plan typically has a divided interest in the individual assets of the master trust based upon participant direction. The "Additional Financial Statement Disclosures" sections in chapters 2 and 3 of the AICPA Audit and Accounting Guide *Employee Benefit Plans* (guide) discusses the requirement for investments in master trusts to be shown as a single line item on the statement of net assets available for benefits; however, the plan does not "purchase" and "dispose" of its interest in the master trust but is allocated an interest once the plan sponsor chooses to transfer the plan's assets into the master trust. The guide also discusses the requirement for master trust investments to be shown by general type in the footnotes.

For employee benefit plan financial statements, are the disclosure requirements of FASB ASC 820-10-50 required for the plan's total interest in the master trust or the individual investments under the master trust arrangement?

Reply—The disclosures required by FASB ASC 820-10-50 are required for individual investments under a master trust arrangement and are not required for the plan's total interest in the master trust.

According to FASB ASC 820-10-50, for assets that are measured at fair value on a recurring basis in periods subsequent to initial recognition, the reporting entity shall disclose information that enables users of its financial statements to assess the valuation techniques and inputs used to develop those measurements, and for recurring fair value measurements using significant unobservable inputs (level 3), the effect of the measurements on earnings (or changes in net assets) for the period.

Because of the nature of the plan's ownership interest in the master trust—that is, the plan does not hold units or shares of a master trust—the disclosures in FASB ASC 820 should be presented for the underlying master trust investments.

Consideration should be given to combining, or reconciling, or both, the master trust FASB ASC 820 disclosures as described previously with the current master trust disclosures as described in chapters 2–3 of the guide.

[Issue Date: March 2009; Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC; Revised, April 2010.]

.12 Accounting and Disclosure Requirements for Health and Welfare Plans Related to the COBRA Premium Subsidy Included in the American Recovery and Reinvestment Act of 2009

Inquiry—On February 17, 2009, President Obama signed into law the American Recovery and Reinvestment Act of 2009 (Recovery Act), which imposes new temporary Consolidated Omnibus Budget Reconciliation Act (COBRA) rules for employers sponsoring group health plans. The Recovery Act reduced the amount to be paid by a former employee to 35 percent of the plan's average cost, with the remaining 65 percent of the cost to be covered by the federal government through a payroll tax credit to the employer (COBRA premium subsidy). The 65 percent COBRA premium subsidy applies to certain former employees who become eligible for, and who elect, COBRA coverage between February 17, 2009, and February 28, 2010. The maximum length of time the COBRA premium subsidy will be provided is 15 months.

How should the effects of the COBRA premium subsidy be reflected when calculating a health and welfare plan's postemployment benefit obligation?

Reply—When calculating a health and welfare plan's postemployment benefit obligation, the COBRA premium subsidy should be considered a replacement of a portion of the employee COBRA contribution and, therefore, should be recorded consistent with how employee contributions are currently required to be recorded.

FASB ASC 965, *Plan Accounting—Health and Welfare Benefit Plans*, provides that the postemployment benefit obligation recorded in a plan's financial statements should be measured in accordance with FASB ASC 712, *Compensation—Nonretirement Postemployment Benefits*, with disclosure of information about the former employee's relative share of the plan's estimated cost of providing postemployment benefits. FASB ASC 712 provides for benefits that do not vest or accumulate to be accounted for using the principles of FASB ASC 450, *Contingencies*. Application of FASB ASC 450 to COBRA benefits results in the accrual of a liability for the present value of future benefits to be provided by the employer to the former employees who are currently receiving COBRA benefits, offset by the present value of contributions to be received from the affected former employees.

Accordingly, the amount of the present value of the former employee contributions, along with the present value of the COBRA premium subsidy, would have an offsetting effect on the COBRA liability when calculating the COBRA postemployment obligation to be included in the plan's financial statements. Also, disclosure should be made about the portion of the plan's estimated cost that is funded by the COBRA premium subsidy.

The accounting for the COBRA subsidy in a single employer plan differs from the accounting for the Medicare Part D subsidy for prescription drugs in section 6931.05, "Accounting and Disclosure Requirements for Single-Employer

Employee Benefit Plans Related to the Medicare Prescription Drug, Improvement and Modernization Act of 2003,” because under the Medicare Part D subsidy, the employer is not obligated to transfer the subsidy to the plan, whereas with the COBRA subsidy, the employer has already incurred the cost of providing COBRA benefits (either by payment of a premium to an insurance company or by paying future claims if self-insured) and has paid benefits prior to receiving the subsidy. The COBRA premium subsidy is intended to subsidize the former employee’s cost, not the employer’s cost. Further, the COBRA premium subsidy is temporary, but the Medicare Part D subsidy can be anticipated for many years into the future. Actuarial valuations of postretirement medical plans make projections for 50 years or more. The COBRA subsidy has a maximum projection period of 15 months following the expiration date of the Recovery Act provision. Changing the measurement of the COBRA post-retirement obligation for the periods impacted by the COBRA premium subsidy would affect comparability of the financial statements.

[Issue Date: July 2010.]

.13 Health and Welfare Plan Accounting for Reimbursements Received Under the Patient Protection and Affordable Care Act’s Early Retiree Reinsurance Program When the Reimbursement Is Not Remitted to the Trust

Inquiry—The Early Retiree Reinsurance Program (ERRP) was established by the Patient Protection and Affordable Care Act (PPACA). The PPACA was passed by Congress and signed into law in March 2010, providing for comprehensive health insurance reforms. Congress appropriated funding of \$5 billion for this temporary program to provide financial assistance to employers, unions, and state and local governments to help them maintain coverage for early retirees age 55 and older who are not yet eligible for Medicare, including their spouses, surviving spouses, and dependents. Employers could apply for the ERRP beginning June 29, 2010. The ERRP ceased accepting applications after May 5, 2011.

Employers may receive various notifications from the ERRP Center, including notification that the application was received, notification that the application was approved, and notification that the reimbursement request was approved. The notification indicating that the reimbursement request was approved will also include the amount of the reimbursement. Employers may be able to estimate the reimbursement amount when they submit their reimbursement request; however, realization of the reimbursement request is subject to approval, and approval is contingent upon the availability of funds in the ERRP.

If a reimbursement is received under the ERRP, the employer must use the proceeds to reduce (a) the employer’s health benefit premiums or costs; (b) plan participants’ health benefit premium contributions, copayments, deductibles, coinsurance, or other out-of-pocket costs or any combination of these costs; or (c) any combination of the costs specified in (a) and (b). Proceeds received pursuant to the ERRP may not be used as general revenue of the employer. Thus, to the extent that an employer decides to use the reimbursement for its own purposes, it may use the reimbursement only to offset increases in the employer’s health benefit premiums or costs. The ERRP states that it is expected that sponsors will continue to provide at least the same level of contribution to support the applicable plan as they did before the program.

Should the health and welfare plan’s financial statements reflect reimbursements that were not remitted to the trust?

(The following reply would be applicable to both single employer and multiemployer plans.)

Reply—Yes. If a reimbursement is received under the ERRP, the employer must use the proceeds to reduce (a) the employer’s health benefit premiums or costs; (b) plan participants’ health benefit premium contributions, copayments, deductibles, coinsurance, or other out-of-pocket costs or any combination of these costs; or (c) any combination of the costs specified in (a) and (b).

As stated in paragraph 4.13 of the Audit and Accounting Guide *Employee Benefit Plans*, plan transactions, including contributions, benefit payments, and expenses paid through the voluntary employee beneficiary association trust or otherwise, should be recorded in a plan’s financial statements and subject to audit procedures.

[Issue Date: December 2011.]

.14 Health and Welfare Plan Accounting for Reimbursements Received Under the PPACA’s ERRP Described in TIS Section 6931.13

Inquiry—How should the health and welfare plan’s financial statements reflect reimbursements received under the ERRP described in TIS section 6931.13, “Health and Welfare Plan Accounting for Reimbursements Received Under the Patient Protection and Affordable Care Act’s Early Retiree Reinsurance Program When the Reimbursement Is Not Remitted to the Trust?”

(The following reply would be applicable to both single employer and multiemployer plans.)

Reply—Reimbursements from the ERRP, although used to reduce contributions from the employer or participants (or a combination of both), are considered contributions from other identified sources. FASB ASC 965 states that the statement of changes in net assets available for benefits shall be presented in enough detail to identify the significant changes during the year, and it includes the following types of contributions:

- a. Contributions from employers segregated between cash and noncash contributions
- b. The nature of noncash contributions described either parenthetically or in a note
- c. Contributions from participants, including those collected and remitted by the sponsor
- d. Contributions from other identified sources (for example, state subsidies or federal grants)

[Issue Date: December 2011.]

.15 Health and Welfare Plan Accounting for Reimbursements Applied for Prior to Year-End but Not Approved Until After Year-End Under the PPACA’s ERRP Described in TIS Section 6931.13

Inquiry—Should the health and welfare plan’s financial statements record a receivable if the employer filed for reimbursement under the ERRP described in TIS section 6931.13 prior to year-end but did not receive approval of the reimbursement request until after year-end?

(The following reply would be applicable to both single employer and multiemployer plans.)

Reply—No, the health and welfare plan’s financial statements should not reflect a receivable until an approval of the reimbursement is received. As noted

in TIS section 6931.13, the notification indicating approval of the reimbursement request will also include the amount of the reimbursement. Employers may be able to estimate the reimbursement amount when they submit their reimbursement request; however, realization of the reimbursement request is subject to approval, and approval is contingent upon the availability of funds in the ERRP.

The FASB ASC glossary defines a *contribution receivable* as the amounts due, as of the date of the financial statements, to the plan from employers, participants, and other sources of funding (for example, state subsidies or federal grants). They include amounts due pursuant to firm commitments, as well as legal or contractual requirements. Receipt of approval of the reimbursement request will generally constitute the commitment by the ERRP. If the reimbursement request approval notification is received after the plan's year-end, the reimbursement should not be accrued. Further, if an employer applies for additional reimbursements that are not approved prior to the plan's year-end, these amounts should not be accrued because approval of these additional reimbursements are contingent upon the availability of funds in the ERRP.

The plan may consider disclosing the following (also see the disclosures in TIS section 6931.17, "Health and Welfare Plan Disclosures About the PPACA's ERRP Described in TIS Section 6931.13"):

- a. The existence of the PPACA and the ERRP
- b. The fact that the employer applied for reimbursements from the ERRP prior to year-end

In addition, the plan should consider whether subsequent event disclosures are required if the reimbursement amounts are received after year-end (see FASB ASC 855, *Subsequent Events*).

[Issue Date: December 2011.]

.16 Accounting for the Effects of the Reimbursement on the Health and Welfare Plan's Postretirement Benefit Obligations Under the PPACA's ERRP Described in TIS Section 6931.13

Inquiry—How do the reimbursed amounts from the ERRP described in TIS section 6931.13 affect the health and welfare plan's postretirement benefit obligation?

(The following reply would be applicable to both single employer and multiemployer plans.)

Reply—Consulting with the plan actuary is important in determining the effect of the reimbursed amounts on the health and welfare plan's postretirement benefit obligation. FASB ASC 965 provides that the postretirement benefit obligation recorded in a plan's financial statements should be measured in accordance with FASB ASC 715, *Compensation—Retirement Benefits*, which provides that measurement of the expected postretirement benefit obligation is based on the expected amount and timing of future benefits, taking into consideration the expected future cost of providing the benefits and the extent to which those costs are shared by the employer; the employee (including consideration of contributions required during the employee's active service period and following retirement, deductibles, coinsurance provisions, and so forth); or others (such as through governmental programs).

[Issue Date: December 2011.]

.17 Health and Welfare Plan Disclosures About the PPACA's ERRP Described in TIS Section 6931.13

Inquiry—What disclosures might a health and welfare plan consider including in its financial statements relating to the ERRP described in TIS section 6931.13?

(The following reply would be applicable to both single employer and multiemployer plans.)

Reply—The plan might consider including the following disclosures:

- a. The existence of the PPACA and the ERRP
- b. Whether the plan has applied for reimbursements that have not been received and the amount of the reimbursements requested, if known
- c. The amount of reimbursements received by the plan
- d. How the reimbursements were used or are intended to be used
- e. How the reimbursements are reflected in the plan's financial statements

The following is an illustrative disclosure for a plan that applied for reimbursement under the ERRP in 2010, and the reimbursement request was approved in 2011:

The Early Retiree Reinsurance Program (ERRP) was established by the Patient Protection and Affordable Care Act. Congress appropriated funding of \$5 billion for this temporary ERRP to provide financial assistance to employers, unions, and state and local governments to help them maintain coverage for early retirees age 55 and older who are not yet eligible for Medicare, including their spouses, surviving spouses, and dependents. The ERRP ceased accepting applications after May 5, 2011.

The plan sponsor submitted an application for reimbursement from the ERRP in 2010 and received reimbursements of \$XX in 2011. These reimbursements are not reflected in the accompanying 2010 financial statements because the reimbursement request was not approved until 2011. Reimbursements will be used to offset increases in the employer's costs of maintaining health care coverage.

[Issue Date: December 2011.]

[The next page is 6491.]

Section 6932

ERISA Reporting and Disclosures

.01 Employee Benefit Security Administration Guidance on Insurance Company Demutualizations

Inquiry—During the past few years there have been a number of insurance companies that have demutualized, resulting in the insurance contract policyholder receiving demutualization proceeds. What alternatives are available with respect to receipt by policyholders of demutualization proceeds?

Reply—On February 15, 2001, Employee Benefit Security Administration (EBSA) issued a letter regarding alternatives available under the trust requirement of Title I of ERISA with respect to receipt by policyholders of demutualization proceeds belonging to an ERISA-covered plan in connection with the proposed plan of demutualization of an insurance company (the company). In its letter, the DOL noted that the application of ERISA's trust requirements would depend on whether demutualization proceeds received by a policyholder constitute plan assets. The DOL stated that, in the case of an unfunded or insured welfare plan in which participants pay a portion of the premiums, the portion of the demutualization proceeds attributable to participant contributions must be treated as plan assets. In the case of a pension plan, or where any type of plan or trust is the policyholder or where the policy is paid for out of trust assets, the DOL stated that all of the proceeds received by the policyholder in connection with the demutualization would constitute plan assets. Auditors should take care to identify those plans with contracts with insurance companies that have demutualized and ensure that the proceeds are properly recorded as plan assets. Plan sponsors may not be familiar with EBSA's letter regarding alternatives available with respect to receipt by policyholders of demutualization proceeds. In addition, it has been noted that demutualization proceeds are often deposited into a separate account or trust and may be overlooked in financial reporting for the plan.

.02 When Should Participant Contributions Be Considered Late Remittances?

Inquiry—For purposes of reporting on line 4(a) of Form 5500, from what date should remittances be deemed late; the date the remittances can reasonably be made, or 15 days after the end of the month in which the funds were withheld?

Reply—Participant contributions are required to be remitted as soon as they can reasonably be segregated from an employer's general assets. DOL Regulation 2510.3-102 states that an employer is required to segregate employee contributions from its general assets as soon as practicable, but in no event more than (a) 90 days after the contributions are paid by employees or withheld from their wages for a welfare benefit plan or (b) the 15th business day following the end of the month in which amounts are contributed by employees or withheld from their wages for a pension benefit plan. The definition of what constitutes as soon as practicable will vary from plan sponsor to plan sponsor. DOL Field Assistance Bulletin 2003-2 states that the process for segregating participant contributions must be taken into account when determining when participant contributions can be reasonably segregated from the employer's general assets. Plan sponsors, under their fiduciary responsibility, also should consider how costly to the plan a more expeditious process

would be. Those costs should be balanced against any additional income and security the plan and plan participants would realize from a faster system.

In considering whether remittances are delinquent, an understanding of the plan sponsor's process to segregate and remit contributions should be obtained. If the plan has several entities and payroll processes that comprise the remittance process, their timeframe to remit may be longer than a plan sponsor with only one location and one payroll system. Similarly, facts and circumstances that occur in the year (for example, a change in payroll processing or new service provider) may change the timeframe in which remittances are made. If a process has been established and the plan sponsor deviates from such a process, an understanding of the reasons why the remittance of the contributions for the period or periods did not comply with the established process should be obtained. Based on that understanding, a determination as to whether the plan sponsor remitted contributions as soon as it could reasonably segregate them from general assets should be made. The plan sponsor also may want to consult ERISA counsel in making that determination. In any case, any contributions remitted after the 15th business day after the end of the month in which the funds were withheld should be reported on Form 5500, Schedule H, Line 4a.

.03 How Should Delinquent Loan Remittances Be Reported on the Form 5500?

Inquiry—How should delinquent loan remittances be reported on the Form 5500?

Reply—In Advisory Opinion 2002-02A, the DOL stated that participant loan repayments paid to or withheld by an employer for purposes of transmittal to an employee benefit plan are sufficiently similar to participant contributions to justify, in the absence of regulations providing otherwise, the application of principles similar to those underlying the participant contribution regulation for purposes of determining when such repayments become assets of the plan. Delinquent forwarding of participant loan repayments is eligible for correction under the Voluntary Filer Correction Program and PTE 2002-51 on terms similar to those that apply to delinquent participant contributions. Accordingly, the DOL will not reject a Form 5500 report based solely on the fact that delinquent forwarding of participant loan repayments is included on Line 4a of the Schedule H or Schedule I. Filers that choose to include such participant loan repayments on Line 4a must apply the same supplemental schedule and independent public accountant disclosure requirements to the loan repayments as apply to delinquent transmittals of participant contributions. If the plan does not report delinquent loan remittances on Line 4a, those payments should be reported on Schedule G.

.04 How Should Participant Loans Be Reported on Defined Contribution Plan Master Trust Form 5500 Filings?

Inquiry—How should participant loans be reported on defined contribution plan master trust Form 5500 filings?

Reply—The face of Schedule H Form 5500 instructs master trust investment accounts not to complete line 1c(8) participant loans. In practice, many master trusts for defined contribution plans include participant loans as part of their master trust agreement. However, even though these loans may be included as part of the master trust agreement, the Form 5500 instructs the preparer not to include them as part of the master trust assets. Thus, the plan's financial statements would require a supplemental schedule, Schedule of Assets (Held at End of Year), to report participant loans as a nonmaster trust

investment. The plan's Form 5500 filing would require the participant loans to be broken out separately from the investment in the master trust on the Schedule H.

.05 How Should Investments in Brokerage Accounts Be Reported in the Financial Statements and Form 5500?

Inquiry—Investments in individually directed brokerage accounts can be aggregated in a single line item on the Form 5500. Can they be listed as a single line item on the supplemental schedule of assets, or do the individual underlying investments have to be listed?

Reply—As described in the Form 5500 instructions, individually directed brokerage accounts may be aggregated in a single line item on the statement of net assets available for benefits and on the supplemental schedule of assets, provided the investments are not loans, partnership or joint-venture interests, real property, employer securities, or investments that could result in a loss in excess of the account balance of the participant or beneficiary who directed the transaction. However, the notes to the financial statements must disclose any individual investment that is over 5 percent of net assets available for benefits at the end of the year. In addition, the total investment income or loss for individually directed brokerage accounts may be aggregated in a single line item in the Form 5500; however, the financial statements must separate interest and dividends from net appreciation (depreciation) in fair value on the statement of changes in net assets available for benefits and disclose net appreciation (depreciation) by type of investment in the notes to the financial statements.

.06 Do All Types of Reconciling Items Between the Financial Statements and the Form 5500 Require a Reconciling Footnote in the Financial Statements?

Inquiry—Does ERISA require a footnote to the audited financial statements reconciling amounts reported in the Statement of Changes in Net Assets Available for Benefits to those reported in the Form 5500 for differences in the way income and expense amounts are classified in the two reports?

Reply—Generally, a reconciliation would be required for differences occurring because certain income and expense items are netted against each other and disclosed as one amount in one statement and reported separately in the other (for example, the amount reported as contributions in the financial statements may differ from that reported in the 5500 because excess contributions are recorded net on the financial statements but gross on the Form 5500). However, frequently the classification of line items comprising certain income and expense items (for example, investments and investment interest, dividends, gains and losses, and self-directed brokerage accounts) reported in the Form 5500 differ from the classifications shown in the financial statements. In such situations, a reconciling footnote may not be necessary.

For further guidance, see the “Reports Issued Prior to Form 5500 Filing” section in chapter 12 of the AICPA Audit and Accounting Guide *Employee Benefit Plans*.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature.]

.07 What is the Requirement to Report Certain Transactions Under Individual Account Plans on the Schedule of Reportable Transactions?

Inquiry—Under Form 5500 (Schedule H, Part IV, line 4j), there is a special rule whereby transactions under an individual account plan that a participant directs should not be taken into account for purposes of preparing the Schedule

of Reportable Transactions. What about situations where an individual account plan is participant-directed but has certain transactions that appear to be nonparticipant-directed (for example, pass-through account for contributions)?

Reply—If the plan is an individual account plan and the overall structure of the plan is participant-directed, pass-through account transactions would not be required to be included on the Schedule of Reportable Transactions. Another example would be a participant-directed individual account plan that liquidates its investment options as a result of a plan termination, merger, or change in service provider. Often such changes result in the plan sponsor directing the plan trustee to liquidate the current balance in the participant-directed investment options into a short-term fund before the transfer to new investment options. Such transactions would not be required to be included on the Schedule of Reportable Transactions.

.08 Is Noninterest-Bearing Cash an Asset on the Supplemental Schedule of Assets (Held at End of Year)?

Inquiry—Should noninterest-bearing cash be included as an asset on the supplemental Schedule of Assets (Held at End of Year)?

Reply—Generally, only assets held for investment are included on the supplemental Schedule of Assets (Held at End of Year); thus noninterest-bearing cash would not be included. Interest-bearing cash accounts would be included on the supplemental schedule.

.09 Is Netting of Investments on the Schedule of Assets (Held at End of Year) Permitted?

Inquiry—Can immaterial investments be netted together as “other” on the supplemental Schedule of Assets (Held at End of Year)?

Reply—No, each investment must be separately listed on the supplemental schedule.

.10 Is the Schedule of 5 Percent Reportable Transactions Required for Defined Benefit Plans?

Inquiry—Is the schedule of 5 percent reportable transactions required for defined benefit plans?

Reply—As defined benefit plans generally are not participant-directed, the reportable transactions schedule would be required.

[The next page is 6501.]

Section 6933

Auditing Employee Benefit Plans

.01 Initial Audit of a Plan

Inquiry—In an initial audit of a plan that has been in existence for several years, to what extent does the auditor need to audit information from previous years?

Reply—In an initial audit of a plan which has been in existence in previous years, ERISA requires that the audited financial reports contain a comparative Statement of Net Assets Available for Benefits and, as such, there should be some consideration of the accumulation of data from prior years, and the effect on current year balances. The auditor can choose to compile, review, or audit the opening Statement of Net Assets Available for Benefits. It is important to note, however, that if the opening Statement of Net Assets Available for Benefits is not audited, the auditor must satisfy himself or herself as to the reasonableness of the amounts reported in that statement because material errors in that information may materially impact the Statement of Changes in Net Assets Available for Benefits under audit.

The auditor should apply appropriate audit tests and procedures to the opening balances in the Statement of Net Assets Available for Benefits to determine that those balances are not materially misstated. The auditor should make inquiries of the plan's management and outside service organizations, as applicable, regarding the plan's operations during those earlier years. The auditor also may wish to obtain relevant information (for example, trust statements, recordkeeping reports, reconciliations, minutes of meetings, and service auditors' reports issued under Statement on Standards for Attestation Engagements [SSAE] No. 16, *Reporting on Controls at a Service Organization* [AICPA, *Professional Standards*, AT sec. 801], or Statement on Auditing Standards No. 70, *Service Organizations*, as amended (now superseded),¹ for earlier years, as applicable, to determine whether there appears to be any errors during those years that could have a material effect on current year balances. Further, the auditor should gain an understanding of the accounting practices that were followed in prior years to determine that they have been consistently applied in the current year. Based on the results of the auditor's inquiries, review of relevant information, and evidence gathered during the current year audit, the auditor would determine the necessity of performing additional substantive procedures (including detailed testing or substantive analytics) on earlier years' balances.

See the "Initial Audits of Plans" sections in chapters 5 and 13 of the AICPA Audit and Accounting Guide *Employee Benefit Plans*.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature; Revised, August 2011, to reflect

¹ Prior to the issuance of Statement on Standards for Attestation Engagements (SSAE) No. 16, *Reporting on Controls at a Service Organization* (AICPA, *Professional Standards*, AT sec. 801), the requirements and guidance for service auditors reporting on controls at a service organization were contained in Statement on Auditing Standards No. 70, *Service Organizations*, as amended (now superseded). SSAE No. 16 is effective for service auditor's reports for periods ending on or after June 15, 2011, with earlier implementation permitted. [Footnote added, August 2011, to reflect conforming changes necessary due to the issuance of SSAE No. 16. Footnote revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

conforming changes necessary due to the issuance of SSAE No. 16; Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

.02 Investment Allocations Testing in an Electronic Environment

Inquiry—How should the auditor test for proper investment allocation in situations where changes may be made by participants electronically, via phone or internet, on a daily basis?

Reply—Where participants make contributions or investment elections by telephone or electronic means (such as the Internet), the auditor should consider confirming the contribution percentage, source, and investment election directly with the participant, or compare that information to detail of the transaction (for example, a copy of the transaction confirmation) if maintained by the plan sponsor or service organization. Alternatively, if a service organization has a type 2 SSAE No. 16 report that provides evidence that controls over the investment allocation process were operating effectively, the auditor may place some reliance on those controls to assess the risks of material misstatement at less than maximum and thereby reduce (not eliminate) substantive testing.

See the “General Auditing Procedures” section in chapter 7 of the AICPA Audit and Accounting Guide *Employee Benefit Plans*.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature; Revised, August 2011, to reflect conforming changes necessary due to the issuance of SSAE No. 16.]

.03 Auditor’s Responsibility for Detecting Nonexempt Transactions

Inquiry—What is the auditor’s responsibility for detecting nonexempt transactions resulting from participant contributions that are not remitted to the plan within the guidelines established by DOL regulations?

Reply—An audit performed in accordance with generally accepted auditing standards (GAAS) cannot be expected to provide assurance that all party-in-interest transactions will be discovered. Nevertheless, during the audit the auditor should be aware of the possible existence of party-in-interest transactions. During the planning phase of the audit, the auditor should inquire about the existence of any party-in-interest or nonexempt transactions. If any issues relating to late remittances are brought to the auditor’s attention, the auditor may consider obtaining a schedule of employee contributions detailing payroll withholding date and date of deposit to the plan. A sample of deposits can then be traced to the supporting payroll register and wire transfer advice or check. Further, the auditor should have the client include in the management representation letter a representation that there are no party-in-interest transactions that have not been disclosed in the supplemental schedules.

.04 Nonexempt Transactions

Inquiry—If a nonexempt transaction related to the preceding is noted, is materiality of the transaction taken into consideration in determining the need for the supplemental schedule of nonexempt transactions?

Reply—There is no materiality threshold for the inclusion on the supplemental schedule. All known events must be reported.

.05 Testing of Plan Qualification Tests Prepared by TPA

Inquiry—What responsibility does the auditor have in testing plan qualification tests (for example, ACP and ADP) prepared by a client’s third-party administrator?

Reply—An audit in accordance with generally accepted auditing standards (GAAS) is not designed to ensure compliance with all legislative and regulatory provisions. However, plans must be designed and comply with certain operating tests to maintain their qualified status. If specific information comes to the auditor's attention that provides evidence concerning the existence of possible violations affecting the financial statements, the auditor should apply auditing procedures specifically directed to ascertaining whether a violation has occurred. The auditor is also expected to inquire of, and obtain representation from, management concerning compliance with laws and regulations and the prevention of violations that may cause disqualification.

.06 Audit Procedures for Plan Mergers

Inquiry—What audit procedures should be performed for material plan mergers into a plan? What audit procedures are required when the prior plan was audited? What if the prior plan was never audited?

Reply—If the prior plan was audited, the auditor should obtain the audited financial statements to ensure that the balance transferred from the prior plan reconciles to the balance that is reflected on the new plan's financial statements. Also, the auditor will generally perform procedures to ensure that participant accounts were properly set up under the new plan. If the prior plan was not audited, the auditor will generally perform audit procedures to determine that the equity that is transferred from the prior plan is reasonable based upon an analysis of historical activity. (Other audit procedures relating to plan mergers can be found in the "Plan Mergers" section in chapter 12 of AICPA Audit and Accounting Guide *Employee Benefit Plans*.)

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature.]

.07 Audit Requirements for Remaining Portion of a Split Plan

Inquiry—For the year ended December 31, 20X1, an audit was performed for AB Plan with more than 100 participants that covered two related companies (Company A and Company B). In July 20X2, Company A was sold, and the plan assets related to those participants were transferred to a new unrelated plan (Plan C). What are the audit requirements for the remaining portion of the AB Plan which, as of July 20X2, covers only employees at Company B and had fewer than 100 participants?

Reply—Audit for the AB Plan is required for the year ended December 31, 20X2, because the plan had over 100 participants at the beginning of the plan year. For the year ended December 31, 20X3, an audit of plan AB may not be required if the number of participants at January 1, 20X3, is under 100 and the plan meets the criteria for the Small Pension Plan Audit Waiver.

.08 Audit Requirements for Frozen and Terminated Plans

Inquiry—Are frozen and terminated plans that are still paying out benefits required to have an audit?

Reply—An audit is required if the plan has more than 100 participants at the beginning of the plan year. Chapter 5 of the AICPA Audit and Accounting Guide *Employee Benefit Plans*, provides guidance with regard to the definition of "participants." When a plan has been terminated or frozen, complete and prominent disclosure of the relevant circumstances is essential in all subsequent financial statements issued by the plan. If the number of participants falls below 100, auditors should consider whether the plan meets the criteria for the Small Pension Plan Audit Waiver.

For further guidance, see the “Terminating Plans” section in chapter 2 and the “Small Pension Plan Audit Waiver (SPPAW) Summary” flowchart in chapter 5 of the guide.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature.]

.09 Audit Procedures When Plan Operates in a Decentralized Environment

Inquiry—When a plan operates in a decentralized environment, what additional audit procedures should be considered?

Reply—The auditor should consider the controls at each decentralized location as well as the overall mitigating controls that may be performed on a centralized basis. Taking into consideration the materiality of the activity at each decentralized location, the auditor may choose to expand participant level and substantive testing to incorporate these decentralized locations.

.10 Is the Master Trust Required to Be Audited?

Inquiry—Is the master trust required to be audited?

Reply—While the DOL does not require the master trust to be audited, the plan administrator normally engages an auditor to report only on the financial statements of the individual plans. If the master trust is not audited, the plan auditor should perform those procedures necessary to obtain sufficient audit evidence to support the financial statement assertions as to the plan’s investments or qualify or disclaim his or her report.

[The next page is 6511.]

Section 6934

Limited-Scope Audits—Employee Benefit Plans

.01 Certifications by “Agent of”

Inquiry—Can the plan sponsor accept a certification from the plan’s recordkeeper if the recordkeeper certifies the investment information to be complete and accurate on behalf of the plan’s trustee/custodian as “agent for”?

Reply—According to the Department of Labor, such a certification generally would be acceptable if there is in fact a legal arrangement between the trustee and the recordkeeper to be able to provide the certification on the trustee’s behalf. Care should be taken by the plan administrator to obtain such legal documentation. Additionally the plan auditor might consider adding wording to the standard limited-scope report to include reference to such an arrangement. Sample language might include the following: “... any auditing procedures with respect to the information described in Note X, which was certified by ABC, Inc., the recordkeeper of the Plan as agent for XYZ Bank, the trustee of the Plan, ... We have been informed by the plan administrator that the trustee holds the Plan’s investment assets and executes investment transactions. The plan administrator has obtained a certification from the agent on behalf of the trustee, as of and for the year ended December 31, 20XX, that the information provided to the plan administrator by the agent for the trustee is complete and accurate.” The third paragraph of the report should also be modified.

.02 Limited-Scope Audit on a Portion of the Plan’s Investments

Inquiry—Is it permissible to perform a limited-scope audit on a portion of the plan’s investments but not all (some investments did not meet the DOL 29 CFR 2520.103-8 criteria for a limited-scope audit)? If yes, what form does the auditors’ report take?

Reply—Yes, it is permissible to perform a limited-scope audit on only a portion of a plan’s investments and audit the remaining investments. The auditors’ report is the same as that used for a limited-scope audit. However, the note that is referenced in the auditor report should clearly identify the investments that were not audited.

.03 Limited-Scope Audit—Plan Certifications for Master Trusts

Inquiry—If a limited-scope audit is to be performed for a plan funded under a master trust arrangement or other similar vehicle, should separate individual plan certifications from the trustee or the custodian be obtained for the allocation of the assets and the related income activity to the specific plan?

Reply—Yes, if a limited-scope audit is to be performed for a plan funded under a master trust arrangement or other similar vehicle, separate individual plan certifications from the trustee or the custodian should be obtained for the allocation of the assets and the related income activity to the specific plan.

[DOL regulation 2520.103-8]

.04 In a Limited-Scope Audit Is it Necessary to Test the Allocation of Investment Earnings at the Participant Account Level?

Inquiry—For a DOL limited-scope audit, is it necessary to test the allocation of investment earnings at the participant account level?

Reply—The testing of allocation of investment earnings at the participant level is part of the participant data testing and is recommended for a limited-scope audit.

[The next page is 6515.]

Section 6935

SSAE No. 16 Reports—Employee Benefit Plans

.01 Audit Procedures When SSAE¹ No. 16 Reports Are Not Available

Inquiry—What procedures need to be performed in an audit of a plan if the service organization does not provide the plan with a type 1 or type 2 service auditor's report,² as described in Statement on Standards for Attestation Engagements (SSAE) No. 16, *Reporting on Controls at a Service Organization* (AICPA, *Professional Standards*, AT sec. 801)?

Reply—Service organizations are not required to furnish SSAE No. 16 reports. However, this does not relieve the auditor of his or her responsibility to obtain a sufficient understanding of the plan and its environment, including components of the plan's internal control that are maintained by the service organization. This understanding enables the plan auditor to assess the risks of material misstatement of financial statement assertions affected by transactions executed by the service organization, and to design the nature, timing, and extent of further audit procedures. When an SSAE No. 16 report is not available, other sources, such as user manuals, system overviews, technical manuals, the contract between the user organization and the service organization, and reports on the service organization's controls issued by internal auditors or regulatory authorities, may provide sufficient information about the nature of the services provided by the service organization that are part of the plan's information system and the service organization's controls over those services. If both the services provided and the service organization's controls over those services are highly standardized, information obtained through the plan auditor's prior experience with the service organization may be helpful in assessing risk. The plan auditor may wish to consider the specific control objectives and selected controls outlined in exhibit B-1 of appendix B of the AICPA Accounting and Audit Guide *Employee Benefit Plans*, in obtaining his or her understanding. If the plan auditor concludes that the available information is not adequate to obtain a sufficient understanding of the service organization's controls to assess the risks of material misstatement of financial statement assertions affected by the service organization's services, consideration should be given to contacting the service organization through the user organization to obtain adequate internal control information, or request that a service auditor be engaged to perform procedures at the service organization.

¹ Statement on Standards for Attestation Engagements (SSAE) No. 16, *Reporting on Controls at a Service Organization* (AICPA, *Professional Standards*, AT sec. 801), establishes the requirements and application guidance for a service auditor reporting on controls at a service organization that are relevant to user entities' internal control over financial reporting, and also describes the contents of such reports. AU-C section 402, *Audit Considerations Relating to an Entity Using a Service Organization* (AICPA, *Professional Standards*), contains the requirements and guidance for auditors of the financial statements of entities that use a service organization. [Footnote revised, August 2011, to reflect conforming changes necessary due to the issuance of SSAE No. 16. Footnote revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

² In SSAE No. 16, a *type 1 report* is a report on management's description of a service organization's system and the suitability of the design of controls, and a *type 2 report* is a report on management's description of a service organization's system and the suitability of the design and operating effectiveness of controls. [Footnote added, August 2011, to reflect conforming changes necessary due to the issuance of SSAE No. 16.]

The level of substantive testing that should be performed depends on the amount of reliance the auditor can place on controls at the service organization. Thus, if a type 2 SSAE No. 16 report is not available, the auditor would need to increase substantive testing or consider testing controls at the service organization.

Auditing procedures applied to data maintained by the service organization may include tests of participant data, payroll data, or benefits data to determine that they agree with the information obtained and maintained by the employer. If the data is not available at the employer, consideration should be given to confirming the information directly with participants or to reviewing hard copy information obtained from the service organization, if available.

Individual participant accounts in 401(k) plans or other defined contribution pension plans should be tested for proper allocation of plan assets, contributions, income, and expenses. As such, the auditor should consider confirming contribution percentages and investment elections directly with the participants in situations where transactions are performed electronically or by phone. In addition, record keepers may maintain back up documentation of participant transactions, which may be requested as audit evidence to test participant data.

Procedures that should be considered in the audit of benefit payments, particularly those initiated by telephone or electronic methods, include confirming disbursements directly with participants, or comparing the disbursement to a transaction report if one is maintained, and testing the documentation underlying the benefit payment transactions.

For further guidance, see chapters 7 and 9–10 of the AICPA Audit and Accounting Guide *Employee Benefit Plans*.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature; Revised, June and August 2011, to reflect conforming changes necessary due to the issuance of SSAE No. 16.]

.02 Allocations Testing of Investment Earnings When a Type 2 SSAE No. 16 Report Is Available

Inquiry—In plan audits in which the auditor uses a type 2 SSAE No. 16 report, how extensively should the allocation of investment earnings at the participant level be tested? What are commonly used methods for testing this information?

Reply—In plan audits in which the plan auditor uses a type 2 SSAE No. 16 report, the extent of testing of the allocation of investment earnings at the participant level will be determined based on the plan auditor's assessment of the risk that earnings have not been allocated in accordance with the plan instrument. The type 2 SSAE No. 16 report can provide information about the service auditor's tests of the operating effectiveness of the service organization's controls over the investment allocation process and the results of those tests to help the auditor assess this risk. However, the auditor should not use the type 2 SSAE No. 16 report to completely eliminate substantive testing.

One commonly used method of testing this information is comparing the yield in the participants' accounts (selecting a sample of funds) for a certain

period of time to the yield that the plan reported as a whole (as compared to published sources) for those funds for the same period of time.

[Revised, June and August 2011, to reflect conforming changes necessary due to the issuance of SSAE No. 16.]

[The next page is 6521.]

Section 6936

Auditing Defined Contribution Plans

.01 Auditor's Responsibility for Testing a Plan's Compliance With Qualification Issues

Inquiry—What is the auditor's responsibility for testing a plan's compliance with top heavy rules, the Average Deferral Percentage Test, and other qualification issues?

Reply—An audit in accordance with generally accepted auditing standards (GAAS) is not designed to ensure compliance with all legislative and regulatory provisions. However, a plan must be designed to comply with all provisions, and must meet certain operating tests in order to maintain its qualified status. If specific information comes to the auditor's attention that provides evidence concerning the existence of possible violations of provisions that may affect the financial statements, he or she should apply auditing procedures specifically directed to ascertaining whether a violation has occurred. The auditor also is expected to inquire of, and obtain representation from, management concerning compliance with laws and regulations, and the controls in place to prevent violations of those laws and regulations that may cause the plan to lose its qualified status.

For further guidance, see chapter 11 and the "Plan Tax Status" section of chapter 12 of AICPA Audit and Accounting Guide *Employee Benefit Plans*.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature.]

.02 Merger Date for Defined Contribution Plans

Inquiry—If a defined contribution plan has an effective merger date, per the merger agreement, of December 31, 20X1, but a significant portion of the plan's assets have not been transferred as of December 31, 20X1, should the audit be done as of the December date, or when the majority of the assets were transferred? Would the answer be any different for a defined benefit plan? Would a liability representing the assets due to the acquiring plan be reflected on the statement of net assets if the audit date is December 31, 20X1?

Reply—For defined contribution plans, if there is a significant difference between the effective merger date per the merger agreement and the actual date assets were transferred, consideration should be given to performing an audit through the date of the actual transfer. However, all facts and circumstances should be considered, including management's intent, before determining the proper merger date.

For defined benefit plans, the merger typically is recorded on the effective merger date per the merger agreement because legal title to the assets, liabilities, and benefit obligations has transferred. In certain circumstances, it may be appropriate to record a liability representing the assets due the acquiring plan at year-end (for example, if the physical transfer from one plan to another has been requested and is pending).

[The next page is 6525.]

Section 6937

Auditing Defined Benefit Plans

.01 General Conditions Requiring an Audit of Pension Plan Financial Statements

Inquiry—What are the general conditions requiring an audit of pension plan financial statements?

Reply—An audit generally is required if the plan is covered under Title I of ERISA and there are over 100 participants as of the beginning of the plan year. Exhibit 5-2 in chapter 5 of the AICPA Audit and Accounting Guide *Employee Benefit Plans* provides guidance on determining who is considered a participant. In addition, DOL regulations permit plans that have between 80 and 120 participants at the beginning of the plan year to complete the Form 5500 in the same category (large plan or small plan) as was filed in the previous year.

[The next page is 6531.]

Section 6938

Auditing Health and Welfare Plans

.01 When Does a Health and Welfare Plan Require an Audit?

Inquiry—When does a health and welfare plan require an audit?

Reply—A health and welfare plan is required to have an audit when the plan has more than 100 participants at the beginning of the plan year (this can be expanded to 120 if the 80–120-participant rule applies) and the plan is funded. According to DOL Regulation 2520.104-44, the existence of a separate fund or account for the plan by the employer or a third-party administrator can cause the requirement that funds be paid directly from the general assets of the sponsor not to be met. For example, if a separate account is maintained that would be deemed to be a trust under state law, the related plan would be deemed to be funded under ERISA. It is not always easy to determine when a plan is considered funded. The auditor may wish to consult with legal counsel, plan actuaries, or the DOL to determine if a plan meets the definition of funded.

.02 Audit Requirements for Health and Welfare Plans

Inquiry—Assume a partially insured H&W plan where the employer pays claims to a certain level and then reinsurance assumes the liability. There are over 100 participants, and the employer and employees each pay a portion of the premiums. The employee's share is paid on a pretax basis through a Section 125 plan. There is no trust established, but at year end there may be a minimal payable to the third party administrator for regular monthly charges and a small reinsurance receivable, depending on timing. Does this plan require an audit?

Reply—No, the plan does not require an audit. According to the fact pattern described, no separate trust exists to hold the assets of this plan, and therefore it is not a funded plan for ERISA purposes. ERISA exempts unfunded plans from the requirement to perform an annual audit. Participant contributions made through a Section 125 cafeteria plan are not required to be held in trust per DOL Technical Release 92-1, and as long as no trust is being utilized, no audit requirement exists.

For further guidance, see the “Welfare Benefit Plans” and “PWBA Technical Release 92-1” sections in appendix A of the AICPA Audit and Accounting Guide *Employee Benefit Plans*.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature.]

.03 HIPAA Restrictions

Inquiry—In recent audits of health and welfare plans, our firm has been denied access to personnel files because of Health Insurance Portability and Accountability Act of 1996 (HIPAA) rules. In such cases, it has prohibited us from performing certain procedures necessary to render our opinion on the financial statements, such as testing of birth date, hire date, elections, and other such information. How can we overcome this obstacle?

Reply—The items mentioned (birth date, hire date, elections) are not “protected health information” (PHI) under the HIPAA rules.

PHI is individually identifiable health information that is created or received from a health care provider, health plan, employer, or health care

clearinghouse; that either identifies or can be used to identify an individual; and relates to the individual's past, present, or future physical or mental health, to the provision of health care to an individual, or to the payment for the provision of health care to the individual. In other words, there are two components to PHI: (a) the identification of an individual, and (b) health information. Identification of an individual without the corresponding health information is not PHI, nor is health information without identifying the corresponding individual to whom it relates.

The first step is to understand what information is needed for the audit and whether it constitutes PHI. If access to PHI is necessary for the audit, HIPAA regulations allow for that access.

HIPAA privacy regulations indicate that a plan sponsor may not use or disclose protected health information except as permitted or required by the regulations. The regulations permit use of the "minimum necessary" information for use in health care operations, including conducting audits. If the auditor has signed a business associate agreement with the plan sponsor, then that auditor is considered a business associate under the regulations, and access to such minimum necessary information required for the audit should not be restricted by HIPAA.

Discussion with the plan sponsor may be necessary to demonstrate that the requested information is the minimum necessary for the audit and, if such information is not obtained, would result in a disclaimer of opinion.

For more information, call the Department of Labor Office of Health Plan Standards and Compliance Assistance at (202) 693-8335, or call EBSA's toll free inquiry line at 1-866-444-EBSA (3272). Health and Human Service (HHS) also has a toll-free number dealing with HIPAA privacy related issues. That number is 1-866-627-7748. You also may wish to visit the HHS Web site, www.hhs.gov/ocr/hipaa.

.04 Is a Health and Welfare Plan Required to Be Audited if Participants Are Contributing to the Plan?

Inquiry—If participants are contributing to a health and welfare plan, is an audit required?

Reply—According to DOL Technical Release Nos. 88-1 and 92-1, participant contributions to a welfare plan that has an Internal Revenue Code (IRC) Section 125 cafeteria plan feature do not have to be held in trust. If contributions are not through a Section 125 plan and they are not used for the payment of insurance or health maintenance organization (HMO) premiums, generally, they will be required to be held in trust. If the plan is funded voluntarily or as required by DOL regulation, then the plan would require an audit.

.05 Audit Requirement When Only Medical Is Funded Through a VEBA Trust

Inquiry—If a plan offers several benefits under the plan document, and only the medical component is funded through the voluntary employees' beneficiary association (VEBA) trust, what is the audit requirement?

Reply—The reporting entity and thus the audit requirement is of the entire plan; not the trust. All benefits covered by the plan should be included in the audited financial statements.

.06 Audit of Plan When VEBA Trust Is a Pass-Through

Inquiry—If a VEBA trust is used as a pass-through for claims payment during the year, but there are no monies in the VEBA trust at year end, is an audit of the plan required?

Reply—If a plan is deemed to be funded for a part of a plan year, the entire plan year is subject to the audit requirement. All plan activity for the entire year would have to be included in the audited financial statements.

.07 When Multiple Plans Use a VEBA Trust, Can the Audit Be Performed At the Trust Level?

Inquiry—If multiple plans use a VEBA trust, can an audit be performed at the VEBA trust level?

Reply—The audit requirement is of the plan, not the trust. Each plan would require a separate audit if it individually met the audit requirement (see previous question). The auditor may be engaged to audit the VEBA trust in order to assist with the plan level allocation reporting, but this would not fulfill the plan level audit requirement.

.08 Audit Requirement for Health and Welfare Plan Funded Through a 401(h) Account

Inquiry—Does the funding of a health and welfare benefit plan through a 401(h) account, when the plan was otherwise unfunded, cause the plan to require an audit?

Reply—If the plan was otherwise unfunded, the 401(h) account association will not cause the health and welfare benefit plan to be considered funded for audit determination purposes.

[The next page is 6535.]

Section 6939

Auditor's Reports—Employee Benefit Plans

[.01] Reserved

.02 Audit Opinion to Be Issued When Discrimination Testing Has Not Been Completed

Inquiry—We have completed the audit of a plan except for reviewing the 401(k) and 401(m) discrimination testing, which has not yet been done and, quite possibly may not ever be done. If such testing is not performed, what type of audit opinion should be issued?

Reply—Independent auditors should inquire if the plan has complied with the annual limitation tests to determine if the plan has met the requirements in order to maintain its tax exempt status. Since the nondiscrimination requirements under 401(k) and 401(m) are required to be met annually, the independent auditor should understand the results of similar tests performed in the past and the reasons why the associated testing has not been performed in the current year. The auditor should be aware that any corrections, corrective distributions, or qualified nonelective contributions (QNECs) that would result from the failure of these compliance tests must be made before the end of the following plan year to preserve the plan's qualified status. If correction is to be made through refunds then a correction made within two and a half months after the plan's year end will avoid potential excise tax and preserve the plan's qualified tax status. In contrast, a refund after two and a half months triggers an excise tax payable by the plan sponsor. In the event that testing has not been completed for the year under audit, the auditor should consider the results of testing performed in the past and any corrections that were made and whether significant changes in the plan's demographics have occurred. The client should determine whether or not it is expected that a correction will be necessary, and should make an estimate for accrual purposes of the amount required for correction. Consideration should be given to modifying the tax note in the financial statements to indicate that the plan sponsor will take the necessary steps, if any, to bring the plan's operations into compliance with the Code. Similar wording also should be included in the management representation letter. If the results of the testing, when completed, are expected to be material based on similar issues in the past or discussions with the client and a correction amount cannot be reasonably estimated, the auditor should consider withholding his or her report until the testing is completed and the appropriate accruals recorded. If, however, the financial statements are issued and the client doesn't remedy or complete the tests by the next audit, the auditor should consider the effect on the financial statements as well as other implications as described in AU-C section 250, *Consideration of Laws and Regulations in an Audit of Financial Statements* (AICPA, *Professional Standards*), since the plan's tax qualified status may be in jeopardy.

For further guidance, see the "Plan Tax Status" section in chapter 12 of AICPA Audit and Accounting Guide *Employee Benefit Plans*.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature; Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

[The next page is 6551.]

Section 6940

Franchisors

.01 Method of Accounting for Sale of Territorial Franchise Right

Inquiry—A client sells territorial franchise rights to region managers for \$30,000 with ten percent taken in cash and the remainder as a note. The region manager in turn sells franchises in his territory. The note is payable at the rate of \$1,000 per franchise sold in the territory but is due in three years regardless of the number of franchises sold.

The collectibility of the notes depends on the performance of the region managers. The company has been able to resell territories of managers who have been unsuccessful, and the down payments have been refunded in these instances.

What is the proper method of accounting for these franchise fees and the related costs of selling the territories?

Reply—In discussing initial franchise fees for area franchises, Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 952-605-25-5 states, in part: “. . . revenue ordinarily shall be recognized when all material services or conditions relating to the sale(s) have been substantially performed or satisfied by the franchisor.” FASB ASC 952-605-25-2 describes substantial performance as follows:

Substantial performance for the franchisor means that all of the following conditions have been met:

- a. The franchisor has no remaining obligation or intent—by agreement, trade practice, or law—to refund any cash received or forgive any unpaid notes or receivables.
- b. Substantially all of the initial services of the franchisor required by the franchise agreement have been performed.
- c. No other material conditions or obligations related to the determination of substantial performance exist.

Therefore, the sale of the regions is not a completed transaction which would allow the recognition of income when the sale is made (for example, when the down payment and notes are received) since the company’s practice of refunding down payments to region managers and, in effect, excusing nonpayment of their notes would violate item (a).

Since payment of the notes is on the basis of specific performance (for example, at the rate of \$1,000 per franchise sold in the region), as a practical matter, a reasonable basis for recognizing deferred revenue would be over the estimated number of franchises to be opened in a region.

With regard to the costs of selling the territories, paragraphs 1–3 of FASB ASC 952-340-25 state the following:

Direct (incremental) costs relating to franchise sales for which revenue has not been recognized shall be deferred until the related revenue is recognized.

Deferred costs shall not exceed anticipated revenue less estimated additional related costs.

Costs yet to be incurred shall be accrued and charged against income no later than the period in which the related revenue is recognized . . .

Therefore, deferral and amortization of costs “incurred to produce the region sales” could be accounted for in a manner similar to the deferral and recognition

of revenue discussed in the preceding paragraph. The operating expenses of the company should be charged off as a period cost.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.02 Revenue Recognition for Franchisors

Inquiry—A franchise agreement is entered into whereby the franchisor agrees to provide to a franchisee the technical information necessary to manufacture a product. In addition, the franchisor agrees to provide consultation needed to produce the product for the next five years. The agreement states that 80 percent of the franchise fee is to be paid in the first year of the agreement, and five percent is to be paid in each of the next four years. How should the franchisor recognize the revenue from this agreement?

Reply—This issue is addressed in FASB ASC 952. FASB ASC 952-605-25-4 states that “if it is probable that the continuing fee will not cover the cost of the continuing services to be provided by the franchisor and a reasonable profit on those continuing services, then a portion of the initial franchise fee shall be deferred and amortized over the life of the franchise. The portion deferred shall be an amount sufficient to cover the estimated cost in excess of continuing franchise fees and provide a reasonable profit on the continuing services.” The FASB ASC glossary defines *continuing franchise fees* as “consideration for the continuing rights granted by the franchise agreement and for general or specific services during its life.”

In the preceding situation, it is unlikely the five percent of revenues the franchisor will receive in years two through five is sufficient to cover the costs, and a reasonable profit, on the raw materials and services provided. Therefore, the franchisor should defer a portion of the first year’s franchise fee and amortize it over the next four years at a rate that will cover costs and provide a reasonable profit.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.18 Accounting for the Issuance of Zero-Coupon Bonds and Other Deep Discount Debt by a Governmental Entity

Inquiry—A governmental entity issues zero-coupon bonds due in 10 years. Even though bond interest and principal is not due until the end of the bond's term, a sinking fund was established. When should interest expense be recognized and principal payments be deducted from the debt?

Reply—The treatment by governmental entities of the bond discount related to deep-discount debt has not been specifically addressed in authoritative literature. As discussed in *Governmental Accounting, Auditing and Financial Reporting*, by the Government Finance Officers Association, the accrual of principal and interest payments for zero-coupon bonds and other deep-discount debt is not recommended because the requirement that payments be due "early in the next year" is not met. The face amount of the debt less the discount presented as a direct deduction should be presented in the general long-term debt account group. The net value of the bonds should be accreted (the discount reduced) over the life of the bonds in the long-term debt account group. This presentation shows what amount would be payable if the debt were required to be paid today. The interest method provides an acceptable means of amortizing the discount. However, the straight line amortization method may also be used if its application would not produce amounts that differ materially from those that would be achieved if the interest method were applied.

.21 Auditor's Reports on Local Governments

Inquiry—A state law referring to the audit of local governments requires every auditor's report to state that the audit was conducted in accordance with generally accepted auditing standards and with the auditing standards prescribed by the state auditor. The law also requires the auditor's report to conform with the standard report form and to contain a reference to a report of comments and recommendations.

May a CPA include such wording in the opinion if he or she has followed the standards prescribed by the state auditor and he or she has included a report of comments and recommendations?

Reply—A CPA may state in the report that the audit has been conducted in accordance with generally accepted auditing standards and with the standards prescribed by the state treasurer if the audit was in fact conducted in accordance with these standards.

Also a CPA may include in the auditor's report a reference to a report of comments and recommendations if such a report has in fact been issued. [Amended June 1995; Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

.22 State Accounting Guide Differs From GAAP

Inquiry—Are reports on financial statements conforming to the State accounting guide requirements considered auditor's reports on special purposes financial statements in accordance with AU-C section 800, *Special Considerations—Audits of Financial Statements Prepared in Accordance With Special Purpose Frameworks* (AICPA, *Professional Standards*)?

Reply—Yes. Reports on financial statements conforming to the State accounting guide requirements are considered auditor's reports on special purposes financial statements. Paragraph .07 of AU-C section 800 states that a basis of accounting that an entity uses to comply with the requirements or financial reporting provisions of a regulatory agency to whose jurisdiction the entity is subject is a special purpose framework. Paragraph .A35 of AU-C section 800 contains illustrations of auditor's reports on special purpose financial statements. In addition, chapter 14 of *Audit and Accounting Guide State and Local Governments* discusses auditor reporting when law or regulation requires a government to prepare and file with a regulatory agency financial statements that do not constitute a complete presentation of all the financial statements required by GASB Statement No. 34, *Basic Financial Statements— and Management's Discussion and Analysis—for State and Local Governments*, but that otherwise are prepared in accordance with GAAP.

.12 Allocation of Overhead

Inquiry—A private college has many individual restricted programs funded from federal, state and private contributions. One of the programs was charged a \$97,000 overhead expense amount, with the credit going to revenue in another program. Is it appropriate under generally accepted accounting principles to record revenue based on the overhead allocation?

Reply—No, it is inappropriate. The allocation of overhead is an interprogram transaction that should not be reported as revenue of the program providing the services but rather as a reduction of expense of such program. For additional information related to this topic, see chapter 16 of Audit and Accounting Guide *Not-for-Profit Entities*.

[Amended, June 1995.]

Section 6970

Entertainment Industry

.01 Changes in Film Impairment Estimates During Quarters Within a Fiscal Year (Part I)

Inquiry—Company A produced a film that is subject to the requirements of Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 926, *Entertainment—Films*. In accordance with paragraphs 12–17 of FASB ASC 926-20-35, Company A determined at the end of the first quarter of 20X1 that the film was impaired. Company A wrote down the film’s cost basis by \$2 million, which represents the amount that the film’s net book value exceeded the film’s fair value. Company A determined the film’s fair value by using a discounted cash flow model. At the end of the second quarter of 20X1, Company A determines based on updated information that the film’s estimated net cash flows will be greater than anticipated at the end of the first quarter. Is the change in the estimated net cash flows a circumstance under FASB ASC 926 that requires Company A to restore all or a portion of the film’s cost basis that was written off in the first quarter of 20X1?

Reply—Yes. FASB ASC 926-20-35-3 requires that changes in estimates during the fiscal year be applied retroactively from the beginning of the fiscal year.

In this situation, Company A would use the new information regarding the film’s estimated net cash flows gathered in the second quarter as if it were available in the first quarter to determine what the amount of the impairment loss would have been in the first quarter. Company A would record this adjustment to the impairment loss in the second quarter. Company A also would adjust the film’s cost amortization for the first and second quarters to reflect the revised impairment loss. Company A should not restate the first quarter. In accordance with FASB ASC 926-20-35-13, the amount of the impairment write down restored cannot result in the adjusted net book value exceeding the film’s fair value at the end of the second quarter. For example, if the revised first quarter calculation indicates that the impairment loss was only \$1 million at the end of the first quarter, the actual adjustment at the end of the second quarter would be different than the \$1 million because of the effect on the film’s cost amortization using the individual-film-forecast-computation method, and possibly the film’s fair value at the end of the second quarter. In addition, restorations of impairment write downs on a film should not exceed previous impairment write downs taken on that film.

FASB ASC 270-10-45-14 requires that Company A disclose the effect of the change in estimate in the period that the change occurred. For public registrants, the Management Discussion and Analysis should address material restorations of prior impairment write downs.

Note that had the change in estimated net cash flows occurred in the subsequent fiscal year, FASB ASC 926-20-35-13 would prohibit Company A from adjusting the impairment write down taken in 20X1.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.02 Changes in Film Impairment Estimates During Quarters Within a Fiscal Year (Part II)

Inquiry—Assume the same facts in section 6970.01 with the following exception. The film's actual net cash inflow for the second quarter was as expected by Company A at the end of the first quarter. Company A, as expected, spent most of its advertising budget to promote the film during the second quarter. The film's estimated net cash inflow for subsequent periods also did not change. As a result of the advertising expenditures, using a discounted cash flow model at the end of the second quarter, the film's fair value increased from the amount determined at the end of the first quarter. Is that a circumstance under FASB ASC 926, for which Company A should restore all or a portion of the film's cost basis that was previously written off in the first quarter of 20X1?

Reply—No. In this situation the film's estimated net cash flows did not change from those used to estimate the film's fair value at the end of the first quarter. Accordingly, the guidance in FASB ASC 926-20-35-3 is not applicable.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

Section 6980

Brokers and Dealers

.01 Auditor's Report on Internal Control for Broker-Dealer [Amended]

Inquiry—Some state regulatory agencies are requesting that their name be included in the restrictive paragraph of the auditor's report on internal accounting control for broker-dealers. Because most broker-dealers must comply with Securities and Exchange Commission (SEC) regulations, the report on internal accounting control from their auditors includes a report on the additional requirements of Rule 17a-5(g) as well as a report on their study and evaluation as part of an audit. The restriction paragraph of the report illustrated in the AICPA Audit and Accounting Guide *Brokers and Dealers in Securities* appendix C therefore includes the SEC as a designated recipient of the report and reads as follows:

This report is intended solely for the information and use of the Board of Directors, management, the SEC, [*designated self-regulatory organization*], and other regulatory agencies that rely on Rule 17a-5(g) under the Securities Exchange Act of 1934 in their regulation of registered brokers and dealers, and should not be used for any other purpose.

One state agency suggested revising the paragraph to reflect other agencies as recipients as follows:

This report is intended solely for the information and use of the Board of Directors, management, the SEC, [*designated self-regulatory organization*], and other regulatory agencies and should not be used for any other purpose.

Is this proposed revised wording appropriate in view of the fact that not all regulatory agencies use the SEC's Rule 17a-5(g) criteria or other established criteria for the evaluation of the adequacy of internal accounting control procedures for their purposes?

Reply—No. The previous suggested wording is not appropriate because the report would then be distributable to all other non-SEC regulatory agencies, and as stated, most agencies, including those of the 50 states, do not establish criteria in reasonable detail and in terms susceptible to objective application for the auditor's study, evaluation and report on the control procedures for the agencies' purposes.

Common Interest Realty Associations

.01 Personal Property of Timeshares

Inquiry—Should a common interest realty association (CIRA) that is a timeshare development report as assets personal property that it owns and uses as internal unit furnishings for timeshare units?

Reply—Yes. Financial Accounting Standards Board *Accounting Standards Codification* 972-360-25-5 states, “Common interest realty associations shall recognize common personal property, such as furnishings, recreational equipment, maintenance equipment, and work vehicles, that is used by the common interest realty association in operating, preserving, maintaining, repairing, and replacing common property and providing other services, as assets.” Personal property that is owned by a CIRA and used as internal unit furnishings for timeshare units is common personal property that is used by the CIRA in providing other services.

Section 6995

Credit Unions

.01 Financial Reporting Issues Related to Actions Taken by the National Credit Union Administration on January 28, 2009 in Connection With the Corporate Credit Union System and the National Credit Union Share Insurance Fund

Inquiry—On January 28, 2009, the National Credit Union Administration (NCUA) announced certain actions it was taking to stabilize the corporate credit union system. The NCUA indicated that the expense of the actions would be passed on proportionately to all federally-insured credit unions through the partial (currently estimated by NCUA to be 51 percent) write-off of such credit unions' existing deposits with the National Credit Union Share Insurance Fund (NCUSIF), as well as the assessment of an insurance premium sufficient to return the NCUSIF's equity to insured shares ratio to 1.30 percent.

Federally insured credit unions (including corporate credit unions) are required to maintain a refundable deposit with the NCUSIF in an amount equal to one percent of the credit union's total insured shares. The amount on deposit in the insurance fund is periodically adjusted for changes in the balance of a credit union's insured shares. In addition, a credit union is required to pay an additional annual insurance premium equal to one-twelfth of one percent of its insured shares.

Credit unions also have their own financial system, the Corporate Credit Union Network, consisting of the U.S. Central Federal Credit Union (USC) and its member corporate credit unions. These state or regional corporate credit unions make available a wide range of investments and correspondent financial services for credit unions, and the USC serves as a financial intermediary for corporate credit unions. The USC and many of the corporate credit unions made investments in asset-backed securities that became impaired during 2008.

In a letter to federally-insured credit unions (NCUA Letter No. 09-CU-02) issued on January 28, 2009, the NCUA stated that the corporate credit union system is now facing unprecedented strains on its liquidity and capital due to credit market disruptions and the current economic climate, and that given the importance of the USC as a liquidity and payment systems provider to both corporate credit unions and, by extension, natural person credit unions, NCUA is taking decisive action to stabilize the USC's financial position and provide stability for the liquidity needs of the corporate system. In the letter, the NCUA announced two significant actions it was taking to address the current status of the corporate credit union system, as follows:

- The NCUA is injecting \$1 billion in cash from the NCUSIF into the USC in the form of capital. The NCUA has stated that while a capital infusion has cost implications for all credit unions, it is a lower cost alternative than liquidation and sale of the distressed securities held by the USC in today's market. The staff notes that in the *unaudited* January 2009 financial statements of the NCUSIF, this investment in the USC was immediately written off.
- The NCUA is offering a voluntary temporary NCUSIF guarantee of member shares in corporate credit unions through December 31, 2010. The guarantee will cover all shares, but does not include paid-in capital and membership capital accounts. The NCUA believes the guarantee

helps provide stability to meet the liquidity needs of the corporate system, which will allow for the orderly pay down of stressed securities and, in turn, reduces the overall resolution cost. The NCUA's initial estimate of the liability attributable to this guarantee is \$3.7 billion, based on current corporate credit union balance sheets (that is, the holdings of impaired asset-backed securities) and the modeling of various market scenarios. The NCUA has indicated that this estimate could change significantly depending on a host of factors including, but not limited to, credit loss estimates.

In consideration of AU-C section 560, *Subsequent Events and Subsequently Discovered Facts* (AICPA, *Professional Standards*), do the actions of the NCUA with regard to the valuation of a federally-insured credit union's NCUSIF deposit at December 31, 2008, constitute a subsequent event that provides evidence of conditions that existed at the date of the financial statements (commonly referred to as a "type 1" subsequent event), or of conditions that arose after the date of the financial statements (commonly referred to as a "type 2" subsequent event)? Secondly, when and how should the obligation for the insurance premium be recognized for financial reporting purposes?

Reply—

Issue 1: NCUSIF Deposit. The AICPA staff believes that there is diversity in opinion on this issue and based on the facts known at the time this question and answer was issued, the staff does not express a preference for either of the views discussed in the following paragraphs.

Existing authoritative guidance for the accounting for the NCUSIF deposit is in Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 942-325-25-3, which states the following:

For credit unions and corporate credit unions, amounts deposited with the National Credit Union Share Insurance Fund shall be accounted for and reported as assets as long as such amounts are fully refundable.

FASB ASC 942-325-35-4 further states the following:

The refundability of National Credit Union Share Insurance Fund deposits shall be reviewed for impairment. When the refundability of a deposit is evaluated, the financial condition of both the credit union and of the National Credit Union Share Insurance Fund shall be considered. Deposits may be returned to solvent credit unions for a number of reasons, including termination of insurance coverage, conversion to insurance coverage from another source, or transfer of operations of the insurance fund from the National Credit Union Administration Board. However, insolvent or bankrupt credit unions shall not be entitled to a return of their deposits. To the extent that National Credit Union Share Insurance Fund deposits are not refundable, they shall be charged to expense in the period in which the deposits are made or the assets become impaired.

- Alternative A—Type 1 Subsequent Event

AU-C section 560 addresses the auditor's responsibilities relating to subsequent events occurring between the date of the financial statements and the date of the auditor's report that require adjustment of, or disclosure in, the financial statements. AU-C section 560 describes one type of subsequent event as an event that provides evidence of conditions that existed at the date of the financial statements.

Proponents of type 1 subsequent event accounting maintain that the actions taken by the NCUA on January 28, 2009 constitute additional evidence regarding strained liquidity and capital deterioration conditions

that existed at December 31, 2008, and that the NCUA announcement on January 28, 2009 of the partial write-off of the NCUSIF deposit is a confirmation of those conditions at December 31, 2008.

Proponents of this view also believe that Emerging Issues Task Force (EITF) Issue No. 87-22, "Prepayments to the Secondary Reserve of the FSLIC," addresses a situation that may be considered relevant. Similar to the NCUSIF, the Federal Savings and Loan Insurance Corporation (FSLIC) required insured institutions to make annual prepayments of their regular future insurance premiums. In May 1987, the Federal Home Loan Bank Board eliminated the secondary reserve of the FSLIC as of December 31, 1986. The Task Force reached a consensus that the impairment of the secondary reserve of the FSLIC was a type 1 subsequent event.

- **Alternative B—Type 2 Subsequent Event**

AU-C section 560 describes a second type of subsequent event as an event that provides evidence of conditions that arose after the date of the financial statements.

Proponents of type 2 subsequent event accounting refer to the NCUA's disclosures that it had no obligation to undertake the actions approved on January 28, 2009, and that the NCUSIF deposits were refundable under the circumstances noted in FASB ASC 942-325-25 and FASB ASC 942-325-35 until January 28, 2009. As such, proponents of this view believe that the NCUSIF deposits did not become impaired until January 28, 2009.

Proponents of this view also believe that EITF Topic No. D-47, "Accounting for the Refund of Bank Insurance Fund and Savings Association Insurance Fund Premiums," in which the Financial Accounting Standards Board (FASB) staff expressed their belief that insured institutions should not accrue a liability for a potential special assessment of deposit insurance premium until the period in which any proposed legislation is enacted, can be used by analogy to support their view regarding the NCUSIF deposit.

Issue 2: Premium Assessment.

- **View A—Record in 2009.** Proponents of this view support recognition of the obligation to pay the insurance premium when assessed, at January 28, 2009, and refer to FASB ASC 942-325-35-4(c), which states that to the extent that the NCUA Board assesses premiums to cover prior operating losses of the insurance fund or to increase the fund balance to "normal operating levels," credit unions should expense those premiums when assessed.

Further reference is made to the aforementioned EITF Topic No. D-47, in which the FASB staff expressed their belief that insured institutions should not accrue a liability for a potential special assessment of deposit insurance premium until the period in which any proposed legislation is enacted.

- **View B—Record in 2008.** If NCUSIF deposit impairment is recognized in 2008, proponents of view B believe that both the NCUSIF deposit impairment and the additional premium assessment relate to the same event and conditions that caused the deposit impairment that existed at December 31, 2008, and that both should be recorded as of December 31, 2008.

[Issue Date: March 2009; Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.02 Evaluation of Capital Investments in Corporate Credit Unions for Other-Than-Temporary Impairment

Inquiry—In a letter to its shareholders on February 2, 2009, the U.S. Central Federal Credit Union (USC) explained its financial position to other corporate credit unions that have direct capital investments in the USC in the form of membership capital shares (MCS) and paid-in capital (PIC). The letter also explained that on December 31, 2008, \$450 million of members' MCS were converted to a new form of capital, paid-in capital II (PIC II). On January 28, 2009, the USC announced that it would record other-than-temporary impairment (OTTI) charges of approximately \$1.2 billion for 2008 in relation to its portfolio of asset-backed securities as a result of severe deterioration in economic and market data during the fourth quarter of 2008, and that this charge resulted in an accumulated deficit (negative retained earnings) for the USC of approximately \$493 million. The staff notes that audited financial statements of the USC as of and for the year ended December 31, 2008 were not available at the time of issuance of this question and answer. On January 28, 2009, the National Credit Union Administration (NCUA) announced that it was injecting \$1.0 billion from the National Credit Union Share Insurance Fund (NCUSIF) in the form of new PIC to the USC, which is senior to all other forms of USC capital. The staff notes that in the *unaudited* January 2009 financial statements of the NCUSIF, this investment in the USC was immediately written off.

According to the NCUA Rules and Regulations, *membership capital* means funds contributed by members that are

- adjustable balance with a minimum withdrawal notice of three years or are term certificates with a minimum term of three years.
- available to cover losses that exceed retained earnings and PIC.
- not insured by the NCUSIF or other share or deposit insurers.
- cannot be pledged against borrowings.

Paid-in capital means accounts or other interests of a corporate credit union that are

- perpetual, noncumulative dividend accounts.
- available to cover losses that exceed retained earnings.
- not insured by the NCUSIF or other share or deposit insurers.
- cannot be pledged against borrowings.

How should a corporate credit union evaluate its MCS and PIC in the USC for OTTI at December 31, 2008? Similarly, how should a natural person credit union evaluate its MCS and PIC investments in other corporate credit unions for OTTI at December 31, 2008?

Reply—The staff believes the following authoritative literature is helpful in making that evaluation.

FASB ASC 320, *Investments—Debt and Equity Securities*, addresses equity securities that have readily determinable fair values. As there is no active market for MCS or PIC investments, FASB ASC 320 would not apply. FASB ASC 323, *Investments—Equity Method and Joint Ventures*, generally requires

that investments in common stock that result in the investor having the ability to exert significant influence over the issuer be accounted for using the equity method. Otherwise, the cost method would apply. FASB ASC 323 also indicates that a series of operating losses of an investee or other factors may indicate that a decrease in value of the investment has occurred, which is other than temporary and should accordingly be recognized, and reference is then made to FASB ASC 320. MCS and PIC do not represent common stock investments; however, the concepts of FASB ASC 323 can be considered. According to the aforementioned USC letter to corporate credit unions, the ownership of MCS or PIC, or both, by any particular corporate credit union would not provide it the opportunity to exert significant influence over the USC, particularly given “one member, one vote.” As such, it appears appropriate to consider investments in MCS and PIC cost method equity investments and that evaluation for impairment by corporate credit unions is required.

Although FASB ASC 320 does not specifically apply to MCS and PIC, FASB ASC 320 addresses issues of impairment and includes within its scope cost method equity investments. FASB ASC 958-325-35-8 states that the guidance in this Subtopic is applicable for investments in equity securities that are not subject to the scope of FASB ASC 320 and not accounted for under the equity method pursuant to FASB ASC 958-810-05-5. FASB ASC 320-10-35-25 provides guidance on how to determine impairment on such cost-basis investments without readily determinable fair values.

Step 1 of the impairment framework detailed in paragraphs 20–29 of FASB ASC 320-10-35 requires an investor to determine whether or not the fair value of the investment is less than its cost basis. FASB ASC 320-10-35-25 regarding cost-method investments (that have no readily determinable fair value) states the following:

Because the fair value of cost-method investments is not readily determinable, the evaluation of whether an investment is impaired shall be determined as follows:

- a. If an entity has estimated the fair value of a cost-method investment (for example, for disclosure under Section 825-10-50, that estimate shall be used to determine if the investment is impaired for the reporting periods in which the entity estimates fair value. If the fair value of the investment is less than its cost, proceed to Step 2.
- b. For reporting periods in which an entity has not estimated the fair value of a cost-method investment, the entity shall evaluate whether an event or change in circumstances has occurred in that period that may have a significant adverse effect on the fair value of the investment (an impairment indicator).

FASB ASC 320-10-35-27 further states the following:

Impairment indicators include, but are not limited to:

- a. A significant deterioration in the earnings performance, credit rating, asset quality, or business prospects of the investee
- b. A significant adverse change in the regulatory, economic, or technological environment of the investee
- c. A significant adverse change in the general market condition of either the geographic area or the industry in which the investee operates

- d. A bona fide offer to purchase (whether solicited or unsolicited), an offer by the investee to sell, or a completed auction process for the same or similar security for an amount less than the cost of the investment
- e. Factors that raise significant concerns about the investee's ability to continue as a going concern, such as negative cash flows from operations, working capital deficiencies, or noncompliance with statutory capital requirements or debt covenants.

FASB ASC glossary defines *fair value* as "the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date." The staff understands that, in practice, fair value disclosures under FASB ASC 825-10-50 for MCS and PIC have generally reflected redemption values (at par), and have recognized that such investments were interest-earning at assumed market rates of interest. This is similar to historical fair value disclosures for investments in Federal Home Loan Bank stock.

FASB ASC 320-10-35-30 states the following:

When the fair value of an investment is less than its cost at the balance sheet date of the reporting period for which impairment is assessed, the impairment is either temporary or other than temporary. An entity shall apply the following guidance and other guidance that is pertinent to the determination of whether an impairment is other than temporary, such as the guidance in Section 325-40-35, as applicable. *Other than temporary* does not mean permanent.

The staff notes that entities holding MSC or PIC should first determine whether fair values are believed to be less than the cost bases of the respective holdings at the balance sheet date. If so, such impairment is assessed as either temporary or other than temporary. In this regard, SEC Staff Accounting Bulletin Topic 5M indicates the following:

The value of investments in marketable securities classified as either available-for-sale or held-to-maturity may decline for various reasons. The market price may be affected by general market conditions which reflect prospects for the economy as a whole or by specific information pertaining to an industry or an individual company. Such declines require further investigation by management. Acting upon the premise that a write-down may be required, management should consider all available evidence to evaluate the realizable value of its investment.

There are numerous factors to be considered in such an evaluation and their relative significance will vary from case to case. The staff believes that the following are only a few examples of the factors which, individually or in combination, indicate that a decline is other than temporary and that a write-down of the carrying value is required:

- a. The length of the time and the extent to which the market value has been less than cost;
- b. The financial condition and near-term prospects of the issuer, including any specific events which may influence the operations of the issuer such as changes in technology that may impair the earnings potential of the investment or the discontinuance of a segment of the business that may affect the future earnings potential; or

- c. The intent and ability of the holder to retain its investment in the issuer for a period of time sufficient to allow for any anticipated recovery in market value.

Unless evidence exists to support a realizable value equal to or greater than the carrying value of the investment, a write-down to fair value accounted for as a realized loss should be recorded. In accordance with the guidance of paragraph 16 of Statement 115, such loss should be recognized in the determination of net income of the period in which it occurs and the written down value of the investment in the company becomes the new cost basis of the investment.

Accordingly, investors should consider an evaluation of the financial position of the USC and its ability to redeem the MSC or PIC within anticipated time frames. The staff believes the audited financial statements of the USC as of and for the year ended December 31, 2008 would be useful evidence to appropriately evaluate MSC or PIC for other-than-temporary impairment. The evaluation for impairment should consider the specific facts and circumstances, including consideration of the regulatory capital requirements of the USC. However, the staff does not believe that regulatory capital requirements should be the primary consideration for assessing whether impairment is other than temporary. As noted earlier in this question and answer, the NCUSIF has immediately written off the investment in the USC. The staff believes this action by the NCUSIF should be considered in the assessment of whether impairment is deemed to be other than temporary.

The staff also notes that a natural person credit union that invests in a corporate credit union whose direct investment may be impaired, should evaluate that investment for other-than-temporary impairment using the same guidance noted earlier. The staff notes that the evaluation for impairment in any of these cases should be determined in view of the specific facts and circumstances.

Section 7200

Partnerships

.01 Balance Sheet Presentation of Drawings in Excess of Capital Contributions

Inquiry—Two partners each contributed capital of \$100 to form a partnership for the construction of a shopping center. The partnership has obtained several loans to fund the construction, but no payments on these loans are due for two years. The partners each withdrew excess funds of \$50,000 from the partnership out of the proceeds of the loans.

How would the balance sheet show the \$200 of capital and \$100,000 of withdrawals?

Reply—Whether the \$50,000 payments to the partners are permissible depends on the terms of the construction loan commitment. If the partnership agreement is silent concerning these payments, and they are, in fact, not loans to the partners, the \$50,000 withdrawn by each partner represents drawings in anticipation of profits. As drawing accounts, they would normally be closed to the partners' capital accounts. In the situation presented, it would result in a "negative" capital account for each partner in the amount of \$49,900 in the partners' equity section of the balance sheet. Full disclosure of the circumstances causing the negative balance should also be included.

.02 Provision for Income Taxes on Partnership Income

Inquiry—A partnership agreement provides that in computing net profits, there will be a provision for income taxes, and the amount of the provision for income taxes will be considered an expense of the partnership. In the preparation of the income statement, would the net profit figure after income taxes be considered as having been determined according to generally accepted accounting principles?

Reply—Between themselves, partners may agree to compute net profits in any fashion they wish; but for financial presentation purposes, a provision for income taxes should not be set up. The absence of this item in the financial statement can be explained in the form of a footnote to the income statement. If the income statement shows a net profit figure after income taxes, the statement is not prepared in accordance with generally accepted accounting principles.

[.07] Reserved

.08 Income Allocation of Limited Partnership

Inquiry—A real estate limited partnership allocates the depreciation deduction entirely to the limited partners in accordance with the provisions of the partnership agreement. This is done in order to induce investment in the venture by the limited partners. Would such an allocation in the financial statements conform with generally accepted accounting principles (GAAP)?

Reply—Yes. Allocation of partnership income is determined by the partnership agreement. Therefore, in computing the income allocable to the limited and general partners, the depreciation deduction may be allocated entirely to the limited partners, in financial statements prepared in accordance with GAAP.

.06 Exchange of Interest Bearing Note for Non-Interest Bearing Note

Inquiry—Corporation A has an interest bearing note receivable from an officer/shareholder. Corporation A plans to exchange the present note for a non-interest bearing note. Should the non-interest bearing note be discounted in accordance with Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 835, *Interest*?

Reply—Yes. The non-interest bearing note should be discounted in accordance with FASB ASC 835, and there should be recognition of compensation or a dividend distribution, depending on what the unstated right or privilege represents.

Section 8100

Generally Accepted Auditing Standards

.01 Determining the Effective Date of a New Statement on Auditing Standards for Audits of a Single Financial Statement

Inquiry—The Auditing Standards Board issues a Statement on Auditing Standards (SAS) and the effective date is as follows: “This standard is effective for audits of financial statements for periods beginning on or after December 15, 2006.” If an auditor is engaged to perform an audit of only the balance sheet as of December 31, 2006, would the new standard be effective?

Reply—In determining whether the standard is effective to an audit of a single statement, the auditor needs to determine whether the standard would be effective if the auditor was engaged to audit the entity’s complete set of financial statements. If the standard would be effective when auditing a complete set of financial statements, the standard is effective when auditing a single statement. If the standard would not be effective when auditing a complete set of financial statements, the standard is not effective when auditing a single statement. To illustrate, refer to the following examples:

Example 1—Entity’s year began January 1, 2006, and ends December 31, 2006; would the standard apply to an audit of only the balance sheet as of December 31, 2006?

No, because the standard is not effective until periods beginning on or after December 15, 2006. Because the standard would not be effective if engaged to audit the complete set of financial statements, the standard is not effective if engaged to audit only the balance sheet.

Example 2—Entity’s year begins November 1, 2006, and ends October 31, 2007; would the standard apply to an audit of only the balance sheet as of June 30, 2007 (or as of any date during their year)?

No, for same reason as stated in Example 1.

Example 3—Entity’s year begins December 25, 2006, and ends December 21, 2007 (52–53 weeks); would the standard be effective if the auditor is engaged to audit only the balance sheet as of December 31, 2006?

Yes, because the fiscal period began after December 15, 2006, the standard would be effective if engaged to audit a complete set of financial statements for this period. Therefore, the standard is effective for an audit of the balance sheet only.

Example 4—Entity’s year begins January 1, 2007, and ends December 31, 2007; would the standard be effective if the auditor is engaged to audit only the balance sheet as of January 31, 2007?

Yes, for the same reason as stated in Example 3.

.02 Determining the Effective Date of a New Statement of Auditing Standards for Audits of Interim Periods

Inquiry—The Auditing Standards Board issues a SAS and the effective date is as follows: “This standard is effective for audits of financial statements for periods beginning on or after December 15, 2006.” If an auditor is engaged to perform an “interim audit” of an entity’s financial statements, would the standard apply?

Reply—The auditor would refer to the entity's normal fiscal year to determine whether the standard is effective. To illustrate, refer to the following examples:

Example 1—Entity's year begins January 1, 2007. The standard would be effective for an audit of financial statements for the three-month period ending March 31, 2007, because the interim period began after December 15, 2006.

Example 2—Entity's year begins October 1, 2006. The standard would not be effective for an audit of financial statements for the six-month period ending March 31, 2007, because the interim period began prior to December 15, 2006.

.03 Using Current Auditing Standards for Audits of Prior Periods

Inquiry—An auditor is engaged to perform an audit of financial statements that are as of or for a period that ended prior to the effective date of the clarified auditing standards. May an auditor use the clarified auditing standards that are currently effective at the time the audit is performed even though the standards were not effective for that prior period?

Reply—Yes. Because the clarified auditing standards are now effective and comprise auditing standards generally accepted in the United States of America (GAAS), the auditor may perform and report on an entity's prior period financial statements using the clarified auditing standards. The auditor's documentation should indicate whether the auditor followed GAAS currently in effect or whether the auditor followed GAAS that existed for the period under audit.

[Issue Date: December 2013.]

[The next page is 8371.]

Section 8200

Internal Control

.01 [Reserved]

.02 Determining Accuracy of Cash Collections for Coin-Operated Machines

Inquiry—How can the accuracy of the cash collections be determined for a chain of laundromats with several thousand machines? The coin-operated machines do not employ the use of meters, counters, locked boxes, or any other devices that would provide a basis for control.

Reply—One method to determine if the machines' receipts are being surrendered intact is to occasionally fill selected coin-operated machines with marked coins. The subsequent collections can then be reviewed to make sure the same coins have been turned in. It may also be possible to correlate revenues with consumption of water and electricity by these machines. Furthermore, it may be possible to determine the expected revenues from an installation and the extent to which the machines are being used by observation of the activities of selected installations.

.03 [Reserved]

.04 [Reserved]

.05 Testing the Operating Effectiveness of Internal Control

Inquiry—Where the auditor anticipates the entity may not have effective internal control, does AU-C section 315, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*), require the auditor to obtain an understanding of internal control even if the auditor intends to design a substantive audit approach and not rely on controls?

Reply—Yes. Paragraph .13 of AU-C section 315 states

The auditor should obtain an understanding of internal control relevant to the audit. Although most controls relevant to the audit are likely to relate to financial reporting, not all controls that relate to financial reporting are relevant to the audit. It is a matter of the auditor's professional judgment whether a control, individually or in combination with others, is relevant to the audit.^[1]

Paragraph .14 of AU-C section 315 further states

When obtaining an understanding of controls that are relevant to the audit, the auditor should evaluate the design of those controls and determine whether they have been implemented by performing procedures in addition to inquiry of the entity's personnel.

The nature and extent of the auditor's understanding of relevant controls is described in paragraph .A68 of AU-C section 315, which states

Evaluating the design of a control involves considering whether the control, individually or in combination with other controls, is capable of effectively preventing, or detecting and correcting, material misstatements. Implementation of a control means that the control exists and that the entity is

^[1] [Footnote deleted, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

using it. Assessing the implementation of a control that is not effectively designed is of little use, and so the design of a control is considered first. An improperly designed control may represent a significant deficiency or material weakness in the entity's internal control.

When the auditor believes, based on the understanding of controls, that controls are capable of effectively preventing or detecting and correcting material misstatements at the assertion level, the auditor may initially assess control risk at a low level during the risk assessment phase of the audit. This initial assessment of control risk is subject to the satisfactory results of the tests of the operating effectiveness of those controls to support that control risk assessment. Whether an auditor initially assesses control risk at a low level, and the degree thereof, is a matter of professional judgment.

In contrast, when the auditor believes, based on the understanding of controls, that controls are not capable of preventing or detecting and correcting material misstatements, the auditor would assess control risk as high, and the auditor would plan and perform substantive procedures to appropriately respond to the identified risks. In this situation, the auditor may identify missing or ineffective controls. The auditor is required to evaluate identified control deficiencies and determine whether these deficiencies, individually or in combination, are significant deficiencies or material weaknesses. Control deficiencies identified during the audit that upon evaluation are considered significant deficiencies or material weaknesses under this section should be communicated in writing to management and those charged with governance.² Also, in this circumstance, the auditor needs to be satisfied that performing substantive procedures alone would enable the auditor to design and perform an appropriate audit strategy and provide sufficient appropriate audit evidence to support his or her audit opinion.

[Issue Date: February 2008; Revised, January 2010, to reflect conforming changes necessary due to the issuance of SAS No. 115; Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

.06 The Meaning of Expectation That the Controls Are Operating Effectively

Inquiry—Paragraph .08 of AU-C section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained* (AICPA, *Professional Standards*), requires the auditor to design and perform tests of controls to obtain sufficient appropriate audit evidence about the operating effectiveness of relevant controls if the auditor's assessment of risks of material misstatement at the relevant assertion level includes an expectation that the controls are operating effectively or if substantive procedures alone cannot provide sufficient appropriate audit evidence at the relevant assertion level. What does *expectation that the controls are operating effectively* mean?

Reply—The phrase *expectation that the controls are operating effectively* means that the auditor's understanding of the five components of internal control has enabled him or her to initially assess control risk at a low level, and the auditor's strategy contemplates a combined approach of designing and performing tests of controls and substantive procedures. As stated above, the auditor's initial assessment of control risk is preliminary and subject to the satisfactory results of the tests of the operating effectiveness of those controls.

² See AU-C section 265, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*). [Footnote revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

[Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

.07 Considering a Substantive Audit Strategy

Inquiry—Paragraph .A4 of AU-C section 330 states, in part

The auditor may determine that performing only substantive procedures is appropriate for particular assertions, and therefore, the auditor excludes the effect of controls from the relevant risk assessment. This may be because the auditor's risk assessment procedures have not identified any effective controls relevant to the assertion or because testing controls would be inefficient, and therefore, the auditor does not intend to rely on the operating effectiveness of controls in determining the nature, timing, and extent of substantive procedures.

Does this mean that an all substantive audit approach may be followed even if the auditor's understanding of internal control causes him or her to believe that controls are designed effectively?

Reply—Yes. After the auditor identifies and assesses the risks of material misstatement, the auditor's decision about whether to test the operating effectiveness of controls may be considered within a cost-benefit framework. If the auditor believes that the benefit of testing control operating effectiveness—both in terms of audit efficiency and effectiveness—is less than the cost of testing controls, the auditor may be inclined to adopt an audit strategy (or modify a preliminary strategy) that excludes testing controls. If testing the operating effectiveness of controls would not be effective or efficient, it will then be necessary to perform substantive procedures that respond to the assessed risks for specific assertions.

However, even in smaller entities, there may be well-designed controls that are operating effectively. For example, there may be controls over revenues that, if tested, could reduce the extent of substantive procedures.

The extent of substantive testing cannot be reduced based on the premise of effective controls, unless the effective operation of such controls has been tested.

[Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

.08 Obtaining an Understanding of the Control Environment

Inquiry—In smaller entities, the control environment might be less formal than larger entities. Is the auditor required to obtain an understanding of these less formal controls, and when do these controls need to be tested?

Reply—AU-C section 315 addresses the auditor's responsibility to identify and assess the risks of material misstatement in the financial statements through understanding the entity and its environment, including the entity's internal control as described in *Internal Control—Integrated Framework*, published by the Committee of Sponsoring Organizations of the Treadway Commission. This includes obtaining a sufficient understanding of the design of controls such as those that are part of the control environment to evaluate the design of controls relevant to an audit of financial statements and to determine whether they have been implemented.

Even in audits of smaller entities, auditors may rely on the control environment to determine the nature, timing, and extent of further auditor

procedures. If an auditor chooses to rely on these controls, then the auditor is presumptively required³ to test those controls.⁴

It is preferable to evaluate the control environment early on in the audit process. This is because the results of the auditor's evaluation of these controls could affect the nature, timing, and extent of other planned audit procedures. For example, weaknesses in the control environment may undermine the effectiveness of other control components and, therefore, be negative factors in the auditor's assessment of the risks of material misstatement, in particular in relation to the risks of fraud.

[Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

.09 Assessing Inherent Risk

Inquiry—Paragraph .14 of AU-C section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards* (AICPA, *Professional Standards*), defines *inherent risk* as “the susceptibility of an assertion about a class of transaction, account balance, or disclosure to a misstatement that could be material, either individually or when aggregated with other misstatements, before consideration of any related controls.” In situations in which the auditor's methodology makes separate assessments of inherent risk and control risk, does this mean that an auditor can ignore the assessment of control risk in his or her assessment of the combined risks of material misstatement if inherent risk is assessed as low?

Reply—No. Paragraph .26 of AU-C section 315 states, in part

To provide a basis for designing and performing further audit procedures, the auditor should identify and assess the risks of material misstatement at^[5]

- b. the relevant assertion level for classes of transactions, account balances, and disclosures.

Because an auditor is required to assess the combined risk of material misstatement, an auditor can not ignore control risk regardless of his or her assessment of inherent risk. While auditing standards do not require separate assessments to be performed, they do require an assessment of risk of material misstatement that includes control risk.

While not required by generally accepted auditing standards, some audit methodologies may express the assessment of inherent risk in quantitative terms (for example, percentages) or nonquantitative terms (for example, high, medium, or low). Because the definition of *inherent risk* excludes the effect of any related controls, the auditor's assessment of inherent risk should exclude the effect of any related controls. Therefore, if an auditor assesses inherent risk as low, an auditor has to be careful whether his or her judgment was influenced by the effect of certain controls.

³ See paragraph .08 of AU-C section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained* (AICPA, *Professional Standards*). [Footnote revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

⁴ Chapter 4 of the AICPA Audit Guide *Assessing and Responding to Audit Risk in a Financial Statement Audit* provides further guidance about obtaining an understanding of the entity and its environment, including its internal control, and about evaluating and testing entity level controls, including the control environment.

^[5] [Footnote deleted, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

For example, assume an auditor is auditing a balance sheet account that the auditor expects to have only one adjustment per month posted to it. The auditor believes that the monthly adjustment is relatively easy to calculate. Assume further that the auditor's methodology calls for the auditor, as part of performing risk assessment procedures, to assess inherent risk at the assertion level as high, medium, or low. The auditor assesses the susceptibility of inherent risk as low because the auditor believes that the amount is relatively easy to calculate, but also partially because the auditor has not identified a misstatement in this account in prior year audits and believes that the bookkeeper is capable of recording the correct monthly amount.

In this example, the auditor's professional judgment as to the assessment of inherent risk was influenced by the auditor's belief that the bookkeeper is competent and has never made an error in prior years in posting the monthly adjustment. As a result, the auditor's assessment of inherent risk did not assume that there are no controls because there are some controls in place that the bookkeeper applies in making his or her monthly adjustment.

Therefore, an auditor has to be careful when assessing inherent risk as "low" because the auditor may be assuming that certain basic controls are in place and operating effectively. In such cases, the auditor may actually be making a combined assessment of the risks of material misstatement rather than assessing only inherent risk.

As discussed in section 8200.05, *Testing the Operating Effectiveness of Internal Control*, an initial assessment of effective controls (even a basic control) is subject to the satisfactory results of the tests of the operating effectiveness of those controls.

[Issue Date: March 2008; Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

.10 Assessing Control Risk

Inquiry—Is defaulting to a high control risk level still permitted under AU-C section 315?

Reply—No. AU-C section 315 addresses the auditor's responsibility to identify and assess the risks of material misstatement in the financial statements through understanding the entity and its environment, including the entity's internal control. As the auditor obtains that understanding, the auditor may identify material weaknesses in the design of controls and, as a result, end up assessing control risk as high for some financial statement accounts and relevant assertions. Also, as discussed in section 8200.07, "Considering a Substantive Audit Strategy," after identifying and assessing the risk of material misstatement at the assertion level, the auditor may adopt a substantive audit strategy. In this circumstance, the auditor may assess control risk as high. Finally, the auditor might initially assess control risk at low level only to find out later, after testing the operating effectiveness of controls, that controls were not effective and would then reassess control risk as high.^[6]

[Issue Date: March 2008; Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

^[6] [Footnote deleted, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

.11 Ineffective Controls

Inquiry—If, based on his or her knowledge of the entity, an auditor believes, in advance of performing risk assessment procedures, that controls over financial reporting are nonexistent or ineffective, could the evaluation and documentation of such controls (including the walkthrough) be skipped?

Reply—No. AU-C section 315 requires the auditor to obtain an understanding of internal control relevant to the audit, and to evaluate the design of those controls and determine whether they have been implemented. In addition, AU-C section 315 requires auditors to identify and assess the risks of material misstatement at the relevant assertion level as the basis for designing and performing further audit procedures.

[Issue Date: March 2008; Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

.12 Use of Walkthroughs

Inquiry—AU-C section 315 requires the auditor to obtain an understanding of internal control relevant to the audit. An auditor might perform walkthroughs to confirm his or her understanding of internal control. If the auditor decides to use walkthroughs to confirm his or her understanding of internal control, how often do walkthroughs need to occur?

Reply—In accordance with AU-C section 315, the auditor is required to obtain an understanding of internal control relevant to the audit to evaluate the design of controls and to determine whether they have been implemented. To do that, performing a walkthrough would be a good practice. Accordingly, auditors might perform a walkthrough of significant accounting cycles every year. In some situations, AU-C section 315 allows the auditor to rely on audit evidence obtained in prior periods. In those situations, the auditor is required to perform audit procedures to establish the continued relevance of the audit evidence obtained in prior periods (for example, by performing a walkthrough). So, an auditor might perform walkthroughs every year in order to update his or her understanding.

[Issue Date: March 2008; Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

.13 Documenting Internal Control

Inquiry—Does a control have to be documented for it to be tested?

Reply—No. However, it is recommended that an entity document its controls so that the auditor can efficiently obtain an understanding of controls, assess the risks of material misstatement, and test them for operating effectiveness and reliance thereon (if the auditor chooses to test controls). If the entity does not document a control, and it is an important control, AU-C section 315 paragraph .33 requires the auditor to document the control as part of the auditor's risk assessment procedures to identify and assess the risks of material misstatement. The auditor is required to perform risk assessment procedures to identify and assess the risks of material misstatements. In addition, it may not be practical to test the operating effectiveness of controls (if the auditor chooses to do so) throughout the audit period without some level of documentation of the control by the client.

[Issue Date: March 2008; Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

.14 Suggesting Improvements in Internal Control

Inquiry—When performing a walkthrough of controls, may an auditor suggest improvements in internal control to the client?

Reply—Yes. A byproduct of obtaining an understanding of internal control is making suggestions for improvement to the client. That brings value to the audit process.

[Issue Date: March 2008]

.15 Identifying Significant Deficiencies

Inquiry—If the auditor decides not to test controls, does that mean there is a control deficiency that is required to be evaluated under AU-C section 265, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*)?

Reply—No, not necessarily. It depends on the reasons the auditor decides not to test the control. The auditor's decisions about the nature, timing, and extent of further audit procedures are based on the assessment of the risks of material misstatement. Communications under AU-C section 265 are based on control deficiencies that the auditor has identified. If the auditor decides not to test a control because it is nonexistent or is not properly designed, then that would represent a control deficiency that would need to be assessed as to severity to determine whether it is a significant deficiency or material weakness. If the design of the control is appropriate, but the auditor decides not to test it for another reason (for example, because the control is redundant), then the auditor has not identified a control deficiency.

[Issue Date: March 2008; Revised, January 2010, to reflect conforming changes necessary due to the issuance of SAS No. 115; Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

.16 Examining Journal Entries

Inquiry—Paragraph .21 of AU-C section 330 states, in part

The auditor's substantive procedures should include audit procedures related to the financial statement closing process, such as

- agreeing or reconciling the financial statements with the underlying accounting records and
- examining material journal entries and other adjustments made during the course of preparing the financial statements.

Does the phrase *adjustments made during the course of preparing the financial statements* refer to journal entries and other adjustments prepared by the client during the process of drafting the financial statements, or does it refer to journal entries recorded during the year?

Reply—The requirement to examine material journal entries and other adjustments made during the course of preparing the financial statements in paragraph .21 of AU-C section 330 refers to those journal entries and adjustments prepared by the entity during the process of preparing its financial statements (for example, consolidating entries or elimination entries between divisions). It does not refer to the journal entries recorded by the entity in the general ledger during the year. However, paragraph .32a of AU-C section 240, *Consideration of Fraud in a Financial Statement Audit* (AICPA, *Professional Standards*), requires auditors to design and perform audit procedures to test the appropriateness of journal entries recorded by the entity in the general ledger during the year.

[Issue Date: March 2008; Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

[The next page is 8491.]

Section 8220

Sampling

.01 Application of AU-C Section 530

Inquiry—When would the auditor apply the audit sampling principles in AU-C section 530, *Audit Sampling* (AICPA, *Professional Standards*)?

Reply—Audit sampling is only one of many tools used by auditors to obtain sufficient, appropriate evidence to support an opinion regarding financial statements. AU-C section 530 outlines design, selection, and evaluation considerations to be applied by the auditor when using audit sampling. As a general rule, audit sampling can be used—

- in performing tests of controls that provide an audit trail of documentary evidence,
- in performing substantive procedures to test details of transactions and balances, and
- in dual purpose tests that test a control that provides documentary evidence of performance and whether the recorded monetary amount of transactions or balances is correct.

Sampling applies when the auditor needs to decide whether the rate of deviation from a prescribed procedure is no greater than a tolerable rate, for example in testing a matching process or an approval process. However, risk assessment procedures performed to obtain an understanding of internal control do not involve sampling. Sampling concepts also do not apply for some tests of controls. Tests of automated application controls are generally tested only once or a few times when effective (IT) general controls are present, and thus do not rely on the concepts of risk and tolerable deviation as applied in other sampling procedures. Sampling generally is not applicable to analyses of controls for determining the appropriate segregation of duties or other analyses that do not examine documentary evidence of performance. In addition, sampling may not apply to tests of certain documented controls or to analyses of the effectiveness of security and access controls. Sampling also may not apply to some tests directed toward obtaining audit evidence about the operation of the control environment or the accounting system, for example, inquiry or observation of explanation of variances from budgets when the auditor does not desire to estimate the rate of deviation from the prescribed control, or when examining the actions of those charged with governance for assessing their effectiveness.

Thus, AU-C section 530 applies when sampling techniques are used to test either the operating effectiveness of the controls or to test details of transactions or balances.

Paragraph .05 of AU-C section 530 defines *audit sampling* as

The selection and evaluation of less than 100 percent of the population of audit relevance such that the auditor expects the items selected (the sample) to be representative of the population and, thus, likely to provide a reasonable basis for conclusions about the population. In this context, *representative* means that evaluation of the sample will result in conclusions that, subject to the limitations of sampling risk, are similar to those that would be drawn if the same procedures were applied to the entire population.

A key to understanding that definition is the intent of the auditor in applying the audit procedure. As noted in paragraph .A3 of AU-C section 530, the auditor may examine fewer than 100 percent of the items comprising an account balance or class of transactions for reasons other than evaluating a characteristic of the balance or class. For example, the auditor is not performing audit sampling in the following situations:

- An auditor traces several sales transactions through a client's accounting system to gain an understanding of the manner in which transactions are processed. AU-C section 530 would not apply because the auditor's intent was to gain an understanding of the processing of these transactions by the accounting system, not to evaluate a characteristic of all sales transactions processed by the accounting system.
- The auditor might examine several large sales invoices that comprise a significant portion of the account balance and leave the remaining portion of the balance untested or test the remaining items by other means, such as the application of analytical procedures. Again, AU-C section 530 does not apply because the auditor does not intend to evaluate all items in the account balance based on the examination of the large items.

Another consideration in determining whether AU-C section 530 is applicable to circumstances in which an auditor examines fewer than 100 percent of the items comprising an account balance or class of transactions is the purpose of the test being applied. If the auditor intends to project the test results to the entire account balance or class of transactions for the purpose of evaluating a characteristic of the balance or class, AU-C section 530 applies. For example, if the auditor intends to examine selected sales invoices to draw a conclusion as to whether sales are overstated, AU-C section 530 applies—the auditor intends to draw a conclusion about all sales. On the other hand, if the auditor selects several large sales invoices for certain audit tests and then applies analytical procedures to the remaining invoices, the auditor is not sampling according to AU-C section 530—the auditor's examination of the large items is not intended to lead the auditor to a conclusion about the other items. In that case, any conclusion about whether sales are overstated would be based on the combined results of the test of large sales invoices, inquiry and observations, analytical procedures, and other auditing procedures performed related to overstatement of sales.

In determining whether AU-C section 530 applies to a given audit procedure, the auditor would also consider the population in which the auditor is interested. The auditor might choose to divide a single reporting line on the financial statements into several populations. For example, accounts receivable might be divided into wholesale receivables, retail receivables and employee receivables. Each of these populations can be tested using a different audit strategy. The sampling concepts in AU-C section 530 apply only to populations for which audit sampling is used. Use of audit sampling on one population does not mandate its use on remaining populations.

[Revised, May 2007; Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

.02 [Reserved]

.03 Adequate Size for Nonstatistical Samples

Inquiry—Is there a rule-of-thumb for determining an adequate size for nonstatistical samples for substantive audit tests?

Reply—There is no rule-of-thumb that is appropriate for all applications. AU-C section 530 imposes no requirement to use quantitative aids, such as sample size tables, to determine sample size. Nor does AU-C section 530 impose a rule regarding minimum sample size. Just as before the issuance of AU-C section 530, professional judgment is the key. Auditors often use benchmarks or starting points such as sample sizes used in prior years or in similar circumstances in other audit engagements in determining what sample size is appropriate for a given sampling application. Paragraph .A13 of AU-C section 530 lists factors that influence the auditor's professional judgment in determining sample size. Those factors include

- for tests of controls,
 - the tolerable rate of deviation of the population to be tested.
 - the expected rate of deviation of the population to be tested.
 - the desired level of assurance (complement of risk of overreliance) that the tolerable rate of deviation is not exceeded by the actual rate of deviation in the population; the auditor may decide the desired level of assurance based on the extent to which the auditor's risk assessment takes into account relevant controls.
 - the number of sampling units in the population if the population is very small.
- for substantive tests of details,
 - the auditor's desired level of assurance (complement of risk of incorrect acceptance) that tolerable misstatement is not exceeded by actual misstatement in the population; the auditor may decide the desired level of assurance based on
 - the auditor's assessment of the risk of material misstatement.
 - the assurance obtained from other substantive procedures directed at the same assertion.
 - tolerable misstatement.
 - expected misstatement for the population.
 - stratification of the population when performed.
 - for some sampling methods, the number of sampling units in each stratum.

An auditor who applies statistical sampling uses tables or formulas to compute sample size based on these judgments. An auditor who applies nonstatistical sampling uses professional judgment to relate these factors in determining the appropriate sample size.

If the auditor considered factors such as these in determining sample size in prior years or in other engagements, there may be no reason to believe that sample sizes based on these benchmarks or starting points are inadequate. Individual firms or auditors often prefer to set their own rules regarding a benchmark or starting point for determining sample size. AU-C section 530 does not prohibit such policies. It merely alerts the auditor to factors the auditor should consider in judging the adequacy of sample size.

[Revised, May 2007; Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

.04 Documentation Requirements of AU-C Section 530

Inquiry—Does AU-C section 530 impose any new documentation requirements?

Reply—No, AU-C section 530 contains no new specific documentation requirements. AU-C section 230, *Audit Documentation* (AICPA, *Professional Standards*), applies to audit sampling applications just as it applies to other auditing applications. For example, AU-C section 300, *Planning an Audit* (AICPA, *Professional Standards*), requires the auditor to include in the audit documentation the audit plan, and AU-C section 230 requires the auditor to prepare audit documentation that is sufficient to enable an experienced auditor, having no previous connection with the audit, to understand (a) the nature, timing, and extent of the audit procedures performed to comply with generally accepted auditing standards and applicable legal and regulatory requirements; (b) the results of the audit procedures performed, and the audit evidence obtained; and (c) significant findings or issues arising during the audit, the conclusions reached thereon, and significant professional judgments made in reaching those conclusions. Thus, with regard to audit sampling applications, the auditor's audit program might document such items as the objectives of the sampling application and the audit procedures related to those objectives. The auditor's record of the work performed might include

- the definition of the population and the sampling unit, including how the auditor considered completeness of the population.
- the definition of misstatement.
- the method of sample selection.
- a list of misstatements identified in the sample.
- an evaluation of the result of the sampling application.
- conclusions reached by the auditor.

[Revised, May 2007; Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

.05 Methods to Select Representative Sample

Inquiry—What are some selection methods that can be used to select a representative sample?

Reply—There is no requirement in AU-C section 530, as amended, that random sampling selection methods be used. Representative sampling methods used by auditors include

- haphazard sampling.
- systematic sampling.
- random-number sampling.

Haphazard sampling consists of selecting sampling units without any conscious bias, that is, without any special reason for including or omitting items from the sample. Haphazard sampling does not imply that units can be selected in a careless manner. Rather, a haphazard sample is selected in a manner that can be expected to be representative of the population. For example, where the physical representation of the population is a file cabinet drawer of vouchers, a haphazard sample of all vouchers processed for the year 19XX might include any of the vouchers that the auditor pulls from the drawer, regardless of each voucher's size, shape, location, or other physical features. The auditor using haphazard selection would want to be careful to avoid distorting the sample by selecting, for example, only unusual or physically small items or by omitting

items such as the first or last items in the physical representation of the population.

Systematic sampling consists of determining a uniform interval, and one item is selected throughout the population at each of the uniform intervals from the starting point.

Random-number sampling entails matching random numbers generated by a computer or selected from a random-number table with, for example, document numbers.

Another method sometimes used in practice is block sampling. Block sampling consists of selecting groups of sequential transactions (for example, all vouchers processed on several selected dates). Using block samples may be inefficient because in order for a block sample to be adequate to lead to an audit conclusion, a relatively larger number of blocks would be selected. If an auditor decides to use block sampling, the auditor may want to exercise special care to control sampling risk in designing the auditor's sample.

[Revised, May 2007; Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

[The next page is 8521.]

Section 8310

Audit Evidence: Securities

.01 [Reserved]

.02 Confirmation of Securities Held in Street Name

Inquiry—A CPA firm has been engaged to perform the initial audit of a pension plan and trust. Most of the trust assets are investments held in street name by a brokerage house. Some negotiable bearer bonds, held in a bank, are in denominations not traceable to the trust account since the bond may represent investments by more than one customer. In addition to its monthly account statements the broker will certify details and ownership of investments at the statement date and will permit examination of certain of its internal records. The bank will also certify details and ownership of investments held for the trust.

Would the fact that the securities are held in “street name” and in some cases in denominations which cannot be traced to the trust’s account preclude obtaining sufficient appropriate audit evidence on which to base an opinion on the financial statements of the pension plan and trust?

Reply—AU-C section 500, *Audit Evidence* (AICPA, *Professional Standards*), discusses audit evidence. Physical inspection and count of the securities in this case appear to be impracticable; therefore, audit evidence concerning the securities would presumably consist primarily of confirmations received from the brokerage houses and other financial institutions which have possession of the securities. Whether or not confirmations would represent sufficient appropriate audit evidence is really a matter for the auditor’s professional judgment.

[Revised, May 2007; Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

[The next page is 8571.]

Section 8320

Audit Evidence: Inventories

.01 Reliance on Observation of Inventories at an Interim Date

Inquiry—Although its fiscal year ends on March 31, a client has always counted its physical inventory on December 31. The March 31 ending inventory has always been calculated by the gross profit method which has proven over the past to be quite accurate. No perpetual inventory records are kept.

Can the auditor rely on an observation of inventory that takes place three months prior to the balance sheet date?

Reply—AU-C section 501, *Audit Evidence—Specific Considerations for Selected Items* (AICPA, *Professional Standards*), addresses evidence regarding inventory. Paragraph .11 of AU-C section 501 requires the auditor to attend physical inventory counting, unless impracticable, to observe the performance of management's count procedures, and to perform audit procedures over the entity's final inventory records to determine whether they accurately reflect actual inventory count results. Paragraph .13 indicates that if attendance at physical inventory counting is impracticable, the auditor should make or observe some physical counts on an alternate date and perform audit procedures on intervening transactions.

Paragraph .A31 of AU-C section 501 further states, in part

For practical reasons, the physical inventory counting may be conducted at a date, or dates, other than the date of the financial statements. This may be done irrespective of whether management determines inventory quantities by an annual physical inventory counting or maintains a perpetual inventory system.

Normally, observing an inventory-taking on December 31 when a client has a March 31 year-end and perpetual records are used as the basis of the March 31 inventories, would present no unusual problems since tests of intervening transactions referred to in paragraph .13 of AU-C section 315, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*), usually can be readily applied. However, if the client keeps no perpetual records of inventory, the tests of the intervening transactions would, in effect, cause the auditor to create the perpetual records as a basis for the March 31 inventory.

[Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

.02 Observation of Physical Inventory on an Initial Audit

Inquiry—A company maintains large inventories of tractor parts in five different locations. The quantities of each part may be quite small, averaging six or seven pieces; but there are approximately 5000 different parts on hand, some as much as twenty years old. The company has been taking complete physical inventories at the end of each year. In the past, the parts inventories have been valued at the current catalogue prices.

A CPA has been engaged to perform the company's initial audit. What procedures may be followed in establishing the value of the parts inventory?

Reply—It would appear necessary under paragraph .11 of AU-C section 501; paragraph .A13 of AU-C section 510, *Opening Balances—Initial Audit*

Engagements, Including Reaudit Engagements (AICPA, *Professional Standards*); and paragraph .07b of AU-C section 705, *Modifications to the Opinion in the Independent Auditor's Report* (AICPA, *Professional Standards*), that the auditor observe the client's count of the parts inventory. Presumably tests would be made in each of the five locations.

Inventory pricing should be based on historical cost, rather than current selling price. While it may not be practicable to determine cost individually for the large number of parts on hand, it might be appropriate to determine the ratio of cost to catalogue price to obtain an approximation of the cost of current inventory. Also, some allowance, based on experience, should be made for obsolescence. Presumably a part will have little current value if there is a probability it will not be sold within five years. Costs of warehousing items for such a period may often approach the discounted value of the sales price.

Based upon observations and upon discussions with the client's employees, the auditor may be able to obtain some impressions as to the reliability of the earlier inventories. This would be supported by a comparison of this year's inventory with the prior year's, and by knowledge of sales and production in the current year.

[Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

.03 Cost of Inventories Acquired From Principal Stockholder

Inquiry—A corporation purchased merchandise from a stockholder who owns 99 percent of the corporation's stock and executed a chattel mortgage in favor of the stockholder. The merchandise was acquired by the stockholder prior to the formation of the corporation.

How can the CPA be sure the purchase price of this merchandise is reasonable?

Reply—The “seller's” cost can be ascertained through the examination of his cost records, invoices, etc., and comparing his total cost with the selling price to the corporation. Also, the taking of inventory can be observed and verified against physical quantities and classifications of inventory, against transfer documents and against the transferor's cost records and invoices. If the latter records are not available, the auditor can price the inventory at the current replacement cost which can be obtained by reference to recent invoices, communication with suppliers, or references to recent merchandise catalogs.

A basic consideration in this case is the fact that, upon incorporation, there is a continuance of beneficial interest in the inventory transferred and in the proceeds from its eventual disposition by virtue of the chattel mortgage and the 99 percent stock ownership. Accordingly, the transferor's cost should be carried over and continued on the books of the newly organized corporation.

.04 Reliance on Estimates of Coal Inventories by Experts

Inquiry—An electric utility maintains a large stockpile of coal. The auditors rely on the calculations of an engineering firm in their test of this inventory. The amount of coal by weight is estimated by multiplying the volume of the coal pile, calculated in cubic feet, by the estimated average density of the coal, measured in pounds per cubic foot. The calculated amount is then compared with the utility's perpetual inventory records, and, if the variance is not considered material, the perpetual inventory is accepted as the accurate amount.

Because of the uncertainties involved in this method, particularly in the estimation of the average density of the coal, the engineers are reluctant to

render an opinion on the amount of coal on hand. Other methods of calculating the amount of coal such as the “two coal-pile” theory are uneconomical.

In all cases, this inventory is a material item in the accounts of the utility. What alternative auditing procedures might be used in these circumstances?

Reply—While a slight change in density of the coal might result in a change in computed quantity of coal on hand, the effect would most likely not be material in relation to the balance sheet or statement of operations of the utility company. Perhaps, using the criteria of statistical sampling, the engineers would be willing to state that there is a X% probability that the quantity of coal is a certain amount plus or minus X% (or some other measure of variability).

.05 Dates of Observation of Inventories Which Are Kept on Perpetual Records

Inquiry—A retail dealer in tires and tubes has twenty-two stores. Each month the dealer takes inventory at two stores. The dealer’s auditor has observed the inventory taking at ten locations. To avoid the need for extra help at year end, January 31, the auditor proposes to visit the remaining locations shortly after December 31 and:

- Count the tires on hand at that time.
- Reconcile the count back to the daily report at December 31.

Do the above described procedures constitute an adequate observation of inventories?

Reply—Paragraphs .11–.15 of AU-C section 501 require the auditor to obtain sufficient appropriate audit evidence regarding the existence and condition of inventory. Paragraph .A31 of AU-C section 501 states, in part

For practical reasons, the physical inventory counting may be conducted at a date, or dates, other than the date of the financial statements. This may be done irrespective of whether management determines inventory quantities by an annual physical inventory counting or maintains a perpetual inventory system.

Presumably the dealer has the necessary perpetual records which allow the taking of inventory at two stores each month during the year. Therefore, the proposed procedures would be acceptable and meet the requirement for inventory observation.

[Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

.06 Observation of Consignment Inventories

Inquiry—Corporation A sells supplies and equipment for manufacturing jewelry. Silver on consignment from a supplier is kept in a vault adjacent to where Corporation A keeps its silver inventory. The supplier employs an independent warehouse firm to protect the consigned silver. The bonded employee of the warehouse firm has sole access to the consignment silver and performs the duties of warehouse manager for Corporation A. The warehouse firm pays the salary of the bonded employee but is reimbursed by Corporation A. Since the possibility for substitutions between Corporation A’s silver inventories and the consignment silver exists, the auditors of Corporation A, in conducting a physical observation of Corporation A’s silver inventories, also want to conduct a physical observation of the consignment silver. Is it necessary for the auditors of Corporation A to observe the consignment silver?

Reply—AU-C section 501 addresses specific considerations by the auditor in obtaining sufficient appropriate audit evidence regarding certain aspects of inventory, including inventory owned by a third party. Paragraph .A38 of AU-C

section 501 provides that the auditor may consider it appropriate to perform other audit procedures instead of, or in addition to, confirmation with the third party. Among the steps recommended for the auditor to follow, depending on the circumstances, is to attend, or arrange for another auditor to attend, the third party's physical counting of inventory, if practicable.

Because of the relationship which Corporation A has with the warehouse and the bonded employee, and the possibility for substitutions of inventory between Corporation A and the supplier, the auditors would observe the consignment inventory and Corporation A's inventory at the same time.

[Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

[The next page is 8671.]

Section 8330

Audit Evidence: Fixed Assets

.01 Verification of Real Estate Ownership

Inquiry—What procedures may be followed in the verification of real property accounts? Is it sufficient to examine the documents involved in the purchase of the property, to examine the real estate tax bills, and to communicate with the holders of any mortgages or trusts secured by the property? Should the client be required to assume the expense of a title search by an attorney?

Reply—It is generally conceded that examination of public records which contain the history of transactions relating to realty, as well as the current status of that property, is normally the function of an attorney or title company rather than that of an auditor. Accordingly if it is feasible for the client to obtain a letter from an attorney or title company which defines the interest the company holds in the land based upon a title search, this appears to be the best evidence available as to title and encumbrances.

If this procedure is too costly, then the following other audit procedures may supply sufficient indicia of title as to enable the auditor to assume that the client does, in fact, own the land subject to named liens.

1. Compare legal description of land found in deed with that found in the title insurance policy, abstract of deed, tax receipts, etc.
2. Verify current payment of carrying expenses of land in question, such as insurance premiums, tax payments, payments to mortgagee, etc.
3. Examine any rent receipts which may show evidence of continuing ownership.
4. Visit the land in question, if this is practicable.
5. Request an attorney's letter describing any conveyances or encumbrances of real property that may have been effected during the period covered in the audit, as well as his opinion regarding present status of title.
6. Obtain statement from client as to condition of title and encumbrance.
7. Check municipal or county records for evidence of ownership.

Use of a property map in connection with undertaking these procedures would also be helpful.

.02 Examination of Assets of a Rental Company

Inquiry—A lessor is in the business of leasing autos, large trucks, tractors, and trailers. Is it necessary for the auditors to make physical observations of

the rolling stock which is scattered across the country? What other audit procedures might be employed in the verification of this equipment? Must the titles to all equipment be examined?

Reply—It is not necessary, unless some extraordinary situation or circumstances were brought to light, to examine titles to all the equipment. Random test verifications of title certificates or proper registration of vehicles should be made. The fact that the client is receiving rent for the vehicles and is currently making payments on its time-purchase contracts would also be verified in regular course. Any tax and insurance payments which the client is required to make in connection with the vehicles can be checked. Also, test confirmations of possession of vehicles with the lessee should be made. Audit responsibility would not necessarily extend to physical observation of the equipment at its numerous shifting locations.

[The next page is 8731.]

Section 8340

Audit Evidence: Confirmation Procedures

[.01] Reserved

[.02] Reserved

.03 Confirmation of Balances Due on Loans

Inquiry—A bank arranges mortgage loans whereby the borrower instructs the bank to make payments to the contractor or developer. Payment booklets, which specify the periodic amounts due, are sent twice yearly to the borrower. In addition, each borrower receives an annual statement which shows his total yearly payments as well as the various yearly charges. Many of the debtors are unable to verify the correctness of the accrued charges and are unable to check the outstanding balances of their loans because of the complex interest rates. How can these loan balances be confirmed when the debtor cannot determine the total amount of the debt?

Reply—While the debtor may not be able to calculate the balance of the loan due, there are details of the loan which he or she should know and which can be confirmed. A request that the debtor confirm the original amount of the loan and the payments he or she has made would properly serve the purpose of a confirmation. Confirmation of the interest rate might also be requested as this affects the balance of the loan and should be known by the debtor.

.09 Insurance Claims

Inquiry—Should an auditor communicate with an insurance company, or the insurance company's attorneys, when trying to obtain sufficient appropriate audit evidence about insured claims outstanding against management?

Reply—The auditor should obtain appropriate audit evidence about claims outstanding (a) from management and (b) by communicating with the entity's external legal counsel in accordance with AU-C section 501, *Audit Evidence—Specific Considerations for Selected Items* (AICPA, *Professional Standards*). The auditor may encounter situations where neither management nor the entity's external legal counsel is able to provide sufficient information regarding outstanding claims handled by insurance companies. In those situations, the auditor may consider communicating directly with the insurance company or its attorneys appropriate.

[Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

.10 Letter of Inquiry to Management's External Legal Counsel

Inquiry—When an auditor requested management to send a letter of inquiry to management's external legal counsel, management objected because its external legal counsel would charge for answering the letter of inquiry. Management also

believed that an inquiry about legal matters was not necessary because it had not used the services of its external legal counsel in the current year for any matters concerning litigation, claims or assessments. Rather, management paid fees to its external legal counsel in connection with other matters such as corporate registrations. Do generally accepted auditing standards require that a letter of inquiry be sent to management's external legal counsel?

Reply—No. Paragraph .16 of AU-C section 501 states that

The auditor should design and perform audit procedures to identify litigation, claims, and assessments involving the entity that may give rise to a risk of material misstatement, including (Ref: par. .A39–.A45)

- a. inquiring of management and, when applicable, others within the entity, including in-house legal counsel;
- b. obtaining from management a description and evaluation of litigation, claims, and assessments that existed at the date of the financial statements being reported on and during the period from the date of the financial statements to the date the information is furnished, including an identification of those matters referred to legal counsel;
- c. reviewing minutes of meetings of those charged with governance; documents obtained from management concerning litigation, claims, and assessments; and correspondence between the entity and its external legal counsel; and
- d. reviewing legal expense accounts and invoices from external legal counsel.

Paragraph .18 of AU-C section 501 further states, in part

Unless the audit procedures required by paragraph .16 indicate that no actual or potential litigation, claims, or assessments that may give rise to a risk of material misstatement exist, the auditor should, in addition to the procedures required by other AU-C sections, seek direct communication with the entity's external legal counsel.

If information contrary to management's assertion is discovered, in addition to requesting management to send an inquiry letter to management's external legal counsel in accordance with paragraph .18 of AU-C section 501, the auditor should consider the effects of the erroneous assertion on the ability to rely on other written representations from management.

In situations where no letter of inquiry is sent to management's external legal counsel, the auditor may consider including in the written representation letter from management a specific representation that no attorney had been consulted regarding litigation, claims, and assessments.

[Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

.11 Receivables in Special Purpose Financial Statements

Inquiry—If accounts receivable and escrow balances are included in special purpose financial statements, should the accounts receivable and escrow balances be confirmed?

Reply—The generally accepted auditing standards, including confirmation, that apply to financial statements prepared in accordance with generally accepted

accounting principles apply to financial statements prepared in accordance with a special purpose framework.

[Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

[.12] **Reserved**

[.13] **Reserved**

[.14] **Reserved**

[.15] **Reserved**

.16 Retention of Returned Confirmations When a Schedule of Confirmation Results is Prepared

Inquiry—AU-C section 505, *External Confirmations* (AICPA, *Professional Standards*), addresses the auditor’s use of external confirmation procedures to obtain audit evidence, in accordance with the requirements of AU-C section 330, *Performing Audit Procedures in Response to Assessed Risks and Evaluating the Audit Evidence Obtained* (AICPA, *Professional Standards*), and AU-C section 500, *Audit Evidence* (AICPA, *Professional Standards*). Similarly, AU-C section 230, *Audit Documentation* (AICPA, *Professional Standards*), addresses the form, content, and extent of audit documentation. When written confirmations are received, should they be retained as part of audit documentation or is a schedule of confirmation results sufficient?

Reply—Paragraph .A4 of AU-C section 230 sets forth factors that the auditor may consider in determining the form, content, and extent of the documentation. As indicated in paragraph .03 of AU-C section 505, confirmations are typically used for accounts with higher risks of material misstatement, they often serve as significant evidence to the assertions being tested, and seasoned judgment is often needed in evaluating confirmations that identify the nature and extent of exceptions. These reasons, among others, support retaining returned confirmations even though a schedule of confirmation results is prepared.

Section 8345

Audit Evidence: Destruction of Documents

.01 Audit Considerations When Client Evidence and Corroborating Evidence in Support of the Financial Statements Has Been Destroyed by Fire, Flood, or Natural Disaster

Inquiry—Prior to issuance of an auditor’s report on financial statements, and either prior to or after the completion of fieldwork, the audit documentation is destroyed by a fire, flood, or natural disaster. To what extent is the auditor required to recreate the audit documentation in order to express an opinion on the financial statements?

Reply—Paragraph .05 of AU-C section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards* (AICPA, *Professional Standards*), states, in part, that “as the basis for the auditor’s opinion, GAAS require the auditor to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error. Reasonable assurance ... is obtained when the auditor has obtained sufficient appropriate audit evidence to reduce audit risk (that is, the risk that the auditor expresses an inappropriate opinion when the financial statements are materially misstated) to an acceptably low level.”

If substantially all of an entity’s evidence and corroborating evidence in support of their financial statements has been destroyed and the auditor has been unable to complete audit procedures with respect to financial statement amounts and assertions,¹ the auditor should disclaim an opinion on the financial statements as the auditor is unable to form an opinion as to the fairness of presentation of the financial statements in accordance with the applicable financial reporting framework. If the auditor disclaims an opinion due to an inability to obtain sufficient appropriate audit evidence, the auditor should include in the basis of modification paragraph all the reasons for that inability.

When the auditor disclaims an opinion due to an inability to obtain sufficient appropriate audit evidence, the auditor should amend the introductory paragraph of the auditor’s report to state that the auditor was engaged to audit the financial statements. The auditor should also amend the description of the auditor’s responsibility and the description of the scope of the audit to state only the following: “Our responsibility is to express an opinion on the financial statements based on conducting the audit in accordance with auditing standards generally accepted in the United States of America. Because of the matter(s) described in the basis for disclaimer of opinion paragraph, however, we were not able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion.” Paragraph .A32 of AU-C section 705, *Modifications to the Opinion in the Independent Auditor’s Report* (AICPA, *Professional Standards*), contains an illustration of an auditor’s report containing a disclaimer of opinion due to the auditor’s inability to obtain sufficient appropriate audit evidence about multiple elements of the financial statements.^[2]

¹ The auditor should design and perform substantive procedures for all relevant assertions related to each material class of transactions, account balance, and disclosure.

^[2] [Footnote deleted, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

In the case where the evidence and corroborating evidence is available for some, but not all, of the financial statement accounts and assertions, the auditor would explain which evidence has been destroyed (such as evidence supporting the cost of inventory, the valuation of amounts in accounts receivable, and so on).

If so engaged by an entity, the auditor may express an opinion on one or more specified elements, accounts, or items of a financial statement (such as a schedule of accounts receivable or fixed assets). If the auditor is so engaged, the guidance in AU-C section 805, *Special Considerations—Audits of Single Financial Statements and Specific Elements, Accounts, or Items of a Financial Statement* (AICPA, *Professional Standards*), should be followed. The auditor should not express an opinion on specified elements, accounts, or items included in a financial statement on which he or she has disclaimed an opinion, if such reporting would be tantamount to expressing a piecemeal opinion on the financial statements. However, an auditor would be able to express an opinion on one or more specified elements, accounts, or items of a financial statement provided that matters to be reported on and the related scope of the audit were not intended to and did not encompass so many elements, accounts, or items as to constitute a major portion of the financial statements. For example, it may be appropriate for an auditor to express an opinion on an entity's schedule of accounts receivable or fixed assets even if the auditor has disclaimed an opinion on the financial statements taken as a whole. However, the report on the specified element, account, or item should be presented separately from the financial statements of the entity.

[Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

.02 Considerations When Audit Documentation Has Been Destroyed by Fire, Flood, or Natural Disaster

Inquiry—Prior to issuance of an auditor's report on financial statements, and either prior to or after the completion of fieldwork, the audit documentation is destroyed by a fire, flood, or natural disaster. To what extent is the auditor required to recreate the audit documentation in order to express an opinion on the financial statements?

Reply—Audit documentation is the principal record of auditing procedures applied, evidence obtained, and conclusions reached by the auditor in the engagement. In addition, certain Statements on Auditing Standards contain specific documentation requirements. Paragraph .02 of AU-C section 230, *Audit Documentation* (AICPA, *Professional Standards*), states that audit documentation provides (a) evidence of the auditor's basis for a conclusion about the achievement of the overall objectives of the auditor;³ and (b) evidence that the audit was planned and performed in accordance with generally accepted auditing standards (GAAS) and applicable legal and regulatory requirements. Oral explanations cannot serve as the principal support for the work performed or the conclusions reached.

Because audit documentation is an essential element of an audit performed in accordance with generally accepted auditing standards, the auditor cannot state that he or she has performed an audit in accordance with generally accepted auditing standards without the required audit documentation. In cases where the audit documentation has been destroyed by fire, flood, or a

³ Paragraph .12 of AU-C section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards* (AICPA, *Professional Standards*). [Footnote revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

natural disaster prior to the issuance of the auditor's report, it will be necessary for the auditor to either recreate the audit documentation in support of the audit procedures performed or re-perform the audit procedures and create new audit documentation.

In making the determination as to whether to recreate the destroyed audit documentation or to re-perform the audit procedures, the auditor may keep in mind the ultimate objective of the auditing procedures. That is, to obtain sufficient appropriate audit evidence to afford a reasonable basis for expressing an opinion on the financial statements. For example, the auditor may be able to recreate the documentation that supports certain assertions about accounts receivable by using information contained in the audit documentation with respect to sales revenue (assuming that the sales documentation was not destroyed). In addition, the auditor may be able to recreate the audit program and prepare memorandums sufficient to explain the procedures performed and the results obtained. When considering the sufficiency of such documentation, the auditor is required by paragraph .08 of AU-C section 230 to prepare audit documentation that is sufficient to enable an experienced auditor, having no previous connection with the audit, to understand (a) the nature, timing, and extent of the audit procedures performed to comply with GAAS and applicable legal and regulatory requirements; (b) the results of the audit procedures performed, and the audit evidence obtained; and (c) significant findings or issues arising during the audit, the conclusions reached thereon, and significant professional judgments made in reaching those conclusions. Except for perhaps the smallest of audits, it will prove difficult for the auditor to amass sufficient audit documentation by referring to documentation for a related account or by recreating the audit documentation. Consequently, the auditor will usually have to re-perform the audit procedures and create new audit documentation.

[Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

[The next page is 8771.]

Section 8350

Audit Evidence: Audit Documentation

.01 Current Year Audit Documentation Contained in the Permanent File

Inquiry—Paragraph .06 of AU-C section 230, *Audit Documentation* (AICPA, *Professional Standards*), defines *audit documentation* as the record of audit procedures performed, relevant audit evidence obtained, and conclusions the auditor reached. AU-C section 230 is applicable to all audit documentation supporting the current year's auditor's report. Do the provisions of AU-C section 230 with respect to documentation completion and retention apply to current year audit documentation maintained in the permanent file?

Reply—Yes. AU-C section 230 applies to current year audit documentation maintained in any type of file if such documentation serves as support for the current year's audit report.

[Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

[The next page is 8801.]

Section 8700

Subsequent Events

Note: Additional Questions and Answers on subsequent events can be found in section 9070, *Subsequent Events*.

[.01] Reserved

.02 Auditor Responsibilities for Subsequent Events

Inquiry—FASB ASC 855-10-50-1 states, “An entity shall disclose the date through which subsequent events have been evaluated, as well as whether that date is the date the financial statements were issued or the date the financial statements were available to be issued.” How does the entity’s responsibility to disclose the date through which subsequent events have been evaluated affect the auditor’s responsibilities for subsequent events?

Reply—FASB ASC 855 does not change the auditor’s responsibilities under AU-C section 560, *Subsequent Events and Subsequently Discovered Facts* (AICPA, *Professional Standards*), which requires the auditor to perform subsequent event procedures from the date of the financial statements to the date of the audit report or as near as practicable thereto.¹ Because AU-C section 700, *Forming an Opinion and Reporting on Financial Statements* (AICPA, *Professional Standards*), requires the auditor’s report to be dated no earlier than the date on which the auditor has obtained sufficient appropriate audit evidence on which to base the auditor’s opinion on the financial statements,² the auditor’s report date can never be earlier than management’s subsequent event note date. Because the auditor is concerned with events occurring through the date of the auditor’s report that may require adjustment to, or disclosure in, the financial statements, the specific management representations relating to information concerning subsequent events should be made as of the date of the auditor’s report.³ In most cases, this will result in the date that management discloses as the date through which they have evaluated subsequent events being the same date as the auditor’s report. In order to coordinate that these dates (note date, representation letter date, and auditor report date) are the same, the auditor may want to discuss these dating requirements with management in advance of beginning the audit and may also want to include, in the auditor’s written understanding with the client regarding the terms of the engagement (engagement letter), that management will not date the subsequent event note earlier than the date of their management representation letter (also the date of the auditor’s report).

[Issue Date: September 2009; Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

¹ See paragraph .10 of AU-C section 560, *Subsequent Events and Subsequently Discovered Facts* (AICPA, *Professional Standards*). [Footnote revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

² See paragraph .41 of AU-C section 700, *Forming an Opinion and Reporting on Financial Statements* (AICPA, *Professional Standards*). [Footnote revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

³ See paragraph .20 of AU-C section 580, *Written Representations* (AICPA, *Professional Standards*). [Footnote revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

.03 Auditor's Responsibilities for Subsequent Events Relative to a Conduit Debt Obligor⁴

Inquiry—Entity A is a nonprofit conduit debt obligor with conduit debt securities that are traded in a public market. The entity has a June 30 year-end. Management of the nonprofit has scheduled its annual meeting for early August. During its annual meeting, audited financial statements will be distributed to the board of trustees, as well as to all other persons in attendance. At the same time, entity A will post a notice to its website that alerts the general public regarding the method(s) available for obtaining a copy of its audited financial statements. Entity A plans to file its audited financial statements with the Electronic Municipal Market Access system in late September, after other filing information has been prepared.

FASB ASC 855-10-25-1A states, in part

[a]n entity that meets either of the following criteria shall evaluate subsequent events through the date the financial statements are issued:

- a. It is an SEC filer.
- b. It is a conduit bond obligor for conduit debt securities that are traded in a public market (a domestic or foreign stock exchange or an over-the-counter market, including local or regional markets).

The FASB ASC glossary defines *financial statements are issued* as follows: “Financial statements are considered issued when they are widely distributed to shareholders and other financial statement users for general use and reliance in a form and format that complies with GAAP.”

Management has asserted that the financial statements will be widely distributed as of the date of the annual meeting (and, therefore, would be considered issued) because the financial statements (in a form and format that complies with generally accepted accounting principles [GAAP]) are distributed to the board of trustees at the meeting, as well as made available to anyone else as of that date (either through their attendance at the annual meeting or through their being able to obtain a copy through the method(s) described on entity A’s website).

How does FASB ASC 855-10 affect the auditor’s responsibility and the date of the auditor’s report?

Reply—Because entity A is a conduit debt obligor with conduit debt securities that trade in a public market, management is required to evaluate subsequent events through the date the financial statements are first widely distributed (that is, issued).

The auditor, exercising professional judgment, needs to evaluate management’s assertion about the financial statement issuance date and decide whether the manner in which entity A has made its financial statements available does or does not constitute issuance for purposes of complying with GAAP and completing the auditor’s subsequent event procedures. The auditor is required, in accordance with AU-C section 560, to perform subsequent event procedures at or near the date of the auditor’s report. As discussed more fully in section 8700.02, “Auditor Responsibilities for Subsequent Events,” in most cases, this will be the same date that management discloses as the date through which they have evaluated subsequent events. In accordance with paragraph

⁴ This inquiry and response assumes an entity’s financial statements have been prepared in accordance with generally accepted accounting principles promulgated by the Financial Accounting Standards Board. The accounting and disclosures for subsequent events may be different for other accounting standard setters.

.12 of AU-C section 560, the auditor is not required to perform any audit procedures regarding the financial statements after the date of the auditor's report. If, however, a subsequently discovered fact becomes known to the auditor after the report release date, the auditor is required to perform the requirements in paragraph .15 of AU-C section 560.

[Issue Date: June 2010; Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

[The next page is 8901.]

Section 8800

Audits of Group Financial Statements and Work of Others

.01 Applicability of AU-C Section 600

Inquiry—Do the requirements of AU-C section 600, *Special Considerations—Audits of Group Financial Statements (Including the Work of Component Auditors)* (AICPA, *Professional Standards*), apply only when the auditor makes reference to the audit of another auditor in his or her report on the group financial statements?

Reply—No. AU-C section 600 applies to all audits of group financial statements. Certain requirements (detailed in paragraphs .50–.64 of AU-C section 600) are applicable to all components, except those for which the auditor of the group financial statements is making reference to the work of a component auditor. (See paragraph .08 of AU-C section 600.)

[Issue Date: November 2012.]

.02 Making Reference to Any or All Component Auditors

Inquiry—If the group engagement partner decides to make reference to one component auditor in the audit report on the group financial statements, is he or she required to make reference to all component auditors in that report?

Reply—No. The decision to make reference to the audit of a component auditor is made individually for each component auditor. The auditor of the group financial statements may make reference to any, all, or none of the component auditors. (See paragraphs .24 and .A52 of AU-C section 600.)

[Issue Date: November 2012.]

.03 Deciding to Act as Auditor of Group Financial Statements

Inquiry—What factors determine whether an auditor decides to act as the auditor of a group's financial statements?

Reply—The group engagement partner decides to act as the auditor of the group financial statements and report as such on the group financial statements upon evaluating whether the group engagement team will be able to obtain sufficient appropriate audit evidence through the group engagement team's work or use of the work of component auditors. Relevant factors in making this determination include, among other things, the (a) individual financial significance of the components for which the auditor of the group financial statements will be assuming responsibility, (b) extent to which significant risks of material misstatements of the group financial statements are included in the components for which the auditor of the group financial statements will be assuming responsibility, and (c) extent of the group engagement team's knowledge of the overall financial statements. (See paragraphs .15 and .A18 of AU-C section 600.)

In audits of state and local governments, additional factors to consider include (a) engagement by the primary government as the auditor of the financial reporting entity and (b) responsibility for auditing the primary government's general fund (or other primary operating fund). (See paragraph .A21 of AU-C section 600.)

[Issue Date: November 2012.]

.04 Factors to Consider Regarding Component Auditors

Inquiry—What factors might the group engagement partner consider when deciding to use the work of a component auditor and whether to make reference to the component auditor in the auditor’s report on the group financial statements?

Reply—In all group audits, the group engagement team is required to obtain an understanding of the component auditor, and the group engagement partner uses this and his or her understanding of the component when deciding to use the work of a component auditor and whether to make reference to the component auditor in the auditor’s report on the group financial statements. Factors affecting this decision include (a) differences in the financial reporting framework applied in preparing the component and group financial statements, (b) whether the audit of the component financial statements will be completed in time to meet the group reporting schedule, (c) differences in the auditing and other standards applied by the component auditor and those applied in the audit of the group financial statements, and (d) whether it is impracticable for the group engagement team to be involved in the work of the component auditor. (See paragraphs .22 and .A40 of AU-C section 600.)

[Issue Date: November 2012.]

[.05] Deleted

[Deleted, March 2013, due to the issuance of SAS No. 127, *Omnibus Statement on Auditing Standards—2013*. See section 8800.27, “Circumstances in Which Making Reference Is Inappropriate.”]

.06 Governmental Financial Statements That Include a GAAP-Basis Component

Inquiry—When a governmental university includes a nongovernmental foundation as a component unit in its financial statements, as required by the Governmental Accounting Standards Board (GASB) financial reporting framework (that is, a not-for-profit foundation that appropriately uses accounting principles generally accepted in the United States of America [GAAP] as promulgated by the Financial Accounting Standards Board [FASB]), may the auditor’s report on the university’s group financial statements make reference to the auditor of the foundation’s financial statements when the group engagement team identifies the foundation as a component?

Reply—Yes. In this situation, because the university (the primary government) is required by the GASB financial reporting framework to include the foundation as a component unit in the financial reporting entity (the group financial statements) and because GASB provides guidance on how to present component unit information that does not conform to GASB reporting standards, the financial statements of the foundation (a component) are deemed to be in accordance with the GASB financial reporting framework.

It is important to note that reference to a component auditor in these circumstances is appropriate only when the provisions established by GASB that require inclusion of the component unit in the financial statements of the primary government have been followed (see section 8800.27).

[Issue Date: November 2012; Revised: March 2013.]

[.07] Deleted

[Deleted, March 2013, due to the issuance of SAS No. 127. See section 8800.27.]

.08 Component Audit Performed in Accordance With Government Auditing Standards

Inquiry—When a component auditor conducts an audit of a component's financial statements using *Government Auditing Standards* (GAS), and the group engagement team conducts the audit of the group financial statements using generally accepted auditing standards (GAAS), may the auditor's report on the group financial statements make reference to the component auditor?

Reply—Yes. Financial audits performed under the 2011 revision of GAS incorporate AICPA Statements on Auditing Standards by reference, as well as establish additional requirements. Further, the audit reports issued to meet GAS requirements often refer separately to GAAS, as well. Therefore, the audit of the component would be deemed to have been performed in accordance with GAAS, and the audit report on the group financial statements may make reference to the component auditor. Such reference is appropriate only when the component auditor follows the requirements established by GAAS when conducting the financial audit of the component under GAS. (See paragraphs .25 and .A54 of AU-C section 600.)

[Issue Date: November 2012.]

.09 Component Audit Performed by Other Engagement Teams of the Same Firm

Inquiry—Do the requirements of AU-C section 600 apply when a CPA firm uses auditors in different offices of the firm to perform various audit procedures related to the audit of a single entity's financial statements?

Reply—If the group engagement team identifies components in the financial statements of a single entity, it is a group audit, and AU-C section 600 applies. As defined in AU-C section 600, a *component auditor* may be part of the group engagement partner's firm, a network firm of the group engagement partner's firm, or another firm. (See paragraph .11 of AU-C section 600.)

[Issue Date: November 2012.]

.10 Terms of the Group Audit Engagement

Inquiry—What matters are required to be included in the terms of the group audit engagement?

Reply—The auditor of the group financial statements is required to agree upon the terms of the group audit engagement. In addition to the matters identified in AU-C section 210, *Terms of Engagement* (AICPA, *Professional Standards*), other matters may be included in the terms of a group audit, including whether reference will be made to the audit of a component auditor in the auditor's report on the group financial statements. The terms of the engagement may also include arrangements to facilitate (a) unrestricted communication between the group engagement team and component auditors to the extent permitted by law or regulation and (b) communication to the group engagement team of important communications between (i) component auditors, those charged with governance of the component, and component management and (ii) regulatory authorities and components related to financial reporting matters. (See paragraphs .17 and .A28 of AU-C section 600.)

[Issue Date: November 2012.]

.11 Equity Method Investment Component

Inquiry—If a company has an investment accounted for using the equity method, is the equity method investment considered a component for applying AU-C section 600?

Reply—Yes. An investment accounted for under the equity method constitutes a component for purposes of AU-C section 600. As such, the requirements of AU-C section 600 apply; however, paragraphs .50–.64 of AU-C section 600 only apply when the group engagement partner assumes responsibility for the work of a component auditor. (See paragraphs .11 and .A2 of AU-C section 600.)

[Issue Date: November 2012.]

.12 Criteria for Identifying Components

Inquiry—What criteria might the group engagement team use to identify components?

Reply—A *component* is defined as “[a]n entity or business activity for which group or component management prepares financial information that is required by the applicable financial reporting framework to be included in the group financial statements.” The structure of a group and the nature of the financial information and the manner in which it is reported affect how the group engagement team identifies components. Components can be separate entities or may be identified on the basis of the group financial reporting system that may be (a) a parent, one or more subsidiaries, and so on; (b) a head office and one or more divisions or branches; or (c) both. (See paragraphs .11 and .A1 of AU-C section 600.)

In audits of state and local governments, a component may be a separate legal entity reported as a component unit or part of the governmental entity, such as a business activity, department, or program. (See paragraph .A5 of AU-C section 600.)

[Issue Date: November 2012.]

.13 Criteria for Identifying Significant Components

Inquiry—What criteria might the group engagement team use to identify significant components?

Reply—A *significant component* is a component of individual financial significance to the group or likely to include significant risks of material misstatement of the group financial statements due to its specific nature or circumstances. As the individual financial significance of a component increases relative to the group financial statements, the risks of material misstatement of the group financial statements (posed by the financial information pertaining to that component) typically increase. The group engagement team may apply a percentage to one or more chosen benchmarks to identify components that are of individual financial significance. Appropriate benchmarks might include group assets, liabilities, cash flows, revenues, expenditures, net income, or a combination of these. Components engaging in complex transactions, such as foreign currency transactions, derivatives, alternative investments, complex financing arrangements, and so on, may expose the group to a significant risk of material misstatement even though they are not otherwise of individual financial significance to the group. The group engagement team may consider such components as significant components due to these risks. (See paragraphs .11, .A6, and .A77 of AU-C section 600.)

In audits of governmental entities, appropriate quantitative benchmarks for identifying significant components might include net costs or total budget. Qualitative considerations may involve matters of heightened public sensitivity (for example, national security issues, donor-funded projects, or reporting of tax revenue).

[Issue Date: November 2012.]

.14 No Significant Components Are Identified

Inquiry—Do the requirements of AU-C section 600 apply when the group engagement team does not identify any significant components?

Reply—Yes. AU-C section 600 is applicable to audits of group financial statements, and group financial statements include financial information for more than one component, regardless of whether any component is identified as a significant component. When a group consists only of components not considered significant components, the group engagement partner can reasonably expect to obtain sufficient appropriate audit evidence (on which to base the group audit opinion) if the group engagement team will be able to (a) perform work on the financial information of some of these components and (b) use the work performed by component auditors on the financial information of other components to the extent necessary to obtain sufficient appropriate audit evidence. In addition, when no component is identified as significant, it is more likely that appropriate responses to assessed risks of material misstatement for some or all accounts or classes of transactions may be implemented at the group level without the involvement of component auditors. (See paragraphs .A19, .A65, and .A83 of AU-C section 600.)

[Issue Date: November 2012.]

.15 Restricted Access to Component Auditor Documentation

Inquiry—When a component auditor restricts the group engagement team's access to relevant documentation, will the auditor of the group financial statements be able to report on the group financial statements?

Reply—Yes. As long as the group engagement team is able to obtain sufficient appropriate audit evidence, the group engagement partner is able to report on the group financial statements. However, this is less likely as the significance of the component increases. (See paragraphs .16 and .A23 of AU-C section 600.)

[Issue Date: November 2012.]

.16 Responsibilities With Respect to Fraud in a Group Audit

Inquiry—Does AU-C section 600 change the auditor's responsibilities with respect to fraud in the audit of a group's financial statements?

Reply—No. The group engagement team is required to gain an understanding of the group and its environment and to identify and assess the risks of material misstatement of the group financial statements due to error or fraud. In addition, the group engagement team is required to design and implement appropriate responses to the assessed risks. (See paragraphs .20 and .A35 of AU-C section 600.)

[Issue Date: November 2012.]

.17 Inclusion of Component Auditor in Engagement Team Discussions

Inquiry—Is the engagement team required to include the component auditor in its discussions of the entity's susceptibility to material misstatements of the financial statements due to error or fraud?

Reply—No. Key members of the group engagement team are required to discuss the susceptibility of an entity to material misstatements of the financial statements due to error or fraud, specifically emphasizing the risks due to fraud. The group engagement partner may choose to include the component auditor in certain discussions, including those to discuss the susceptibility of

the entity to material misstatements of the financial statements. (See paragraphs .20 and .A36 of AU-C section 600.)

[Issue Date: November 2012.]

.18 Determining Component Materiality

Inquiry—If the group engagement partner decides to make reference to a component auditor in the auditor’s report on the group financial statements, does the group engagement team establish materiality for the component auditor to use in the separate audit of the component’s financial statements?

Reply—No. Reference in the group auditor’s report to the fact that part of the audit was conducted by a component auditor is intended to communicate that the group auditor is not assuming responsibility for the work of the component auditor. In that case, the component auditor is responsible for establishing materiality as part of performing the audit of the component’s financial statements.

However, if the group engagement partner assumes responsibility for the work of a component auditor, the group engagement team is required to evaluate the appropriateness of materiality at the component level. In addition, the group engagement team is required to communicate the relevant component materiality to that component auditor. The component auditor uses component materiality to evaluate whether uncorrected detected misstatements are material, individually or in the aggregate. (See paragraphs .31, .52–.53, .55, and .A73–.A74 of AU-C section 600.)

[Issue Date: November 2012.]

.19 Understanding of Component Auditor Whose Work Will Not Be Used

Inquiry—Is the group engagement team required to obtain an understanding of a component auditor for a component that is not a significant component if the group engagement team does not plan to use the work of the component auditor and plans only to perform analytical procedures at a group level?

Reply—No. It is not necessary to obtain an understanding of the auditors of those components for which the group auditor will not be using the work of the component auditor to provide audit evidence for the group audit. (See paragraphs .22, .29, and .A41 of AU-C section 600.)

[Issue Date: November 2012.]

.20 Involvement in the Work of a Component Auditor

Inquiry—When the group engagement partner decides to assume responsibility for the work of a component auditor, is the group engagement team required to be involved in the work of the component auditor?

Reply—Yes. The group engagement team is required to determine the type of work to be performed by the group engagement team (or a component auditor on behalf of the group engagement team) on the financial information of a component. The group engagement team is also required to determine the nature, timing, and extent of its involvement in the work of the component auditor. (See paragraph .51 of AU-C section 600.)

[Issue Date: November 2012.]

.21 Factors Affecting Involvement in the Work of a Component Auditor

Inquiry—What factors might affect the group engagement team’s involvement in the work of a component auditor?

Reply—Factors that may affect the group engagement team’s involvement in the work of a component auditor include (a) the significance of the component, (b) identified significant risks of material misstatement of the group financial statements, and (c) the group engagement team’s understanding of the component auditor. (See paragraph .A84 of AU-C section 600.)

[Issue Date: November 2012.]

.22 Form of Communications With Component Auditors

Inquiry—When the group engagement partner decides to assume responsibility for the work of a component auditor, are all communications between the group engagement team and component auditor required to be in writing?

Reply—No. Communication between the group engagement team and a component auditor need not necessarily be in writing. For example, the group engagement team may visit the component auditor to discuss identified significant risks or review relevant parts of the component auditor’s audit documentation. In all audits of group financial statements, however, communications between the group engagement team and component auditors about the group engagement team’s requirements should be written. (See paragraphs .49, .59–.60, and .A87 of AU-C section 600.)

[Issue Date: November 2012.]

.23 Use of Component Materiality When the Component Is Not Reported On Separately

Inquiry—Is it necessary to use a component materiality lower than group materiality when the component will not be reported on separately, and the audit of the entire group is being performed by the group engagement team as one audit?

Reply—If the component is a significant component on which the group engagement team will be performing audit procedures, the group engagement team is required to determine component materiality. (See paragraph .31 of AU-C section 600.) To reduce the risk that uncorrected and undetected misstatements in each component’s financial statements, when aggregated, exceeds the materiality for the group’s financial statements as a whole, component materiality should be less than the materiality for the group financial statements as a whole. In circumstances when appropriate responses to assessed risks of material misstatement for some or all accounts or classes of transactions may be implemented at the group level, for example when accounts receivable for the parent and subsidiaries use the same system and the consolidated accounts receivable are audited as one aggregated amount, there is no risk of aggregation error and, therefore, no need to allocate materiality to components.

[Issue Date: November 2012; Revised, February 2013.]

.24 Applicability of AU-C Section 600 When Only One Engagement Team Is Involved

Inquiry—Company X consolidates the operations of Entity A. The same group engagement team that audits Company X also audits Entity A. Because only one engagement team is involved, does AU-C section 600 apply? If so, what does AU-C section 600 require that is not already covered by other auditing standards?

Reply—AU-C section 600 applies to all audits of *group financial statements*, which are financial statements that contain more than one component. In the circumstances when the same engagement team audits all components of the

group, the considerations addressed in AU-C section 600 that relate to component auditors are not relevant. However, considerations addressed in AU-C section 600, such as understanding the components; identifying components that are significant due to individual financial significance and the significant risk of material misstatement; determining component materiality; understanding the consolidation process; and addressing the risks, including aggregation risk, of material misstatement in the group financial statements; are relevant in all group audits.

[Issue Date: February 2013.]

.25 Applicability of AU-C Section 600 When Making Reference to the Audit of an Equity Method Investee

Inquiry—When the group engagement partner decides to make reference to the audit of the component auditor of an equity investee in the auditor's report on the group financial statements, is the group auditor still required to determine component materiality for those components for which reference to component auditors will be made?

Reply—Once the group engagement partner has decided to make reference to the audit of the component auditor, paragraph .26 of AU-C section 600 requires the group engagement team to obtain sufficient appropriate audit evidence with regard to the equity investee by

- performing the procedures required by AU-C section 600, except those required by paragraphs .50–.64.
- reading the equity investee's financial statements and component auditor's report thereon to identify significant findings and issues and, when considered necessary, communicating with the component auditor in this regard.

Therefore, when the group engagement partner has decided to make reference to the audit of a component auditor, the group engagement team is not required to determine component materiality for that component.

[Issue Date: February 2013.]

.26 Procedures Required When Making Reference to the Audit of an Equity Method Investee

Inquiry—The auditor of Company A has decided to make reference to the audit of the component auditor of an equity investee in the report on Company A's financial statements. In addition to obtaining and reading the equity investee's financial statements and component auditor's report thereon, what additional procedures may be necessary in order to determine that the equity investment has been properly recorded?

Reply—In determining that the equity investment has been properly recorded, the group engagement team may conclude that additional audit evidence is needed because of, for example, significant differences in fiscal year-ends, changes in ownership, or changes in conditions affecting the use of the equity method of accounting. Examples of procedures that the group engagement team may perform include, but are not limited to, reviewing information in the group's (investor's) files that relates to the equity investee, such as investee minutes, budgets, and cash flows information, and making inquiries of investor management about the equity investee's financial results.

[Issue Date: February 2013.]

.27 Circumstances in Which Making Reference Is Inappropriate

Inquiry—Are there any circumstances in which it would be inappropriate to make reference to the audit of a component auditor of an equity investee in the auditor's report on the group financial statements?

Reply—AU-C section 600 precludes the auditor of the group financial statements from making reference to the audit of the component auditor in the following circumstances:

- When the group engagement team has serious concerns about the component auditor's professional competency or independence. (In this circumstance, the group auditor is precluded from using the work of the component auditor at all.)
- The component auditor's report on the equity investee's financial statements is restricted regarding use.
- The audit of the component was not performed in accordance with the relevant requirements of GAAS or, if applicable, the standards promulgated by the Public Company Accounting Oversight Board (PCAOB).
- The financial statements of the component (that is, the equity investee) and group are prepared in accordance with different financial reporting frameworks, unless certain conditions are met.

Determining if the Audit of the Component Was Performed in Accordance With the Relevant Requirements of GAAS

When the component auditor has performed an audit of the component financial statements in accordance with auditing standards other than GAAS or the standards promulgated by the PCAOB, the group auditor is precluded from making reference, unless the group engagement partner has determined that the component auditor has performed an audit of the financial statements of the component in accordance with the relevant requirements of GAAS. Relevant requirements of GAAS in this context are those that pertain to planning and performing the audit of the component financial statements and do not include those related to the form of the auditor's report. Audits performed in accordance with International Standards on Auditing (ISAs) promulgated by the International Auditing and Assurance Standards Board (IAASB) are more likely to meet the relevant requirements of GAAS than audits performed in accordance with auditing standards promulgated by bodies other than the IAASB. The group engagement team may provide the component auditor with AU-C appendix B, *Substantive Differences Between the International Standards on Auditing and Generally Accepted Auditing Standards* (AICPA, *Professional Standards*), that identifies substantive requirements of GAAS that are not requirements in ISAs.

The component auditor may perform additional procedures in order to meet the relevant requirements of GAAS. When the component auditor's report on the component's financial statements does not state that the audit of the component's financial statements was performed in accordance with GAAS or the standards promulgated by the PCAOB, and the group engagement partner has determined that the component auditor performed additional audit procedures in order to meet the relevant requirements of GAAS, the auditor's report on the group financial statements should clearly indicate

- a. the set of auditing standards used by the component auditor and
- b. that additional audit procedures were performed by the component auditor to meet the relevant requirements of GAAS.

Making Reference When Different Financial Reporting Frameworks Have Been Used

Conditions that, if met, permit the group auditor to make reference when the component financial statements are prepared in accordance with a different financial reporting framework than that used for the group financial statements are the following:

- The applicable financial reporting framework provides for the inclusion of component financial statements that are prepared in accordance with a different financial reporting framework, and as such, the component financial statements are deemed to be in accordance with the applicable financial reporting framework. For example, the financial reporting frameworks established by GASB and the Federal Accounting Standards Advisory Board have such provisions.
- The measurement, recognition, presentation, and disclosure criteria that are applicable to all material items in the component's financial statements under the financial reporting framework used by the component are similar to the criteria applicable to all material items in the group's financial statements under the financial reporting framework used by the group, and the group engagement team has obtained sufficient appropriate audit evidence for purposes of evaluating the appropriateness of the adjustments to convert the component's financial statements to the financial reporting framework used by the group without the need to assume responsibility for, and, thus, be involved in, the work of the component auditor.

When reference is made to a component auditor's report on financial statements prepared using a different financial reporting framework, the auditor's report on the group financial statements should disclose that the auditor of the group financial statements applied audit procedures on the conversion adjustments.

[Issue Date: February 2013.]

.28 Lack of Response From a Component Auditor

Inquiry—Paragraph .40 of AU-C section 600 requires the group engagement team to communicate to the component auditor and ask for his or her cooperation. Paragraph .41 of AU-C section 600 requires the group engagement team to ask the component auditor for certain information. If the component auditor does not respond to the group engagement team, is the auditor of the group financial statements precluded from making reference to the audit of a component auditor?

Reply—Lack of response from a component auditor to the communication and request for information from the group engagement team does not, in and of itself, preclude the group engagement partner from deciding to make reference to the audit of a component auditor. However, the group engagement team is required to obtain an understanding of the component auditor, in accordance with paragraph .22 of AU-C section 600, including

- a. whether a component auditor understands and will comply with the ethical requirements that are relevant to the group audit and, in particular, is independent.
- b. a component auditor's professional competence.
- c. whether the group engagement team will be able to obtain from a component auditor information affecting the consolidation process.
- d. whether a component auditor operates in a regulatory environment that actively oversees auditors.

Obtaining this understanding may be more difficult when the component auditor does not respond to the communication from the group engagement team. When a component auditor does not meet the independence requirements that are relevant to the group audit, or the group engagement team has serious concerns about the other matters previously listed, the group engagement team should obtain sufficient appropriate audit evidence relating to the financial information of the component without making reference to the audit of that component auditor in the auditor's report on the group financial statements or otherwise using the work of that component auditor.

[Issue Date: February 2013.]

.29 Equity Investee's Financial Statements Reviewed, and Investment Is a Significant Component

Inquiry—Company X has an equity investment in Entity A that the group engagement team has identified as a significant component. If the management of Entity A has their financial statements reviewed but refuses to allow an audit or any other work to be performed on Entity A's financial statements, does a scope limitation exist?

Reply—Yes. If Entity A is a significant component, and no auditing procedures can be performed on Entity A's financial statements, a scope limitation exists, and the effect of the group engagement team's inability to obtain sufficient appropriate audit evidence is considered in terms of AU-C section 705, *Modifications to the Opinion in the Independent Auditor's Report* (AICPA, *Professional Standards*).

[Issue Date: February 2013.]

.30 Making Reference to Review Report

Inquiry—Is it ever appropriate to make reference to another CPA's review report in an auditor's report on group financial statements?

Reply—No, it is never appropriate to make reference to the review report on the component's financial statements in the auditor's report on group financial statements. AU-C section 600 only provides for making reference to the audit of a component auditor.

[Issue Date: February 2013.]

.31 Review of Component That Is Not Significant Performed by Another Practitioner

Inquiry—Company X has an equity investment in Entity A that is not considered a significant component. A review of the financial statements of Entity A has been performed by another practitioner. Can the group engagement team use the work of the practitioner as part of the audit evidence for the audit of the group financial statements?

Reply—Paragraphs .54–.55 of AU-C section 600 discuss certain procedures to be performed on a component when the component is not a significant component. In certain circumstances, a review of a component's financial statements may be sufficient audit evidence. Therefore, a group auditor may use the work of another practitioner if the review meets the needs of the group auditor. Although the group auditor may use the review as part of the auditor's evidence for the audit of the group financial statements, the group auditor is not permitted to make reference to the practitioner's review report.

[Issue Date: February 2013.]

.32 Issuance of Component Auditor's Report

Inquiry—Company X has an investment in Entity A accounted for under the equity method of accounting. Company X is audited by one firm, and a CPA from a different firm performs audit procedures at Entity A sufficient to provide the auditor of Company X with appropriate audit evidence relative to the equity investee's financial information. Is it necessary for the auditor of Company X to obtain an auditor's report on Entity A's financial statements from the component auditor?

Reply—Although an audit report is typically obtained when an independent CPA performs work for a group auditor of a different firm, there is no requirement that such report be obtained if the group auditor assumes responsibility for the component auditor's work. When the auditor of Company X will assume responsibility for, and, thus, be involved in, the work of a component auditor, a component auditor's communication with the group engagement team may take the form of a memorandum or report of work performed. Alternatively, the auditor of Company X may decide to review the component auditor's working papers documenting the audit procedures performed. However, in order for the auditor of Company X to make reference to the audit of the component auditor, it is necessary for the component auditor to issue an auditor's report on Entity A.

[Issue Date: February 2013.]

.33 Structure of Component Auditor Engagement

Inquiry—Company X has an investment in Entity A accounted for under the equity method of accounting. Entity A is not willing to pay for an audit of its financial statements. Would an agreed-upon procedures engagement performed by an independent CPA for Entity A be sufficient to provide the auditor of Company X with appropriate audit evidence relative to the investment in the equity investee?

Reply—The auditor of Company X is responsible for determining the nature and extent of the procedures necessary to provide the auditor of Company X with sufficient appropriate audit evidence relative to the investment in the equity investee. The nature and extent of the necessary procedures are based on the significance of the component to the group. A component auditor may perform specified audit procedures relating to the likely significant risks of material misstatement of the group financial statements on behalf of the auditor of Company X. However, the structure of the engagement for the component auditor to perform the necessary procedures is not addressed by the standard.

[Issue Date: February 2013.]

.34 Subsequent Events Procedures Relating to a Component

Inquiry—Company X has an investment in Entity A that is accounted for by the equity method of accounting. Company X and Entity A are audited by different auditors. The audit of Entity A was completed before the audit of Company X began, and the auditor of Company X's financial statements has decided to make reference to the report of the auditor of Entity A. In such circumstances, who is responsible for performing auditing procedures relating to subsequent events at Entity A that may require adjustment to, or disclosure in, the group financial statements?

Reply—The auditor of the group financial statements is responsible for obtaining sufficient appropriate audit evidence that the group financial statements are free from material misstatement, regardless of whether reference is

made to the audit of a component auditor. Paragraph .39 of AU-C section 600 states that for components that are audited, the group engagement team or component auditors should perform procedures designed to identify events at those components that occur between the dates of the financial information of the components and the date of the auditor's report on the group financial statements and that may require adjustment to, or disclosure in, the group financial statements.

When the audit of the component is completed before the date of the auditor's report on the group financial statements, the group engagement team may communicate with the component auditor and ask the component auditor to perform procedures to identify subsequent events that would require adjustment to, or disclosure in, the group financial statements. Alternatively, the group engagement team may work with group management to obtain the necessary information and perform procedures themselves. Examples of procedures the group engagement team may perform include, but are not limited to, reviewing information in group management's files that relates to the component, such as component minutes, budgets, and cash flows information, and making inquiries of group management about the component's financial results.

If the group engagement team is unable to obtain sufficient appropriate audit evidence about subsequent events to make a determination about whether the group financial statements are materially misstated, then a scope limitation exists, and the effect of the group engagement team's inability to obtain sufficient appropriate audit evidence is considered in terms of AU-C section 705.

[Issue Date: February 2013.]

.35 Component and Group Have Different Year-Ends

Inquiry—Company X has a component comprising an investment in Entity A accounted for by the equity method of accounting. Entity A is audited by a component auditor. Entity A has a different year-end than Company X. The auditor of the group financial statements has decided to make reference to the audit of the component auditor. What procedures, if any, would be appropriate for the group engagement team perform as a result of the difference in year-ends?

Reply—FASB *Accounting Standards Codification* (ASC) 323-10-35-6 states that “[i]f financial statements of an investee are not sufficiently timely for an investor to apply the equity method currently, the investor ordinarily shall record its share of the earnings or losses of an investee from the most recent available financial statements. A lag in reporting shall be consistent from period to period.” When a time lag in reporting between the date of the financial statements of the group and that of the component exists, appropriate procedures performed by the group engagement team include consideration of whether the time lag is consistent with the prior period in comparative statements and, as discussed in section 8800.15, “Restricted Access to Component Auditor Documentation,” whether a significant transaction occurred during the time lag that would require adjustment to, or disclosure in, the group financial statements. The group engagement team may also perform auditing procedures on the information from the period audited by the component auditor to Company X's year-end (stub period). If the group engagement team is unable to obtain sufficient appropriate audit evidence about the stub period information, a scope limitation exists, and the effect of the group engagement team's inability to obtain sufficient appropriate audit evidence is considered in terms of AU-C section 705. If a change in stub period occurs that has a material

effect on the group's financial statements, the auditor should consider the consistency of the financial statements for the periods presented, in accordance with AU-C section 708, *Consistency of Financial Statements* (AICPA, *Professional Standards*), because of the change in reporting period.

[Issue Date: February 2013.]

.36 Investments Held in a Financial Institution Presented at Cost or Fair Value

Inquiry—Paragraph .11 of AU-C section 600 defines a component as “[a]n entity or business activity for which group or component management prepares financial information that is required by the applicable financial reporting framework to be included in the group financial statements.” Is an investment in a certificate of deposit or other types of cash investments held by a financial institution (for example, an overnight repurchase agreement) deemed a component for purposes of AU-C section 600?

Reply—No. A certificate of deposit or other cash investments held by a financial institution or bank do not constitute components.

[Issue Date: February 2013.]

.37 Employee Benefit Plan Using Investee Results to Calculate Fair Value

Inquiry—Do the investments in an employee benefit plan that rely on the investee results to calculate fair value constitute components under AU-C section 600?

Reply—No. Generally, the investments held by an employee benefit plan are required to be accounted for at fair value, with limited exceptions, and do not constitute a *component*, as defined under AU-C section 600; therefore, AU-C section 600 would not apply.

[Issue Date: February 2013.]

.38 Using Net Asset Value to Calculate Fair Value

Inquiry—Paragraphs 59–62 of FASB ASC 820-10-35 permit a reporting entity to estimate the fair value of an investment using net asset value (NAV) per share of the investment (or its equivalent) if NAV is calculated in a manner consistent with the measurement principles of FASB ASC 946, *Financial Services—Investment Companies*, as of the reporting entity's measurement date. If an entity uses the NAV of an investment as a practical expedient to estimate the fair value of that investment, is that investment considered a component under AU-C section 600?

Reply—No. Paragraph .A2 of AU-C section 600 states that an investment accounted for under the equity method constitutes a component for purposes of AU-C section 600. AU-C section 600 does not specifically identify what other, if any, types of investments may be considered components under the definition in that section.

When an entity elects to use NAV as a practical expedient, paragraph .04 of AU-C section 501, *Audit Evidence—Specific Considerations for Selected Items* (AICPA, *Professional Standards*), generally applies because it addresses situations when investments in securities are valued based on an investee's financial results, excluding investments accounted for using the equity method of accounting.

Paragraph .04 of AU-C section 501 states that when investments in securities are valued based on an investee's financial results, excluding investments accounted for using the equity method of accounting, the auditor should

obtain sufficient appropriate audit evidence in support of the investee's financial results, as follows:

- a. Obtain and read available financial statements of the investee and the accompanying audit report, if any, including determining whether the report of the other auditor is satisfactory for this purpose.
- b. If the investee's financial statements are not audited or if the audit report on such financial statements is not satisfactory to the auditor, apply or request that the investor entity arrange with the investee to have another auditor apply appropriate auditing procedures to such financial statements, considering the materiality of the investment in relation to the financial statements of the investor entity.
- c. If the carrying amount of the investment reflects factors that are not recognized in the investee's financial statements or fair values of assets that are materially different from the investee's carrying amounts, obtain sufficient appropriate audit evidence in support of such amounts.
- d. If the difference between the financial statement period of the entity and investee has or could have a material effect on the entity's financial statements, determine whether the entity's management has properly considered the lack of comparability, and determine the effect, if any, on the auditor's report.

[Issue Date: February 2013.]

.39 Disaggregation of Account Balances or Classes of Transactions

Inquiry—Company X consolidates the operations of Entity A. The same group engagement team audits Company X and the operations of Entity A; no other auditors or engagement teams are involved. Are there any requirements in AU-C section 600 to disaggregate account balances or classes of transactions for purposes of auditing the consolidated financial statements of Company X? For example, is the auditor required to disaggregate accounts receivable for purposes of confirmation procedures, or can the consolidated group of accounts be treated as one population?

Reply—AU-C section 600 does not require the auditor to disaggregate account balances or classes of transactions. The group auditor should design an audit plan that is responsive to the risks of material misstatements to the consolidated financial statements. The less similar the risks of material misstatement at the group and component level, the less appropriate it may be to perform audit procedures for some or all accounts or classes of transactions at the group level. Additionally, the more complex the group (for example, decentralized systems, fewer groupwide controls, differing jurisdictions, or diverse product lines), the less likely that testing in the aggregate will sufficiently and appropriately address the risks of material misstatement.

[Issue Date: February 2013.]

.40 Variable Interest Entities (VIEs) as a Component

Inquiry—Company X consolidates the financial information of Entity A, a variable interest entity of which Company X is the primary beneficiary. Is Entity A considered a component for purposes of AU-C section 600?

Reply—Yes. Paragraph .11 of AU-C 600 defines a component as “[a]n entity or business activity for which group or component management prepares financial information that is required by the applicable financial reporting framework to be included in the group financial statements.” Because Entity

A's financial information is required to be consolidated into Company X's financial statements, Entity A constitutes a component for purposes of AU-C section 600. As such, the requirements of AU-C section 600 apply.

[Issue Date: March 2013.]

.41 Component Using a Different Basis of Accounting Than the Group

Inquiry—A component whose financial information is required to be consolidated into group financial statements maintains its financial information on the tax basis of accounting. The group financial statements are prepared using GAAP. What is the group auditor's responsibility regarding the consolidation of the component's financial information into the group financial statements?

Reply—When a component's financial information is prepared on the tax basis of accounting, and the group financial statements are prepared using GAAP, the auditor is required by paragraph .36 of AU-C section 600 to evaluate whether the financial information of the component has been appropriately adjusted. Appropriate adjustments are adjustments that convert the tax basis of information to GAAP basis. An example of this is converting depreciation under the method used for tax purposes by the component to depreciation calculated using the method used for the group financial statements.

[Issue Date: March 2013.]

.42 Component Audit Report of Balance Sheet Only

Inquiry—Company X prepares consolidated financial statements that include the operations of entity A. The auditor for entity A has audited the balance sheet only and has disclaimed an opinion on the other financial statements. May the group auditor of Company X, who was engaged to issue an opinion on the consolidated financial statements of the group, make reference in the report on the group financial statements to the audit of the balance sheet of entity A?

Reply—No. A component auditor's report on a balance sheet only does not provide sufficient appropriate audit evidence on revenues, expenses, and cash flows of the component to enable the group engagement partner to make reference. Accordingly, the group engagement team would have to perform procedures on the financial information of entity A in order to obtain sufficient appropriate audit evidence.

[Issue Date: June 2013.]

.43 Using Another Accounting Firm to Perform Inventory Observations

Inquiry—An accounting firm outsources its year-end inventory observation procedures for an audit to another accounting firm due to location of the inventory. Is the other accounting firm considered a component auditor in accordance with AU-C section 600?

Reply—The other auditor performing inventory observation is not considered a component auditor. However, paragraph .02 of AU-C section 600 states that "an auditor may find this section, adapted as necessary in the circumstances, useful when that auditor involves other auditors in the audit of financial statements that are not group financial statements. For example, an auditor may involve another auditor to observe the inventory count or inspect fixed assets at a remote location." Paragraph .16 of AU-C section 220, *Quality Control for an Engagement Conducted in Accordance With Generally Accepted Auditing Standards* (AICPA, *Professional Standards*), requires the engagement partner to be satisfied that those performing the audit possess the appropriate competence and capabilities. In accordance with paragraph .17 of AU-C section

220, the engagement partner is responsible for the direction, supervision, and performance of the audit engagement. The requirements and application material in AU-C section 600 relating to understanding a component auditor, setting materiality, determining the type of work to be performed, and involvement in the work performed by component auditors provide relevant guidance for meeting the requirements in AU-C section 220 with regard to the other auditor.

[Issue Date: June 2013.]

[The next page is 8991.]

Section 8900

Predecessor Auditors

[.01] Reserved

.02 Communications Between Predecessor Auditors and Auditors

Inquiry—A client has decided to restate, for comparative purposes, the statement of changes in financial position reported on by the predecessor auditor to a statement of cash flows. The predecessor auditor's audit report will not be presented.

- a. Should the auditor notify the predecessor auditor as part of the auditor's procedures to prepare or evaluate restatements permitted or mandated by new accounting standards?
- b. How will the restatement affect the auditor's report?

Reply—Paragraph .12 of AU-C section 510, *Opening Balances—Initial Audit Engagements, Including Reaudit Engagements* (AICPA, *Professional Standards*), states

If the auditor becomes aware of information that leads the auditor to believe that financial statements reported on by the predecessor auditor may require revision, the auditor should request management to inform the predecessor auditor of the situation and arrange for the three parties to discuss this information and attempt to resolve the matter.

In cases where revisions result from an accounting change required or permitted by a new Financial Accounting Standards Board or AICPA pronouncement, the auditor is not required to consult with the predecessor auditor. However, the auditor may find that communication with the predecessor auditor is desirable in order to obtain any additional information or audit documentation that may be needed to prepare or evaluate the restatement. To maintain audit efficiency, such communications may be made as part of the auditor's routine request for review of selected audit documentation.

Paragraph .55 of AU-C section 700, *Forming an Opinion and Reporting on Financial Statements* (AICPA, *Professional Standards*), requires that if the prior period financial statements are restated, and the predecessor auditor agrees to issue a new auditor's report on the restated financial statements of the prior period, the auditor should express an opinion only on the current period.

[Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

.03 Communications With a Predecessor Auditor Who Has Ceased Operations¹

Inquiry—AU-C section 210, *Terms of Engagement* (AICPA, *Professional Standards*), requires an auditor to attempt certain communications with the predecessor auditor prior to acceptance of an engagement. How should the

¹ AR section 400, *Communication Between Predecessor and Successor Accountants* (AICPA, *Professional Standards*), provides guidance to a successor accountant who decides to communicate with a predecessor accountant regarding acceptance of an engagement to compile or review the financial statements of a nonpublic company. In situations in which the predecessor accountant has ceased operations and the successor accountant decides to engage in such communications, the guidance in this paragraph may be useful.

auditor fulfill this responsibility when the predecessor auditor has ceased operations?

Reply—Even when the predecessor auditor has ceased operations, AU-C section 210 obligates an auditor to attempt certain communications with the predecessor auditor prior to acceptance of an engagement. The auditor should attempt the required communications, about matters that the auditor believes will assist the auditor in determining whether to accept the engagement, with the individual who had final responsibility for the audit (for example, the engagement partner). Paragraph .12 of AU-C section 210 requires the auditor to evaluate the predecessor auditor's response, or consider the implications if the predecessor auditor provides no response or a limited response, in determining whether to accept the engagement.

[Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

.04 Unavailability of the Audit Documentation of a Predecessor Auditor Who Has Ceased Operations

Inquiry—An auditor's initial audit may be facilitated by reviewing the predecessor auditor's audit documentation. What is the effect on the auditor's initial audit when the audit documentation of a predecessor auditor who has ceased operations is not available for review?

Reply—Paragraph .08 of AU-C section 510 requires the auditor to obtain sufficient appropriate audit evidence about whether the opening balances contain misstatements that materially affect the current period's financial statements, and states that the auditor should perform one or both of the following to obtain evidence regarding opening balances:

- a. Review the predecessor auditor's audit documentation
- b. Perform specific audit procedures

Paragraph .15 of AU-C section 510 requires that if the auditor is unable to obtain sufficient appropriate audit evidence regarding the opening balances, the auditor should express a qualified opinion or disclaim an opinion on the financial statements, as appropriate, in accordance with AU-C section 705, *Modifications to the Opinion in the Independent Auditor's Report* (AICPA, *Professional Standards*).

[Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

.05 Significant Audit Procedures Performed by a Predecessor Auditor Who Has Ceased Operations

Inquiry—If a predecessor auditor has performed significant audit procedures, such as the observation of inventory or the confirmation of accounts receivable, and subsequently has ceased operations, to what extent may this work be used by the auditor?

Reply—Because a report on the financial statements has not been issued by the predecessor auditor and the auditor cannot complete the procedures required by AU-C section 600, *Special Considerations—Audits of Group Financial Statements (Including the Work of Component Auditors)* (AICPA, *Professional Standards*), the auditor can neither assume responsibility for the work of the predecessor auditor nor issue a report that reflects divided responsibility for the audit, as described in AU-C section 600. The auditor should perform audit procedures sufficient to reduce audit risk to an acceptably low level and thereby enable the auditor to draw reasonable conclusions on which

to base the auditor's opinion on the financial statements under audit. However, review of the predecessor auditor's audit documentation may have an effect on the nature, timing and extent of those procedures.

[Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

.06 Auditor Becomes Aware of Information During the Audit That Leads the Auditor to Believe That Financial Statements Reported On by a Predecessor Auditor Who Has Ceased Operations May Require Revision

Inquiry—Paragraph .12 of AU-C section 510 states that if the auditor becomes aware of information during the audit that leads the auditor to believe that financial statements reported on by the predecessor auditor may require revision, the auditor should request management to inform the predecessor auditor of the situation and arrange for the three parties to discuss the situation and attempt to resolve the matter. What actions may an auditor take when the auditor becomes aware of information during the audit that leads the auditor to believe that financial statements reported on by a predecessor auditor require revision when the predecessor auditor has ceased operations?

Reply—When the auditor becomes aware of information that leads the auditor to believe that the financial statements reported on by a predecessor auditor who has ceased operations may require revision, in accordance with paragraph .12 of AU-C section 510, the auditor should discuss the information with management and attempt to resolve the matter. In attempting to resolve the matter, the auditor may request that management inform the individual who had final responsibility for the audit of the financial statements reported on by the predecessor auditor (for example, the engagement partner) of the situation and arrange for that individual to discuss the information with the auditor and management. If it is determined that the financial statements require revision, the auditor may request that management disclose the information to the party responsible for winding up the affairs of the predecessor auditor. If the auditor is not satisfied with the resolution of the matter, in accordance with paragraph .13 of AU-C section 510, the auditor should evaluate (a) the implications on the current engagement and (b) whether to withdraw from the engagement or, when withdrawal is not possible under applicable law or regulation, disclaim an opinion on the financial statements. The auditor may decide to consult with legal counsel in determining an appropriate course of action.

[Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

.10 Successor Accountant Becomes Aware of Information During the Performance of a Compilation or Review That Leads the Successor Accountant to Believe That Financial Statements Reported On by a Predecessor Accountant Who Has Ceased Operations May Require Revision

Inquiry—Paragraph .10 of AR section 400, *Communications Between Predecessor and Successor Accountants* (AICPA, *Professional Standards*), provides guidance to a successor accountant who, during an engagement to compile or review current-period financial statements, becomes aware of information that leads him or her to believe that financial statements reported on by a predecessor accountant may require revision. Paragraph .10 of AR section 400 states

that the successor accountant should request that his or her client communicate this information to the predecessor accountant. How may the successor accountant fulfill this responsibility when the predecessor accountant has ceased operations?

Reply—When the successor accountant becomes aware of information that leads him or her to believe that financial statements reported on by a predecessor accountant may require revision, the successor accountant should discuss the information with management. In attempting to resolve the matter, the successor accountant may request that management inform the individual who had final responsibility for the prior-period engagement (for example, the engagement partner) of the situation and arrange for that individual to discuss the information with management. If it is determined that the financial statements require revision, the successor accountant may request that management disclose the information to the party responsible for winding up the affairs of the predecessor accountant. If the successor accountant is not satisfied with the resolution of the matter, in accordance with paragraph .11 of AR section 400, the successor accountant should evaluate (a) possible implications for the current engagement and (b) whether to resign from the engagement. The successor accountant may decide to consult with legal counsel in determining an appropriate course of action.

[Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

Section 9030

Accounting Changes

[.01] Reserved

[.02] Reserved

.03 Change in Service Lives of Fixed Assets

Inquiry—A reevaluation of the lives of depreciable property resulted in an increase in the remaining lives of certain properties. The company would like to include the cumulative, net of tax, effect of this change in income. Is this in accordance with generally accepted accounting principles?

Reply—Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 250, *Accounting Changes and Error Corrections*, is quite specific regarding the treatment of changes in estimated service lives of depreciable assets. Such a change is considered a change in an accounting estimate and should be recorded prospectively, that is, in the period of the change and future periods as appropriate. Therefore, the proposed accounting would not be in accordance with generally accepted accounting principles. If the change in service lives of depreciable property were accounted for as suggested, the independent auditors would have to issue a qualified or adverse opinion depending upon materiality of the item.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.10 Change From Generally Accepted Accounting Principles (GAAP) to a Special Purpose Framework or From a Special Purpose Framework to GAAP

Inquiry—A company that has previously issued financial statements prepared in accordance with GAAP has decided to change to the income tax basis (or vice versa). How should the change in accounting basis be accounted for and reported in the financial statements and how does the change impact the auditor's or accountant's report?

Reply—Accounting issues:

Authoritative literature does not address accounting for a change in accounting basis. FASB ASC 250 provides guidance for reporting accounting changes within the same basis. However, the situation described above is considered to be a change in accounting basis rather than an accounting change.

When only current year financial statements are presented, it is common practice to present the effect of the change in the accounting basis by showing beginning retained earnings as previously reported with an adjustment to convert to the new basis. Although not as common in practice, precedent also exists for either showing opening retained earnings on the new basis or showing the effects of the change as a cumulative-effect adjustment in the income statement.

However, if comparative financial statements are presented, the prior year(s) should be restated and presented under the basis to which the company has changed. Restatement is necessary to ensure comparability with all periods presented.

In both cases, the change in accounting basis should be disclosed in the notes to the financial statements.

—Reporting issues:

Auditing literature states that a change in accounting basis does not represent a lack of consistency and, consequently, that report modification is not required. However, the literature allows for the inclusion of an emphasis-of-matter paragraph in the auditor's report to emphasize a matter regarding the financial statements.

A summary of the relevant authoritative references follows:

Paragraph .A1 of AU-C section 708, *Consistency of Financial Statements* (AICPA, *Professional Standards*), indicates that the consistency reference in the auditor's report refers to consistent application of principles within a basis of presentation. The standards do not address the consistent use of a basis of presentation; therefore, a change in accounting basis does not require the auditor to modify the report for a lack of consistency.

Paragraph .06 of AU-C section 706, *Emphasis-of-Matter Paragraphs and Other-Matter Paragraphs in the Independent Auditor's Report* (AICPA, *Professional Standards*), indicates that an auditor should include an emphasis-of-matter paragraph in the auditor's report if the auditor considers it necessary to draw users' attention to a matter appropriately presented or disclosed in the financial statements that, in the auditor's professional judgment, is of such importance that it is fundamental to users' understanding of the financial statements.

A sample emphasis-of-matter paragraph for an audit report on comparative financial statements in the year of change to a special purpose framework follows:

(emphasis-of-matter paragraph)

As discussed in Note A to the financial statements, in 20X4 the Company adopted a policy of preparing its financial statements on the accrual method of accounting used for federal income tax purposes, which is a comprehensive basis of accounting other than generally accepted accounting principles. Accordingly, the accompanying financial statements are not intended to present financial position and results of operations in accordance with accounting principles generally accepted in the United States of America. The financial statements for 20X3 have been restated to reflect the income tax basis of accounting accrual method adopted in 20X4.

Accountants performing review or compilation engagements may also consider adding an explanatory paragraph for these basis changes.

[Amended, February 1995; Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC; Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

Section 9060

Uncertainties

[.01] Reserved

[.02] Reserved

[.03] Reserved

[.04] Reserved

[.05] Reserved

.06 Possible Effect of Divorce Proceedings on Credit Rating

Inquiry—A client and his wife who are co-owners and co-managers of a business are involved in divorce proceedings. The auditor believes a divorce will adversely affect the business's credit rating. Is it necessary to include a reference in the financial statements to the divorce proceedings and their potentially adverse effects?

Reply—The auditor should not include references in his report to currently litigated divorce proceedings. The independent auditor should refrain from mentioning the client's involvements of a personal nature which might effectively disparage (or even stimulate the slander of) his business reputation or credit standing. It is possible that a divorce settlement could adversely affect the credit standing of the client, but in the absence of a final determination of the litigation or a determinative event which directly affects the financial condition of the entity under audit, the rule of informative disclosure does not compel the independent accountant to contribute in advance to a possible adverse effect on the client's credit standing.

[.07] Reserved

.08 Going Concern Problem—Financial Statements Prepared on the Income Tax Basis of Accounting

Inquiry—A client prepares its financial statements on the income tax basis of accounting. The client is experiencing financial difficulties and its ability to continue as a going concern is questionable. Since the financial statements are prepared on a special purpose framework, is the CPA's audit report required to include an emphasis-of-matter paragraph that refers to this uncertainty?

Reply—Yes. AU-C section 570, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern* (AICPA, *Professional Standards*), applies to all audits of financial statements, regardless of whether the financial statements are prepared in accordance with a general purpose or a special purpose framework. Therefore, when the auditor concludes that there is substantial doubt about the entity's ability to continue as a going concern for a reasonable period, regardless of whether the financial statements are prepared in accordance with a general purpose or a special purpose framework, the auditor should include an emphasis-of-matter paragraph (following the opinion paragraph) to reflect that conclusion.

[Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

.09 Audit Report for Development Stage Enterprise

Inquiry—Is an emphasis-of-matter paragraph in the auditor's report for a going concern uncertainty always required for a development stage enterprise because there is doubt as to recovery of costs from future operations?

Reply—No. A going concern uncertainty does not automatically arise because an enterprise is in the development stage. In accordance with AU-C section 570, the auditor should consider whether the results of the procedures performed during the course of the audit identify conditions or events that, when considered in the aggregate, indicate there could be substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time. If such conditions or events are identified, the auditor should obtain information about management's plans that are intended to mitigate the adverse effects of such conditions or events, and assess whether it is likely that such plans can be effectively implemented.

If the auditor concludes that substantial doubt about the entity's ability to continue as a going concern for one year after the balance sheet date remains after considering conditions or events and management's plans, the going concern issue should be adequately disclosed in the financial statements, and the auditor's report should include an emphasis-of-matter paragraph to reflect this conclusion.

[Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

[The next page is 9121.]

Section 9070

Subsequent Events

Note: *Additional Questions and Answers on subsequent events can be found in section 8700, Subsequent Events.*

.01 Failure to Remit Withholding Taxes in Subsequent Period

Inquiry—In the course of an examination of the financial statements, the auditor has discovered that in the period subsequent to the balance sheet date the company has not remitted to the appropriate agencies the taxes currently withheld from employees' wages. Assuming the amount is material, is it necessary that this matter be disclosed in the auditor's report?

Reply—Paragraph .02 of AU-C section 560, *Subsequent Events and Subsequently Discovered Facts* (AICPA, *Professional Standards*), states, in part

Financial statements may be affected by certain events that occur after the date of the financial statements...financial reporting frameworks ordinarily identify two types of events:

- a. Those that provide evidence of conditions that existed at the date of the financial statements
- b. Those that provide evidence of conditions that arose after the date of the financial statements

The auditor's objective is to determine whether events occurring between the date of the financial statements and the date of auditor's report that require adjustment of, or disclosure in, the financial statements have been identified and are appropriately reflected in the financial statements. Even if it is determined that the financial statements are not directly affected, it is possible that the situation indicated future serious difficulties that might require disclosures.

If the delinquent obligations are not evidence of serious financial difficulties, there usually would be no reason why obligations incurred subsequent to the balance sheet date need be reported in financial statements as of such date. In such a case, it should be expected that the delinquent payments will soon be remitted.

[Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

.02 Disclosure of Note Receivable Covering Previous Account of Bankrupt Company

Inquiry—Company A reports on a fiscal year ending January 31. Company A's accounts receivable include a material amount due from a bankrupt company. To avoid legal action, several individuals formed a new company. The new company and the individuals signed a note which would pay the accounts receivable of the bankrupt company over a three year period. The note was signed on March 1, subsequent to the balance sheet date. Should the note receivable, assumed to be collectible, be presented in the balance sheet at January 31?

Reply—AU-C section 560 and Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 855, *Subsequent Events*, deal with subsequent events. Paragraph 1 of FASB ASC 855-10-55 states, in part

Subsequent events affecting the realization of assets, such as receivables and inventories or the settlement of estimated liabilities, should be recognized in the financial statements when those events represent the culmination of conditions that existed over a relatively long period of time.

Accordingly, the accounts receivable should be reported as a note receivable at January 31, with adequate disclosure of the financial arrangements made after the balance sheet date.

[Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

.03 Discovery of Potential Liability in Subsequent Period

Inquiry—In the period subsequent to the balance sheet date, the auditors discovered that an employee of the client had used a company purchase order to obtain merchandise for his personal business. This transaction resulted in a material potential liability of the client. Negotiations with the creditor ensued and the client's attorney was successful in securing a complete release from any obligation on the part of the client.

Is it necessary to disclose this matter on the client's financial statements?

Reply—According to paragraph .02 of AU section 560, the resolution of this matter appears to constitute a subsequent event which is evidence of a condition that existed at the balance sheet date, but since no transaction in fact occurred which involved the client, it is not necessary to disclose the matter in the financial statements. However, a condition which did affect the client and which did exist at the balance sheet date is the future legal costs of settling the matter. Provisions for these costs (if they are material) should be made on the financial statements, and the reasons for incurring these costs should be disclosed.

[Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

[.04] Reserved

.05 Consideration of Impact of Losses From Natural Disasters Occurring After Completion of Audit Field Work and Signing of the Auditor's Report But Before Issuance of the Auditor's Report and Related Financial Statements

Inquiry—An auditor completes the field work with respect to an audit of financial statements, performs all of the post-field work procedures required by the firm's quality control standards and signs the audit report but does not immediately issue the auditor's report and the related financial statements to the client. During the period that the report was signed but not issued, the client suffers a significant loss due to a natural disaster. What are the auditor's responsibilities with respect to consideration of a material subsequent event that occurs after completion of field work and after the signing of the auditor's report but before issuance of the auditor's report and the audited financial statements?

Reply—AU-C section 560 defines *subsequent events* as events occurring between the date of the financial statements and the date of the auditor's report. Paragraph .12 of AU-C section 560 states that the auditor is not required to perform any audit procedures regarding the financial statements after the date of the auditor's report. However, if a subsequently discovered fact becomes

known to the auditor after the report release date, the auditor is required to perform certain procedures. Paragraph .02 of AU-C section 560 indicates that there are two types of events: (a) those that provide evidence of conditions that existed at the date of the financial statements, and (b) those that provide evidence of conditions that arose after the date of the financial statements.

A loss from a natural disaster occurring after year end would be considered the second type subsequent event. These events should not result in an adjustment to the financial statements. Some of these events, however, may be of such a nature that disclosure of them is required to keep the financial statements from being misleading. In addition, the auditor should always remember that the financial statements belong to the client and the client may wish to disclose the event in the notes to the financial statements even if not required to do so.

Management and the auditor should consider whether a subsequent event that provides evidence of conditions that arose after the date of the financial statements would be of such a nature that disclosure of the event is necessary in order to keep the financial statements from being misleading. Management and the auditor should also consider whether the event affects the entity's ability to continue as a going concern.

For example, if the auditee owns a major distribution center in an area that is declared a disaster area by a local, state, or federal government due to natural disaster (e.g. hurricane, earthquake, tornado), management and the auditor should assess the damage done to that asset and the impact on the entity's current and future operations and determine whether disclosure of the impact of the disaster is required to keep the financial statements from being misleading. Occasionally such an event may be so significant that disclosure can best be made by supplementing the historical financial statements with pro forma financial data giving effect to the event as if it had occurred on the date of the balance sheet. It may be desirable to present pro forma statements, usually a balance sheet only, in columnar form on the face of the historical statements.

The auditor may conclude that the event has such a material impact on the entity that it would be appropriate to include an emphasis of matter paragraph in the auditor's report directing the reader's attention to the event and its effects. As paragraph .06 of AU-C section 706, *Emphasis-of-Matter and Other-Matter Paragraphs in the Independent Auditor's Report* (AICPA, *Professional Standards*), notes, emphasis-of-matter paragraphs are included in the auditor's report if the auditor considers it necessary to draw users' attention to a matter appropriately presented or disclosed in the financial statements that, in the auditor's professional judgment, is of such importance that it is fundamental to users' understanding of the financial statements.

If the auditor concludes that the effects of the disaster are such that substantial doubt exists as to the entity's ability to continue as a going concern for a reasonable period of time, the auditor should include an emphasis-of-matter paragraph (following the opinion paragraph) to reflect that conclusion. Paragraph .A6 of AU-C section 570, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern* (AICPA, *Professional Standards*), provides an example of such an emphasis-of-matter paragraph.

[Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

.06 Decline in Market Value of Assets Subsequent to the Balance Sheet Date

Inquiry—In light of overall market decline, should the decline in market value of an asset subsequent to the balance sheet date result in the adjustment of the financial statements?

Reply—FASB ASC 855-10-25-1 states that “[a]n entity shall recognize in the financial statements the effects of all subsequent events that provide additional evidence about conditions that existed at the date of the balance sheet, including the estimates inherent in the process of preparing financial statements.”

FASB ASC 855-10-25-3 states that “[a]n entity shall not recognize subsequent events that provide evidence about conditions that did not exist at the date of the balance sheet but arose after the balance sheet date but before financial statements are issued or are available to be issued.”

FASB ASC 855-10-55-2 provides a list of examples of nonrecognized subsequent events, including changes in the fair value of assets or liabilities (financial or nonfinancial) after the balance sheet date but before financial statements are issued or are available to be issued.

Audited Financial Statements

[.01] Reserved

.02 Going Concern Assumption for Venture With Limited Life

Inquiry—A corporation has recently been organized with the sole purpose of constructing a shopping center which will take several years to complete, after which the company will be liquidated. The company uses the completed contract method to recognize income and will have only one operating cycle.

Should there be an emphasis-of-matter paragraph in the auditor's report now or near the final years of operations on the assumption that after a certain fixed period it will no longer be a "going concern"?

Reply—AU-C section 570, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern* (AICPA, *Professional Standards*), requires that an emphasis-of-matter paragraph (following the opinion paragraph) be included in the audit report when the auditor concludes that substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time remains. A *reasonable period of time* is defined as "a period of time not to exceed one year beyond the date of the financial statements being audited." Therefore, when the auditor has substantial doubt that the corporation will continue as a going concern for one year from the date of the financial statements under audit, an emphasis-of-matter paragraph (following the opinion paragraph) reflecting that conclusion should be included in the audit report.

However, if the corporation has presented its financial statements on the assumption of liquidation, AU-C section 570 does not apply and therefore an emphasis-of-matter paragraph reflecting the auditor's conclusion that substantial doubt exists about the corporation's ability to continue as a going concern is not necessary.

[Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

.03 Opinion on Balance Sheet Only

Inquiry—Occasionally, a client will request from a CPA only an audited balance sheet with footnotes even though the CPA has examined and reported on all the financial statements. The usual purpose of this statement is for presentation by the client to a supplier for securing credit.

How may the CPA comply with the client's request while remaining in compliance with the reporting requirements in AU-C section 700, *Forming an Opinion and Reporting on Financial Statements* (AICPA, *Professional Standards*)?

Reply—AU-C sections 200–700 apply in an audit of financial statements and are to be adapted as necessary in the circumstances when applied to audits of other historical financial information. AU-C section 805, *Special Considerations—Audits of Single Financial Statements and Specific Elements, Accounts, or Items of a Financial Statement* (AICPA, *Professional Standards*), addresses special consideration in the application of those AU-C sections to an audit of a single financial statement. Examples of an auditor's report on a single financial statement can be found in illustrations 1–2 of the exhibit to AU-C section 805.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC; Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

.04 Opinion on Balance Sheet With Disclaimer on Income Statement

Inquiry—A CPA firm has been engaged to perform the initial audit of a company. Since the firm did not observe the inventory taking at the beginning of the period and it is not practicable for it to satisfy itself by other means as to the beginning inventory, the firm plans to issue an opinion only on the balance sheet and disclaim an opinion on the income statement. Would this be in accordance with paragraphs .11 and .15 of AU-C section 705, *Modifications to the Opinion in the Independent Auditor's Report* (AICPA, *Professional Standards*)?

Reply—Paragraph .11 of AU-C section 705 addresses scope limitations imposed by management after the engagement has been accepted, and does not apply when the scope limitation arises from circumstances relating to the timing of the auditor's work, such as the inability to observe beginning inventory in an initial audit.

Paragraph .15 of AU-C section 705 states, in part, that “when the auditor considers it necessary to ...disclaim an opinion on the financial statements as a whole, the auditor's report should not also include an unmodified opinion with respect to the same financial reporting framework on a single financial statements...” Paragraph .A17 of AU-C section 705 addresses initial audits and states “[i]n an initial audit, it is acceptable for the auditor to express an unmodified opinion regarding financial position and disclaim an opinion regarding the results of operations and cash flows, when relevant. In this case, the auditor has not disclaimed an opinion on the financial statements as a whole.” An example of a such an auditor's report can be found in illustration 8 of the exhibit to AU-C section 705.

[Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

[.05] Reserved**.06 Reference in Financial Statements to Auditor's Report**

Inquiry—Audited financial statements often contain a note such as:

The accompanying notes are an integral part of this financial statement.
or a note sometimes reads

The accompanying notes and auditor's report are an integral part of this financial statement.

The only difference between the two notes is the inclusion of the phrase, “and auditor's report.” Is a reference to the auditor's report necessary?

Reply—Paragraph .04 of AU-C section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards* (AICPA, *Professional Standards*), states, in part, “...an audit in accordance with GAAS is conducted on the premise that management and, when appropriate, those charged with governance, have acknowledged certain responsibilities that are fundamental to the conduct of an audit.” These responsibilities are defined as including the responsibility for the preparation and fair presentation of the financial statements. Therefore, the auditor's report cannot be an integral part of the financial statements, and it is inappropriate to include it by reference.

.09 Arrangement of References to Financial Statements in Auditor's Report

Inquiry—The examples of auditor's opinions in the Statements on Auditing Standards all seem to refer to the statement of financial position first, followed by the statement of results of operations, and finally the statement of cash flows. Is it necessary that the financial statements be presented in this order and the statements be referred to in the auditor's report in this order?

Reply—The order in which the financial statements are referred to in the independent auditor's report need not follow the order in which the statements are physically arranged. The illustrative standard report such as shown in the exhibit of AU-C section 700 can be used regardless of the order in which the financial statements are presented.

[.11] Reserved

[.12] Reserved

.13 Classification of Certain Callable Obligations

Inquiry—In some situations in which there is a violation of a debt agreement that makes a long-term obligation callable, management continues to classify the obligation as long-term because it asserts that it is probable that the violation will be cured during the grace period, while the auditor does not agree with that assertion. In such a situation, does an uncertainty exist that might cause the auditor to add an other-matter paragraph (after the opinion paragraph) to his report?

Reply—No. Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 470-10-45-12 requires that long-term obligations be classified as current liabilities if they are, or will be, callable because of the debtor's violation of a provision of the debt agreement unless certain conditions are met. These conditions occur when (1) the creditor waives or loses the right to demand payment for more than one year from the balance sheet date or (2) it is probable that the violation will be cured within the grace period specified in the loan agreement.

The circumstances described above do not constitute an uncertainty as described in AU-C section 705 because they do not involve matters in which the outcome and related audit evidence are prospective (paragraph .A13 of AU-C section 705). If the auditor, on the basis of available evidence, disagrees with management's assertion, a qualified or adverse opinion because of a departure from generally accepted accounting principles should be considered.

[.14] Reserved

.15 Condensed Financial Statements of a Nonpublic Entity

Inquiry—A client prepares condensed financial statements that name the auditor and state that they have been derived from audited financial statements. The condensed statements incorporate the audited financial statements

by reference and indicate such statements and auditor's report thereon may be obtained. Is the auditor required to report on the condensed financial statements?

Reply—Paragraph .28 of AU-C section 810, *Engagements to Report on Summary Financial Statements* (AICPA, *Professional Standards*), states that if the auditor becomes aware that the entity plans to make a statement in a document that refers to the auditor and the fact that summary financial statements are derived from the financial statements audited by the auditor, the auditor should be satisfied that

- a. the reference to the auditor is made in the context of the auditor's report on the audited financial statements; and
- b. the statement does not give the impression that the auditor has reported on the summary financial statements.

If these conditions are met, the auditor need not do anything further. If these conditions are not met, the auditor should request management to change the statement or delete the reference to the auditor's report. Alternatively, the entity may engage the auditor to report on the summary financial statements.

[The next page is 9161.]

Section 9100

Signing and Dating Reports

.01 Use of Successor Firm Name in Signing Registration Statement

Inquiry—A CPA firm has been requested to provide an opinion on the consolidated financial statements of a client covering a five-year period. During this five-year period, the CPA firm has undergone several changes in its organization and its name:

1. Opinions for the first two years were issued by John Doe & Co.
2. In the third year, the accounting practice merged with another firm and the opinions for years three and four were signed by Doe, Roe & Co. Primary responsibility for the client was retained by the partners of John Doe & Co.
3. This partnership was later dissolved and the opinion in year five was signed by John Doe & Co., who, under the dissolution agreement, retained the working papers for this client.

Since it is impracticable to obtain the consent of each partner of the dissolved partnership, may the opinion on the five-year statements be issued by John Doe & Co.?

Reply—This situation is discussed in paragraph .A46 of AU-C section 700, *Forming an Opinion and Reporting on Financial Statements* (AICPA, *Professional Standards*). Since the partners of John Doe & Co., as it presently exists, retained primary responsibility for the publicly held company in question during the merger period, and since the firm is a successor in interest to the engagement and has retained all working papers for this client, it appears that, after consideration of these circumstances, the statements of consolidated income for the five-year period may be released solely in the name of John Doe & Co.

[Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

.02 Reporting on Companies With Different Fiscal Years

Inquiry—A CPA has a client whose fiscal year ends on June 30. A parent company of this client now wishes to go public and must file consolidated financial statements with the SEC. The parent company, however, observes a fiscal year ending on December 31.

The CPA has been asked by the parent to provide financial statements with an auditor's opinion for the year ending December 31, 20X3. To do this, the auditor needs to assemble figures for the period January 1, 20X3, to June 30, 20X3, from the financial statements for the year ended June 30, 20X3, and figures for the period July 1, 20X3, to December 31, 20X3, from the financial statements for the year ended June 30, 20X4.

The CPA has been having difficulty in segregating the financial information into these six-month periods because of the condition of the accounting records. Furthermore, the inventories were not observed nor were the receivables confirmed at the December 31 dates.

Under these conditions, should the CPA express his opinion for the year ended June 30, 20X3, and disclaim an opinion for the six months ended December 31, 20X3?

Reply—In order for an auditor to express an opinion on financial statements for prior periods, it is generally not necessary to observe all audit procedures required for the most recent financial statements. Paragraphs .A9–.A11 of AU-C section 705, *Modifications to the Opinion in the Independent Auditor's Report* (AICPA, *Professional Standards*), indicate that an inability to perform a specific procedure, such as observation of inventories, does not constitute a limitation on the scope of an audit if the auditor is able to obtain sufficient appropriate audit evidence by performing alternative procedures.

Generally, if the client's records are reasonably well kept and the auditor has satisfied himself as to year-end financial statements, review of ratios of sales to cost of sales and determination that accruals have been properly recognized at the interim date will enable an auditor to satisfy himself that the financial statements at an intervening interim date are fairly presented. On the other hand, if no perpetual inventory records are kept and if the client has not prepared inventories as of the interim date, it may not be practicable to reconstruct such inventory, and a disclaimer of opinion should be expressed on the reconstructed statements. In such circumstances, it would appear necessary that the auditor indicate in a basis for disclaimer paragraph that, due to the fact that he was not engaged to make an audit of financial statements as of such date until June 30, 20X4, he was not in a position to observe the amount of inventory at such date and is unable to satisfy himself thereto by the application of other auditing procedures. If this be the case, the SEC would probably be willing to accept combined income statements based on statements of the subsidiary company as of a date six months different than the parent and to accept unconsolidated balance sheets, with the balance sheet of the subsidiary being presented as of its appropriate year-end. The absence of correspondence with debtors and creditors would probably not cause similar problems.

[Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

[.03] Reserved

[.04] Reserved

.05 Signing of Independent Auditor's Report

Inquiry—Should the independent auditor's report be manually signed?

Reply—Paragraph .39 of AU-C section 700 states that the auditor's report should include the manual or printed signature of the auditor's firm.

Although AU-C section 700 does not require a manual signature, Department of Labor and Securities and Exchange Commission regulations require manual signatures in certain circumstances.

[Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

.06 The Effect of Obtaining the Management Representation Letter on Dating the Auditor's Report

Inquiry—AU-C section 580, *Written Representations* (AICPA, *Professional Standards*), establishes a requirement that the auditor request written representations from management as part of an audit of financial statements performed in accordance with generally accepted auditing standards. Additionally, paragraph .41 of AU-C section 700 states that the auditor's report should be dated no earlier than the date on which the auditor has obtained sufficient appropriate audit evidence on which to base the auditor's opinion. Among other things, sufficient appropriate audit evidence includes evidence that the audit

documentation has been reviewed, and that the entity's financial statements, including the related notes, have been prepared and that management has asserted that it has taken responsibility for them. Is the auditor required to have the signed management representation in hand as of the date of the auditor's report?

Reply—Paragraph .A27 of AU-C section 580 addresses this issue and states that occasionally, circumstances may prevent management from signing the representation letter and returning it to the auditor on the date of the auditor's report. In those circumstances, the auditor may accept management's oral confirmation, on or before the date of the auditor's report, that management has reviewed the final representation letter and will sign the representation letter without exception as of the date of the auditor's report thereby providing sufficient appropriate audit evidence for the auditor to date the report. However, possession of the signed management representation letter prior to releasing the auditor's report is necessary because paragraph .21 of AU-C section 580 requires that the representations be in the form of a written letter from management. Furthermore, when there are delays in releasing the report, a fact may become known to the auditor that, had it been known to the auditor at the date of the auditor's report, might affect the auditor's report and result in the need for updated representations. AU-C section 560, *Subsequent Events and Subsequently Discovered Facts* (AICPA, *Professional Standards*), addresses the auditor's responsibilities in such circumstances.

[Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

.07 Naming the City and State Where the Auditor Practices

Inquiry—Paragraph .40 of AU-C section 700 states that the auditor's report should "name the city and state where the auditor practices." May the auditor comply with this requirement by issuing his or her report on the firm's letterhead that contains the city and state where the auditor practices?

Reply—Yes. The city and state where the auditor practices is not required to be placed under the auditor's signature and may be named in the firm's letterhead on which the report is issued.

[Issue Date: February 2013.]

.08 Audit Firm With Multiple Offices on Their Company Letterhead and Effect on Report

Inquiry—According to paragraph .40 of AU-C section 700, the auditor's report should name the city and state where the auditor practices. If an auditor's letterhead denotes multiple office locations, has this requirement been met by issuing the report on the firm's letterhead?

Reply—No. If the firm's letterhead includes multiple office locations, it will not be clear which location is the issuing office, and, therefore, the auditor would need to indicate the city and state where the auditor practices in the auditor's report.

[Issue Date: June 2013.]

[The next page is 9181.]

Section 9110

Special Reports

.01 Determination of Sales Price Based on Auditor's Report

Inquiry—A CPA has been designated by a contract of sales to prepare a statement of “net current assets” and a statement of net income of the selling firm. Both are elements in the determination of the sales price.

A disagreement has arisen between the seller and the buyer as to the pricing of the inventory which represents the major portion of the “net current assets.” The seller relies on a formula represented as “heretofore agreed” The buyer demands a formula “based upon good accounting practice.”

The CPA believes he may have to submit two inventory values to comply with the contract provisions—one to describe the “net current assets” which will use the formula set forth in the contract, and a second using the normal pricing methods of prior years. There is a major variation between the two. The formula in the contract was not represented as being based on good accounting methods but was developed by management after the date of their latest audit.

Can the CPA express an unmodified opinion on each of the two statements if different price bases are used provided full disclosure is made?

Reply—This is a special report situation and these are special circumstances in which the auditor may have a certain reporting latitude he might not otherwise have. Since seller and buyer were both parties to the contract, the CPA was designated by the contract to prepare specified statements, and the contract apparently describes a special formula to be used in pricing inventories, the CPA would ordinarily perform strictly according to the terms of the engagement and report on one set of statements as being fairly presented or correctly presented in accordance with the specified contractual formula.

However, since the CPA is aware of the basic disagreement between seller and buyer, he might be much more helpful towards ultimately resolving the issue if he were to prepare statements on both bases.

The auditor may properly report on the two statements prepared in accordance with different inventory pricing bases, full disclosure, of course, being assumed. A more significant question, under the circumstances, is whether he has (or can obtain) consent from both parties modifying the terms of the engagement to allow preparation of the statements on a dual basis.

[Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

[.02] Reserved

.03 Audit of Sales for Percentage-of-Sales Lease Agreements

Inquiry—Tenants' lease agreements with a large shopping center provide for a minimum annual rental plus a percentage rent for sales in excess of a certain dollar amount. In accordance with the leases, the shopping center has engaged the services of a CPA to verify that sales exceeding the specified minimum base are being reported. If the CPA is satisfied that the internal control of a tenant is good, may he or she rely on copies of sales tax returns filed with the state as sufficient evidence for his examination? Is any further verification necessary if a tenant submits a written confirmation of its annual sales from its CPA?

Reply—The degree of reliance which the auditor can place on the work of a tenant's CPA will depend upon many considerations such as those described in AU-C section 600, *Special Considerations—Audits of Group Financial Statements (Including the Work of Component Auditors)* (AICPA, *Professional Standards*). Comparison of the sales figure reported to the client with the figure reported on the tenant's sales tax return would not in itself be sufficient verification, and additional procedures will be necessary.

An audit program suitable for determining the annual sales of the tenants will have to be highly flexible. Flexibility is required so as to enable the field auditors involved to adjust the audit procedures employed from store to store, as dictated by changes in types of merchandise sold, selling policies employed, sufficiency of records maintained, adequacy of internal control, etc. Accordingly, the depth of the examination will vary to some extent with almost every tenant audited.

Procedures might include examining weekly cash reports submitted by store managers and comparing these reports with general ledger entries, bank statements, and state and federal tax returns, and test checking consecutively numbered sales invoices.

Perhaps the most important documents to play a role in such an examination of the tenants' sales will be the lease agreements which provide the very basis for such examination and which may well contain restrictions on the number and type of records and reports that each tenant will be required to make available.

.07 Statement of Cash Receipts and Disbursements

Inquiry—What is the appropriate language for audit, review, and compilation reports on a statement of cash receipts and disbursements?

Reply—Report language will vary depending on the level of service performed. A statement of cash receipts and disbursements is a financial statement prepared in accordance with a special purpose framework (see paragraph .07 of AU-C section 800, *Special Considerations—Audits of Financial Statements Prepared in Accordance With Special Purpose Frameworks* [AICPA, *Professional Standards*]), also referred to as an other comprehensive basis of accounting (see paragraph .04 of AR section 60, *Framework for Performing and Reporting on Compilation and Review Engagements* [AICPA, *Professional Standards*]). It is a pure cash-basis financial statement that summarizes cash activity of the entity, including the individual sources and uses of cash, and may be the only financial statement prepared for the period.

Audit reports on this financial statement should contain an emphasis-of-matter paragraph that states the cash receipts and disbursements basis of accounting is being used and that it represents a basis of accounting other than accounting principles generally accepted in the United States of America (see paragraph .19 of AU-C section 800). This extra paragraph is not required for full-disclosure compilation and review reports.

Illustrations of audit, review, and compilation reports on statements of cash receipts and disbursements follow:

A) *Audit*

We have audited the accompanying financial statements of ABC Partnership, which comprise the statement of assets and liabilities arising from cash transactions as of December 31, 20X1, and the related statement of revenue collected and expenses paid for the year then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with the cash basis of accounting described in Note X; this includes determining that the cash basis of accounting is an acceptable basis for the preparation of the financial statements in the circumstances. Management is also responsible for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the partnership's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the partnership's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the assets and liabilities arising from cash transactions of ABC Partnership as of December 31, 20X1, and its revenue collected and expenses paid during the year then ended in accordance with the cash basis of accounting described in Note X.

Basis of Accounting

We draw attention to Note X of the financial statements, which describes the basis of accounting. The financial statements are prepared on the cash basis of accounting, which is a basis of accounting other than accounting

principles generally accepted in the United States of America. Our opinion is not modified with respect to this matter.

B) Review

I (We) have reviewed the accompanying statements of cash receipts and disbursements of XYZ Company for the years ended December 31, 20X2, and 20X1. A review included primarily applying analytical procedures to management (owners') financial data and making inquiries of company management (owners). A review is substantially less in scope than an audit, the objective of which is the expression of an opinion regarding the financial statements as a whole. Accordingly, I (we) do not express such an opinion. Management (owners) is (are) responsible for the preparation and fair presentation of the financial statements in accordance with cash receipts and disbursements basis of accounting described in Note X and for designing, implementing, and maintaining internal control relevant to the preparation and fair presentation of the financial statements.

My (our) responsibility is to conduct the review in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. Those standards require me (us) to perform procedures to obtain limited assurance that there are no material modifications that should be made to the financial statements. I (We) believe that the results of my (our) procedures provide a reasonable basis for our report.

Based on my (our) review, I am (we are) not aware of any material modifications that should be made to the accompanying financial statements in order for them to be in conformity with the cash receipts and disbursements basis of accounting described in Note X.

C) Compilation With Full Disclosure

I (We) have compiled the accompanying statements of cash receipts and disbursements of XYZ Company for the years ended December 31, 20X2, and 20X1. I (we) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or provide any assurance about whether the financial statements are in accordance with the cash receipts and disbursements basis of accounting described in Note X.

Management (owners) is (are) responsible for the preparation and fair presentation of the financial statements in accordance with the cash receipts and disbursements basis of accounting described in Note X and for designing, implementing, and maintaining internal control relevant to the preparation and fair presentation of the financial statements.

My (our) responsibility is to conduct the compilation in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. The objective of a compilation is to assist management in presenting financial information in the form of financial statements without undertaking to obtain or provide any assurance that there are no material modifications that should be made to the financial statements.

D) Compilation With Substantially All Disclosures Omitted Including Disclosure of the Basis of Accounting Used

I (We) have compiled the accompanying statements of cash receipts and disbursements of XYZ Company for the years ended December 31, 20X2, and 20X1. I (we) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or provide any

assurance about whether the financial statements are in accordance with the cash receipts and disbursements basis of accounting.

Management (owners) is (are) responsible for the preparation and fair presentation of the financial statements in accordance with the cash receipts and disbursements basis of accounting and for designing, implementing, and maintaining internal control relevant to the preparation and fair presentation of the financial statements.

My (our) responsibility is to conduct the compilation in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. The objective of a compilation is to assist management in presenting financial information in the form of financial statements without undertaking to obtain or provide any assurance that there are no material modifications that should be made to the financial statements.

Management has elected to omit substantially all of the informative disclosures ordinarily included in financial statements prepared on the cash receipts and disbursements basis of accounting. If the omitted disclosures were included in the financial statements, they might influence the user's conclusion about the Company's cash receipts and disbursements. Accordingly, these financial statements are not designed for those who are not informed about such matters.

[Amended, February 1995; Revised, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature; Revised, December 2010, to reflect conforming changes necessary due to the issuance of SSARS No. 19; Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

.08 Statutory Basis Financial Statements Differ From GAAP

Inquiry—Financial statements filed with a state regulatory agency are prepared on a statutory basis which differs from generally accepted accounting principles (GAAP). How should the accountant report on the financial statements if he or she knows they will be distributed to third parties other than the regulatory agency?

Reply—Paragraph .21 of AU-C section 800 addresses this situation and indicates that the auditor should express a qualified or adverse opinion regarding the application of GAAP and, in a separate paragraph, express an opinion about whether the financial statements are presented in accordance with the prescribed basis of accounting mandated by the state regulatory agency. In accordance with paragraph .16 of AU-C section 705, *Modifications to the Opinion in the Independent Auditor's Report* (AICPA, *Professional Standards*), the auditor's report would include a basis for modification paragraph that provides an explanation in full of the differences between GAAP and the state mandated policies, or alternatively, a brief description of the differences with a reference to a footnote identifying these differences in detail.

The exhibit of AU-C section 800 includes an illustration of an auditor's report on a complete set of financial statements prepared in accordance with a regulatory basis of accounting when the financial statements together with the auditor's report are intended for general use.

.13 Report Distribution Restriction Related to Financial Statements Prepared on a Basis of Accounting Prescribed in an Agreement

Inquiry—An auditor was asked to report on special purpose financial statements of a corporation prepared in accordance with contractual basis of accounting. Certain assets, such as receivables, inventories, and other properties, have been valued on a basis specified in the agreement (fair market value). Is the auditor required to issue a report containing a paragraph that restricts the distribution of the report?

Reply—Yes. Paragraph .20 of AU-C section 800 indicates that in such circumstances, the auditor's report on special purpose financial statements should include an other-matter paragraph, under an appropriate heading, that restricts the use of the auditor's report when the special purpose financial statements are prepared in accordance with

- a. a contractual basis of accounting,
- b. a regulatory basis of accounting, or
- c. an other basis of accounting when required pursuant to paragraph .06a–b of AU-C section 905, *Alert That Restricts the Use of the Auditor's Written Communication* (AICPA, *Professional Standards*).

[Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

.14 Liquidation Basis Financial Statements

Inquiry—The stockholders of a corporation adopted a plan of complete liquidation. The liquidation will occur over a period of three years. What constitutes the basic financial statements following the adoption of the plan, and on what basis should those statements be presented?

Reply—Interpretation No. 1, “Reporting on Financial Statements Prepared on a Liquidation Basis of Accounting,” of AU-C section 700, *Forming an Opinion and Reporting on Financial Statements* (AICPA, *Professional Standards*, AU-C sec. 9700 par. .01–.05), states that a liquidation basis of accounting may be considered GAAP for entities in liquidation or for which liquidation appears imminent.

The financial statements of entities adopting a plan of liquidation may be presented with financial statements of a prior period that were prepared on a going concern assumption. The basic financial statements following the adoption of a plan of liquidation consist of a statement of net assets in liquidation, and the related statement of changes in net assets in liquidation.

[Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

.15 Reporting on Medicaid/Medicare Cost Reports

Inquiry—Third-party payors may require health care entities to prepare and submit “cost reports” as a condition of participation in a payor's program. The most common examples are Medicare and Medicaid. Sometimes, a specific payor (such as a state Medicaid program) will require health care entities to obtain an audit of their financial statements and further, will require some form

of independent auditor association with or “certification” of cost reports submitted by the health care entity. No standards exist that define or specify what is meant by “certification” of a cost report. A financial statement audit conducted in accordance with generally accepted auditing standards (GAAS) does not include rendering an opinion or any form of assurance on the entity’s compliance with laws and regulations, nor does it provide any assurance on an entity’s cost report. Consequently, auditors have expressed concern that providing such certification might erroneously imply that they are providing assurance on the entity’s cost report or on its compliance with cost report rules or regulations. When an auditor has been engaged to perform an audit of a health care entity’s basic financial statements, what form of report should the auditor issue to comply with the certification requirement?

Reply—The auditor could enter into a separate engagement to examine the cost report under AT section 601, *Compliance Attestation* (AICPA, *Professional Standards*). However, typically states do not require such extensive services and therefore, health care entities may be reluctant to engage the auditor to perform such an examination. If a health care entity includes their cost report as supplementary information to their audited basic financial statements, an auditor may report on the cost report as supplementary information in accordance with AU-C section 720, *Other Information in Documents Containing Audited Financial Statements* (AICPA, *Professional Standards*).^[1] AU-C section 725, *Supplementary Information in Relation to the Financial Statements as a Whole* (AICPA, *Professional Standards*), addresses those situations where the auditor is engaged to report on whether certain cost report amounts or statistics are fairly stated, in all material respects, in relation to those basic financial statements as a whole. The following is an illustration of an other matter paragraph that the auditor may include in the auditor’s report on the audited financial statements or a separate report that the auditor can issue on certain data within a cost report:

Our audit was made for the purpose of forming an opinion on the financial statements as a whole. The financial and statistical data on pages x–x, designated with the tickmark “#”² that are excerpted from ABC Health System’s [identify title of cost report, such as “Annual Report of Hospitals and Hospital Health Care Complexes”]³ for the year ended December 31, 200X, identified by Declaration Control Number xxxxxxx and prepared as of [insert date that cost report was submitted]⁴ are presented for purposes of additional analysis and are not a required part of the financial statements. The financial and statistical data, designated with the tickmark “#,” is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing

[1] [Footnote deleted, December 2010, to reflect conforming changes necessary due to the issuance of SAS Nos. 118–120.]

² It should be clear from the description in the auditor’s report and/or the specific page numbers referenced as to which data is, and which data is not, covered by the “in relation to” opinion.

³ This wording presumes that the supplementary information is comprised of specific pages or schedules excerpted from the cost report. If the entire cost report is included as supplementary information, this sentence might be reworded to read “Certain supplementary financial and statistical data designated with the tickmark “#” in ABC Health System’s [identify title of cost report, such as “Annual Report of Hospitals and Hospital Health Care Complexes”] for the year ended December 31, 200X.”

⁴ A provider’s as-filed cost report may subsequently be revised; therefore, the auditor’s report should clearly identify the specific version of the cost report to which the “in relation to” report applies, such as by identifying specific control numbers and/or date of preparation/filing. Doing so will eliminate any future misunderstanding as to the version of the cost report/cost report excerpts covered by the “in relation to” opinion.

procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the information is stated fairly in all material respects in relation to ABC Health System's financial statements taken as a whole.

The financial and statistical data, designated with the tickmark "#," has been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, is stated fairly in all material respects in relation to ABC Health System's basic financial statements taken as a whole. Those auditing procedures applied in the audit of the financial statements were not intended to determine compliance with, and therefore would not detect compliance with or deviations from, the applicable instructions furnished by the [*identify related regulators, such as "XYZ State Department of Health"*] relating to the preparation of the cost report or the reporting requirements contained in the [*identify related regulations, such as "XYZ State Medicaid Accounting and Reporting Manual"*].⁵ None of the other information included in the accompanying schedules excerpted from [*identify source*] has been subjected to the auditing procedures applied in our audit of the basic financial statements referred to above and, accordingly, we express no opinion or any other form of assurance thereon.⁶

This report is intended solely for the information and use of Management and the Board of Directors of ABC Health System and the [*identify requesting organization, such as "XYZ State Department of Health"*] and is not intended to be and should not be used by anyone other than these specified parties.⁷

Because this is a restricted-use report, the auditor should consider the guidance in paragraphs .A5–.A6 of AU-C section 905 before deciding whether to combine this report with the auditor's report on the basic financial statements.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature; Revised, December 2010, to reflect conforming changes necessary due to the issuance of SAS Nos. 118–120; Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

⁵ An auditor engaged to perform a financial statement audit in accordance with auditing standards generally accepted in the United States of America would not be in a position to express an opinion, or provide any form of assurance, regarding compliance with cost report preparation instructions or rules and regulations covering reimbursement as promulgated by the government program. [Footnote revised, December 2010, to reflect conforming changes necessary due to the issuance of SAS Nos. 118–120.]

⁶ A disclaimer should be included as to any other data included in the supplementary information.

⁷ Restrictive use language should be included in the report. Paragraph .06 of AU-C section 905, *Alert as to the Intended Use of the Auditor's Written Communication* (AICPA, *Professional Standards*), states that the auditor should include an alert that restricts the use of an auditor's written communication when the subject matter of the auditor's written communication is based on (a) measurement or disclosure criteria that are determined by the auditor to be suitable only for a limited number of users who can be presumed to have an adequate understanding of the criteria, (b) measurement or disclosure criteria that are available only to the specified parties, or (c) matters identified by the auditor during the course of the audit engagement when the identification of such matters is not the primary objective of the audit engagement (commonly referred to as a by-product report). [Footnote revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

.16 Example Reports on Federal Deposit Insurance Corporation Loss Sharing Purchase and Assumption Transactions

Inquiry—The Federal Deposit Insurance Corporation’s (FDIC’s) Resolutions Handbook (Handbook) states that a loss sharing *transaction* is a purchase and assumption (P&A) transaction that the FDIC commonly uses as a resolution tool for handling failed institutions with more than \$500 million in assets. A P&A is a resolution transaction in which a healthy institution purchases some or all of the assets of a failed bank or thrift and assumes some or all of the liabilities, including all insured deposits. The Handbook also states that a loss sharing P&A uses the basic P&A structure, except for the provision regarding transferred assets. Instead of selling some or all of the assets to the acquirer at a discounted price, the FDIC agrees to share in future loss experienced by the acquirer on a fixed pool of assets.

How may an independent auditor respond to the requirement in the Handbook for P&A agreements that “[w]ithin 90 days after each calendar year end, the acquiring bank must furnish the FDIC a report signed by its independent public accountants containing specified statements⁸ relative to the accuracy of any computations made regarding shared loss assets”?

Reply—When the FDIC requirement applies to an engagement covering an FDIC loss sharing P&A transaction, the auditor may respond to the requirement by issuing a report in accordance with the requirements of AU-C section 806, *Reporting on Compliance With Aspects of Contractual Agreements or Regulatory Requirements in Connection With Audited Financial Statements* (AICPA, *Professional Standards*). The following are illustrations of auditor reports for three possible outcomes for which the independent auditor might report:

Example A—Independent Auditor’s Report on Compliance With Contractual Provisions

Independent Auditor’s Report

[To the Board of Directors of ABC Bank]

We have audited, in accordance with auditing standards generally accepted in the United States of America, the financial statements of *ABC Bank* (the “Bank”) as of *[insert date—e.g. December 31, 20XY]*, and the related statements of income, changes in stockholder’s equity, and cash flows for the year then ended, and the related notes to the financial statements, and have issued our report thereon dated *[insert date]*.

In connection with our audit, nothing came to our attention that caused us to believe that the Bank failed to comply with the computational provisions of Exhibit 4.15A Single Family Shared-Loss Agreement, Article II section 2.1(b), *[[and] Exhibit 4.15B, Commercial Shared-Loss Agreement, Article II section 2.1(a)]*⁹ of the Purchase and Assumption agreement between the Bank and the Federal Deposit Insurance Corporation dated *[insert date]*, insofar as they relate to accounting matters. However, our audit was not directed primarily toward obtaining knowledge of such noncompliance. Accordingly, had we performed additional procedures, other matters may

⁸ The term *specified statements* is not defined in the Federal Deposit Insurance Corporation’s (FDIC’s) Resolutions Handbook. The practitioner is advised to read the terms of the loss share agreement and confirm that the audit requirement in that agreement provides for the receipt of a report expressing negative assurance.

⁹ Applicable depending on the nature of the agreement between the acquiring bank and the FDIC.

have come to our attention regarding the Bank's noncompliance with the above-referenced provisions, insofar as they relate to accounting matters.

This report is intended solely for the information and use of the Bank and the Federal Deposit Insurance Corporation and is not intended to be and should not be used by anyone other than these specified parties.

[*Date of the auditor's report*]

[Issue Date: February 2010; Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

.17 Application of Financial Accounting Standards Board (FASB) *Accounting Standards Codification 740-10* (previously, *FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes*) to Other Comprehensive Basis of Accounting Financial Statements—Recognition and Measurement Provisions

Inquiry—Does an auditor need to consider the recognition and measurement provisions of Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 740-10 (previously, *FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes*) when auditing financial statements prepared in accordance with a special purpose framework?

Reply—Ordinarily, the recognition and measurement provisions of FASB ASC 740-10 (previously, *FASB Interpretation No. 48*) would not apply to special purpose financial statements because a liability for an uncertain tax position would not be reported on an entity's income tax return, nor would it be based on cash receipts or disbursements. However, FASB ASC 740-10 may apply in order for an entity's financial statements to comply with the financial reporting provisions of a governmental regulatory agency to whose jurisdiction the entity is subject. If the recognition and measurement provisions do apply and the financial statements contain items that are the same as, or similar to, those in financial statements prepared in accordance with GAAP, then the auditor should consider whether the financial statements (including the accompanying notes) include all informative disclosures that are appropriate for the basis of accounting used.

[Issue Date: June 2010; Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

¹¹ Applicable depending on the nature of the agreement between the acquiring bank and the FDIC.

.18 Small Business Lending Fund Auditor Certification Guidance

Inquiry—Enacted into law on September 27, 2010, as part of the Small Business Jobs Act of 2010, the Small Business Lending Fund (SBLF) encourages lending to small businesses by providing capital to community banks with under \$10 billion in assets. The United States Department of the Treasury will make SBLF funding available by purchasing senior preferred stock or equivalents in institutions that apply, and are approved, to participate in the SBLF. Generally speaking, the dividend rate paid by institutions on SBLF funding decreases as the institution's *qualified small business lending*, as defined by the Treasury Department, increases.

Under the terms of the SBLF, a participating community bank is required to calculate and report the amount of its qualified small business lending in a supplemental report. In addition to requiring the institution's management to certify to the Treasury Department that the information provided in each supplemental report is accurate, the institution is also required to receive and submit within 90 days of the end of each fiscal year following the investment date a certification from its external auditors that the processes and controls used to generate the supplemental reports are satisfactory.

How may an independent auditor respond to this requirement?

Reply—An independent auditor may satisfy this requirement by issuing a report in accordance with the requirements of AU-C section 806. This assurance, relative to the supplemental reports, may be provided in a separate report or in one or more paragraphs of the auditor's report accompanying the audited financial statements. Such assurance should not be provided unless the auditor has audited the financial statements and subjected the supplemental reports to audit procedures applied in the audit of the financial statements. Professional judgment needs to be applied by the auditor in determining the nature, timing, and extent of those audit procedures. In addition, when the auditor has expressed an adverse opinion or disclaimed an opinion on the financial statements, the auditor should issue a report on compliance only when instances of noncompliance are identified. When the auditor has identified one or more items of noncompliance, the report on compliance should describe such noncompliance.

The following is an illustration of a report that an auditor may use when, as a result of the auditor's audit procedures, nothing has come to the auditor's attention to indicate that the bank failed to comply with the terms of the SBLF:

Independent Auditor's Report

[To the Board of Directors of Institution Name]

[Address]

[City, State]

We have audited, in accordance with auditing standards generally accepted in the United States of America, the financial statements of [Institution Name] (the "Bank"), which comprise the balance sheet as of [Date], and the related statements of income, changes in stockholders' equity, and cash flows for the year then ended, and the related notes to the financial statements, and have issued our report thereon dated [Date].

In connection with our audit, nothing came to our attention that caused us to believe that the Bank failed to comply with the Small Business Lending Fund Securities Purchase Agreement (the Agreement) between the Bank and the United States Department of the Treasury (Treasury) dated [Date], insofar as the Agreement relates to accounting matters provided on the Bank's Supplemental Reports filed with Treasury during the year ended

[Date] under sections 1.3(j) and 3.1(d) of the Agreement, including that nothing came to our attention that caused us to believe that the Bank's Supplemental Reports did not set forth a complete and accurate statement of loans held by the Bank in each of the categories described therein for the time period(s) specified therein. However, our audit was not directed primarily toward obtaining knowledge of such noncompliance. Accordingly, had we performed additional procedures, other matters may have come to our attention regarding the Bank's compliance with the above-referenced provisions, insofar as they relate to accounting matter

This report is intended solely for the information and use of the Bank and Treasury and is not intended to be and should not be used by anyone other than these specified parties.

[Signature]

[Date]

[Issue Date: October 2011; Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

.19 Lender Comfort Letters

Inquiry—No-documentation or low-documentation loans remain popular options within the lending community, especially in lending to the self-employed. The information a prospective borrower is asked to furnish in connection with such loans is limited; however, lenders or brokers still attempt to assess a borrower's creditworthiness and verify the accuracy of information provided to them by the borrower.

Examples of requested information include

- confirmation of a client's self-employed status.
- verification of income from self-employment.
- profitability of a client's business.
- the impact on a client's business if money is withdrawn to fund the down payment on a real estate purchase.

How may an accountant respond to a request from a client, lender, or loan broker to confirm client information in connection with a pending loan application?

Reply—When presented with such requests, the accountant should consider the guidance in Interpretation No. 2, "Responding to Requests for Reports on Matters Relating to Solvency," of AT section 101, *Attest Engagements* (AICPA, *Professional Standards*, AT sec. 9101 par. .23–.33). Paragraph .27 of Interpretation No. 2 states that a practitioner is precluded from giving any form of assurance on matters relating to solvency or any financial presentation of matters relating to solvency. Paragraph .25 of Interpretation No. 2 defines matters relating to solvency as whether an entity (a) is not insolvent at the time the debt is incurred or would not be rendered insolvent thereby, (b) does not have unreasonably small capital, or (c) has the ability to pay its debts as they mature.

In response to a request to confirm client information in connection with a pending loan application, an accountant may provide a client with various-professional services that may be useful with a financing. Those services include

- an audit, a review, or a compilation of personal financial statements.
- an examination, a review, or a compilation of pro forma personal financial information.
- an examination or a compilation of prospective personal financial statements.
- an agreed-upon procedures report, as long as the agreed-upon procedures do not provide any assurance on matters related to solvency.

Additionally, a broker or lender may be satisfied with a copy of the client's income tax return and a letter from the accountant, including an acknowledgment that the income tax return was prepared by the accountant. Obtaining client consent before providing any confidential information to a third party is required under professional ethics standards, the Gramm-Leach-Bliley Act, the Internal Revenue Code, and federal and state privacy statutes and regulations. The following is a sample letter that may be used in this situation:

Date

ABC Company

Address

City, State Zip

Dear Mr. _____:

I am writing to you at the request of Mr. & Mrs. _____.

The purpose of this letter is to confirm to you that I prepared the 20XX federal income tax return of Mr. & Mrs. _____ and delivered this return to them for filing with the IRS. At their request, I have attached a copy of the tax return and related schedules provided to them for filing.

This return was prepared from information furnished to me by Mr. & Mrs. _____. This information was neither audited nor verified by me, and I make no representation nor do I provide any assurance regarding the accuracy of this information or the sufficiency of this tax return for your credit decision-making purposes.

I prepared Mr. & Mrs. _____ tax return in accordance with the applicable IRS rules and regulations solely for filing with the IRS. As a result, the tax return does not represent any assessment on my part regarding creditworthiness and does not include any statement of their financial position or income and expense for the year 20XX, in accordance with accounting principles generally accepted in the United States of America, and should not be construed to do so.

As you know, a credit decision should be based on a lender's exercise of due diligence in obtaining and considering multiple factors and information. Any use by you of Mr. & Mrs. _____ 20XX federal income tax return and this letter is solely a matter of your responsibility and judgment. This letter is not intended to establish a client relationship with you nor is it intended to establish any obligation on my part to provide any future information to you with regard to Mr. & Mrs. _____.

Sincerely,

_____ (Firm Name)

cc: Mr. & Mrs. _____ (Client)

[Issue Date: July 2012.]

.20 Effective Date of AU-C Section 905 in a Compliance Audit

Inquiry—AU-C section 905 is “effective for the auditor’s written communications related to audits of financial statements for periods ending on or after December 15, 2012. For all other engagements conducted in accordance with GAAS, this section is effective for the auditor’s written communications issued on or after December 15, 2012.”

Which effective date applies in a compliance audit performed pursuant to AU-C section 935, *Compliance Audits* (AICPA, *Professional Standards*), and Office of Management and Budget Circular A-133, *Audits of States, Local Governments and Non-Profit Organizations* (Circular A-133), in which the financial statements of an entity are for a period prior to December 15, 2012 (for example, as of and for the year ended September 30, 2012), but the opinion on compliance and reporting on internal control over compliance (the Circular A-133 report) relating to that same period is issued after December 15, 2012 (for example, the Circular A-133 report is issued on January 15, 2013)?

Reply—Some auditors view the compliance audit performed pursuant to AU-C section 935 and Circular A-133 as related to the audit of the financial statements because Circular A-133 also requires a financial statement audit. Other auditors view the compliance audit as being unrelated to the financial statement audit. Generally, both views may be reasonable. Therefore, the effective date used depends on the auditor’s professional judgment of the circumstances. If, in the auditor’s professional judgment, the compliance audit relates to the audit of the financial statements, AU-C section 905 would not apply and the auditor would use the restricted use alert language required by AU section 532, *Restricting the Use of an Auditor’s Report*, in the Circular A-133 report. However, if, in the auditor’s professional judgment, the compliance audit is unrelated to the audit of the financial statements, AU-C section 905 applies and the auditor’s Circular A-133 report would use the intended use alert language required by paragraph .11 of AU-C section 905.

It should be noted that a Circular A-133 report for periods ending on or after December 15, 2012, should implement the intended use alert language required by paragraph .11 of AU-C section 905.

Finally, with regard to the reporting issued to satisfy the requirements of *Government Auditing Standards* on internal control over financial reporting, and compliance and other matters, which is also required in a Circular A-133 compliance audit, such reporting is related to the audit of the financial statements. Therefore, the auditor would continue to use the restricted use alert language required by AU section 532 when reporting on periods prior to December 15, 2012.

[Issue Date: December 2012.]

.21 Reporting on Current-Value Financial Statements That Supplement Historical-Cost Financial Statements in Presentations of Real Estate Entities

Inquiry—A real estate entity presents current-value financial statements¹² to supplement historical-cost financial statements. May an auditor accept an engagement to report on current-value financial statements that supplement historical-cost financial statements and, if so, how should the auditor report?

¹² Generally accepted accounting principles require the use of current-value accounting for financial statements of certain types of entities (for example, investment companies, employee benefit plans, personal financial statements, and mutual and common trust funds). This interpretation does not apply to reports on current-value financial statements of such entities.

Reply—An auditor may accept an engagement to report on current-value financial statements that supplement historical-cost financial statements of a real estate entity only if the auditor believes the following two conditions exist:

- The measurement and disclosure criteria used to prepare the current-value financial statements are reasonable.
- Competent persons using the measurement and disclosure criteria would ordinarily obtain materially similar measurements or disclosures.

If these conditions are satisfied, an auditor may report on such current-value financial statements in a manner similar to that discussed in paragraph .22 of AU-C section 800. However, because the current-value financial statements only supplement the historical-cost financial statements and are not presented as a stand-alone presentation, it is not necessary to restrict the use of the auditor's report on the presentation as required by that paragraph.

The following is an example of a report an auditor might issue when reporting on current-value financial statements that supplement historical-cost financial statements of a real estate entity.

Independent Auditor's Report

[Appropriate Addressee]

Report on the Financial Statements¹³

We have audited the accompanying historical-cost financial statements of X Company, which comprise the historical-cost balance sheets as of December 31, 20X3, and 20X2, and the related historical-cost statements of income, shareholders' equity, and cash flows for the years then ended, and the related notes to the historical-cost financial statements. We also have audited the supplemental current-value financial statements of X Company, which comprise the current-value balance sheets as of December 31, 20X3, and 20X2, and the related supplemental current-value statements of income and shareholders' equity for the years then ended, and the related notes to the current-value financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of the historical-cost financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of historical-cost financial statements that are free from material misstatement, whether due to fraud or error.

Management is responsible for the preparation and fair presentation of the supplemental current-value financial statements in accordance with the basis of accounting described in Note 1; this includes determining that the basis of accounting described in Note 1 is an acceptable basis for the preparation of the supplemental current-value financial statements in the circumstances. Management is also responsible for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of supplemental current-value financial statements that are free from material misstatement, whether due to fraud or error.

¹³ The subtitle "Report on the Financial Statements" is unnecessary in circumstances when the second subtitle, "Report on Other Legal and Regulatory Requirements," is not applicable.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control.¹⁴ Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Opinion on the Historical-Cost Financial Statements

In our opinion, the historical-cost financial statements referred to above present fairly, in all material respects, the financial position of X Company as of December 31, 20X3, and 20X2, and the results of its operations and its cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Opinion on the Supplemental Current-Value Financial Statements

In our opinion, the supplemental current-value financial statements referred to above present fairly, in all material respects, the financial position of X Company as of December 31, 20X3, and 20X2, and the results of its operations for the years then ended in accordance with the basis of accounting described in Note 1.

Basis of Accounting for the Supplemental Current-Value Financial Statements

As described in Note 1, the supplemental current-value financial statements have been prepared by management to present relevant financial information that is not provided by the historical-cost financial statements and are not intended to be a presentation in conformity with accounting principles generally accepted in the United States of America. In addition, the supplemental current-value financial statements do not purport to present the net realizable, liquidation, or market value of X Company as a whole. Furthermore, amounts ultimately realized by X Company from the disposal of properties may vary significantly from the current values

¹⁴ In circumstances when the auditor also has responsibility to express an opinion on the effectiveness of internal control in conjunction with the audit of the financial statements, this sentence would be worded as follows: "In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances." In addition, the next sentence, "Accordingly, we express no such opinion," would not be included.

presented. Our opinion on the supplemental current-value financial statements is not modified with respect to this matter.

Report on Other Legal and Regulatory Requirements

[Form and content of this section of the auditor's report will vary depending on the nature of the auditor's other reporting responsibilities.]

[Signature]

[Date]

In accordance with paragraph .17 of AU-C section 800, the auditor should also consider the adequacy of disclosures relating to the current-value financial statements. Adequate disclosures describe the accounting policies applied and such matters as the basis of presentation, nature of the reporting entity's properties, status of construction-in-process, valuation bases used for each classification of assets and liabilities, and sources of valuation, in a sufficiently clear and comprehensive manner that enables a knowledgeable reader to understand the current-value financial statements.

[Issue Date: March 2013.]

.22 Use of Restricted Alert Language When Financial Statements Are Audited in Accordance With GAAS and Government Auditing Standards

Inquiry—Paragraph .11 of AU-C section 905,¹⁵ states that the restricted alert language required by paragraph .07 of AU-C section 905 should not be used when

- a. the engagement is performed in accordance with *Government Auditing Standards*, and
- b. the auditor's written communication (commonly referred to as a by-product report) pursuant to that engagement is issued in accordance with
 - i. AU-C section 265, *Communicating Internal Control Related Matters Identified in an Audit* (AICPA, *Professional Standards*);
 - ii. AU-C section 806; or
 - iii. AU-C section 935.

Assume an entity's financial statements are audited in accordance with both GAAS and *Government Auditing Standards*. If the auditor issues a compliance report in accordance with AU-C section 806 but that report is not required to be issued in accordance with *Government Auditing Standards* and the report does not refer to *Government Auditing Standards*, is the auditor prohibited from using the restricted alert language required by paragraph .07 of AU-C section 905?

Reply—No, use of the restricted alert language is not prohibited. An auditor may include a restricted alert paragraph using the language required by paragraph .07 in AU-C section 905 as long as the compliance report is not required to be issued in accordance with *Government Auditing Standards* and the report does not refer to *Government Auditing Standards*.

For example, a not-for-profit organization is required to have a financial statement audit conducted in accordance with GAAS and *Government Auditing Standards* because the organization receives federal funds. In addition to the reports required by *Government Auditing Standards*, the auditor of the not-for-profit organization is requested to provide a compliance report in accordance

¹⁵ All referenced AU-C sections can be found in AICPA *Professional Standards*.

with AU-C section 806 to the organization's financial institution about whether the auditor identified any instances of noncompliance with the covenants of a loan agreement. Because this compliance report is not required to be issued in accordance with *Government Auditing Standards* and the report would be issued only in accordance with GAAS and would not refer to *Government Auditing Standards*, the auditor may use the restricted alert language required by paragraph .07 of AU-C section 905.

[Issue Date: March 2013.]

.23 Modification of Compliance Report When Financial Statements Are Audited in Accordance With GAAS

Inquiry—The exhibit, “Illustrations of Reports on Compliance With Aspects of Contractual Agreements or Regulatory Requirements in Connection With Audited Financial Statements,” in AU-C section 806 provides illustrative reports on compliance based on a financial statement audit conducted in accordance with auditing standards generally accepted in the United States of America. Based on the facts in section 9110.22, “Use of Restricted Alert Language When Financial Statements Are Audited in Accordance With GAAS and Government Auditing Standards,” does the auditor need to modify this language to indicate that the financial statement audit was also conducted in accordance with *Government Auditing Standards*?

Reply—No. In the example in section 9110.22, the auditor's compliance report about whether the auditor identified any instances of noncompliance with the covenants of a loan agreement would be issued only in accordance with GAAS and would not be issued in accordance with *Government Auditing Standards*. Therefore, the illustrative language would not need to be modified and could refer only to the audit being conducted in accordance with auditing standards generally accepted in the United States of America.

Section 9120

Reliance on Others

[.01] Reserved

.02 Responsibility for Audit of Dividend Fund Managed by Agent

Inquiry—A mutual fund employs a management company to act as its dividend disbursing agent and transfer agent. Dividend checks to the individual shareholders of the mutual fund are drawn from a “dividend disbursing agency fund.” This account, however, does not appear as an asset or liability on the books of either the mutual fund or the management company.

Is it the responsibility of the mutual fund’s auditors or the management company’s auditors to audit the dividend disbursing agency fund?

Reply—Since it is one of the primary responsibilities of the management company for the mutual fund, to draw and pay individual dividend checks to the fund’s shareholders, it would be appropriate for, if not incumbent upon, the management company’s auditors, in connection with their audit, to see that this function is being properly discharged, even though the account from which these checks are disbursed does not appear as an asset or liability on the books of either the fund or the management company.

[.03] Reserved

.04 Reliance on State Grain Inspectors for Inventory Measurements

Inquiry—A grain company operates several storage elevators. The company maintains perpetual inventory records for all facilities—both at the elevators and the home office. State grain inspectors measure the stored grain and in effect perform the same audit functions as the CPA firm. Past experience has been that the differences between the measurements of the state inspectors, the CPA firm, and the perpetual inventory records are immaterial. The state inspectors are qualified with years of experience. Can the CPA firm accept the findings of the state inspectors as adequate inventory observation in accordance with generally accepted auditing standards?

Reply—Paragraph .A29 of AU-C section 501, *Audit Evidence—Specific Considerations for Selected Items* (AICPA, *Professional Standards*), can be applied to this situation. The CPA firm could use the measurements and calculations of the state grain inspectors but not as a complete substitute for its own independent inventory observation.

[.05] Reserved

.06 Use of Other Auditors’ Work When They Are Not Independent

Inquiry—AU-C section 600, *Special Considerations—Audits of Group Financial Statements (Including the Work of Component Auditors)* (AICPA, *Professional Standards*), provides guidance when component auditors are involved in an audit of group financial statements. How does the lack of independence of the component auditors affect the use of their work and reports by the group engagement team?

Reply—In these circumstances, the work and reports of the component auditors cannot be used in accordance with AU-C section 600. The responsibility for the audit report on the financial statements rests solely with the group engagement partner.

Therefore, judgments about assessments of inherent and control risk, the materiality of misstatements, the sufficiency of tests performed, the evaluation of significant accounting estimates, and other matters affecting the auditor's report should always be those of the group engagement team.

The group engagement team, however, may use professional judgment in evaluating the work of the component auditors who are lacking in independence in the way an auditor would consider the work performed by internal auditors.

[Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

.07 Reference to Other Auditors in Accompanying Information Report

Inquiry—An audit report is based in part on the report of component auditors. If the group engagement partner makes reference to component auditors' audit in the audit report, is the report on accompanying information, which includes data audited by component auditors, required to include a reference to component auditors' audit?

Reply—Yes. If a portion of the financial statements was audited by component auditors and the group engagement partner's report refers to the component auditors, the group engagement partner's report on the accompanying information, which includes data audited by component auditors, also should refer to component auditors' audit.

[Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

[The next page is 9221.]

Section 9130

Limited Scope Engagements

[.01] Reserved

.02 Auditor's Report if Inventories Not Observed

Inquiry—An auditor has been asked to perform an audit for an entity on a limited scope basis. The entity is required by regulation to have an audit performed, and a disclaimer of opinion is acceptable to the regulator. The engagement does not include any independent verification of the inventory. The auditor will not be present at any physical inventory taking and the pricing and clerical accuracy of the inventory will not be tested. The inventory is material in relation to the other accounts on the client's financial statements.

May the auditor accept the engagement on a limited scope basis? What type of opinion can the auditor give under these circumstances?

Reply—A disclaimer of opinion is appropriate when the scope limitation precludes inventory observation and any other audit tests of the inventories. Paragraph .07 of AU-C section 210, *Terms of Engagement* (AICPA, *Professional Standards*), specifies that if management or those charged with governance impose a limitation on the scope of the auditor's work in the terms of the proposed audit engagement, such that the auditor believes the limitation will result in disclaiming an opinion on the financial statements as a whole, the auditor is not permitted to accept such a limited engagement as an audit engagement. However, if the entity is required by regulation to have an audit, and a disclaimer of opinion is acceptable to the regulator, the auditor is permitted, but not required, to accept the engagement.

[.06] Reserved

.07 Inadequate Internal Control and Financial Records

Inquiry—How should the auditor report that he or she has been unable, because of inadequate internal control and financial records, to obtain sufficient appropriate audit evidence that all transactions were recorded?

Reply—AU-C section 705, *Modifications to the Opinion in the Independent Auditor's Report* (AICPA, *Professional Standards*), addresses the auditor's inability to obtain sufficient appropriate audit evidence (also referred to as a limitation on the scope of an audit). In accordance with paragraphs .08 and .10 of AU-C section 705, the inability of the auditor to obtain sufficient appropriate audit evidence results in one of the following modifications to the opinion in the auditor's report:

- a. A qualified opinion when the auditor concludes that the possible effects on the financial statements of undetected misstatements, if any, could be material but not pervasive.

- b. A disclaimer of opinion when the auditor concludes that auditor concludes that the possible effects on the financial statements of undetected misstatements, if any, could be both material and pervasive.

A disclaimer of opinion in this situation would be appropriate under AU-C section 705 if the effects of the inadequacy of internal control and the accounting records are sufficiently pervasive. Otherwise, a qualified opinion may be appropriate.

Paragraph .20 of AU-C section 705 requires that when a modification to the auditor's opinion results from an inability to obtain sufficient appropriate audit evidence, the auditor should include in the basis of modification paragraph the reasons for that inability.

[Revised, May 2007; Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

[.08] **Reserved**

[.09] **Reserved**

.10 Effect of Generally Accepted Accounting Principles (GAAP) Departures on Limited Scope Engagements

Inquiry—The auditor of a company is unable to observe physical inventory at year end due to a restriction imposed by the client. Because the inventory is material, the auditor plans to issue a disclaimer of opinion on the financial statements in accordance with paragraph .10 of AU-C section 705.

The auditor also discovers significant mathematical errors in the client's last-in, first-out provision in the prior year. The auditor advises the client to report the error as a prior period adjustment in accordance with Financial Accounting Standards Board *Accounting Standards Codification* 250, *Accounting Changes and Error Corrections*. If the client refuses to do so, the auditor is now faced with a GAAP departure and a disclaimer of opinion—both related to the company's inventory.

How would the GAAP departure affect the auditor's disclaimer of opinion?

Reply—Assuming the auditor decided not to withdraw from the engagement, the requirement in paragraph .22 of AU-C section 705 should be followed. That paragraph requires the auditor, even if the auditor has expressed an adverse opinion or disclaimed an opinion on the financial statements, to "... describe in the basis of modification paragraph any other matters of which the auditor is aware and that would have required a modification to the opinion and the effects thereof."

.04 Financial Statements Marked As “Unaudited”

Inquiry—Is it required that each page of compiled or reviewed financial statements of nonissuers be marked “unaudited”?

Reply—No. Neither AR section 80, *Compilation of Financial Statements* (AICPA, *Professional Standards*), nor AR section 90, *Review of Financial Statements* (AICPA, *Professional Standards*), requires that each page of compiled or reviewed financial statements of a nonissuer be marked as “unaudited.” However, nothing precludes the preparer from labeling the financial statements as “unaudited.”

Each page of the financial statements compiled by the accountant should include a reference such as “See accountant’s compilation report” or “See independent accountant’s compilation report” (paragraph .18 of AR section 80). Each page of the financial statements reviewed by the accountant should include a reference such as “See independent accountant’s review report” (paragraph .29 of AR section 90).

[.07] Reserved

.08 Supplementary Information

Inquiry—Are supporting schedules of balance sheet or income statement accounts considered supplementary information? If so, what are the reporting requirements in a review or compilation engagement?

Reply—Paragraph .53 of AR section 80 and paragraph .60 of AR section 90 state that when the basic financial statements are accompanied by information presented for supplementary analysis purposes, the accountant should clearly indicate the degree of responsibility, if any, he or she is taking with respect to such information. Financial and nonfinancial information (other than the financial statements and the accountant’s report thereon) that is included in a document containing compiled or reviewed financial statements and the accountant’s report thereon is considered to be supplementary information.

If the information does not accompany the basic financial statements, it is not supplementary information and, therefore, the accountant does not have a reporting obligation.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature; Revised, December 2010, to reflect conforming changes necessary due to the issuance of SSARS No. 19.]

.09 Application of AR Section 300 to Certain Companies Required to File With Regulatory Bodies

Inquiry—Some nonissuers, as defined in paragraph .04 of AR section 60, *Framework for Performing and Reporting on Compilation and Review Engagements* (AICPA, *Professional Standards*), such as privately owned brokers or dealers in securities, may be required to include unaudited financial statements in a form prescribed by a regulatory body concerned with the sale or trading of securities, such as the National Association of Securities Dealers or the New York Stock Exchange. Does the first sentence of paragraph .02 of AR section 300, *Compilation Reports on Financial Statements Included in Certain Prescribed Forms* (AICPA, *Professional Standards*), preclude an accountant from using the alternative form of report illustrated in AR section 300 in those circumstances?

Reply—No. Paragraph .02 of AR section 300 excludes from the definition of a prescribed form those forms “. . . concerned with the sale or trading of securities.” In that context, “securities” refers to those issued or to be issued by the entity submitting the prescribed form. Accordingly, an accountant is not precluded in the circumstances described in this question from using the alternative form of compilation report illustrated in AR section 300 if the entity is not submitting the prescribed form in connection with the actual or contemplated sale or trading of its own securities.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature; Revised, December 2010, to reflect conforming changes necessary due to the issuance of SSARS No. 19.]

.10 Review of Financial Statements Included in a Prescribed Form

Inquiry—Can an accountant perform a review of financial statements included in a prescribed form that are presented on a basis other than accounting principles generally accepted in the United States of America?

Reply—A review can be performed on the financial statements included in a prescribed form prepared in accordance with any financial reporting framework, but AR section 90 reporting standards would apply, not those in AR section 300.

Accordingly, where the prescribed form or related instructions call for the departures from the applicable financial reporting framework, a review report in accordance with the reporting requirements of AR section 90 would be appropriate provided that, as required by paragraphs .34–.36 of AR section 90, the review report discloses the departures from the applicable financial reporting framework, including the departures called for by the prescribed form or related instructions.

.24 Issuing a Compilation Report on Financial Statements That Omit Substantially All Disclosures After Issuing a Report on the Same Financial Statements That Include Substantially All Disclosures

Inquiry—May an accountant accept an engagement to compile financial statements that omit substantially all disclosures, if he or she previously issued an audit, review, or compilation report on financial statements with substantially all disclosures for the same reporting period?

Reply—Yes. The financial statements that omit substantially all disclosures are separate and distinct from the financial statements that include substantially all disclosures. Paragraph .20 of AR section 80 states that an accountant may compile financial statements that omit substantially all disclosures provided the omission of the disclosure is not, to the accountant's knowledge, undertaken with the intention of misleading those who might reasonably be expected to use the financial statements.

If the accountant believes that the entity's intent is to mislead users, the accountant should not accept the engagement.

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of recent authoritative literature; Revised, December 2010, to reflect conforming changes necessary due to the issuance of SSARS No. 19.]

.25 Determining Whether Financial Statements Have Been Prepared by the Accountant

Inquiry—Paragraph .01 of AR section 80 states that the accountant is required to comply with the provisions of that section whenever he or she submits financial statements to a client or to third parties. Submission of financial statements is defined in paragraph .04 of AR section 60 as presenting to management financial statements that the accountant has prepared. If an accountant's work effort results in or contributes to the existence of financial statements, what should an accountant consider in determining whether he or she prepared those financial statements?

Reply—Due to computer technology, it is often unclear whether existing financial statements have been "prepared" by an accountant or by management. In considering whether an accountant is deemed to have prepared financial statements, an accountant needs to apply professional judgment to all the facts and circumstances. Some factors that an accountant may consider include the following:

1. *The process used to create the financial statements.* If an accountant takes a client's trial balance and puts the accounts into a format that would represent a financial statement, then an accountant has probably prepared the financial statements. The less an accountant has to do with creating the statements, the less likely an accountant would be deemed to have prepared the statements.
2. *Whether the client engaged the accountant to prepare financial statements or reasonably expected that as part of the professional services engagement the accountant would prepare financial statements.* An accountant may determine that he or she prepared financial statements even when not so engaged if, as part of an accounting or bookkeeping services engagement, in the accountant's professional

judgment, the client reasonably expected that the existing financial statements were prepared as a product of that engagement.

3. *The extent of work effort that an accountant contributed to the existence of the financial statements.* For example, if an accountant is intricately involved in adjusting the general ledger and other accounts that are, in turn, presented in a financial statement format, the more likely an accountant may be viewed as preparing the financial statements. On the other hand, if an accountant is not very involved in the accounting process, the less likely that an accountant would be deemed to have prepared the financial statements.
4. *Where the underlying accounting information resides.* If all the accounting data resides on the accountant's computer, it is more likely that the accountant is deemed to have prepared the financial statements. However, based on the facts and circumstances of the situation, an accountant may conclude that he or she prepared financial statements through the use of accounting or bookkeeping software utilized by the client.

Considerations such as who printed the financial statements or the location at which an accountant's services were performed (for example, at the client's location or the accountant's location) are generally not factors in determining whether the accountant has prepared financial statements.

The previously mentioned factors are not meant to be all-inclusive nor are they meant to be used as a program or checklist for determining whether the accountant has prepared financial statements. They address certain general areas that may be factors in the exercise of professional judgment. The accountant may consider other factors in the exercise of professional judgment.

[Issue Date: December 2008; Revised, December 2010, to reflect conforming changes necessary due to the issuance of SSARS No. 19.]

.26 The Accountant's Responsibilities for Subsequent Events in Compilation and Review Engagements

Inquiry—Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 855-10-50-1 states, "An entity shall disclose the date through which subsequent events have been evaluated, as well as whether that date is the date the financial statements were issued or the date the financial statements were available to be issued." How does the entity's responsibility to disclose the date through which subsequent events have been evaluated affect the accountant's responsibilities for subsequent events in a compilation or review engagement?

Reply—FASB ASC 855, *Subsequent Events*, does not change the accountant's responsibilities under AR section 80 with respect to compilation engagements or AR section 90 with respect to review engagement. AR section 90 states that an accountant performing a review engagement should consider inquiring of members of management who have responsibility for financial and accounting matters concerning events subsequent to the date of the financial statements that could have a material effect on the financial statements.¹ In a compilation engagement, the accountant does not have any responsibility with respect to subsequent events unless evidence or information comes to the accountant's attention that a subsequent event that has a material effect on the financial statements has occurred. When such evidence or information comes

¹ See paragraph .19 of AR section 90, *Review of Financial Statements* (AICPA, *Professional Standards*).

to an accountant's attention during a compilation or review engagement, the accountant should request that management consider the possible effects on the financial statements, including the adequacy of any related disclosure.² If the accountant determines that a subsequent event is not appropriately accounted for in the financial statements or disclosed in the notes, he or she should follow the guidance in paragraphs .27–.29 of AR section 80 or paragraphs .34–.36 of AR section 90 regarding departures from the applicable financial reporting framework with respect to compilations or reviews, respectively.³

Because the accountant's compilation or review report should be dated as of the completion of the compilation or review procedures,⁴ the date of the accountant's compilation or review report can never be earlier than management's subsequent event note date.

In a review engagement, because the accountant is concerned with events occurring through the date of the review report that may require adjustment to, or disclosure in, the financial statements, the specific management representations relating to information concerning subsequent events should be made as of the date of the accountant's review report.⁵

In most cases, the date that management discloses as the date through which they have evaluated subsequent events (in the notes to the financial statements and, in a review engagement, in the management representation letter) will be the same date as the accountant's compilation or review report. In order to coordinate that these dates (the note date, the representation letter date [in a review engagement], and the accountant's compilation or review report date) are the same, the accountant may want to discuss these dating requirements with management in advance of beginning the compilation or review engagement. The accountant also may want to include, in the accountant's understanding with the client regarding the services to be performed (engagement letter), that management will not date the subsequent event note earlier than the date of management's representations (in a review engagement) and the date of the accountant's compilation or review report.

[Issue Date: December 2009; Revised, December 2010, to reflect conforming changes necessary due to the issuance of SSARS No. 19.]

.27 The Accountant's Reporting Responsibility With Respect to Subsequent Discovery of Facts Existing at the Date of the Report

Inquiry—Paragraphs .47–.52 of AR section 80 and paragraphs .54–.59 of AR section 90 provide requirements and guidance when the accountant becomes aware that facts may have existed at the date of the accountant's compilation or review report (or the date of submission of compiled financial statements not intended for third party use in which the accountant does not report), respectively, that might have caused him or her to believe that information supplied by the entity was incorrect, incomplete, or otherwise unsatisfactory had the accountant then been aware of such facts.

Paragraph .49(a) of AR section 80 and paragraph .56(a) of AR section 90 state that when the accountant has concluded that action should be taken to prevent further use of the accountant's report or the financial statements, and

² See paragraph .44 of AR section 80, *Compilation of Financial Statements* (AICPA, *Professional Standards*), and paragraph .51 of AR section 90.

³ See paragraph .45 of AR section 80 and paragraph .52 of AR section 90.

⁴ See paragraph .17 of AR section 80 and paragraph .28 of AR section 90.

⁵ See paragraph .24 of AR section 90.

the effect on the accountant's report or the financial statements of the subsequently discovered information can promptly be determined,

disclosure should consist of issuing, as soon as practicable, revised financial statements and, where applicable, the accountant's report. The reasons for the revision usually should be described in a note to the financial statements and, where applicable, referred to in the accountant's report. Generally, only the most recently-issued compiled or reviewed financial statements would need to be revised, even though the revision resulted from events that had occurred in prior years.

What does the term *where applicable* refer to in paragraph .49(a) of AR section 80 and paragraph .56(a) of AR section 90?

Reply—The use of the term *where applicable* refers to a situation in which the accountant has not reported on compiled financial statements not intended for third party use. In the case of a review or a compilation in which the accountant has issued a report, then a revised accountant's report should be issued and the reason for the financial statement's revision usually should be described in the accountant's revised report as well as in a note to the revised financial statements.

[Issue Date: May 2010; Revised, December 2010, to reflect conforming changes necessary due to the issuance of SSARS No. 19.]

.28 Compilation Engagement When the Accountant Is Performing Management Functions

Inquiry—Is it permissible for an accountant to compile financial statements for an entity with respect to which the accountant also performs management functions?

Reply—Yes. However, the accountant should consult Interpretation No. 101-3, "Performance of Nonattest Services," under Rule 101, *Independence* (AICPA, *Professional Standards*, ET sec. 101 par. .05), regarding the independence rules. Interpretation No. 101-3 states that members "should not perform management functions or make management decisions for the attest client." If independence is impaired, the accountant would need to disclose this fact in the compilation report, in accordance with paragraph .21 of AR section 80.

[Issue Date: September 2011.]

.29 Effects on Compilation and Review Engagements When Management Does Not Assess Whether the Reporting Entity Is the Primary Beneficiary of a Variable Interest Entity and Instructs the Accountant to Not Perform the Assessment

Inquiry—FASB ASC 810-10-25-38A requires a reporting entity with a variable interest in a variable interest entity (VIE) to assess whether the reporting entity has a controlling financial interest in the VIE and, thus, is the VIE's primary beneficiary. If management of the enterprise with a variable interest in a VIE does not perform the required assessment and instructs the accountant engaged to compile or review the reporting entity's financial statements to not perform the assessment, is the accountant required to withdraw from the compilation engagement because of management's refusal to provide information or to withdraw from the review engagement because of a scope limitation?

Reply—No. Because management is required to perform the assessment in accordance with accounting principles generally accepted in the United States of America (GAAP), the failure to perform such an assessment and management's instructions to the accountant to not perform the assessment are a

departure from GAAP, not a refusal to provide information or a scope limitation. In accordance with paragraph .27 of AR section 80 or paragraph .34 of AR section 90, as applicable, the accountant should consider whether modification of the standard report is adequate to disclose the departure.

If the accountant concludes that modification of the standard report is appropriate, the accountant may modify the accountant's compilation or review report as follows (assuming there are no other known departures from GAAP):

Accountant's Compilation Report

[Appropriate Addressee]

I (we) have compiled the accompanying balance sheet of XYZ Company as of December 31, 20XX, and the related statements of income, retained earnings, and cash flows for the year then ended. I (we) have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or provide any assurance about whether the financial statements are in accordance with accounting principles generally accepted in the United States.

Management (owners) is (are) responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States and for designing, implementing, and maintaining internal control relevant to the preparation and fair presentation of the financial statements.

My (our) responsibility is to conduct the compilation in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. The objective of a compilation is to assist management in presenting financial information in the form of financial statements without undertaking to obtain or provide any assurance that there are no material modifications that should be made to the financial statements. During our compilation, I (we) did become aware of a departure from accounting principles generally accepted in the United States of America that is described in the following paragraph.

Accounting principles generally accepted in the United States of America require management to assess whether the company has a controlling interest in any entities in which the company has a variable interest in order to determine if those entities should be consolidated. Management has not performed the required assessment and therefore, if there are variable interest entities for which the company is the primary beneficiary, has not consolidated those entities. Although the effects on the financial statements of the failure to perform the required assessment have not been determined, many elements in the financial statements would have been materially affected had management determined that the company is the primary beneficiary of any variable interest entities.

[Signature of accounting firm or accountant, as appropriate]

[Accountant's city and state]

[Date of the accountant's report]

Independent Accountant's Review Report

[Appropriate Addressee]

I (We) have reviewed the accompanying balance sheet of XYZ Company as of December 31, 20XX, and the related statements of income, retained earnings, and cash flows for the year then ended. A review includes primarily applying analytical procedures to management's (owners') financial data and making inquiries of company management (owners). A review is substantially less in scope than an audit, the objective of which is the expression of an opinion regarding the financial statements as a whole. Accordingly, I (we) do not express such an opinion.

Management (owners) is (are) responsible for the presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America and for designing, implementing, and maintaining internal control relevant to the preparation and fair presentation of the financial statements.

My (our) responsibility is to conduct the review in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. Those standards require me (us) to perform procedures to obtain limited assurance that there are no material modifications that should be made to the financial statements. I (We) believe that the results of my (our) procedures provide a reasonable basis for our report.

Based on my (our) review, with the exception of the matter(s) described in the following paragraph, I am (we are) not aware of any material modifications that should be made to the accompanying financial statements in order for them to be in conformity with accounting principles generally accepted in the United States.

Accounting principles generally accepted in the United States of America require management to assess whether the company has a controlling interest in any entities in which the company has a variable interest in order to determine if those entities should be consolidated. Management has not performed the required assessment and therefore, if there are variable interest entities for which the company is the primary beneficiary, has not consolidated those entities. Although the effects on the financial statements of the failure to perform the required assessment have not been determined, many elements in the financial statements would have been materially affected had management determined that the company is the primary beneficiary of any variable interest entities.

[Signature of accounting firm or accountant, as appropriate]

[Accountant's city and state]

[Date of the accountant's report]

If the accountant believes that modification of the standard report is not adequate to indicate the deficiencies in the financial statements, in accordance with paragraph .29 of AR section 80 or paragraph .36 of AR section 90, as applicable, the accountant should withdraw from the compilation or review engagement and provide no further services with respect to those financial statements. The accountant may wish to consult with his or her legal counsel in those circumstances.

[Issue Date: April 2012.]

.30 Disclosure of Independence Impairment in the Accountant's Compilation Report on Comparative Financial Statements When the Accountant's Independence Is Impaired in Only One Period

Inquiry—Paragraph .21 of AR section 80 states that when issuing a report with respect to a compilation of financial statements for an entity with respect to which the accountant is not independent, the accountant's report should be modified. How may an accountant modify the accountant's compilation report on comparative financial statements for an entity with respect to which the accountant was not independent as of and for the earlier period ended, but such impairment was subsequently cured?

Reply—The accountant may indicate the independence impairment as of and for the earlier period ended that was subsequently cured by including language such as the following as the final paragraph of the accountant's compilation report: "As of and for the year ended December 31, 20X1, I was not independent with respect to XYZ Company."

The accountant is not precluded from disclosing a description about the reason(s) that the accountant's independence is impaired, as noted in paragraph .21 of AR section 80.

Although the accountant is not required to disclose that his or her independence impairment was subsequently cured, the accountant may elect to make such a disclosure. An illustration of the accountant's compilation report if the accountant elects to make such a disclosure is as follows: "As of and for the year ended December 31, 20X1, I was not independent with respect to XYZ Company. I am currently independent with respect to XYZ Company."

As noted previously, the accountant is not precluded from disclosing a description about the reason(s) for the impairment and how the impairment was subsequently cured.

[Issue Date: May 2012.]

.31 Break-Even Financial Statements

Inquiry—An accountant is engaged to compile financial statements with inventory recorded so that the financial statements reflect no profit or loss (break-even financial statements). How would this affect the accountant's compilation report?

Reply—Break-even financial statements are not in accordance with GAAP. Accordingly, in accordance with paragraph .27 of AR section 80, the accountant should consider whether modification of the standard report is adequate to disclose the departure. If the accountant concludes that modification of the standard report is appropriate, in accordance with paragraph .28 of AR section 80, the accountant should disclose the departure in a separate paragraph of the report, including disclosure of the effects of the departure on the financial statements if such effects have been determined by management or are known as a result of the accountant's procedures.

[Revised, December 2010, to reflect conforming changes necessary due to the issuance of SSARS No. 19.]

.32 Modification to the Accountant's Compilation or Review Report When a Client Adopts a Private Company Council Accounting Alternative

Inquiry—A private company client has adopted one or more of the Private Company Council (PCC) accounting alternatives in the current year and disclosed the change in accounting principle, which is material to the financial statements. Is the accountant required to add an emphasis-of-matter (EOM)

paragraph to the compilation or review report for this change in accounting principle?

Reply—No, there is no requirement in the SSARs for an accountant to add an EOM paragraph to a compilation or review report for any reason. The SSARs include EOM guidance in paragraphs .25–.26 of AR section 80 and paragraph .33 of AR section 90. Though there is no requirement for an accountant to add an EOM paragraph to a compilation or review report, the SSARs do not preclude the accountant from voluntarily including an EOM paragraph regarding the change in accounting principle. In accordance with paragraph .26 of AR section 80, the accountant should not include an EOM paragraph in a compilation report on financial statements that omit substantially all disclosures unless the matter is disclosed in the financial statements.

[Issue Date: March 2014.]

.33 Compilation or Review Report in Which Management Refuses to Include Disclosure Related to Adoption of a PCC Accounting Alternative

Inquiry—When management has adopted one or more of the PCC accounting alternatives but does not disclose this change in accounting principle, which is material to the financial statements, how should the accountant's compilation or review report be modified?

Reply—If the accountant has determined that the change in accounting principle has a material effect on the financial statements and management refuses to disclose this change in the financial statements, the accountant is required to address the known departure from GAAP by

- modifying the compilation report (assuming management has not elected to omit substantially all disclosures) in accordance with paragraphs .27–.29 of AR section 80, or
- modifying the review report in accordance with paragraphs .34–.36 of AR section 90.

[Issue Date: March 2014.]

.34 Modification to the Accountant's Compilation or Review Report When a Client Adopts a Private Company Council Accounting Alternative That Results in a Change to a Previously Issued Report

Inquiry—A private company client has adopted the guidance in FASB Accounting Standards Update (ASU) No. 2014-07, *Consolidation (Topic 810): Applying Variable Interest Entities Guidance to Common Control Leasing Arrangements*, in the current year. In the prior year, the private company elected not to consolidate a material VIE and, therefore, the accountant's compilation or review report noted a departure from GAAP. The private company is now presenting comparative financial statements and this accounting change (which should be applied retrospectively) no longer requires the material VIE to be consolidated. Accordingly, the prior year compilation or review report on those statements would no longer need to refer to a departure from GAAP. Is the accountant required to add an explanatory paragraph to the compilation or review report in the current period?

Reply—Yes. Paragraph .14 of AR section 200 states that when the accountant's report on the financial statements of the prior period contains a changed reference to a departure from the applicable financial reporting framework (in

this case, GAAP), the report should include an explanatory paragraph indicating

- a. the date of the accountant's previous report,
- b. the circumstances or events that caused the reference to be changed, and,
- c. when applicable, that the financial statements of the prior period have been changed.

According to paragraph .15 of AR section 200, a changed reference to a departure from GAAP includes the removal of a prior reference or the inclusion of a new reference.

Following is an illustration of an explanatory paragraph to be added to an accountant's compilation report when a private company has elected to adopt ASU No. 2014-07 for a VIE when there is a common control leasing arrangement and the VIE was material in 2013 and 2012:

In our report dated March 1, 2013, with respect to the 2012 financial statements, we referred to a departure from accounting principles generally accepted in the United States of America because ABC Company excluded a variable interest entity from the accompanying financial statement that should have been consolidated. As described in Note X, in March 2014 the Financial Accounting Standards Board issued Accounting Standards Update No. 2014-07, *Consolidation (Topic 810): Applying Variable Interest Entities Guidance to Common Control Leasing Arrangements*, which makes changes to the FASB guidance and no longer requires nonpublic companies to apply variable interest entity guidance to certain common control leasing arrangements. This guidance required retrospective application.

Following is an illustration of an explanatory paragraph to be added to an accountant's review report when a private company has elected to adopt ASU No. 2014-07 for a VIE when there is a common control leasing arrangement and the change was material in 2013 and 2012:

In our report dated March 1, 2013, with respect to the 2012 financial statements, we referred to a departure from accounting principles generally accepted in the United States of America because ABC Company excluded a variable interest entity from the accompanying financial statement that should have been consolidated. As described in Note X, in March 2014 the Financial Accounting Standards Board issued Accounting Standards Update No. 2014-07, *Consolidation (Topic 810): Applying Variable Interest Entities Guidance to Common Control Leasing Arrangements*, which makes changes to the FASB guidance and no longer requires nonpublic companies to apply variable interest entity guidance to certain common control leasing arrangements. This guidance required retrospective application. Accordingly, our statement on the 2012 financial statements presented herein, which states that we are not aware of any material modifications that should be made to the accompanying financial statements, is different from that expressed in our previous report.

.03 Dates on Cover for Financial Statements

Inquiry—Paragraph .57 of AU-C section 700, *Forming an Opinion and Reporting on Financial Statements* (AICPA, *Professional Standards*), specifies that an auditor's report disclose that prior year financial statements presented for comparative purposes are unaudited. Is it appropriate to include the dates of both the current year and prior year financial statements on the cover of the financial statements?

Reply—Both years may be included on the cover if the financial statements for the prior year are referred to as unaudited.

[Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

[.04] Reserved

[.05] Reserved

[.06] Reserved

.07 Financial Statements Cover Period Longer Than Twelve Months

Inquiry—Is it acceptable for an auditor to express an opinion on financial statements covering a period longer than 12 months?

Reply—It is acceptable provided the title of the financial statements is descriptive of the period covered and the auditor's report clearly indicates the period covered by the financial statements.

.08 Title of Auditors' Report

Inquiry—Does the auditor's report require a title?

Reply—Paragraph .23 of AU-C section 700 states "The auditor's report should have a title that includes the word *independent* to clearly indicate that it is the report of an independent auditor." Paragraph .16 of AU-C section 705, *Modifications to the Opinion in the Independent Auditor's Report* (AICPA, *Professional Standards*), states, in part, "When the auditor is not independent but is required by law or regulation to report on the financial statements, the auditor should disclaim an opinion and specifically state that the auditor is not independent." Therefore, if the auditor is not independent, the auditor's report should not have a title that includes the word *independent*.

.14 Part of Audit Performed by Another Independent Auditor Who Has Ceased Operations

Inquiry—If an auditor who has ceased operations audited the financial statements of one or more components included in an entity's group financial statements, may the group engagement partner make reference in the auditor's report on the group financial statements to the audit of that auditor or assume responsibility for that auditor's work in accordance with AU-C section 600, *Special Considerations—Audits of Group Financial Statements (Including the Work of Component Auditors)* (AICPA, *Professional Standards*)?

Reply—The group engagement partner may make reference to the audit of a component auditor, or assume responsibility for that auditor's work, only if the component auditor has issued an audit report and the group engagement team has completed the procedures required by AU-C section 600 regarding the component auditor prior to the time that the other auditor ceased operations. The procedures described in AU-C section 600 cannot be appropriately performed after the other auditor has ceased operations. In situations in which the group engagement team cannot use the work of the component auditor in accordance with AU-C section 600, the group engagement team should perform audit procedures sufficient to afford a reasonable basis for an opinion on the financial statements under audit. However, review of the component auditor's working papers may have an effect on the nature, timing, and extent of those procedures.

.21 Fiscal Years for Tax and Financial Reporting Purposes Differ

Inquiry—Can an entity have different fiscal years for tax and reporting purposes?

Reply—There is no requirement in the accounting literature for the tax and the financial reporting year-end to be the same. However, having different fiscal years complicates further any interperiod tax allocation the entity may have.

[.22] Reserved

[.23] Reserved

.24 Required Presentation of the Statement of Stockholders' Equity

Inquiry—Is the statement of stockholders' equity required when financial position and results of operations are presented?

Reply—Disclosure of changes in capital accounts and retained earnings is required. According to Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 505-10-50-2, "if both financial position and results of operations are presented, disclosure of changes in the separate accounts comprising stockholders' equity (in addition to retained earnings) . . . is required to make the financial statements sufficiently informative. Disclosure of such changes may take the form of separate statements or may be made in the basic financial statements or notes thereto."

[Revised, June 2009, to reflect conforming changes necessary due to the issuance of FASB ASC.]

.25 Use of Singular v. Plural Terminology for Accountants and Auditors

Inquiry—In reporting on audited, reviewed, or compiled financial statements, should accountants use singular or plural terminology when referring to themselves?

Reply—Use of plural or singular terminology is not addressed in the professional standards. Illustrative auditors' reports in Statements on Auditing Standards use plural terminology, while the accountants' reports in Statements on Standards for Accounting and Review Services use both singular and plural.

In practice, sole practitioners often use singular terms; firms that have one partner with professional staff use both singular and plural; and firms that have more than one partner most often use plural. However, the use of singular or plural references to the accountant or auditor is purely discretionary. For ease of report preparation, firms should be consistent in their use of singular or plural in all reports.

.26 Compilation and Review—Comparative Financial Statements

Inquiry—A nonissuer's financial statements for the year ended December 31, 20X1, were compiled by a predecessor accountant. Management had elected to omit substantially all of the disclosures and the statement of cash flows required by generally accepted accounting principles (GAAP).

A successor auditor is engaged to audit the 20X2 financial statements, and the client has asked the auditor to include the 20X1 compiled financial statements for comparative purposes with the 20X2 financial statements.

Is the successor auditor permitted to do this?

Reply—No. Paragraph .05 of AR section 200, *Reporting on Comparative Financial Statements* (AICPA, *Professional Standards*), states that compiled financial statements that omit substantially all of the disclosures required by

an applicable financial reporting framework are not comparable to financial statements that include such disclosures.

The 20X1 financial statements would need to be revised to include the statement of cash flows and all disclosures required by GAAP. Either the predecessor or the successor accountant would then need to at least compile the full disclosure financial statements for 20X1.

[Revised, December 2010, to reflect conforming changes necessary due to the issuance of SSARS No. 19.]

.27 Providing Opinion on a Schedule of Expenditures of Federal Awards in Relation to an Entity's Financial Statements as a Whole When the Schedule of Expenditures of Federal Awards Is on a Different Basis of Accounting Than the Financial Statements

Inquiry—An entity subject to Office of Management and Budget Circular A-133, *Audits of States, Local Governments and Non-Profit Organizations* (Circular A-133), prepares its Schedule of Expenditures of Federal Awards (SEFA) on the cash basis of accounting while preparing its basic financial statements in accordance with GAAP. Paragraph .05a of AU-C section 725, *Supplementary Information in Relation to the Financial Statements as a Whole* (AICPA, *Professional Standards*), requires the auditor to determine that the supplementary information was derived from, and relates directly to, the underlying accounting and other records used to prepare the financial statements. If the SEFA is prepared on a different basis of accounting than that of the financial statements, but the SEFA can be reconciled to the underlying accounting and other records used in preparing the financial statements or to the financial statements themselves, may the auditor provide an opinion on whether the SEFA is presented fairly, in all material respects, in relation to the entity's financial statements as a whole?

Reply—As discussed in chapter 7 of the AICPA Audit Guide Government Auditing Standards and *Circular A-133 Audits*, Circular A-133 requires the auditor to determine and provide an opinion on whether the SEFA is presented fairly in all material respects in relation to the financial statements as a whole (often referred to as providing an in-relation-to opinion). Further, Circular A-133 does not specifically prescribe the basis of accounting to be used by the entity to prepare the SEFA. Therefore, some SEFAs may be presented on a basis of accounting that differs from that used to prepare the financial statements. Nevertheless, the entity is required to disclose the basis of accounting and the significant accounting policies used in preparing the SEFA.

As noted in paragraph 7.03 of the guide, the auditee should be able to reconcile amounts presented in the financial statements to related amounts in the SEFA. Further, paragraph .07d of AU-C section 725 would require the auditor to compare and reconcile the SEFA to the underlying accounting and other records used in preparing the financial statements or to the financial statements themselves.

Therefore, as long as the cash basis SEFA can be reconciled back to the underlying accounting and other records used in preparing the financial statements or to the financial statements themselves, the conditions set forth in paragraph .05a of AU-C section 725 are considered met, and, as long as the other conditions and requirements of AU-C section 725 are met, the auditor may provide an in-relation-to opinion on the SEFA.

[Issue Date: June 2011; Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

.28 Combining a Going Concern Emphasis-of-Matter Paragraph With Another Emphasis-of-Matter Paragraph

Inquiry—In certain circumstances, generally accepted auditing standards (GAAS) requires the auditor to include an emphasis-of-matter paragraph in the auditor’s report.¹ For example, paragraph .15 of AU-C section 570, *The Auditor’s Consideration of An Entity’s Ability to Continue as a Going Concern* (AICPA, *Professional Standards*), states that if, after considering identified conditions or events and management’s plans, the auditor concludes that substantial doubt about the entity’s ability to continue as a going concern for a reasonable period of time remains, the auditor should include an emphasis-of-matter paragraph in the auditor’s report to reflect that conclusion.

In addition to certain paragraphs in GAAS that require the auditor to include an emphasis-of-matter paragraph in the auditor’s report, an emphasis-of-matter paragraph may also be included in the auditor’s report, at the auditor’s discretion, to draw users’ attention to a matter appropriately presented or disclosed in the financial statements that, in the auditor’s professional judgment, is of such importance that it is fundamental to users’ understanding of the financial statements, in accordance with paragraph .06 of AU-C section 706, *Emphasis-of-Matter Paragraphs and Other-Matter Paragraphs in the Independent Auditor’s Report* (AICPA, *Professional Standards*).

May an auditor combine a going concern emphasis-of-matter paragraph with another emphasis-of-matter paragraph, such as an emphasis-of-matter paragraph highlighting the significance of related-party transactions?

Reply—AU-C section 706 does not preclude the auditor from combining matters in an emphasis-of-matter paragraph that are either required to be included in the auditor’s report or included at the auditor’s discretion, recognizing that the requirements in paragraph .07 of AU-C section 706 should be followed for each matter identified. Whether the auditor decides to combine more than one matter in the same paragraph is a matter of professional judgment. However, it may be prudent to emphasize each matter separately in separate paragraphs to make it clear that you have more than one matter of emphasis in your report.

Regardless whether the matters are combined or separated, the auditor should (a) include the emphasis-of-matter paragraph(s) immediately after the opinion paragraph, (b) use the heading “Emphasis of Matter” or other appropriate heading, (c) include in the paragraph(s) a clear reference to the matters being emphasized and to where relevant disclosures that fully describe the matters can be found in the financial statements, and (d) indicate that the auditor’s opinion is not modified with respect to the matters emphasized.

With regard to (b) preceding, another heading may be used if it adequately describes the nature of the matter being disclosed or communicated. When more than one matter is being emphasized, it may be appropriate to be more descriptive in the use of the headings.

[Issue Date: May 2012; Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

¹ Exhibit B, “List of AU-C Sections Containing Requirements for Emphasis-of-Matter Paragraphs” of AU-C section 706, *Emphasis-of-Matter Paragraphs and Other-Matter Paragraphs in the Independent Auditor’s Report* (AICPA, *Professional Standards*).

.29 Modification to the Auditor's Report When a Client Adopts a PCC Accounting Alternative

Inquiry—A private company audit client has adopted one or more of the PCC accounting alternatives in the current year and disclosed the change in accounting principle, which is material to the financial statements. Is the auditor required to add an emphasis-of-matter (EOM) paragraph to the auditor's report for this change in accounting principle?

Reply—Yes. According to paragraphs .07–.12 of AU-C section 708, *Consistency of Financial Statements* (AICPA, *Professional Standards*), if an entity has adopted a change in accounting principle and that change has a material effect on the financial statements, the auditor should include, in the auditor's report, an EOM paragraph in the period of the change and in subsequent periods until the new accounting principle is applied in all periods presented. If the change in accounting principle is accounted for by retrospective application to the financial statements of all prior periods presented, the EOM paragraph is needed only in the period of such change.

The auditor's EOM paragraph should describe the change in accounting principle and provide a reference to the entity's note disclosure. Following is an illustration of this paragraph when a private company has elected to adopt a change in accounting for goodwill in its December 31, 2014 financial statements (and that change is material and has been disclosed in the financial statements):

Change in Accounting Principle

As discussed in Note X to the financial statements, the Company has elected to change its method of accounting for goodwill in 2014. Our opinion is not modified with respect to this matter.

[Issue Date: March 2014.]

.30 Modification to the Auditor's Report When a Client Adopts a PCC Accounting Alternative That Results in a Change to a Previously Issued Report

Inquiry—A private company client has adopted the guidance in FASB Accounting Standards Update (ASU) No. 2014-07, *Consolidation (Topic 810): Applying Variable Interest Entities (VIE) Guidance to Common Control Leasing Arrangements*, in the current year. In the prior year, the private company elected not to consolidate a material variable interest entity (VIE) and, therefore, the auditor's report was modified in order to note a material departure from GAAP. The private company is now presenting comparative financial statements, and this accounting change (which is required to be applied retrospectively) no longer requires the material VIE to be consolidated. Accordingly, the prior year auditor's report on those statements would no longer need to be modified. Is the auditor required to add an EOM paragraph to the current year's report?

Reply—Yes. According to paragraph .53 of AU-C section 700 when reporting on prior period financial statements in connection with an audit of the current period, the auditor should disclose the following matters in an EOM paragraph in accordance with AU-C section 706 if the auditor's opinion on such prior period financial statements differs from the opinion the auditor previously expressed:

1. The date of the auditor's previous report
2. The type of opinion previously expressed

3. The substantive reasons for the different opinion
4. That the auditor's opinion on the amended financial statements is different from the auditor's previous opinion

Following is an illustration of an EOM paragraph when a private company has elected to adopt ASU No. 2014-07 for a VIE when there is a common control leasing arrangement and that VIE was material in 2013 and 2012:

Emphasis of Matter—Variable Interest Entity

In our report dated March 1, 2013, we expressed an opinion that the 2012 financial statements did not fairly present the financial position, results of operations, and cash flows of ABC Company in accordance with accounting principles generally accepted in the United States of America because ABC Company excluded a variable interest entity from the accompanying financial statement that, in our opinion, should have been consolidated. As described in Note X, in March 2014 the Financial Accounting Standards Board issued Accounting Standards Update No. 2014-07, *Consolidation (Topic 810): Applying Variable Interest Entities Guidance to Common Control Leasing Arrangements*, which makes changes to the FASB guidance and no longer requires nonpublic companies to apply variable interest entity guidance to certain common control leasing arrangements. This guidance required retrospective application. Accordingly, our present opinion on the 2012 financial statements, as presented herein, is different from that expressed in our previous report.

[Issue Date: April 2014.]

[The next page is 9281.]

Section 9170

Supplementary Information

.01 Consolidating Information Presented on the Face of the Financial Statements

Inquiry—An entity wants to present consolidating information in order to present the separate financial statements of the components of the consolidated group. Does the auditor's reporting responsibility change depending on whether the consolidating information is presented on the face of the financial statements in separate columns or whether the consolidating information is shown outside the basic consolidated financial statements?

Reply—An entity may present consolidating information either on the face of the statements or outside the basic financial statements.

When the auditor is engaged to express an opinion only on the consolidated financial statements, and consolidating information is included on the face of the financial statements, such consolidating information would be considered supplementary information, the same as if the information was presented outside the basic financial statements, as long as such information is clearly differentiated from the financial statements because of its nature and how it is presented. For example, when the consolidated financial statements include columns of information about the components of the consolidated group, the balance sheets might be titled "Consolidated Balance Sheet—December 31, 20X1, With Consolidating Information," and the columns including the consolidating information, might be marked "Consolidating Information." When the consolidating information is presented outside the basic financial statements, the consolidating information might be titled "Consolidating Balance Sheets, December 31, 20X1." If the other information is clearly differentiated from the basic financial statements, such information may be identified as *unaudited* or as *not covered by the auditor's report*.

When the consolidated financial statements include consolidating information that has not been separately audited, and the auditor is engaged to report on the consolidating information in relation to the basic consolidated financial statements as a whole, the auditor's report on the consolidating information might read as follows:

Our audit was conducted for the purpose of forming an opinion on the consolidated financial statements as a whole. The consolidating information is presented for purposes of additional analysis rather than to present the financial position, results of operations, and cash flows of the individual companies and is not a required part of the consolidated financial statements. Such information is the responsibility of management and was derived from, and relates directly to, the underlying accounting and other records used to prepare the consolidated financial statements. The information has been subjected to the auditing procedures applied in the audit of the consolidated financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the consolidated financial statements or to the consolidated financial statements themselves, and other additional procedures, in accordance with auditing standards generally accepted in the United States of America. In our opinion, the information is fairly stated in all material respects in relation to the consolidated financial statements as a whole.

When the auditor is engaged to express an opinion on both the consolidated financial statements and the separate financial statements of the components presented in consolidating financial statements, the auditor's reporting responsibilities with respect to the separate financial statements are the same as his or her responsibilities with respect to the consolidated financial statements. In such cases, the consolidating financial statements and accompanying notes should include all the disclosures that would be necessary for presentation in accordance with generally accepted accounting principles of separate financial statements of each component.

[Issue Date: September 2011; Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

.02 Supplementary Information That Accompanies Interim Financial Information

Inquiry—When performing an interim review in accordance with AU-C section 930, *Interim Financial Information* (AICPA, *Professional Standards*), is the auditor required to report on supplementary information when a client presents supplementary information along with interim financial statements?

Reply—No; however, nothing precludes the auditor from reporting on the supplementary information. If the auditor decides to report on the supplementary information, the auditor may disclaim on the supplementary information or issue a report based on the limited procedures performed as part of the interim review. An example of a report based on the limited procedures applied in the review follows:

Our review was made primarily for the purpose of obtaining a basis for reporting whether we are aware of any material modifications that should be made to the interim financial statements in order for them to be in conformity with accounting principles generally accepted in the United States of America through performing limited procedures. The accompanying supplementary information is presented for purposes of additional analysis and is not a required part of the interim financial statements. The supplementary information has been subjected to the limited procedures applied in the review of the interim financial statements, and we did not become aware of any material modifications that should be made to such information.

[Issue Date: October 2012; Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

Section 9510

Attestation Reports

.01 Testing Prospective Financial Information as Part of Performing Auditing Procedures

Inquiry—Generally accepted accounting principles require that certain accounts be carried at or adjusted to fair value. Many fair value models are based on the present value of future cash flows or earnings. In making those fair value calculations, management may seek the auditor’s assistance in developing what may be considered either a full or partial financial forecast. In testing an entity’s fair value calculation, an auditor might test management’s assumptions including, for example future cash flows for the next five years. Similarly, the auditor may make an independent estimate of fair value, for example, by using a cash flow model developed and prepared by the auditor.

Does the auditor’s assistance in developing or preparing prospective cash flows require the auditor to examine or compile such information in accordance with Statements on Standards for Attest Engagements (SSAEs)?

Reply—No. Paragraph .01 of AT section 101, *Attest Engagements* (AICPA, *Professional Standards*), states that the attest standards apply when a practitioner is “engaged to issue or does issue an examination...” Accordingly, the auditor would not be required to follow the SSAEs unless the auditor has also been engaged to examine, compile, assemble or apply agreed upon procedures to prospective financial information or the auditor issues an examination, compilation, assembly or agreed upon report on prospective financial information.

.02 Availability of Criteria for a Fee

Inquiry—A practitioner may perform an attestation engagement only if he or she has reason to believe that the subject matter is capable of evaluation against criteria that are suitable and available to users. Paragraph .33 of AT section 101 states in part that criteria should be available to users in one or more of a number of ways, including available publicly. Paragraph .34 of AT section 101 goes on to say “If criteria are only available to specified parties, the practitioner’s report should be restricted to those parties who have access to the criteria as described in paragraphs .78 and .80 [of AT section 101].” If criteria is only available for a fee, is it considered available publicly for the purpose of paragraphs .33–.34 of AT section 101?

Reply—Yes, as long as the criteria is available to any person in the normal course of business, it is considered available publicly. This would include certain industry associations and other organizations that make criteria available free of charge to their members but charge a fee to nonmembers.

.03 Reporting on New York State Medicaid Cost Reports*

On June 27, 2006, the New York State Department of Health (“DOH”) issued a prescribed “Opinion of Independent Accountant” (the “Cost Report Opinion”) that is required to be utilized by CPAs reporting on audits and attestation engagements associated with a nursing home’s filing of its Annual Report of Residential Health Care Facility (RHCF-4). The purpose of this

* This Technical Question and Answer (TIS) has not been updated to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards Nos. 122–126. This TIS will be updated in a subsequent update of AICPA *Technical Practice Aids*.

Technical Practice Aid (“TPA”) is to provide clarity to CPAs performing these engagements. This TPA also may be useful to a CPA performing audits and attestation engagements for the purpose of reporting on an Annual Institutional Cost Report of Hospitals and Hospital Healthcare Complexes and other cost reports filed with the New York State Department of Health or other New York State agencies.

The Cost Report Opinion as prescribed by the DOH references certain data in the facility’s RHCF-4 cost report (the “supplemental data”). The Cost Report Opinion includes three separate opinions:

1. An opinion on the facility’s financial statements (displayed as schedules within the cost report) based on an audit conducted in accordance with generally accepted auditing standards.
2. An opinion as to whether the supplemental data is stated fairly in all material respects in relation to the financial statements as a whole.
3. An opinion under the attestation standards (the “attestation opinion”) on the supplemental data’s conformity with the DOH cost report instructions.

The required format of the Cost Report Opinion, as prescribed by the DOH, is attached as Exhibit A. The AICPA staff understands that all DOH Cost Reports, including the Annual Institutional Cost Report of Hospitals and Hospital Healthcare Complexes, within New York State will include similar language.

The Cost Report Opinion contains certain terminology that differs from the language found in AICPA professional standards and therefore may be unclear to practitioners. AICPA staff held conversations with the DOH for the purpose of better understanding their views about these wording differences and their expectations about the procedures a CPA would perform to issue the Cost Report Opinion. The following responses are those of AICPA staff based on their understanding of the requirements and expectations of the DOH.

Four issues are addressed in this Technical Practice Aid:

1. The CPA’s consideration of materiality in completing the attestation engagement.
2. The meaning of the term “certification” in the Cost Report Opinion, and its impact on the CPA’s procedures.
3. The Independence Standards that the CPA is expected to adhere to in the performance of the engagement.
4. Dating the CPA’s report.

Inquiry—The attestation opinion contained in the Cost Report Opinion reads as follows:

In our opinion, the above supplemental data are in all material respects in conformity with the applicable instructions relating to the preparation of the RHCF-4 as furnished by the New York State Department of Health for the year ended Month XX, 20XX.

With respect to the attestation opinion’s phrase, “in all material respects,” may a CPA utilize materiality applied at the financial statement level to plan the scope of the attestation procedures, or in the evaluation of misstatements, if any, that are identified through the attestation procedures?

Reply—No. The AICPA staff understands that the DOH believes that the use of materiality applied at the financial statement level would not be appropriate for planning or performing attestation procedures related to cost report instructions, or for evaluating any misstatements identified related to conformity with cost report instructions. Rather, the AICPA staff's understanding is that materiality should be determined and applied at the individual schedule level. Accordingly, the DOH expects the CPA to perform procedures on line items, columns, and totals in the specific schedules covered by the CPA's attestation opinion to be able to opine that the financial and statistical data presented on each schedule has been prepared in conformity, in all material respects as determined at the individual schedule level, with the applicable instructions. As a result, the CPA ordinarily will perform procedures beyond those performed in the audit of the financial statements with respect to certain amounts included in the supplemental data. These additional procedures result from the application of a lower materiality level for procedures performed on information included in the individual schedules as compared to the materiality level applied in the financial statement audit.

The CPA may consider attestation risk and materiality in applying his or her professional judgment in determining the nature, timing and extent of attestation procedures for testing the financial and statistical data. The CPA's risk assessment should give consideration to the effects of whether amounts in a particular schedule are either understated or overstated. The quantity of attestation evidence needed is affected by the risk of misstatement (items presenting greater risk likely will require evaluation of attestation evidence beyond that deemed necessary for purposes of the financial statement audit) and by the quality of such attestation evidence. In determining the nature, timing and extent of attest procedures to perform, the CPA may give consideration to:

1. His or her assessment of the facility's policies and procedures related to the preparation of the cost report in accordance with the applicable instructions and,
2. Deficiencies related to internal control over the preparation of the cost report (which may differ from internal control over financial reporting evaluated for purposes of the financial statement audit).

In addition to the above considerations, the CPA may focus his or her testing on those amounts, line items, or schedules that impact the facility's reimbursement or rate setting most significantly.

The purpose of testing the supplemental data is to obtain sufficient appropriate attestation evidence to provide a reasonable basis for the CPA's opinion on whether the financial and statistical data in the schedules is in conformity, in all material respects as determined at the individual schedule level, with the applicable instructions. The CPA will have performed audit procedures directed toward evaluating certain amounts included in the supplemental data in connection with the audit of the facility's financial statements. The CPA may consider the results of those procedures in determining the nature, timing and extent of additional work necessary because of a lower materiality level for individual schedules compared to the materiality level for the financial statements.

The CPA ordinarily would select individual amounts from the supplemental data to examine based on the risk of misstatement or departure from the cost report instructions or by applying sampling. A combination of both selection techniques as described below may be necessary to provide the CPA with sufficient appropriate attestation evidence relative to the supplemental data.

The CPA may select amounts to test based on the risk of material misstatement associated with the reimbursement or rate-setting impact of a particular amount, line item, or schedule. For example, the costs associated with non-moveable equipment may have a greater impact on rate setting when compared with major moveable equipment. Accordingly, the CPA may determine that it is necessary to obtain more attestation evidence related to costs for non-moveable equipment. Factors influencing the CPA's assessment of risk might include the facility's history of misstatements in the cost report, the complexity associated with the preparation of a schedule and the effectiveness of management's internal control over the preparation of the applicable cost report schedules.

The CPA may select amounts to test utilizing sampling. The CPA uses his or her professional judgment to determine when it may be appropriate to use sampling and the sample size.

The CPA's procedures ordinarily will include agreeing individual supplemental data amounts, as appropriate, to related audit documentation or the audited financial statements, or to the general ledger, sub-ledgers, or client analyses prepared in support of the cost report schedules. In addition, the CPA's procedures ordinarily will include substantive procedures applied to selected supplemental data amounts, which are designed to identify material misstatements at the individual schedule level. Substantive procedures include tests of details and substantive analytical procedures. For example, the CPA might select supplemental data amounts and compare them to vendor's invoices or analytically compare the relationship of amounts and current year expectations.

As a result of procedures performed, the CPA may identify departures from the cost report instructions. In that case, the CPA would need to re-consider his or her initial risk assessment and determine whether additional procedures need to be performed. If departures from the cost report instructions are not corrected by facility management, the CPA would consider whether such departures result in the CPA opining that there is a material departure from the cost report instructions.

Inquiry—The Cost Report Opinion includes the following paragraph:

The undersigned hereby certifies this opinion and that I/we have disclosed any and all material facts known to me/us, disclosure of which is necessary to make this opinion, the basic financial statements and the supplemental data not misleading. The undersigned hereby further certifies that I/we will disclose any material fact discovered by me/us subsequent to this certification which existed at the time of this certification and was not disclosed in the basic financial statements or the supplemental data, the disclosure of which is necessary to make the basic financial statements or the supplemental data not misleading and will disclose any material misstatement in said financial statements or supplemental data.

Given that the terms "certifies" and "certification" are not defined in AICPA professional standards, should the CPA perform additional procedures beyond those contemplated by Statements on Auditing Standards (SASs) and Statements on Standards for Attestation Engagements (SSAEs) in order to provide a "certification"? Additionally, since the financial statements and supplemental schedules are the responsibility of management, what is the CPA's responsibility with respect to information discovered subsequent to the certification's report date?

Reply—New York State Public Health Law Section 2808-b states in part "All financial statements or financial information...shall be certified in their entirety by an independent public accountant..." Although the phrase "certifies

this opinion” does not appear in AICPA professional standards, there is nothing in the concept of a certification that would be in conflict with or contrary to those standards. The CPA may consider the phrase “certifies this opinion” to be the equivalent of rendering or expressing an opinion. However, it is the responsibility of the CPA to determine, and take any and all steps that are necessary and proper, in order to be able to appropriately sign the Cost Report Opinion.

Public Health Law 2808-b further states that “Subsequent to such certification (the CPA should disclose) any material fact discovered by him which existed at the time of such certification ...which is necessary to make the financial statements or financial information not misleading” If the CPA becomes aware of information, which relates to the audited financial statements or supplemental schedules previously reported on by him or her, but which was not known to the CPA at the date of the Cost Report Opinion, and such subsequently discovered information is deemed to be necessary to make the basic financial statements not misleading, the CPA should ensure that such subsequently discovered information is communicated to the DOH. AU section 561, *Subsequent Discovery of Facts Existing at the Date of the Auditor’s Report*, provides that the CPA should request the client to communicate such information to the DOH. However, the CPA retains the responsibility to ensure that such information is communicated to the DOH—whether by the client or the CPA. In fulfilling this responsibility, if the client refuses to make such communication the CPA should notify the DOH of the information and that the Cost Report Opinion should no longer be relied upon.

Inquiry—The Cost Report Opinion is titled “Opinion of Independent Accountant” and includes the following paragraph:

During the period of this professional engagement, at the time of expressing this opinion, and during the period covered by the financial statements I/we did not have nor were committed to acquire, any direct financial interest or material indirect financial interest in the ownership or operation of the facility and I/we were not connected in any way with the ownership, financing or operation of the facility as a director, officer or employee, or in any capacity other than as an independent certified public accountant or independent public accountant.

What independence requirements are expected to be followed in conducting the engagements contemplated by the Cost Report Opinion?

Reply—The CPA should follow Independence Standards as issued by the AICPA and that are codified in the AICPA *Code of Professional Conduct* as well as any independence standards issued by the N.Y. Board of Accountancy.

Inquiry—The engagements underlying the Cost Report Opinion may have different dates for completion of field work. For example, the audits of the financial statements and the supplemental data in relation to the basic financial statements taken as a whole may have been completed (and the CPA’s opinions thereon rendered) before the CPA completes the work related to the attestation opinion. In those situations, may the Cost Report Opinion be dual-dated?

Reply—Yes. Although dual-dating is not required, the Cost Report Opinion may be dual dated for the attestation opinion as follows:

[Date], except for our examination of the conformity of specified data with the instructions for the year ended December 31, 20XX, as to which the date is [Date].

Exhibit

FORM RHCF-4 DOH 490 (06/07/06)

PLEASE COMPLETE ALL OF THE FOLLOWING INFORMATION

NAME OF FACILITY_____
OPERATING CERTIFICATE NUMBER_____
NAME OF ADMINISTRATOR_____
NAME OF CONTROLLER OR CHIEF FISCAL OFFICEROpinion of Independent Accountant

We have audited the balance sheet of _____ as of December 31, 2004 and the related statements of operations, changes in net assets or equity and cash flows for the year then ended included as Exhibits A through E (the basic financial statements), except for lines 041, 042 and 043 of Exhibit E of Part IV of the accompanying Annual Report of Residential Health Care Facility (RHCF-4) identified by Declaration Control Number _____. These financial statements are the responsibility of the facility management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the aforementioned financial statements present fairly, in all material respects, the financial position of _____ as of December 31, 2004 and the results of its operations, changes in net assets or equity and its cash flows for the year then ended, in conformity with accounting principles generally accepted in the United States of America.

Our audit was conducted for the purpose of forming an opinion on the basic financial statements taken as whole. The following supplemental data, which are the responsibility of the facility management, are presented for the purpose of additional analysis and are not required as part of the basic financial statements identified by Declaration Control Number _____.

PART I—STATISTICAL DATA

Bed Capacity—Patient Days, Line 017

PART II—CROSSWALK

Schedule 7, Column 0161

Schedules 8 through 11, except for Schedule 8C, Lines 010 through 035

PART IV—UNIFORM REPORT

Exhibit H, except Columns 0034–0044, Lines 054–057, 060–069 and 090
Exhibit I
Schedule 4, except Columns 0114–0122, Lines 054–057, 060–069 and 090
Schedule 6

The above supplemental data have been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, are stated fairly in all material respects when considered in conjunction with the basic financial statements included as Exhibits A through E of the RHCF-4, taken as a whole.

Our procedures were not intended to determine compliance with, and therefore would not necessarily disclose deviations from, reporting requirements contained in the New York State Residential Health Care Facility Accounting and Reporting Manual.

The other information included on Parts I, II, III and IV of the Annual Report of Residential Health Care Facility (RHCF-4) identified by Declaration Control Number _____, (not detailed in the preceding paragraphs), was not audited by us and, accordingly, we express no opinion thereon.

We have examined the above supplemental data for the year ended December 31, 2004. [Facility name] _____ management is responsible for the preparation of the supplemental data in conformity with the applicable instructions relating to the preparation of the RHCF-4 as furnished by the New York State Department of Health for the year ended December 31, 2004. Our responsibility is to express an opinion on the supplemental data's conformity with those instructions based upon our examination.

Our examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants and, accordingly, included examining, on a test basis, evidence supporting the supplemental data's conformity with the applicable instructions and performing such other procedures as we considered necessary in the circumstances. We believe that our examination provides a reasonable basis for our opinion.

In our opinion, the above supplemental data are in all material respects in conformity with the applicable instructions relating to the preparation of the RHCF-4 as furnished by the New York State Department of Health for the year ended December 31, 2004.

This RHCF-4 report, including this accountant's opinion, is intended solely for the information and use of the management and ownership of the facility and the officers and agencies of the State of New York, and is not intended to be and should not be used by anyone other than these specified parties.

The undersigned hereby certifies this opinion and that I/we have disclosed any and all material facts known to me/us, disclosure of which is necessary to make this opinion, the basic financial statements and the supplemental data not misleading. The undersigned hereby further certifies that I/we will disclose any material fact discovered by me/us subsequent to this certification which existed at the time of this certification and was not disclosed in the basic financial statements or the supplemental data, the disclosure of which is necessary to make the basic financial statements or the supplemental data not misleading and will disclose any material misstatement in said financial statements or supplemental data.

During the period of this professional engagement, at the time of expressing this opinion, and during the period covered by the financial statements I/we did not have nor were committed to acquire, any direct financial interest or

material indirect financial interest in the ownership or operation of the facility and I/we were not connected in any way with the ownership, financing or operation of the facility as a director, officer or employee, or in any capacity other than as an independent certified public accountant or independent public accountant.

Section 9520

Statement on Standards for Attestation Engagements No. 16, Reporting on Controls at a Service Organization

[.01] Reserved

[.02] Reserved

[.03] Reserved

.04 Definition of *Service Organization and User Entity*

Inquiry—Statement on Standards for Attestation Engagements (SSAE) No. 16,¹ *Reporting on Controls at a Service Organization* (AICPA, *Professional Standards*, AT sec. 801),¹ uses the terms *service organization* and *user entity*. What do these terms mean?

Reply—AT section 801 defines a *service organization* as an organization or segment of an organization that provides services to user entities, which are likely to be relevant to user entities' internal control over financial reporting (ICFR). A service organization performs a function or task for the user entities that results in data or other information that the user entities incorporate in their financial statements. Some examples of service organizations are custodians for investment companies, mortgage servicers that service loans for others, and claims processors that process medical claims for self-insured entities. AT section 801 defines a *user entity* as an entity that uses a service organization.

[Issue Date: June 2011; Revised, November 2011.]

[.05] Reserved

[.06] Reserved

.07 Types of Reports Under AT Section 801

Inquiry—Are there type 1 and type 2 reports under AT section 801?

Reply—Yes, AT section 801 enables practitioners to provide two types of service auditor's reports. In both reports the service organization must prepare a description of its system that includes, among other things, the nature of the service provided, how the service is performed, and the service organization's controls and related control objectives as they relate to the service provided. In a type 1 report, the service auditor expresses an opinion on whether the description is fairly presented (that is, does it describe what actually exists) and whether the controls included in the description are suitability designed.

¹ For service auditors' reports for periods ending on or after June 15, 2011, Statement on Standards for Attestation Engagements (SSAE) No. 16, *Reporting on Controls at a Service Organization* (AICPA, *Professional Standards*, AT sec. 801), supersedes the guidance for service auditors that previously was contained in Statement on Auditing Standards (SAS) No. 70, *Service Organizations*, as amended (now superseded). For audits of financial statements for periods ending on or after December 15, 2012, AU-C section 402, *Audit Considerations Relating to an Entity Using a Service Organization* (AICPA, *Professional Standards*), supersedes the guidance for user auditors that previously was contained in SAS No. 70, as amended (now superseded). [Footnote added, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

Controls that are suitably designed are able to achieve the related control objectives if they operate effectively. In a type 2 report, the service auditor's report contains the same opinions that are included in a type 1 report and also includes an opinion on whether the controls were operating effectively. Controls that operate effectively do achieve the control objectives they were intended to achieve. Both reports are examination reports, which means the practitioner obtains a high level of assurance.

[Issue Date: June 2011; Revised, November 2011.]

.08 Changes Introduced by AT Section 801

Inquiry—Does the implementation of AT section 801 result in significant changes to a service auditor's engagement?

Reply—The following are the three major changes introduced by AT section 801:

1. Management of the service organization is required to provide the service auditor with a written assertion about the fairness of the presentation of management's description of the service organization's system, the suitability of the design of the controls included in the description and, in a type 2 engagement, the operating effectiveness of those controls. That assertion is either attached to or included in the service organization's description of its system.
2. In a type 2 engagement, the description of the service organization's system and the service auditor's opinion on the description covers a period (the same period as the period covered by the service auditor's tests of the operating effectiveness of controls). In Statement on Auditing Standards (SAS) No. 70, *Service Organizations*, as amended (now superseded), the description of the service organization's system in a type 2 report was as of a specified date, rather than for a period.
3. The service auditor is required to identify, in the description of tests of controls, any tests of controls performed by the internal audit function (other than those performed in a direct assistance capacity) and the service auditor's procedures with respect to that work. Tests of controls are procedures designed to evaluate the operating effectiveness of controls in achieving the control objectives stated in management's description of the service organization's system.

The following are other differences introduced by AT section 801:

- Suitable criteria are used by management to measure and present the subject matter and by the service auditor to evaluate the subject matter. Paragraphs .14–.16 of AT section 801 provide suitable criteria for the fairness of the presentation of a service organization's description of its system and the suitability of the design and operating effectiveness of its controls. Criteria are the standards or benchmarks used to measure and present the subject matter and against which the service auditor evaluates the subject matter.
- The service auditor's examination report contains the report elements identified in paragraph .85 of AT section 101, *Attest Engagements* (AICPA, *Professional Standards*). Paragraphs .52–.53 of AT section 801 tailor these report elements to a service auditor's engagement.
- The service auditor may not use evidence obtained in prior engagements about the satisfactory operation of controls in prior periods to provide a basis for a reduction in testing in the current period, even if it is supplemented with evidence obtained during the current period.

- AT section 801 specifically states that it is not applicable when the service auditor is reporting on controls at a service organization relevant to subject matter other than user entities' ICFR (such as controls related to regulatory compliance or privacy).

[Issue Date: June 2011; Revised, November 2011; Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

.09 Implementation Guidance for Reporting on Controls at a Service Organization Under AT Section 801

Inquiry—Has the AICPA Guide *Service Organizations: Applying SAS No. 70, as Amended* (commonly known as the SAS 70 guide)² been rewritten to reflect AT section 801?

Reply—Yes. AICPA Guide *Service Organizations: Applying SAS No. 70, as Amended* was rewritten to reflect the requirements and guidance in AT section 801 and is available as AICPA Guide *Service Organizations, Applying SSAE No. 16, Reporting on Controls at a Service Organization (SOC 1)* (SOC 1³ guide).

[Issue Date: June 2011; Revised, November 2011.]

.10 Illustrative Assertion for Management of Service Organization in an SSAE No. 16 Engagement

Inquiry—Where can I find an illustrative management assertion for an SSAE No. 16 engagement?

Reply—Exhibit A, “Illustrative Assertions by Management of a Service Organization,” of AT section 801 contains illustrative management assertions for type 1 and type 2 engagements. In addition, appendix B, “Illustrative Service Auditor’s Reports,” of the SOC 1 guide contains illustrative type 2 reports that include management assertions.

[Issue Date: June 2011; Revised, November 2011.]

.11 Illustrative Assertion for Management of Subservice Organization in an SSAE No. 16 Engagement

Inquiry—AT section 801 requires management of a subservice organization to provide a written assertion when the inclusive method is used. AT section 801 contains illustrative management assertions for management of a service organization. Is an illustrative assertion for management of a subservice organization available?

Reply—Yes. Example 2 of appendix B of the SOC 1 guide contains an illustrative assertion for an inclusive engagement.

[Issue Date: June 2011; Revised, November 2011.]

² Prior to the issuance of SSAE No. 16, the guidance for service auditors reporting on controls at a service organization and for user auditors auditing the financial statements of a user entity was contained in SAS No. 70, as amended (now superseded). For that reason, reports on controls at a service organization were frequently referred to as “SAS 70 reports,” and the related AICPA Guide *Service Organizations, Applying SAS No. 70, as Amended* was referred to as the “SAS 70 guide.” [Footnote renumbered and revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

³ The AICPA has introduced the service organization controls (SOC) series of reports, which are further explained in section 9530.02, “Service Organization Controls Reports.” Engagements performed under AT section 801 are designated as SOC 1 engagements. AICPA Guide *Service Organizations, Applying SSAE No. 16, Reporting on Controls at a Service Organization (SOC 1)* is referred to as the SOC 1 guide. [Footnote renumbered, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

.12 Another CPA Firm Acts as the Accounting Department for Your Client—Auditor Responsibility

Inquiry—An auditor is in the process of planning an audit for a client and determines that significant accounting and financial reporting processes and controls are performed by an outside CPA firm. What is the auditor's responsibility with respect to the functions performed by the other CPA firm?

Reply—Paragraph .01 of AU-C section 315, *Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement* (AICPA, *Professional Standards*), addresses the auditor's responsibility to identify and assess the risks of material misstatements in the financial statements through understanding the entity and its environment, including the entity's internal control. Paragraph .13 of AU-C section 315 states that the auditor should obtain an understanding of internal control relevant to the audit. Therefore, the auditor's responsibility is the same regardless of whether the client designs and operates its own accounting processes and controls or whether those processes and controls are outsourced to a third party.

Assuming that the other CPA firm has not undergone a type 1 or type 2 service auditor's examination and, therefore, cannot provide user entities with such a report, the auditor may obtain the necessary understanding by visiting the other CPA firm's office where the information is processed to understand how the processes and controls have been designed and whether those controls have been implemented.

If the auditor intends to rely on any of the controls performed by the other CPA firm, then those controls would need to be tested to determine if they are operating effectively, just as they would if the controls had been implemented by the client.

[Issue Date: November 2011; Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

.13 Placement of Management's Assertion in an SSAE No. 16 Engagement

Inquiry—Does AT section 801 require that management's assertion accompany the service organization's description of its system?

Reply—Yes. Paragraph .09c(vii) of AT section 801 states that one of the conditions for engagement acceptance or continuance is that management provide a written assertion that will be included in or attached to management's description of the service organization's system.

[Issue Date: November 2011.]

.14 Type 2 Reports That Cover Less Than a Six-Month Period

Inquiry—Does AT section 801 require that a type 2 report cover a minimum period?

Reply—AT section 801 discourages the service auditor from performing a type 2 engagement that covers a period of less than six months. Paragraph .A42 of AT section 801 indicates that a type 2 report that covers a period that is less than six months is unlikely to be useful to user entities and their auditors. However, there are certain limited circumstances, such as the following, in which a type 2 report covering less than six months may be considered:

- The service auditor was engaged close to the date by which the report on controls is to be issued, precluding the service auditor from testing the operating effectiveness of controls for a six month period.
- The service organization or a particular system or application has been in operation for less than six months.

- Significant changes have been made to the controls, and it is not practicable either to wait six months before issuing a report or to issue a report covering the system both before and after the changes.

[Issue Date: November 2011; Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

.15 Information About Relevant IT Control Objectives and Related Controls in Description of Service Organization’s System

Inquiry—Does AT section 801 require that management’s description of the service organization’s system include a description of the service organization’s IT control objectives and related controls? If so, does the SOC 1 guide address which IT control objectives and controls would usually be relevant to a user entity’s ICFR?

Reply—The definition of *service organization’s system* in paragraph .07 of AT section 801 indicates that the description of the service organization’s system includes the policies and procedures designed, implemented, and documented by management of the service organization to provide user entities with the services covered by the service auditor’s report. Paragraph .A11 of AT section 801 further clarifies that sentence: “The policies and procedures referred to in the definition of service organization’s system refer to the guidelines and activities for providing transaction processing and other services to user entities and include the infrastructure, software, people, and data that support the policies and procedures.” Paragraph 3.65 of the SOC 1 guide indicates that if the control objectives in a service organization’s description of its system only address application controls, and the proper functioning of general computer controls is necessary for the application controls to operate effectively, the service organization would be expected to include the relevant general computer controls in its description of the system as they relate to the specified control objectives. Appendix D, “Illustrative Control Objectives for Various Types of Service Organizations,” of the SOC 1 guide includes illustrative control objectives related to general computer controls.

[Issue Date: November 2011.]

.16 Identification of Risks in the Description of the Service Organization’s System

Inquiry—Does the service organization’s description of its system need to identify the risks that could prevent the service organization’s controls relevant to user entities’ ICFR from achieving the related control objectives?

Reply—AT section 801 does not require that management identify, in its description of the service organization’s system, the risks related to each control objective included in the description. However, the service auditor would probably expect management to be able to discuss its consideration of risks in designing the controls to achieve the related control objectives.

[Issue Date: November 2011.]

.17 Information About the Risk Assessment Process to Be Included in the Description

Inquiry—Paragraph .14 of AT section 801 indicates that management’s description of a service organization’s system should include aspects of the service organization’s risk assessment process. What information should be included in describing the risk assessment process?

Reply—The content of the description of the risk assessment process will vary depending on the complexity of the service organization’s process. Paragraph .A18 of AT section 801 indicates that management may have a formal or informal process for identifying relevant risks. A formal process may include estimating the significance of identified risks, assessing the likelihood of their occurrence, and deciding about actions to address them. In those circumstances, nothing precludes management from including the details of its process in the description. However, because control objectives relate to the risks that controls seek to mitigate, paragraph .A18 of AT section 801 indicates that thoughtful identification by management of the control objectives when designing, implementing, and documenting the service organization’s system may itself comprise an informal process for identifying relevant risks.

[Issue Date: November 2011.]

.18 Purpose of SSAE No. 16 Reports

Inquiry—Will entities now become “SSAE 16 certified”?

Reply—No. A popular misconception about SAS No. 70, as amended (now superseded), was that a service organization became “certified” as SAS No. 70 compliant after undergoing a type 1 or type 2 service auditor’s engagement. No such certification existed under SAS No. 70, as amended (now superseded), nor does it exist under AT section 801. An SSAE No. 16 report (as was the case for a SAS No. 70 report) is primarily an auditor-to-auditor communication, the purpose of which is to provide user auditors with information about controls at a service organization that are relevant to the user entities’ ICFR.

[Issue Date: November 2011; Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

.19 Providing a Service Organization With a Bridge Letter

Inquiry—May a service auditor provide a service organization with a *bridge letter* under AT section 801 (a letter from a service auditor stating that nothing has changed since the last type 1 or type 2 report)?

Reply—No. AT section 801 does not address such letters or reports. A service organization may choose to issue a letter that describes updates or changes in its controls since the previous type 1 or type 2 report. However, there are no provisions in AT section 801 for service auditors to report on such a letter. Service auditors and user auditors are cautioned against providing assurance on or inferring assurance from such letters, respectively.

[Issue Date: November 2011; Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

.20 Format of Type 1 and Type 2 SSAE No. 16 Reports

Inquiry—Other than the addition of management’s assertion and changes to the auditor’s report, is the format of the SSAE No. 16 report package the same as it was under SAS No. 70, as amended (now superseded)?

Reply—Except for the addition of management’s assertion, AT section 801 has the same report package as it did under SAS No. 70, as amended (now superseded). That package consists of the following components:

- Section 1: The service auditor’s report, that is, the letter from the service auditor
- Section 2: Management of the service organization’s written assertion
- Section 3: Management’s description of the service organization’s system

- Section 4: The service auditor's description of tests of the operating effectiveness of controls and results of those tests (type 2 reports only)
- Section 5: Optional other information provided by management of the service organization

[Issue Date: November 2011; Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

.21 Understanding Internal Control in Audit of a Service Organization's Financial Statements When Also Reporting on Service Organization's Controls Under AT Section 801

Inquiry—If an auditor performs an SSAE No. 16 engagement for a service organization and also audits that service organization's financial statements, when auditing the service organization's financial statements, does the auditor still need to obtain a sufficient understanding of the service organization and its environment, including its internal control, sufficient to assess the risk of material misstatement and design audit procedures?

Reply—Yes. In an SSAE No. 16 engagement, the service auditor focuses on controls at the service organization that are relevant to the *user entities'* ICFR, rather than controls at the service organization that are relevant to the *service organization's* ICFR. Some of the controls included in the service organization's description of its system may be relevant to the service organization's ICFR, but because controls evaluated and tested for the purposes of an SSAE No. 16 engagement are not necessarily controls that affect the service organization's financial reporting, the auditor of the service organization's financial statements would still need to obtain an understanding of the service organization's internal control for the purpose of the audit.

[Issue Date: November 2011.]

.22 Determining Control Objectives and Controls in an SSAE No. 16 Engagement

Inquiry—Does AT section 801 define or suggest specific control objectives for service organizations that provide services that are likely to be relevant to user entities' ICFR or does the service organization define its own control objectives and controls?

Reply—AT section 801 does not define or suggest specific control objectives for service organizations that provide services that are likely to be relevant to user entities' ICFR. In an SSAE No. 16 engagement, the service auditor evaluates whether the service organization's controls were suitably designed or operating effectively by determining whether the control objectives specified by management of the service organization were achieved. AT section 801 requires that the control objectives be reasonable in the circumstances. Although most service organizations that provide similar services will have similar control objectives, in order for control objectives to be reasonable in the circumstances, they should reflect features of the particular service organization, such as the nature of the services provided, the industry in which the user entity operates, and the needs of the user entities. Accordingly, in SSAE No. 16 engagements, not all service organizations will have the same control objectives. However, certain control objectives are typical for certain types of service organizations. To assist service auditors, appendix D of the SOC 1 guide contains illustrative control objectives for various types of service organizations, including application service providers, claims processors, credit card payment processors, investment managers, payroll processors, and transfer agents. The appendix also includes illustrative general control objectives that may be applicable to any service organization.

[Issue Date: November 2011; Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

.23 Reporting Under International Standard on Assurance Engagements 3402, Assurance Reports on Controls at a Service Organization

Inquiry—AT section 801 is based on International Standard on Assurance Engagements (ISAE) 3402, *Assurance Reports on Controls at a Service Organization*, issued by the International Auditing and Assurance Standards Board (IAASB). May a U.S. CPA perform and report on a service auditor's engagement under ISAE 3402?

Reply—Unless they also meet the international requirements, a U.S. CPA could not issue a stand-alone ISAE 3402 report. However, a U.S. CPA could issue a report indicating the examination was performed in accordance with AICPA and IAASB standards, assuming that the requirements of both standards have been met.

[Issue Date: November 2011.]

.24 Engagements Performed Under AICPA and IAASB Standards

Inquiry—Under what circumstances would a service organization request that the service auditor report under both AICPA and IAASB standards?

Reply—Engagements performed under AT section 801 and ISAE 3402 are very similar. (Exhibit B, “Comparison of Requirements of Section 801, *Reporting on Controls at a Service Organization*, With Requirements of International Standard on Assurance Engagements 3402, *Assurance Reports on Controls at a Service Organization*,” of AT section 801 identifies differences between AT section 801 and ISAE 3402.) For service organizations with international operations or international clients, there may be a benefit to obtaining a report indicating that the examination was performed in accordance with AICPA and IAASB standards. An engagement that is performed in accordance with both sets of standards would not be expected to involve a substantially different examination scope or approach than an individual SSAE No. 16 engagement would.

[Issue Date: November 2011.]

.25 Applying AT Section 801 Internationally

Inquiry—If a service organization in the United States provides services to a user entity in Europe, may the practitioner perform the examination under AT section 801 or should it be performed under ISAE 3402?

Reply—The applicability of AT section 801 is not limited to user entities located in the United States. Accordingly, a user entity in Europe could be a recipient of an SSAE No. 16 report.

[Issue Date: November 2011.]

.26 Reporting on Controls at a Service Organization Relevant to Subject Matter Other Than User Entities' ICFR

Inquiry—May AT section 801 be used for reporting on a service organization's controls relevant to subject matter other than user entities' ICFR?

Reply—No. AT section 801 does not apply to examinations of controls over subject matter other than user entities' ICFR. In the past, some CPAs used SAS No. 70, as amended (now superseded) to report on controls at a service organization relevant to subject matter other than user entities' ICFR. However, SAS No. 70, as amended (now superseded) was never intended for such reporting, and neither is AT section 801. Paragraph .A2 of AT section 801

clarifies this point, and paragraph .02a of AT section 801 indicates that AT section 801 may be helpful to practitioners in developing and performing such engagements under AT section 101. AT section 101 provides a framework that enables practitioners to develop engagements and report on subject matter other than financial statements. For example, an entity may be required by law or regulation to maintain the privacy of the information it collects from its customers. Such information may be passed on to a service organization that performs certain tasks for the user entity. Even though certain controls over the privacy of the information are implemented by the service organization, management of the user entity is not relieved of its responsibility for effective internal control over the privacy of the information it processes for the user entity. In this situation, management of the service organization may engage a CPA to report on the effectiveness of its controls over privacy that are relevant to the user entities, and it may provide that report to the user entities and other specified parties identified in the report. Such an examination would be performed under AT section 101, not AT section 801. The increasing use of *cloud computing* companies (that provide user entities with on-demand network access to a shared pool of computing resources, such as networks, servers, storage, applications, and services) has created an increasing demand for CPAs to report on a cloud computing service organization's controls relevant to subject matter other than user entities' ICFR.

[Issue Date: November 2011; Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

[The next page is 9561.]

Section 9530

Service Organization Controls Reports

.01 Reporting on Controls at a Service Organization Relevant to Subject Matter Other Than User Entities' Internal Control Over Financial Reporting

Inquiry—Is authoritative guidance available for reporting under AT section 101, *Attest Engagements* (AICPA, *Professional Standards*), on a service organization's controls relevant to subject matter other than user entities' internal control over financial reporting (ICFR)?

Reply—Yes. The AICPA Guide *Reporting on Controls at a Service Organization Relevant to Security, Availability, Processing Integrity, Confidentiality, or Privacy* (SOC 2) (SOC 2 guide) is designed to assist practitioners in reporting under AT section 101 on an examination of controls at a service organization relevant to the security, availability, or processing integrity of a system or the confidentiality, or privacy of the information processed by the system.

[Issue Date: November 2011.]

.02 Service Organization Controls Reports

Inquiry—What does the acronym “SOC” stand for?

Reply—The acronym SOC stands for service organization controls, as in “service organization controls reports.” The AICPA introduced this term to make practitioners aware of the various professional standards and guides available to them for examining and reporting on controls at a service organization relevant to user entities and to help practitioners select the appropriate standard or guide for a particular engagement. The following are the designations for the three engagements included in the SOC report series and the source of the guidance for performing and reporting on them:

- SOC 1: Statement on Standards for Attestation Engagements (SSAE) No. 16, *Reporting on Controls at a Service Organization* (AICPA, *Professional Standards*, AT sec. 801), and AICPA Guide *Service Organizations: Applying SSAE No. 16, Reporting on Controls at a Service Organization* (SOC 1)
- SOC 2: AICPA Guide *Reporting on Controls at a Service Organization Relevant to Security, Availability, Processing Integrity, Confidentiality, or Privacy* (SOC 2) and AT section 101
- SOC 3: TSP section 100, *Trust Services Principles, Criteria, and Illustrations for Security, Availability, Processing Integrity, Confidentiality, and Privacy*, and AT section 101

[Issue Date: November 2011.]

.03 Authority of SOC 1 and SOC 2 Guides

Inquiry—What is the authority of the SOC 1 and SOC 2 guides?

Reply—The SOC 1 and SOC 2 guides have been cleared by the AICPA's Auditing Standards Board. AT section 50, *SSAE Hierarchy* (AICPA, *Professional Standards*), classifies attestation guidance included in an AICPA guide as an interpretive publication and indicates that a practitioner should be aware of and consider interpretive publications applicable to his or her examination. If a practitioner does not apply the attestation guidance included in an applicable interpretive publication, the practitioner should be prepared to

explain how he or she complied with the SSAE provisions addressed by such attestation guidance.

[Issue Date: November 2011.]

.04 SOC 3 Engagements

Inquiry—What is a SOC 3 engagement?

Reply—A SOC 3 engagement is similar to a SOC 2 engagement in that the practitioner reports on whether an entity (any entity, not necessarily a service organization) has maintained effective controls over its system with respect to security, availability, processing integrity, confidentiality, or privacy. Like a SOC 2 engagement, a SOC 3 engagement uses the criteria in TSP section 100. Unlike a SOC 2 engagement, a SOC 3 report (1) does not contain a description of the practitioner's tests of controls and results of those tests and (2) is a general-use report rather than a restricted use report. (The term *general use* refers to reports for which use is not restricted to specified parties.)

[Issue Date: November 2011.]

.05 Types of Reports for SOC 2 Engagements

Inquiry—Are there type 1 and type 2 reports for SOC 2 engagements?

Reply—Yes. In a SOC 2 engagement, like a SOC 1 engagement, the practitioner has the option of providing either a *type 1* or a *type 2 report*. In both reports, management of the service organization prepares a description of its system. In a type 1 report, the service auditor expresses an opinion on whether the description is fairly presented (that is, does it describe what actually exists) and whether the controls included in the description are suitably designed. Controls that are suitably designed *are able* to achieve the related control objectives or criteria if they operate effectively. In a type 2 report, the service auditor's report contains the same opinions that are included in a type 1 report, and also includes an opinion on whether the controls were operating effectively. Controls that operate effectively *do* achieve the control objectives or criteria they were intended to achieve. Both SOC 1 and SOC 2 reports are examination reports, which means the practitioner obtains a high level of assurance.

[Issue Date: November 2011.]

.06 Minimum Period of Coverage for SOC 2 Reports

Inquiry—Does the SOC 2 guide require that a type 2 report cover a minimum period?

Reply—The SOC 2 guide does not prescribe a minimum period of coverage for a SOC 2 report, however, paragraph 2.09 of the SOC 2 guide states that one of the relevant factors to consider when determining whether to accept or continue a SOC 2 engagement is the period covered by the report. The guide presents an example of a service organization that wishes to engage a service auditor to perform a type 2 engagement for a period of less than two months. The guide states that in those circumstances, the service auditor should consider whether a report covering that period will be useful to users of the report, particularly if many of the controls related to the applicable trust services criteria are performed on a monthly or quarterly basis. A practitioner would use professional judgment in determining whether the report covers a sufficient period.

[Issue Date: November 2011.]

.07 Placement of Management's Assertion in a SOC 2 Report

Inquiry—In a SOC 2 engagement, does management's assertion need to accompany the service organization's description of its system?

Reply—Paragraph 2.13b of the SOC 2 guide states, in part, that a service auditor ordinarily should accept or continue an engagement to report on controls at a service organization only if management of the service organization acknowledges and accepts responsibility for “providing a written assertion that will be attached to management's description of the service organization's system and provided to users.” The recommendation in the SOC 2 guide is that the assertion be attached to the description rather than included in the description to avoid the impression that the practitioner is reporting on the assertion rather than on the subject matter.

[Issue Date: November 2011.]

.08 Illustrative Assertion for Management of a Service Organization in a SOC 2 Engagement

Inquiry—Where can I find an illustrative management assertion for a SOC 2 engagement?

Reply—Appendix C, “Illustrative Management Assertions and Related Service Auditor's Reports on Controls at a Service Organization Relevant to Security, Availability, Processing Integrity, Confidentiality, and Privacy,” and appendix D, “Illustrative Type 2 Service Organization Controls Report,” of the SOC 2 guide contain illustrative assertions by management of a service organization for type 2 SOC 2 engagements.

[Issue Date: November 2011.]

.09 Illustrative Assertion for Management of a Subservice Organization in a SOC 2 Engagement

Inquiry—The SOC 2 guide contains illustrative management assertions for management of a service organization. Is an illustrative assertion for management of a subservice organization available in the SOC 2 guide?

Reply—No. However, the illustrative assertions in appendix C or appendix D of the SOC 2 guide can be used to construct the subservice organization's assertion. Paragraphs 2.13–.15 of the SOC 2 guide address the requirement for an assertion by management of a subservice organization when the inclusive method is used.

[Issue Date: November 2011.]

.10 Management of a Subservice Organization Refuses to Provide a Written Assertion in a SOC 1 or SOC 2 Engagement

Inquiry—When using the inclusive method, if management of a subservice organization will not provide a written assertion, what should the service auditor do?

Reply—Paragraph .A8 of AT section 801 indicates that the subservice organization's refusal to provide the service auditor with a written assertion precludes the service auditor from using the inclusive method. However, the service auditor may instead use the carve-out method. Paragraph 2.15 of the SOC 2 guide contains similar guidance for SOC 2 engagements.

[Issue Date: November 2011.]

.11 Determining Whether Management of a Service Organization Has a Reasonable Basis for Its Assertion (SOC 1 and SOC 2 Engagements)

Inquiry—Paragraph .09c(ii) of AT section 801 states that one of the requirements for a service auditor to accept or continue a type 1 or type 2 engagement is that management acknowledge and accept responsibility for having a reasonable basis for its assertion. Paragraph .A17 of AT section 801 indicates that the service auditor’s report on controls is not a substitute for the service organization’s own processes to provide a reasonable basis for its assertion. How does the service auditor determine whether management has a reasonable basis for its assertion?

Reply—AT section 801 indirectly describes how the service auditor makes this determination. First, paragraph .14a(vii) of AT section 801 indicates, in part, that the service organization’s description of its system should include the service organization’s monitoring activities. Because a service auditor is required to determine whether the description is fairly stated, in doing so the service auditor would determine whether the section of the description that describes monitoring controls is fairly stated. Second, paragraph .A17 of AT section 801, shown subsequently, defines the term *monitoring of controls* and indicates that management’s monitoring activities may provide evidence of the design and operating effectiveness of controls in support of management’s assertion. Similar guidance for SOC 2 engagements is included in appendix A, “Information for Management of a Subservice Organization,” of the SOC 2 guide, in the section titled “Providing a Written Assertion.”

[Issue Date: November 2011.]

.12 Reasonable Basis for Management of a Subservice Organization’s Assertion (SOC 1 and SOC 2 Engagements)

Inquiry—In an inclusive SOC 1 engagement, is the service auditor required to determine whether management of the subservice organization has a reasonable basis for its assertion?

Reply—Paragraph .09c(ii) of AT section 801 states that one of the requirements for a service auditor to accept or continue a type 1 or type 2 engagement is that management acknowledge and accept responsibility for having a reasonable basis for its assertion. Paragraph .A7 of AT section 801 states that when the inclusive method is used, the requirements of AT section 801 also apply to the services provided by the subservice organization, including the requirement to acknowledge and accept responsibility for the matters in paragraph .09c(i)–(vii) of AT section 801 as they relate to the subservice organization. Paragraph .09c(vii) requires a service organization to provide a written assertion; therefore, a subservice organization would also be required to provide a written assertion and have a reasonable basis for its assertion.

In determining whether a subservice organization has a reasonable basis for its assertion, the service auditor would analogize the requirements and guidance in AT section 801 to the subservice organization. Paragraph .14a(vii) of AT section 801 would require that the subservice organization’s description of its system include the subservice organization’s monitoring activities. Because a service auditor is required to determine whether the subservice organization’s description is fairly stated, in doing so the service auditor would determine whether the section of the description that describes monitoring controls is fairly stated. Paragraph .A17 of AT section 801 defines the term *monitoring of controls* and indicates that management’s monitoring activities may provide evidence of the design and operating effectiveness of controls in support of management’s assertion. Similar guidance on this topic for a SOC 2 engagement is included in paragraphs 2.13b–c and 2.15 of the SOC 2 guide.

[Issue Date: November 2011.]

.13 Point in a SOC 1 or SOC 2 Engagement When Management Should Provide Its Written Assertion

Inquiry—At what point in a SOC 1 or SOC 2 engagement should management provide the service auditor with its written assertion?

Reply—Management may provide its written assertion to the service auditor at any time after the end of the period covered by the service auditor's type 2 report and, for a type 1 report, at any time after the as of date of the type 1 report. The date of the service auditor's report should be no earlier than the date on which management provides its written assertion.

[Issue Date: November 2011.]

.14 Implementing Controls Included in Management's Description of the Service Organization's System (SOC 1 and SOC 2 Engagements)

Inquiry—In a type 1 report for a SOC 1 or SOC 2 engagement, do the controls included in management's description of the service organization's system need to be implemented?

Reply—Yes. In order for the description of the service organization's system to be fairly presented, the controls included in the description would have to be placed in operation (implemented). See paragraph 4.01*b* of the SOC 1 guide and paragraph 3.13 of the SOC 2 guide.

[Issue Date: November 2011.]

.15 Responsibility for Determining Whether a SOC 1, SOC 2, or SOC 3 Engagement Should Be Performed

Inquiry—Who determines whether a SOC 1, SOC 2, or SOC 3 engagement should be performed—the service auditor or management of the service organization?

Reply—SOC 1 engagements address a service organization's controls relevant to user entities' ICFR, whereas SOC 2 and SOC 3 engagements address a service organization's controls relevant to the security, availability, or processing integrity of a system or the confidentiality or privacy of the information the system processes. In SOC 2 and SOC 3 engagements, the service auditor uses the criteria in TSP section 100 for evaluating and reporting on controls relevant to the security, availability, or processing integrity of a system, or the confidentiality or privacy of the information processed by the system. In TSP section 100, these five attributes of a system are known as *principles*. A service auditor may be engaged to report on a description of a service organization's system and the suitability of the design and operating effectiveness of controls relevant to one or more of the trust services principles. The criteria in TSP section 100 that are applicable to the principle(s) being reported on are known as the *applicable trust services criteria*.

If management of the service organization is not knowledgeable about the differences among these three engagements, the service auditor may assist management in obtaining that understanding and selecting the appropriate engagement. Determining which engagement is appropriate depends on the subject matter addressed by the controls and the risk management and governance needs of the user entities, and it often involves discussion with the user entities regarding their needs.

[Issue Date: November 2011.]

.16 Criteria for SOC 2 and SOC 3 Engagements

Inquiry—Are there a prescribed set of control objectives for SOC 2 and SOC 3 engagements?

Reply—In SOC 1 engagements, the service auditor determines whether controls achieve specified control objectives. In SOC 2 and SOC 3 engagements, the service auditor determines whether controls meet the applicable trust services criteria. Although the terminology is different in these engagements (control objectives versus criteria), the control objectives in a SOC 1 engagement serve as criteria for evaluating the design and, in a type 2 report, the operating effectiveness of controls. Unlike SOC 1 engagements, in which management of the service organization determines the service organization's control objectives based on the nature of the service provided and how the service is performed, in all SOC 2 and SOC 3 engagements, the service organization's controls must meet all of the criteria in TSP section 100 that are applicable to the principle(s) being reported on. The applicable trust services criteria serve as a prescribed set of criteria.

[Issue Date: November 2011.]

.17 Using Existing Set of Controls for a New SOC 2 or SOC 3 Engagement

Inquiry—In the past, many IT service organizations provided their user entities with reports issued under Statement on Auditing Standards (SAS) No. 70, *Service Organizations*, as amended (now superseded), covering their IT services. If a service organization plans to undergo a SOC 2 or SOC 3 examination for the first time and has a fully defined set of controls and control objectives related to its IT services, does the service organization need to adopt a new set of controls to meet the applicable trust services criteria?

Reply—The SOC 2 guide and appendix C of TSP section 100 require the service organization to establish controls that meet all of the applicable trust services criteria. A service organization that is planning to undergo a SOC 2 or SOC 3 engagement for the first time may have controls in place that address all of the applicable trust services criteria. However, the service organization will need to determine whether its existing control objectives align with the applicable trust services criteria and whether its controls address all of the applicable trust services criteria. If not, it will need to implement or revise certain controls to meet all of the applicable trust services criteria.

[Issue Date: November 2011; Revised, December 2012, to reflect conforming changes necessary due to the issuance of SAS Nos. 122–126.]

.18 Reporting on Compliance With Other Standards or Requirements in SOC 2 or SOC 3 Engagements

Inquiry—May a SOC 2 or SOC 3 report cover compliance with other standards or authoritative requirements that are substantially similar to the applicable trust services criteria, for example, requirements in Special Publication 800-53, *Recommended Security Controls for Federal Information Systems*, issued by the National Institute of Standards and Technology or in Payment Card Industry (PCI) Security Standards issued by the PCI Security Counsel?

Reply—Yes. A service organization may request that a SOC 2 or SOC 3 report address additional subject matter that is not specifically covered by the applicable trust services criteria. An example of such subject matter is the service organization's compliance with certain criteria established by a regulator, for example, security requirements under the Health Insurance Portability and Accountability Act of 1996 or compliance with performance criteria

established in a service-level agreement. Paragraph 1.39 of the SOC 2 guide states that in order for a service auditor to report on such additional subject matter, the service organization provides the following:

- An appropriate supplemental description of the subject matter
- A description of the criteria used to measure and present the subject matter
- If the criteria are related to controls, a description of the controls intended to meet the control-related criteria
- An assertion by management regarding the additional subject matter

Paragraph 1.40 of the guide states

The service auditor should perform appropriate procedures related to the additional subject matter, in accordance with AT section 101 and the relevant guidance in this guide. The service auditor's description of the scope of the work and related opinion on the subject matter should be presented in separate paragraphs of the service auditor's report. In addition, based on the agreement with the service organization, the service auditor may include additional tests performed and detailed results of those tests in a separate attachment to the report.

[Issue Date: November 2011.]

.19 Issuing Separate Reports When Performing Both a SOC 1 and SOC 2 Engagement for a Service Organization

Inquiry—Does a service organization that wishes to have a practitioner report on controls relevant to user entities' ICFR along with controls that are not relevant to user entities' ICFR need to request two separate reports—SOC 1 and SOC 2?

Reply—Yes. Service organizations need to request two separate SOC reports if the service organization would like to address controls relevant to user entities' ICFR and controls that are not relevant to user entities' ICFR. See paragraph 1.24 of the SOC 2 guide.

[Issue Date: November 2011.]

.20 Deviations in the Subject Matter (SOC 1 and SOC 2 Engagements)

Inquiry—In a SOC 1 or SOC 2 engagement, if the service auditor identifies deviations in the subject matter (that is, the fairness of the presentation of the description, the suitability of the design of the controls, and the operating effectiveness of the controls) and qualifies the report because of these deviations, does management need to revise its assertion to reflect these deviations?

Reply—If management of the service organization agrees with the service auditor's findings regarding the deviations, management would be expected to revise its assertion to reflect the deviations identified in the service auditor's report. If management does not revise its assertion, the service auditor should add an explanatory paragraph to the report indicating that the deficiencies identified in the service auditor's report have not been identified in management's assertion. Similar guidance for a SOC 2 engagement is included in paragraph 3.105 of the SOC 2 guide.

[Issue Date: November 2011.]

.21 Use of a Seal on a Service Organization's Website

Inquiry—Is there a SOC seal that can be displayed on a service organization's website indicating that the service organization has undergone a SOC 1, SOC 2, or SOC 3 engagement?

Reply—A seal is available only for SOC 3 engagements. A SOC 3 SysTrust for Service Organization Seal (seal) may be issued and displayed on a service organization's website. All practitioners who wish to provide this registered seal must obtain a license to provide the seal from by the Canadian Institute of Chartered Accountants (CICA). Typically the seal is linked to the report issued by the practitioner. For more information on licensure, go to www.webtrust.org. It is important to note that a practitioner can perform a SOC 3 engagement and issue a SOC 3 report without issuing a SOC 3 seal. In such cases the practitioner does not need to be licensed by the CICA. The license is only for the issuance of a seal.

In addition, SOC logos are available for use by (a) CPAs for marketing and promoting SOC services and (b) service organizations that have undergone a SOC 1, SOC 2, or SOC 3 engagement within the prior 12 months. These logos are designed to make the public aware of these SOC services and do not offer or represent assurance that an organization obtained an unqualified (or clean) opinion. For additional information about logos, go to www.aicpa.org/interestareas/frc/assuranceadvisoryservices/pages/soclogosinfo.aspx.

.22 Attestation Standards and Interpretive Guidance for Reporting on a Service Organization's Controls Relevant to User Entities and for Reporting on an Entity's Internal Control

Inquiry—AICPA professional literature includes a variety of attestation standards and interpretive guidance for reporting on a service organization's controls relevant to user entities and for reporting on an entity's internal control. How does a practitioner determine the applicable attestation standard and interpretive guidance for these engagements?

Reply—The following table identifies a variety of attestation engagements that involve reporting on a service organization's controls relevant to user entities, or reporting on an entity's internal control. The table also identifies the appropriate attestation standard or interpretive guidance to be used in the circumstances.

<i>Engagement</i>	<i>Professional Standard or Other Guidance</i>	<i>Restrictions on the Use of the Report</i>
<p><i>Reporting on Controls at a Service Organization Relevant to User Entities' Internal Control Over Financial Reporting: Controls were not designed by the service organization; management of the service organization will not provide an assertion regarding the suitability of the design of the controls, and the practitioner is reporting on</i></p> <ul style="list-style-type: none"> <li data-bbox="176 743 452 857">• the fairness of the presentation of management's description of the service organization's system and <li data-bbox="176 1216 452 1503">• the operating effectiveness of the service organization's controls relevant to user entities internal control over financial reporting. Such a report may include a description of tests of the operating effectiveness of the controls and the results of the tests. 	<p>Report on the fairness of the presentation of the description under AT section 101, <i>Attest Engagements</i> (AICPA, <i>Professional Standards</i>), using the description criteria in paragraph .14 of AT section 801, <i>Reporting on Controls at a Service Organization</i> (AICPA, <i>Professional Standards</i>), and adapting the relevant requirements and guidance therein</p> <p>Report on the operating effectiveness of controls under AT section 101 or AT section 201, <i>Agreed-Upon Procedures Engagements</i> (AICPA, <i>Professional Standards</i>)</p>	<p>Management of the service organization, user entities, and the auditors of the user entities' financial statements</p> <p>The specified parties that agreed upon the sufficiency of the procedures for their purposes</p>

(continued)

<i>Engagement</i>	<i>Professional Standard or Other Guidance</i>	<i>Restrictions on the Use of the Report</i>
<p><i>Reporting on Controls at a Service Organization Relevant to User Entities' Internal Control Over Financial Reporting: Controls were not designed by the service organization; management of the service organization provides an assertion regarding the suitability of design of controls</i></p>	<p>AT section 801</p>	<p>Management of the service organization, user entities, and the auditors of the user entities' financial statements</p>

Select PCAOB Staff Questions and Answers

.01 Staff Questions and Answers — Audits of Financial Statements of Non-Issuers Performed Pursuant to the Standards of the Public Company Accounting Oversight Board, June 30, 2004

Summary

Staff questions and answers set forth the staff's opinions on issues related to the implementation of the standards of the Public Company Accounting Oversight Board ("PCAOB" or "Board"). The staff publishes questions and answers to help auditors implement, and the Board's staff administer, the Board's standards. The statements contained in the staff questions and answers are not rules of the Board, nor have they been approved by the Board.

The following staff questions and answers related to PCAOB Auditing Standard No. 1, *References in Auditors' Reports to the Standards of the Public Company Accounting Oversight Board* ("Auditing Standard No. 1"), were prepared by the Office of the Chief Auditor. Questions should be directed to C. Gregory Scates, Associate Chief Auditor (202/207-9114; scatesg@pcaobus.org), or Thomas Ray, Deputy Chief Auditor (202/207-9112; rayt@pcaobus.org).

* * *

The Sarbanes-Oxley Act of 2002 (the "Act") directs the Public Company Accounting Oversight Board to establish auditing and related attestation, quality control, ethics and independence standards, to be used by registered public accounting firms in the preparation and issuance of audit reports of issuers.¹ The Act and PCAOB Rules require audits of issuers to be conducted in accordance with PCAOB standards. When issuing an audit report on the financial statements of an issuer, PCAOB Auditing Standard No. 1 requires registered public accounting firms to include a reference to "the standards of the Public Company Accounting Oversight Board (United States)." In contexts other than an audit of the financial statements of an issuer, however, auditors, whether registered or not, may be legally required to, or may agree voluntarily to, perform an engagement in accordance with PCAOB standards or some portion of those standards.² Auditors and other interested persons have raised questions about the implications of Auditing Standard No. 1, as well as the Act and other PCAOB rules, for such engagements. The following staff questions and answers seek to answer some of those questions.

¹ Section 2(a) of the Act defines "issuer" as "an issuer (as defined in Section 3 of the Securities Exchange Act of 1934 (15 U.S.C. 78c)), the securities of which are registered under Section 12 of the Act (15 U.S.C. 781), or that is required to file reports under Section 15(d)(15 U.S.C. 780(d)), or that files or has filed a registration statement that has not yet become effective under the Securities Act of 1933 (15 U.S.C. 77a et seq.), and that it has not withdrawn."

² See, e.g., Securities Exchange Act of 1934 Rule 17i-6(d), 17 CFR 240.17i-6(d) (requiring supervised investment bank holding companies to obtain an audit and review "in accordance with the rules promulgated by the Public Company Accounting Oversight Board").

Q1. Must a public accounting firm be registered with the PCAOB to perform an audit of a non-issuer according to PCAOB standards?

A1. No. The Sarbanes-Oxley Act requires only that those public accounting firms that prepare or issue, or participate in the preparation or issuance of, audit reports on the financial statements of issuers be registered.³

Q2. The PCAOB's Auditing Standard No. 1 requires the auditor to include a reference to "the standards of the Public Company Accounting Oversight Board (United States)" in audit reports on the financial statements of issuers. May an auditor refer to "the auditing standards of the Public Company Accounting Oversight Board (United States)" rather than to "the standards of the Public Company Accounting Oversight Board (United States)" in an audit report on an audit of the financial statements of a non-issuer that was performed in accordance with the Board's auditing standards?

A2. Yes. In an audit of the financial statements of a non-issuer, an auditor may wish to be clear that he or she adhered to only the auditing standards of the PCAOB; accordingly, the auditor may include the word "auditing" in the reference to the standards of the PCAOB. Registered public accounting firms, however, are not permitted to limit their reference to the "auditing standards" of the PCAOB in their audit reports on the financial statements of issuers.

Q3. What standards are included in a reference to "the standards of the Public Company Accounting Oversight Board (United States)"?

A3. A reference to "the standards of the Public Company Accounting Oversight Board (United States)" includes the standards of the Board that are applicable in the circumstances of the engagement. For example, in an audit of financial statements that does not involve the use of a specialist, the auditor would not be expected to follow the Board's interim auditing standard, Statement of Auditing Standards No. 73, "Using the Work of a Specialist." Similarly, in an audit of an entity that has immaterial inventory balances, the auditor would not be expected to follow the Board's interim auditing standard, AU Section 331, "Inventories," of Statement on Auditing Standards No. 1, "Codification of Auditing Standards and Procedures." On the other hand, the Board's interim auditing standard, Statement on Auditing Standards No. 99, "Consideration of Fraud in a Financial Statement Audit," would be applicable in all audits of financial statements conducted pursuant to the Board's standards. As another example, quality control standards generally apply to a firm's system of quality control over its accounting and auditing practice and not to individual audit engagements. Thus, a breakdown in the system of quality control does not necessarily mean that a particular audit was not conducted in accordance with the standards of the PCAOB. However, such a breakdown might result in a deficient audit if it caused or contributed to an audit deficiency. In addition, an auditor who states that he or she has performed the audit in accordance with the standards of the PCAOB must be in compliance with the applicable interim independence standards of the Board. These are examples only, and not an exhaustive list of standards that may be applicable to an engagement. While not required by PCAOB rules, auditors of issuers and other entities subject to the SEC's jurisdiction are reminded that they must also comply with applicable

³ The SEC has ordered that broker-dealers that are not issuers need not file with the Commission, and send to their customers, financial statements certified by a registered public accounting firm until January 1, 2005, unless rules are in place regarding Board registration of auditors of such broker-dealers that set an earlier date. See Notice, Broker-Dealer Financial Statement Requirements under Section 17 of the Exchange Act, Rel. No. 34-48281 (August 4, 2003).

Commission requirements, including the Commission's auditor independence requirements.

Q4. By referring to “the auditing standards of the Public Company Accounting Oversight Board (United States)” in an audit report on the financial statements of a non-issuer, does the auditor represent that he or she has adhered to the Board's interim independence standards?

A4. No. Auditors of the financial statements of non-issuers, including nonprofit organizations, government agencies, municipalities and other governments, should look to relevant state and federal laws and regulations relating to auditor independence. Auditors of nonpublic companies should bear in mind, however, that any company that becomes an issuer, as defined in Section 2(a)(7) of the Act, must file with the SEC an audit report prepared and issued by an independent registered public accounting firm, and therefore it may behoove an auditor of a nonpublic company that intends to become an issuer to comply with SEC and PCAOB independence requirements.

Q5. By referring to “the auditing standards of the Public Company Accounting Oversight Board (United States)” or to “the standards of the Public Company Accounting Oversight Board (United States)” in an audit report on the financial statements of a non-issuer, does the auditor represent that he or she has complied with the Commission's auditor independence requirements?

A5. No. A Note to the PCAOB's rule on interim independence standards, PCAOB Rule 3600T, reminds auditors of issuers and other entities subject to the SEC's jurisdiction of their separate obligations under the SEC's rule on auditor independence. The PCAOB's rule on interim independence standards does not, however, incorporate the SEC's auditor independence requirements.

Q6. What are the PCAOB's independence requirements and to whom do they apply?

A6. The PCAOB adopted interim independence standards when it adopted PCAOB Rule 3600T, which is a temporary rule in effect until the Board adopts permanent independence standards. Rule 3600T requires that, when a registered public accounting firm conducts an audit of the financial statements of an issuer, the firm comply with—

- Rule 101 of the AICPA's Code of Professional Conduct, and interpretations and rulings thereunder, as in existence on April 16, 2003; and
- Standards Nos. 1, 2 and 3, and Interpretations 99-1, 00-1, and 002, of the Independence Standards Board.

Registered public accounting firms must also comply with SEC requirements, including its Rule 2-01 of Regulation S-X, relating to auditor independence, when they conduct audits required by the federal securities laws, including audits of financial statements of issuers. The Board did not adopt the SEC's Rule 2-01 because that rule already governs auditor independence from issuers. As a Note to Rule 3600T makes clear, however, in an audit of the financial statements of an issuer, to the extent that a provision of the SEC's rule is more restrictive—or less restrictive—than the Board's interim independence standards, a registered public accounting firm must comply with the more restrictive rule.

Q7. Does a reference to “the auditing standards of the Public Company Accounting Oversight Board (United States)” or to “the standards of the Public Company Accounting Oversight Board (United States)” in an auditor's report

on the financial statements of a non-issuer imply that the non-issuer is subject to, or otherwise complied with, some or all of the provisions of the Act and other securities laws or the Commission's rules and regulations thereunder?

A7. No. An auditor's reference to PCAOB standards in an audit report on the financial statements of a non-issuer does not subject the auditor or the non-issuer to any laws that the auditor or the non-issuer would not otherwise have been required to comply with. Unless the non-issuer is involved in an activity that subjects it to the Act or other securities laws, such as the laws governing broker-dealers, compliance by the auditor or the non-issuer with the Act or other securities laws would be strictly voluntary.

Q8. Does inclusion of a reference to the Board's standards in an auditor's report on the financial statements of a non-issuer cause the audit to become eligible for review as a part of a Board inspection?

A8. No. An audit of the financial statements of a non-issuer does not become subject to PCAOB inspection solely because the auditor performed and reported on the audit in accordance with the standards of the PCAOB. Auditors of the financial statements of non-issuers may, nevertheless, be subject to various forms of state and federal oversight, such as review by federal banking regulators, the U.S. General Accounting Office, or a state board of accountancy.

Q9. If a non-issuer elects to have its financial statements audited pursuant to the Board's standards, must it also have its internal control over financial reporting audited pursuant to the Board's Auditing Standard No. 2, "An Audit of Internal Control Over Financial Reporting Conducted in Conjunction with an Audit of Financial Statement"?

A9. No. Only certain issuers that are subject to Section 404 of the Act are required to include within the scope of the audit an audit of internal control over financial reporting. Although the Board's standards provide for an integrated audit of financial statements and internal control for those issuers that are subject to Section 404 of the Act, the Board's standards also permit auditors to conduct a financial statement-only audit under circumstances, for example, when Section 404 of the Act is not applicable.

Q10. If an auditor refers to either "the standards of the Public Company Accounting Oversight Board (United States)" or "the auditing standards of the Public Company Accounting Oversight Board (United States)" in an audit report on an audit of the financial statements of a non-issuer, is the auditor also required to subject the audit to a "concurring partner review" as required by the Board's adoption of certain of the requirements of the AICPA's former Securities and Exchange Commission Practice Section ("SECPS")?

A10. No. The Board may at some time adopt a standard requiring the performance of a second partner review. At this time, however, the PCAOB interim quality control standards only require registered firms that were members of the SECPS as of April 16, 2003, to have a concurring partner review on audits of issuers. (See PCAOB Release No. 2003-006.)

.02 Staff Questions and Answers — Attest Engagements Regarding XBRL Financial Information Furnished Under the XBRL Voluntary Financial Reporting Program on the Edgar System, May 25, 2005**Summary**

Staff questions and answers set forth the staff's opinions on issues related to the implementation of the standards of the Public Company Accounting Oversight Board ("PCAOB" or "Board"). The staff publishes questions and answers to help auditors implement, and the Board's staff administer, the Board's standards. The statements contained in the staff questions and answers are not rules of the Board, nor have they been approved by the Board.

The following staff questions and answers related to attest engagements regarding XBRL financial information furnished under the XBRL Voluntary Financial Reporting Program on the EDGAR System were prepared by the Office of the Chief Auditor. Additional questions should be directed to Keith Wilson, Associate Chief Auditor (202/207-9134; wilsonk@pcaobus.org).

* * *

Q1. What is XBRL?

A1. XBRL (eXtensible Business Reporting Language) is an open standard for electronic communication of business and financial data. The XBRL standard provides a format for tagging that data so users can extract, exchange, analyze, and present the information.

XBRL information is commonly distributed in the form of XBRL instance documents. These documents are electronic files consisting of financial data along with their corresponding XBRL tags.

To facilitate electronic communication of financial information among many parties, XBRL instance documents must be created using a common set of standards that all parties can understand and use. In XBRL, this is accomplished through taxonomies and specifications. An XBRL taxonomy (or tag list) provides a data structure and vocabulary for interpreting financial information, such as all of the items comprising "net income." An entity may extend the taxonomy by creating additional custom tags for its own use. XBRL specifications have been developed by the XBRL Consortium for creating and extending taxonomies. (See the XBRL website, www.xbrl.org, for more information about XBRL.)

Q2. What is the XBRL Voluntary Financial Reporting Program on the EDGAR System?

A2. The Securities and Exchange Commission ("SEC") has adopted rule amendments¹ allowing issuers to voluntarily submit supplemental tagged financial information using the XBRL² format as exhibits to specified EDGAR filings under the Securities Exchange Act of 1934 and the Investment Company Act of 1940. The amendments include certain requirements regarding the information in those exhibits. This SEC initiative is referred to in the SEC Release as the "XBRL Voluntary Financial Reporting Program on the EDGAR System" (hereinafter referred to as the "SEC Voluntary Program").

¹ *Final Rule: XBRL Voluntary Financial Reporting Program on the EDGAR System*, Securities and Exchange Commission Release Nos. 33-8529, 34-51129, 3527944, 39-2432, IC-26747; File Number S7-35-04 (February 3, 2005) [70 FR 6556].

² The SEC's website, www.sec.gov, has more information about the SEC's XBRL initiative.

The XBRL documents furnished under the SEC Voluntary Program are referred to in the SEC Regulations³ as “XBRL-Related Documents.” The XBRL-Related Documents must contain only certain specified content (“mandatory content” and “optional content”) that appears in a specified format (“voluntary program format”), as set forth in the SEC Regulations.

According to the EDGAR Filer Manual,⁴ issuers who file under the SEC Voluntary Program must create their XBRL-Related Documents using one of the US Generally Accepted Accounting Principles (“US GAAP”) taxonomies, based on XBRL Specification Version 2.1. Issuers also may use one of the Stand Alone Add-on taxonomies provided in the US Financial Reporting Taxonomy Framework for certain content. Any company extensions of those taxonomies must conform to XBRL Specification Version 2.1.

Q3. May an auditor⁵ examine and report on whether the XBRL-Related Documents accurately reflect the information in the corresponding part of the official EDGAR filings? If so, what are the primary engagement standards that apply to those engagements?

A3. Yes, an auditor may be engaged to examine and report on whether the XBRL-Related Documents accurately reflect the information in the corresponding part of the official EDGAR filings. That engagement is an examination under AT section 101 of the PCAOB’s interim attestation standards, *Attest Engagements* (“AT section 101”), as amended.

Q4. The second general attestation standard in paragraph .21 of AT section 101 indicates that the engagement shall be performed by an auditor “having adequate knowledge of the subject matter.” How does this general standard apply to examination engagements regarding XBRL-Related Documents?

A4. In examination engagements regarding XBRL-Related Documents, the auditor must have sufficient knowledge of the applicable SEC Regulations, EDGAR Filer Manual requirements, and XBRL taxonomies and specifications to perform the examination. The auditor must also have sufficient knowledge of the company’s financial statements and underlying financial records to understand how the financial data in the XBRL-Related Documents relates to the corresponding information in the official EDGAR filing.

Q5. The third general attestation standard in paragraph .23 of AT section 101 states that the auditor “shall perform the engagement only if he or she has reason to believe that the subject matter is capable of evaluation against criteria that are suitable and available to users.” How does this general standard apply to examination engagements regarding XBRL-Related Documents?

A5. Paragraphs .24 through .34 of AT section 101 discuss the attributes of suitable and available criteria. The US GAAP Version 2.1 based taxonomies,

³ §232.401 of Regulation S-T, 17 C.F.R. 232.401; and SEC Final Rule Release No. 33-8529 (February 3, 2005).

⁴ EDGARLink Filer Manual, Appendix L. (The EDGARLink Filer Manual comprises Volume 1 of the EDGAR Filer Manual.)

⁵ These PCAOB Staff Questions and Answers assume that the auditor who is engaged to perform this examination has also audited, in accordance with PCAOB standards, the financial statements for at least the latest period to which the XBRL financial information relates and the financial statements for the other periods covered by the XBRL financial information have been audited by the auditor or a predecessor auditor. Therefore, the word “auditor” is used instead of “practitioner.”

Stand Alone Add-on taxonomies, and XBRL Specification Version 2.1 would be considered suitable and available criteria because (a) they were developed by a panel of widely recognized experts that follow due process procedures, including exposure for public comment, and (b) they are available free of charge through the XBRL Consortium.

Company extensions of those taxonomies normally do not go through the same development processes as described in the preceding paragraph. Accordingly, the auditor should evaluate whether company extensions represent suitable and available criteria as described in AT section 101.

Q6. May the auditor assist a company with the creation or tagging of its XBRL-Related Documents and still perform an examination regarding those documents?

A6. The fourth general attestation standard requires the auditor to be independent in order to perform an attest engagement. When evaluating independence, the auditor should apply the independence principles for financial statement audits to the context of the examination engagement. For example, although the auditor may provide technical advice on matters related to the application of the XBRL taxonomy and specifications, the auditor's independence would be impaired (and thus the auditor would be unable to examine a company's XBRL-Related Documents) if he or she prepared those documents or made decisions about the documents for management.

Q7. What are the objectives of the examination procedures regarding the XBRL-Related Documents, and what procedures should be performed to achieve those objectives?

A7. In performing the examination as set forth in AT section 101, the auditor should apply procedures as necessary to obtain sufficient evidence to provide a reasonable basis for an opinion on whether the XBRL-Related Documents accurately reflect the information in the corresponding part of the official EDGAR filings. Thus, the objectives of the examination procedures are to determine whether—

- a. the XBRL data agrees with the official EDGAR filings, and
- b. the XBRL-Related Documents are in conformity with the applicable XBRL taxonomies and specifications, as well as with the SEC requirements for format and content.

The following are examination procedures that the auditor should consider to achieve the engagement objectives:

- Compare the rendered⁶ XBRL-Related Documents to the information in the official EDGAR filing, and agree the corresponding content.
- Determine whether the content in the XBRL-Related Documents conforms to the SEC voluntary program content requirements.
- Determine whether the XBRL-Related Documents (and the related taxonomy documents, as necessary) conform to the SEC voluntary program format requirements. To accomplish this, the auditor should consider the following procedures:
 - a. Test whether the data elements (i.e., text and line item names and associated values, dates and other labels) in the XBRL-Related

⁶ A rendered XBRL-Related Document has been converted from machine readable form into human readable form using a software tool.

Documents reflect the same information as the corresponding official EDGAR filing (i.e., the HTML or ASCII version).

- b. Verify that the data elements in the corresponding official EDGAR filing have not been changed, deleted, or summarized in the XBRL-Related Documents.
 - c. Evaluate whether the XBRL-Related Documents comply with the appropriate XBRL specification and EDGAR-supported XBRL taxonomies.
 - d. Evaluate whether any company extensions of the taxonomy are consistent with the SEC voluntary program format requirements, including conformity with XBRL specifications.
 - e. Test whether data elements in the XBRL-Related Documents are matched with appropriate tags in accordance with the applicable taxonomy.
- Read the EDGAR filing to determine whether it contains the disclosures regarding XBRL-Related Documents required by SEC Regulations.⁷
 - Obtain a representation letter from management that includes a statement that the XBRL-Related Documents comply with SEC requirements.

Q8. What are the reporting requirements for examination engagements regarding XBRL-Related Documents?

A8. The report for this engagement should comply with the requirements of AT section 101, as amended.

If the underlying information in the XBRL-Related Documents has been audited, the examination report should refer to the audit report. If the underlying information was reviewed, and the review report was filed with the SEC, the examination report should refer to the review report. If the underlying information was reviewed, but the review report was not filed with the SEC, the examination report need not refer to the review report but should indicate that the underlying information has not been audited and no opinion is expressed on it. The auditor should disclaim an opinion on any underlying information in the XBRL-Related Documents that is not covered by an audit report or review report.

The auditor may be engaged to report on management's assertion or on the subject matter of the assertion. The following are examples of examination reports for these engagements.

⁷ §232.401(d) of Regulation S-T, 17 C.F.R. 232.401(d).

Report on the Subject Matter of the Assertion**Report of Independent Registered Public Accounting Firm
on XBRL-Related Documents**

We have examined the accompanying XBRL-Related Documents of Sample Volunteer Company, presented as Exhibit [number] to the Company's [Identify EDGAR filing, such as Form 10-K], which reflect the data presented in the [Identify corresponding information in the official EDGAR filing] as of [Month and Day], [Year] and [Year] and for each of the years in the [number]-year period ended [date]. Sample Volunteer Company's management is responsible for the XBRL-Related Documents. Our responsibility is to express an opinion based on our examination.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the financial statements of Sample Volunteer Company as of [Month and Day], [Year] and [Year] and for each of the years in the [number]-year period ended [date], and in our report dated [date], we expressed an unqualified opinion on those financial statements.⁸ In addition, we have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the effectiveness of Sample Volunteer Company's internal control over financial reporting as of [Month and Day],

[Year], based on [Identify control criteria], and our report dated [date], expressed [Include nature of opinion].^{9, 10, 11, 12}

Our examination was conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States) and, accordingly, included examining, on a test basis, evidence supporting the XBRL-Related Documents. Our examination also included evaluating the XBRL-Related Documents for conformity with the applicable XBRL taxonomies and specifications and the content and format requirements of the Securities and Exchange Commission. We believe that our examination provides a reasonable basis for our opinion.

⁸ If the auditor's opinion on the related financial statements is other than unqualified, this report should disclose that fact along with the reason for the modified report.

⁹ This sentence is necessary if (a) the XBRL-Related Documents include information about the effectiveness of internal control over financial reporting, and (b) that information was covered by an audit report.

¹⁰ If the financial statements have been reviewed and the review report was filed with the SEC, this paragraph should read: "We have also reviewed, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the financial statements of Sample Volunteer Company as of [date], and for the three months then ended, the objective of which was the expression of limited assurance on such financial statements, and issued our report thereon dated [date], [Describe any modifications of such report]. A review of financial statements is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion."

¹¹ If the financial statements have been reviewed but the review report was not filed with the SEC, this paragraph should read: "We did not audit the financial statements of Sample Volunteer Company (or examine [Identify any other underlying information]), the objective of which would have been the expression of an opinion on them. Accordingly, we do not express an opinion on them."

¹² If the XBRL-Related Documents contain both (a) financial statements that are covered by an audit report or review report filed with the SEC and (b) other information that is not covered by an audit or review report, this paragraph should include a statement such as the following: "We were not engaged to and did not conduct an audit (or review) of [Identify information], the objective of which would have been the expression of an opinion (or limited assurance) on such [Identify information]. Accordingly, we do not express an opinion or any other assurance on [it] [them]."

In our opinion, the XBRL-Related Documents of Sample Volunteer Company referred to above accurately reflect, in all material respects, the data presented in the *[Identify corresponding information in the official EDGAR filing]* in conformity with *[Identify the criteria—for example, the taxonomy, such as “US GAAP—Commercial and Industrial Taxonomy,” and where applicable, the Stand Alone Add-on Taxonomy such as “US Financial Reporting—Management Report Taxonomy,” and the specifications, such as “XBRL Specifications (Version 2.1)”]*.

[City and State or Country]

[Date]

Report on Management's Assertion¹³**Report of Independent Registered Public Accounting Firm
on XBRL-Related Documents**

We have examined management's assertion that *[Identify the assertion—for example, the accompanying XBRL-Related Documents, presented as Exhibit [number] to Sample Volunteer Company's [Identify EDGAR filing, such as Form 10-K] accurately reflect the data presented in the [Identify corresponding information in the official EDGAR filing] as of [Month and Day], [Year] and for each of the years in the [number]-year period ended [date], in conformity with [Identify the criteria—for example, the taxonomy, such as "US GAAP—Commercial and Industrial Taxonomy," and where applicable, the Stand Alone Add-on Taxonomy such as "US Financial Reporting—Management Report Taxonomy," and the specifications, such as "XBRL Specifications (Version 2.1)"]].* Sample Volunteer Company's management is responsible for the assertion. Our responsibility is to express an opinion on the assertion based on our examination.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the financial statements of Sample Volunteer Company as of *[Month and Day]*, *[Year]* and *[Year]* and for each of the years in the *[number]-year* period ended *[date]*, and in our report dated *[date]*, we expressed an unqualified opinion on those financial statements. In addition, we have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the effectiveness of Sample Volunteer Company's internal control over financial reporting as of *[Month and Day]*, *[Year]*, based on *[Identify control criteria]*, and our report dated *[date]*, expressed *[Include nature of opinion]*.

Our examination was conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States) and, accordingly, included examining, on a test basis, evidence supporting the XBRL-Related Documents. Our examination also included evaluating the XBRL-Related Documents for conformity with the applicable XBRL taxonomies and specifications and the content and format requirements of the Securities and Exchange Commission. We believe that our examination provides a reasonable basis for our opinion.

In our opinion, management's assertion referred to above is fairly stated, in all material respects, in conformity with *[Identify the criteria—for example, the taxonomy, such as "US GAAP—Commercial and Industrial Taxonomy," and where applicable, the Stand Alone Add-on Taxonomy such as "US Financial Reporting—Management Report Taxonomy," and the specifications, such as "XBRL Specifications (Version 2.1)"]].*

.03 Staff Questions and Answers — Adjustments to Prior-Period Financial Statements Audited by a Predecessor Auditor, June 9, 2006

Summary

Staff questions and answers set forth the staff's opinions on issues related to the implementation of the standards of the Public Company Accounting Oversight Board ("PCAOB" or "Board"). The staff publishes questions and answers to help auditors implement, and the Board's staff administer, the Board's standards. The statements contained in the staff questions and answers are not rules of the Board, nor have they been approved by the Board.

The following staff questions and answers related to adjustments to prior-period financial statements audited by a predecessor auditor were prepared by the Office of the Chief Auditor. Additional questions should be directed to Greg Scates, Associate Chief Auditor (202/207-9114; scatesg@pcaobus.org) or Sam Guzman, Assistant Chief Auditor (202/207-9117; guzmans@pcaobus.org).

* * *

General

Q1. Circumstances arise that require a company to make adjustments to prior-period financial statements. Such circumstances include, for example, the reporting of discontinued operations, and the retrospective application of a change in accounting principle or the correction of an error in prior-period financial statements pursuant to Financial Accounting Standards Board Statement of Financial Accounting Standards No. 154, *Accounting Changes and Error Corrections* ("FASB Statement 154").¹

If the prior-period financial statements that require adjustments were audited by a predecessor auditor, which auditor, the predecessor or the successor, may audit the adjustments to prior-period financial statements?²

A1. Either the successor auditor or the predecessor auditor may audit the adjustments made to prior-period financial statements so long as the auditor is independent and registered with the PCAOB. Issuers sometimes select the predecessor auditor to audit the adjustments because that auditor has performed the audit of the prior-period financial statements and has knowledge of the transactions that occurred during that period. In addition, the use of the predecessor auditor sometimes can be more cost-effective for performing this work. However, the successor auditor also may audit the adjustments.

Predecessor Auditor Audits the Adjustments to Prior-Period Financial Statements

Q2. If the predecessor auditor audits the adjustments to the prior-period financial statements, how should the predecessor auditor date his or her report on the reissued financial statements?

¹ Pursuant to Financial Accounting Standards Board Statement of Financial Accounting Standards No. 154, *Accounting Changes and Error Corrections* ("FASB Statement 154"), the retrospective application of a change in accounting principle also is appropriate when there are no transition requirements specific to a particular accounting pronouncement.

² The term "adjustments to prior-period financial statements" should be understood for purposes of this set of questions and answers to include, among other things, the reporting of discontinued operations, as well as, restatements to correct errors and retrospective applications of changes in accounting principles, as described in FASB Statement 154.

A2. The predecessor auditor should dual-date his or her reissued report in connection with the audit of the adjustments made to the prior-period financial statements. Paragraph .73 of AU section (“sec.”) 508, *Reports on Audited Financial Statements*, states that, “A predecessor auditor’s knowledge of the current affairs of his or her former client is obviously limited in the absence of a continuing relationship. Consequently, when reissuing the report on prior-period financial statements, a predecessor auditor should use the date of his or her previous report to avoid any implication that he or she has examined any records, transactions, or events after that date. If the predecessor auditor revises the report or if the financial statements are restated, he or she should dual-date the report.”

Q3. If the predecessor auditor audits the adjustments made to the prior-period financial statements, what is the successor auditor’s responsibility with regard to those adjustments?

A3. If the predecessor auditor audits the adjustments made to the prior-period financial statements, he or she is responsible for the audit conclusions reached with respect to those adjustments. However, because corrections of errors and the retrospective application of a change in accounting often have the effect of changing the periods in which transactions and events are recognized in the financial statements, the successor auditor should obtain an understanding of the adjustments made to the prior-period financial statements and their effects, if any, on the current-period financial statements.³

In addition, the successor auditor should evaluate the consistency of the application of accounting principles from period to period. Paragraph .24 of AU sec. 420, *Consistency of Application of Generally Accepted Accounting Principles*, states:

When the independent auditor has not audited the financial statements of a company for the preceding year, he should adopt procedures that are practicable and reasonable in the circumstances to assure himself that the accounting principles employed are consistent between the current and the preceding year.

Successor Auditor Audits the Adjustments to Prior-Period Financial Statements

Q4. What factors are relevant to a successor auditor’s determination as to whether he or she is able to audit only the adjustments to prior-period financial statements or whether a reaudit of those financial statements is necessary?⁴

A4. To audit only the adjustments to prior-period financial statements that were audited by a predecessor auditor,⁵ a successor auditor must be able to form an opinion that the adjustments are appropriate and have been

³ See the requirement for the auditor to plan and perform his or her work with due professional care in paragraph .02 of AU section (“AU sec.”) 230, *Due Professional Care in the Performance of Work*.

⁴ This staff question and answer assumes that the predecessor auditor reissues his or her report on the prior-period financial statements before the effects of the adjustments.

⁵ This series of staff questions and answers assumes that the predecessor auditor has not ceased operations as the term “ceased operations” has been defined in footnote 2 of AU sec. 9508, *Reports on Audited Financial Statements: Auditing Interpretations of Section 508*. In cases in which the predecessor auditor has ceased operations, the successor auditor should refer to AU sec. 9508.60–.75.

properly applied.⁶ In determining whether he or she is able to form such an opinion without performing a reaudit of the prior-period financial statements, the successor auditor should consider:

- *The extent of the adjustments.* The less extensive and pervasive the adjustments to prior-period financial statements are, the more likely it is that a successor auditor can form an opinion that the adjustments are appropriate and have been properly applied without performing a reaudit of those financial statements. More extensive and pervasive adjustments make it more likely that a reaudit is necessary.
- *The reason for the adjustments.* A successor auditor is ordinarily more likely to be able to form an opinion that adjustments to prior-period financial statements are appropriate and have been properly applied when those adjustments are due to the retrospective application of an accounting principle rather than when the adjustments are necessary to correct an error.⁷ In the latter situation, the auditor should consider the risk that there may be other undetected misstatements in the prior-period financial statements. In particular, if the adjustments correct an intentional misstatement,⁸ it is more likely that a reaudit is necessary.
- *Cooperation of predecessor auditor.* A successor auditor is more likely to be able to form an opinion that adjustments to prior-period financial statements are appropriate and have been properly applied if he or she has the cooperation of the predecessor auditor. For example, a successor auditor may determine that he or she is able to audit adjustments to prior-period financial statements if he or she has access to the audit documentation relating to the prior periods and if the predecessor auditor is responsive to questions relating to those periods.

After a successor auditor has determined that he or she is likely to be able to form an opinion that adjustments to prior-period financial statements are appropriate and have been properly applied, the auditor might obtain evidence indicating, or otherwise might determine, that the prior-period financial statements are materially misstated in other respects. In this circumstance, the successor auditor should reevaluate whether auditing only the adjustments is appropriate or whether a reaudit of the prior-period financial statements is necessary.⁹

Q5. If the successor auditor audits adjustments to the prior-period financial statements audited by a predecessor auditor, how should the successor auditor report on the results of the audit of those adjustments?

A5. AU sec. 508.74 describes how a successor auditor should report when he or she audits adjustments and the predecessor auditor's report is not presented. The successor auditor may use a similar form of reporting if he or she has audited the adjustments made to prior-period financial statements in

⁶ See paragraph .74 of AU sec. 508, *Reports on Audited Financial Statements*.

⁷ FASB Statement 154 defines an error in previously issued financial statements as an error in recognition, measurement, presentation, or disclosure in financial statements resulting from mathematical mistakes, mistakes in the application of GAAP, or oversight or misuse of facts that existed at the time the financial statements were prepared. Errors, also referred to as misstatements, include those that are intentional or unintentional.

⁸ See paragraph .05 of AU sec. 316, *Consideration of Fraud in a Financial Statement Audit*.

⁹ In addition, the successor auditor has responsibilities under paragraphs .21-.22 of AU sec. 315, *Communications Between Predecessor and Successor Auditors*, when the successor auditor becomes aware of information that leads him or her to believe that the prior-period financial statements reported on by the predecessor auditor may require revision.

connection with his or her audit of a subsequent period and if the predecessor auditor also reissues his or her report on the prior-period financial statements. It also is appropriate for the successor auditor to emphasize in the report that he or she was not engaged to audit, review, or apply any procedures to the prior-period financial statements other than with respect to the adjustments.

The following are examples of a paragraph the successor auditor may include in his or her report on the audit of the financial statements of a subsequent period:

Example for retrospective application of a change in accounting

We also have audited the adjustments to the 20X4 financial statements to retrospectively apply the change in accounting [*describe accounting change*], as described in Note X. In our opinion, such adjustments are appropriate and have been properly applied. We were not engaged to audit, review, or apply any procedures to the 20X4 financial statements of the Company other than with respect to the adjustments and, accordingly, we do not express an opinion or any other form of assurance on the 20X4 financial statements taken as a whole.

Example for correction of an error

We also have audited the adjustments described in Note X that were applied to restate the 20X4 financial statements to correct an error. In our opinion, such adjustments are appropriate and have been properly applied. We were not engaged to audit, review, or apply any procedures to the 20X4 financial statements of the Company other than with respect to the adjustments and, accordingly, we do not express an opinion or any other form of assurance on the 20X4 financial statements taken as a whole.

Q6. When a successor auditor audits and reports on adjustments made to prior-period financial statements due to the correction of an error, may the predecessor auditor reissue his or her report on the prior-period financial statements?

A6. Yes. A predecessor auditor may reissue his or her report on prior-period financial statements when a successor auditor has been engaged to audit and report on adjustments made to those prior-period financial statements, provided that the predecessor auditor has determined that the report on those financial statements is still appropriate, other than with respect to the error correction.¹⁰ When determining whether the report is still appropriate, the predecessor auditor may consider factors such as:

- The nature and extent of the adjustments pertaining to the error correction,
- Whether management has withdrawn the prior-period financial statements, and
- Whether the errors were intentional.

Q7. If the predecessor auditor does not reissue his or her report on the prior-period financial statements, may the successor auditor reaudit and report on those financial statements as adjusted?

A7. Yes. A successor auditor or another independent auditor may reaudit and report on prior-period financial statements as adjusted.

¹⁰ See AU sec. 508.71. The predecessor auditor also may decide to withdraw his or her report on those financial statements. See AU sec. 561, *Subsequent Discovery of Facts Existing at the Date of the Auditor's Report*.

Q8. In circumstances in which a successor auditor audits and reports on adjustments made to prior-period financial statements audited by a predecessor auditor, what procedures should the predecessor auditor perform prior to reissuing his or her report on those financial statements prior to adjustment?

A8. AU sec. 508.71 states that, “a predecessor auditor should (a) read the financial statements of the current period, (b) compare the prior-period financial statements that he or she reported on with the financial statements to be presented for comparative purposes, and (c) obtain representation letters from management of the former client and from the successor auditor. The representation letter from management of the former client should state (a) whether any information has come to management’s attention that would cause them to believe that any of the previous representations should be modified, and (b) whether any events have occurred subsequent to the balance-sheet date of the latest prior-period financial statements reported on by the predecessor auditor that would require adjustment to or disclosure in those financial statements [except for the adjustments]. The representation letter from the successor auditor should state whether the successor’s audit revealed any matters that, in the successor’s opinion, might have a material effect on, or require disclosure in, the financial statements reported on by the predecessor auditor [other than the adjustments disclosed to the predecessor auditor].”

Q9. In circumstances in which a successor auditor audits and reports on adjustments made to prior-period financial statements audited by a predecessor auditor, are there any modifications the predecessor auditor should make to his or her reissued report on the prior-period financial statements?

A9. Yes. If the predecessor auditor was not engaged to audit the adjustments to the prior-period financial statements, the predecessor auditor should modify his or her reissued report to indicate that (a) the reissued opinion relates to the prior-period financial statements before the effects of the adjustments, and (b) he or she was not engaged to audit, review, or apply any procedures to the adjustments.

The following are examples of how the predecessor auditor may modify his or her report:¹¹

Example for retrospective application of a change in accounting
Report of Independent Registered Public Accounting Firm

We have audited, before the effects of the adjustments to retrospectively apply the change in accounting described in Note X, the balance sheet of ABC Company as of December 31, 20X4, and the related statements of income, changes in shareholders’ equity, and cash flows for the year then ended (the 20X4 financial statements before the effects of the adjustments discussed in Note X are not presented herein). The 20X4 financial statements are the responsibility of the company’s management. Our responsibility is to express an opinion on these financial statements based on our audit.

[Same second paragraph as the standard report]

In our opinion, the 20X4 financial statements, before the effects of the adjustments to retrospectively apply the change in accounting described in Note X, present fairly, in all material respects, the financial position of ABC Company as of December 31, 20X4, and the results of its operations and its

¹¹ See PCAOB staff question no. 6.

cash flows for the year then ended in conformity with U.S. generally accepted accounting principles.

We were not engaged to audit, review, or apply any procedures to the adjustments to retrospectively apply the change in accounting described in Note X and, accordingly, we do not express an opinion or any other form of assurance about whether such adjustments are appropriate and have been properly applied. Those adjustments were audited by [*name of successor auditor*].

[*Signature*]

[*City and State or Country*]

[*Original Date*]

Example for correction of an error

Report of Independent Registered Public Accounting Firm

We have audited, before the effects of the adjustments for the correction of the error described in Note X, the balance sheet of ABC Company as of December 31, 20X4, and the related statements of income, changes in shareholders' equity, and cash flows for the year then ended (the 20X4 financial statements before the effects of the adjustments discussed in Note X [*have been withdrawn and*] are not presented herein). The 20X4 financial statements are the responsibility of the company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

[*Same second paragraph as the standard report*]

In our opinion, except for the error described in Note X, the 20X4 financial statements present fairly, in all material respects, the financial position of ABC Company as of December 31, 20X4, and the results of its operations and its cash flows for the year then ended in conformity with U.S. generally accepted accounting principles.

We were not engaged to audit, review, or apply any procedures to the adjustments for the correction of the error described in Note X and, accordingly, we do not express an opinion or any other form of assurance about whether such adjustments are appropriate and have been properly applied. Those adjustments were audited by [*name of successor auditor*].

[*Signature*]

[*City and State or Country*]

[*Original Date*]

Q10. When a successor auditor audits and reports on adjustments made to prior-period financial statements audited by a predecessor auditor, how should the predecessor auditor date his or her report on the reissued financial statements?

A10. When the successor auditor has audited and reported on the adjustments made to the prior-period financial statements and the predecessor auditor is reissuing the report on the prior-period financial statements, the predecessor auditor should use the date of the previous report to avoid any implication that he or she has examined any records, transactions, or events after that date.¹²

¹² See AU sec. 508.73.

Successor Auditor Has Not Completed an Audit

Q11. Can a successor auditor audit and report on the adjustments made to the prior-period financial statements if he or she has not yet completed an audit of the current-period financial statements?

A11. No. If the prior-period financial statements have been adjusted, the successor auditor may audit and report on the adjustments made to the prior-period financial statements in connection with the successor auditor's audit of the financial statements of the company for a subsequent period.¹³ Unless the successor auditor has completed an audit of the financial statements of the company, he or she will not have sufficient knowledge of the company and its financial reporting to adequately plan and perform an audit of the adjustments to conclude on whether they are appropriate and have been properly applied. If the successor auditor has not completed an audit of a subsequent period, the successor auditor, or another independent auditor, may be engaged to reaudit the prior-period financial statements and audit the adjustments to those financial statements.

¹³ See AU sec. 508.74.

.04 Staff Questions and Answers — Auditing the Fair Value of Share Options Granted to Employees, October 17, 2006

Summary

Staff questions and answers set forth the staff's opinions on issues related to the implementation of the standards of the Public Company Accounting Oversight Board ("PCAOB" or "Board"). The staff publishes questions and answers to help auditors implement, and the Board's staff administer, the Board's standards. The statements contained in the staff questions and answers are not rules of the Board, nor have they been approved by the Board.

The following staff questions and answers are applicable to audits of financial statements in circumstances in which a company has granted share options to employees that must be accounted for as compensation cost in conformity with Statement of Financial Accounting Standards No. 123 (revised 2004), *Share-Based Payment*, issued by the Financial Accounting Standards Board. These staff questions and answers were prepared by the Office of the Chief Auditor. Additional questions should be directed to Greg Fletcher, Assistant Chief Auditor (202/207-9203; fletchergr@pcaobus.org) or Jennifer Rand, Deputy Chief Auditor (202/207-9206; randj@pcaobus.org).

* * *

General

Q1. What is the purpose of these PCAOB staff questions and answers about auditing the fair value of employee share options?

A1. The purpose of these questions and answers is to help auditors implement the PCAOB's existing auditing standards when auditing the fair value of share options granted to employees. The Financial Accounting Standards Board ("FASB") issued Statement of Financial Accounting Standards No. 123, *Share-Based Payment* (revised 2004) ("FAS 123R"), which established the accounting requirements for companies that grant share options to employees and generally required that companies recognize as compensation cost the grant-date fair value of the award. In addition, the SEC staff issued Staff Accounting Bulletin 107 ("SAB 107") in March 2005, which, among other things, provides the Securities and Exchange Commission ("SEC") staff's views regarding the valuation of share-based payment arrangements for public companies. Based on these developments, the PCAOB staff believes that there is a need for guidance for implementing the existing auditing standards related to a company's accounting for the fair value of employee share options.¹

Q2. Which auditing standards of the PCAOB provide direction on auditing the fair value of employee share options and what are the general steps involved in auditing them?

¹ This series of PCAOB staff questions and answers addresses the principles and procedures related to auditing the grant-date fair value of employee share options, which is a component of compensation cost associated with the issuance of employee share options. It does not address auditing the other components of determining and reporting compensation cost in the financial statements. Other components include making adjustments for actual pre-vesting forfeitures to arrive at the compensation cost related to the share option grant; determining the periods in which compensation cost is recognized in the financial statements; determining related financial statement effects of employee share options to the company, such as income tax effects; and making the appropriate entries in the general ledger.

A2. Because employee share options are complex financial instruments with no available market, companies generally use option-pricing models to estimate the fair value. As such, these valuations are accounting estimates, and AU sec. 342, *Auditing Accounting Estimates*, and AU sec. 328, *Auditing Fair Value Measurements*, most directly apply. In addition, because fraudulent financial reporting often is accomplished through an intentional misstatement of an estimate, AU sec. 316, *Consideration of Fraud in a Financial Statement Audit*, also applies.²

In general, when auditing the fair value of employee share options, the auditor should:

- Obtain an understanding of the process used to develop the estimated fair value of employee share options;
- Assess the risk of misstatement related to the fair value of employee share options; and
- Perform testing on the company's estimated value of employee share options. Testing includes:
 - Evaluating the consistency of the process,
 - Evaluating the reasonableness of (1) the company's model and (2) the assumptions used in the model, such as expected term and expected volatility, and
 - Verifying the accuracy and completeness of the data underlying the fair value measurements.

The auditor also should evaluate whether he or she possesses the necessary skills and knowledge to plan and perform the audit procedures.

Each of these matters is addressed in the following PCAOB staff questions and answers

The Company's Process

Q3. How should the auditor evaluate the company's process for estimating the fair value of employee share option grants?

A3. AU sec. 328.09 requires the auditor to obtain an understanding of the company's process for determining fair value measurements and disclosures and of the relevant controls sufficient to develop an effective audit approach.³ AU sec. 328.23 states that, based on the auditor's assessment of the risk of material misstatement, the auditor should test the entity's fair value measurements and disclosures. AU sec. 328.23 also identifies three ways in which the auditor may test fair value measurements:

- Testing management's significant assumptions, the valuation model, and the underlying data,
- Developing independent fair value estimates for corroborative purposes, or

² The Board adopted as its interim standards generally accepted auditing standards as described in the AICPA Auditing Standards Board's Statement on Auditing Standards No. 95, *Generally Accepted Auditing Standards*, as in existence on April 16, 2003, to the extent not superseded or amended by the Board, on an initial transitional basis.

³ Paragraph .12 of AU sec. 328, *Auditing Fair Value Measurements and Disclosures*, also provides items that auditors should consider when obtaining an understanding of fair value measurements and disclosures.

- Reviewing subsequent events and transactions.⁴

Because of the complexity involved in developing an independent estimate and the limited usefulness of reviewing subsequent events and transactions to evaluate the fair value of employee share options, in many cases, the second and third approaches are not likely to be practical approaches to auditing the fair value of employee share options. In such cases, the auditor should test management's significant assumptions, the valuation model, and the underlying data related to the fair value estimate.

In applying the provisions of AU sec. 328 to the evaluation of the company's process for estimating the fair value of employee share option grants, the auditor should review the procedures used by the company to make the estimates. These procedures include:

- Evaluating how the terms of the share option awards affect the determination of the grant date, selection of model, and the assumptions used,⁵
- Selecting the option-pricing model;⁶ (See also PCAOB staff question Nos. 5 and 6.)
- Developing the assumptions used in the valuation, including implementation of the guidance in FAS 123R and SAB 107,⁷ that could affect the assumptions;⁸ (See also PCAOB staff question Nos. 7–18.)
- Ensuring that the data upon which the fair value measurements are based (including employee exercises and post-vesting cancellations and lapses) are accurate and complete;⁹ (See also PCAOB staff question No. 19.) and
- Generating the estimated fair value of the employee share options, including executing the calculations required in the option-pricing model.¹⁰ (See also PCAOB staff question No. 20.)

The auditor also should evaluate whether the process is complete, including whether the company considers the relevant factors identified in the accounting literature that affect the assumptions and whether the company applies the process consistently from period to period.¹¹

In addition, in auditing the financial statements, the auditor may determine that it is not practical or possible to restrict detection risk to an acceptable level by performing only substantive tests for one or more assertions. In such circumstances, the auditor should obtain evidence about the effectiveness of

⁴ Similarly, in evaluating the reasonableness of an estimate, paragraph .10 of AU sec. 342, *Auditing Accounting Estimates*, requires the auditor to review and test the process used by management to develop an estimate, develop an independent estimate to corroborate the reasonableness of the company's estimate, or review subsequent events or transactions occurring before the completion of fieldwork.

⁵ See Statement of Financial Accounting Standard No. 123, *Share-Based Payment* (revised 2004) ("FAS 123R"), paragraph A2.

⁶ See FAS 123R, paragraphs A13–A15.

⁷ See SEC Staff Accounting Bulletin 107, *Share-Based Payment* (March 29, 2005).

⁸ See FAS 123R, paragraph A16.

⁹ See AU sec. 328.39.

¹⁰ *Ibid.*

¹¹ AU sec. 328.19 states that the auditor should evaluate whether the company's method (in this case, the company's process) for determining fair value measurements is applied consistently and if so, whether the consistency is appropriate considering possible changes in the environment or circumstances affecting the company, or changes in accounting principles.

both the design and operation of controls to reduce the assessed level of control risk.^{12, 13}

Risk Factors

Q4. What factors affect the auditor's assessment of risk at the financial statement and significant account levels for fair value measurements related to employee share options?

A4. Accounts consisting of amounts derived from accounting estimates have a higher inherent risk than do accounts consisting of relatively routine factual data¹⁴ or having readily determinable values. Therefore, compensation cost based on fair value measurements of employee share options, and related disclosures, often will have a high inherent risk. The auditor should be aware of how changes in assumptions and models affect fair value.

The following are examples of circumstances or conditions that indicate increased risk and might indicate a risk of fraud that would require a specific response from the auditor:¹⁵

- When an assumption that a company uses has the effect of reducing the fair value below what it would have been had the company based the assumption on unadjusted historical information.
- Exclusion of an historical period of time from the inputs to the valuation model, especially when the effect of that exclusion is to lower expected term or expected volatility.¹⁶ (See also PCAOB staff question No. 14.)
- Adjustments to historical exercise behavior or historical share price volatility. For example:
 - The expected term estimate for the current grant of share options is five years when the company has averaged seven years in previous grants of share options;
 - The expected term or expected volatility estimate selected as the most likely was the lowest in a range of possible expected terms or expected volatilities; or
 - The expected term and expected volatility estimates are both lower than the historical averages.
- Adjustments to historical exercise behavior or historical share price volatility are not applied consistently to each option grant in circumstances in which they should have been consistently applied.

¹² See AU sec. 319.03.

¹³ In an integrated audit of the financial statements and internal control over financial reporting, the auditor must obtain evidence about the effectiveness of internal controls. This series of PCAOB staff questions and answers does not illustrate how the auditor should test the design and operating effectiveness of controls related to employee share option compensation cost and disclosures in an integrated audit.

¹⁴ See AU sec. 312.27a.

¹⁵ See AU sec. 316.48b.

¹⁶ See also SAB 107, interpretive response to question 2, Section D.1. SAB 107 states that valid exclusions of periods would be rare.

Model Selection

Q5. Observable market prices generally are not available for employee share options because employee share options are not traded. As a result, companies ordinarily will need to use an option-pricing model to estimate the fair value of employee share options. What factors should the auditor use to evaluate the reasonableness of a company's selection of an option-pricing model for calculating the fair value of employee share options?¹⁷

A5. The auditor should evaluate whether the model selected by the company

- Is applied in a manner consistent with FAS 123R's fair value measurement objective;
- Is based on established principles of financial economic theory; and
- Reflects all of the substantive characteristics of the share options granted to employees.¹⁸

The Black-Scholes-Merton formula, a closed-form option-pricing model, was developed for exchange-traded share options. As developed, it assumes that option exercises occur at the end of an option's contractual term, and that the other factors, expected volatility, expected dividends, and risk-free interest rates, are constant over the option's term. Because employees often exercise before the contractual term expires, FAS 123R requires companies to modify the term used as an input to the original formula by estimating an expected term for the employee share options that is less than the contractual term.

A lattice, or binomial, option-pricing model, however, can accommodate dynamic assumptions of expected volatility and dividends over the option's contractual term, and estimates of expected option exercise patterns during the contractual term (for example, the likelihood that an employee will exercise when the share price reaches a certain multiple of the exercise price). Therefore, the design of a lattice model might more fully reflect the substantive characteristics of a particular employee share option.¹⁹

The auditor should be alert to circumstances in which the selection of the Black-Scholes-Merton formula might not be appropriate. For example, the appropriate model for estimating the fair value of an instrument with a market condition (such as an exercise condition that is satisfied when the share price exceeds a specified value for a specified period of days) must take into account the effect of that market condition.²⁰ The Black-Scholes-Merton option-pricing formula would not generally be an appropriate valuation model for a share option in which the exercisability is conditional on a specified increase in the price of the underlying shares because it is not designed to take into account that type of market condition.²¹

Q6. What steps should the auditor take when a company changes the valuation technique or model chosen to value employee share options?

¹⁷ See FAS 123R, paragraph A2. The fair value of equity instrument share options granted to employees is measured on the date of the grant.

¹⁸ See FAS 123R, paragraph A8, AU sec. 328.18, and AU sec. 328.26b. In addition to the Black-Scholes-Merton formula and a lattice option-pricing model, a Monte Carlo simulation technique also satisfies the requirements in paragraph A8 of FAS 123R. See FAS 123R, footnote 48.

¹⁹ See FAS 123R, paragraph A15.

²⁰ See FAS 123R, paragraph A14.

²¹ See the interpretive response to question 2, section C of SAB 107.

A6. The auditor should evaluate whether the new technique or model meets the fair value measurement objective of FAS 123R. The SEC staff has stated that it would not object to a company changing its valuation technique or model, as long as the new technique or model meets the fair value measurement objective.²² SAB 107 states that a company should take into account the reason for the change in technique or model in determining whether it meets the fair value measurement objective.²³ However, the SEC staff also has stated that it would not expect that a company would frequently switch between valuation techniques or models, particularly when there has been no significant variation in the form of share-based payments being²⁴ As noted in SAB 107, changing a technique or model from period to period for the sole purpose of lowering the fair value estimate of a share option would not meet the fair value measurement objective of FAS 123R.²⁵ Finally, frequent changes in the valuation technique or model also might indicate a risk of fraud that would require a response by the auditor. Accordingly, the auditor should evaluate management's reason for the change.

Assumptions Used In Option-Pricing Models

Q7. Paragraph A18 of FAS 123R states that the valuation technique or model used to estimate the fair value of the share option shall take into account, at a minimum—

- Expected term of the option (in a lattice model, expected term is an output of the model);
- Expected volatility of the price of the underlying share for the expected term of the option;
- Exercise price of the option;
- Current price of the underlying share;
- Risk-free interest rate(s) for the expected term of the option; and
- Expected dividends of the underlying share for the expected term of the option.

How should the auditor assess the possible effect of these six items on the fair value measurement?

A7. The expected term and expected volatility assumptions have the highest risk because they involve the greatest amounts of judgment and have a significant effect on the estimated fair value. PCAOB staff question Nos. 8 through 11. provide direction to the auditor regarding expected term. PCAOB staff question Nos. 12 through 17 provide direction to the auditor regarding volatility.

The exercise price of the option and current price of the underlying shares have a significant effect on the fair value measurement and have a high degree of verifiability. The auditor should verify that the company has properly authorized the share option plan and test whether the company has properly authorized the specific terms of the award, correctly determined the grant date, and accurately entered the exercise price and current share price, as of the measurement date, into the valuation model.

²² See the interpretive response to question 3, section C of SAB 107.

²³ Ibid.

²⁴ Ibid.

²⁵ Ibid.

The risk-free interest rate(s) might have an elevated risk because a mathematical computation could be involved. The expected dividends assumption might have an elevated risk because of potential measurer bias. PCAOB staff question No. 18 provides direction to the auditor regarding risk-free interest rate(s) and expected dividends.

Expected Term of the Option

Q8. The expected term assumption is one of the key drivers of fair value in the Black-Scholes-Merton formula.²⁶ Paragraph A23 of FAS 123R states that assumptions used to estimate the fair value of share options granted to employees should be determined in a consistent manner from period to period. How should the auditor evaluate the reasonableness of the expected term assumption?

A8. When a company is using the Black-Scholes-Merton option-pricing formula, the auditor should apply the following procedures to the expected term assumption:²⁷

- Obtain an understanding of the company's process for estimating expected term, including the extent to which the company evaluates relevant factors in the accounting literature;²⁸
- Verify that the expected term generally is at least equal to the vesting period of the share option grant;²⁹
- Verify that the company (1) has taken into account the contractual term of the option and the effects of employees' post-vesting employment termination behavior, in addition to employees' expected exercise behavior, and (2) has not taken into account pre-vesting employee termination behavior;³⁰
- Evaluate whether adjustments that the company has made to the historical exercise behavior are reasonable and supportable,³¹ including adjustments to the historical exercise behavior of groups (See also PCAOB staff question No. 11); and
- Test the data that the company uses for its estimate, such as data on actual exercise behavior (See also PCAOB staff question No. 19).

The auditor also should evaluate whether the person or persons determining the expected term assumption, including the company's specialists, have experience in valuing employee share options³² and assess how that evaluation affects the audit procedures.

²⁶ Expected term usually is an output of lattice models.

²⁷ See PCAOB staff question No. 10 for a discussion about the "simplified method." If a company's share option plan has the characteristics that are sometimes referred to as "plain vanilla," it may use the simplified method for estimating expected term, as found in SAB 107. However, the SEC staff has stated that it does not expect the simplified method to be used for share option grants after December 31, 2007.

²⁸ For example, see FAS 123R, paragraphs A26–A30.

²⁹ See FAS 123R, paragraph 42. Some awards have graded vesting schedules. These may be accounted for as in-substance multiple awards.

³⁰ Paragraphs A27 and A28 of FAS 123R describe factors that may affect expectations about employees' exercise behavior.

³¹ See FAS 123R, footnote 50.

³² See AU sec. 328.12.

Q9. What should the auditor do to test a company's calculation of its historical exercise experience for employee share options, including consideration of the contractual term and post-vesting employee behavior?

A9. Paragraph A21 of FAS 123R states that historical experience generally is the starting point for developing expectations about the future. Because the expected term estimate is the period of time for which the option is expected to be outstanding (that is, generally the period of time from the grant date to the date of expected exercise or other expected settlement), companies may start by calculating a historical weighted average period of time for which previous grants of share options were outstanding.

The auditor should verify that a company's calculations include options that were not exercised during the contractual term. Failure to include such options could significantly understate average time that options were outstanding. For example, if a company calculates historical exercise behavior based only on the 70 percent of the options exercised over a 10 year contractual term, then it will probably significantly understate the average by not considering the 30 percent of options that may have been outstanding for 10 years and never exercised.

The auditor should:

- Evaluate whether the company's calculations are complete; i.e., that the calculations include all vested options, including those that were never exercised;
- Evaluate whether the company's calculations are mathematically correct, including any separate calculations for groups of employees (See also PCAOB staff question No. 11); and
- Test the underlying data upon which the company's calculations are based, for example, the grant date and exercise date (See also PCAOB staff question No. 19).

The auditor also should be aware of situations in which historical information is not sufficiently complete to enable a company to use it as the sole basis for estimating expected term. For example, if a company issues employee share options for the first time in 20X4 with a three-year vesting period and a ten-year contractual term, it cannot use its unadjusted historical experience in estimating the expected term of additional grants in 20X8 because there will have been only one year in which the earlier grants could have been exercised. The earliest it will have a complete history is at the end of the ten-year contractual term.

In situations in which the company calculated the historical exercise behavior based on incomplete historical information, the auditor should evaluate whether the company's rationale for using this calculation in connection with an estimate of expected term is reasonable and supportable.

Q10. FAS 123R states that expectations based on historical experience should be modified to reflect ways in which currently available information indicates that the future is reasonably expected to differ from the past.³³ What procedures should the auditor perform to evaluate the reasonableness of adjustments to historical exercise behavior?

A10. The auditor should evaluate whether the company's rationale for adjustments to historical exercise behavior are reasonable and supportable.³⁴ The auditor also should evaluate whether the company failed to make a

³³ See FAS 123R, paragraph A21.

³⁴ AU sec. 328 provides general guidance about evaluating a company's assumptions.

necessary adjustment. For example, if the historical experience is based on grants with one-year vesting, an adjustment would be appropriate if current grants have four-year vesting. The volatility of the company's stock price also can affect whether vested employees (1) exercise the options, (2) terminate from the company and exercise the options, (3) terminate from the company and let the options lapse, or (4) stay with the company through the contractual term and let the options lapse. Announced plans for acquisitions, divestitures, and initial public offerings of stock also could affect employee exercises and forfeitures.

The auditor should evaluate whether the amount of an adjustment is reasonable by reviewing the support for the adjustment. The auditor also should be alert to the risk of management override in the adjustments.

Range of expected terms. If a company, after analyzing its historical data, developed a range of possible expected terms that are each equally likely, the auditor should verify that the company selected the average of the amounts in the range (the expected value according to paragraph A20 of FAS 123R).

Use of SAB 107 "simplified method." According to SAB 107, the simplified method of estimating expected term is permitted only for "plain vanilla" options.³⁵ If a company uses the simplified method, the auditor should review the evidence that supports the company's view that it is eligible to use the simplified method. Specifically, the auditor should review the grant documentation to ensure that the terms conform to the "plain-vanilla" requirements, review pre-vesting terminations to ensure that the associated share options were cancelled, and test whether exercises by terminated employees occurred within a limited time after termination (typically 30 to 90 days).

Q11. According to FAS 123R, aggregating individual awards into relatively homogenous groups, with respect to exercise and post-vesting employment termination behaviors, and estimating the fair value of the options granted to each group separately, reduces the risk of potential misstatement of the value of the award.³⁶ How should the auditor evaluate the appropriateness of groups of employees used in the estimate of expected term?

A11. If the company segregates the employees into more than one group (such as executives and non-executives), the auditor should perform the following procedures to evaluate the company's employee groups:

- Evaluate whether the company aggregated individual awards into relatively homogeneous groups with respect to exercise and post-vesting employment termination behaviors and the evidence and rationale supporting the determination of the groups is adequate;
- Evaluate the reasonableness and completeness of groups;
- Evaluate the reasonableness and support for adjustments to historical exercise behavior of groups;

³⁵ The interpretative response to question 5, section D.2 of SAB 107, establishes basic characteristics of share option plans that are sometimes referred to as "plain vanilla." The basic characteristics are: (1) share options are granted at-the-money, (2) exercisability is conditional only on performing service through the vesting date, (3) if an employee terminates service prior to vesting, the employee would forfeit the share options, (4) if an employee terminates service after vesting, the employee would have a limited time to exercise the share options (typically 30 to 90 days), and (5) share options are nontransferable and nonhedgeable. In addition, the SEC staff has stated that it does not expect the simplified method to be used for share option grants after December 31, 2007 (See the interpretative response to question 6, section D.2.).

³⁶ See FAS 123R, paragraph A30. In addition, the interpretive response to Question 4 of section D.2. of SAB 107 states that an entity may generally make a reasonable fair value estimate with as few as one or two groupings.

- Test the underlying data upon which the groups are based (See also PCAOB staff question No. 19); and
- Evaluate whether the company's calculations of historical exercise behavior for each group are mathematically correct.

Expected Volatility

Q12. Paragraph A23 of FAS 123R states that assumptions used to estimate the fair value of share options granted to employees should be determined in a consistent manner from period to period. Paragraphs A32 and A34 provide further guidance related to the company's estimate of expected volatility. How should the auditor evaluate the reasonableness of a company's estimate of the expected volatility of its share price?

A12. The auditor should perform the following procedures to evaluate the reasonableness of a company's estimate of expected volatility:³⁷

- Obtain an understanding of the company's process for estimating expected volatility.
- Evaluate whether the company's process considers all of the applicable factors identified in paragraph A32 of FAS 123R in determining its estimate of expected volatility. The auditor also should evaluate whether the process (1) identifies the information necessary to be able to consider the volatility factors and (2) evaluates and weights that information (as required by paragraph A34 of FAS 123R).
- Evaluate the reasonableness of the assumptions, supporting information, judgments, and weightings. Evidence of reasonableness includes whether the company considered all the volatility factors and how such factors might affect the company's estimate of expected volatility. The auditor also should be alert to the risk of management override of the company's process for estimating expected volatility.
- Evaluate the consistency of the company's process for estimating expected volatility from period to period in evaluating the company's compliance with paragraphs A32 and A34 of FAS 123R.³⁸ However, the auditor also should consider that when circumstances indicate the availability of new or different information which would be useful in estimating expected volatility, SAB 107 directs the company to incorporate that information.³⁹
- In general, for historical volatility, verify that the company's process provides for looking back over the expected term (for a closed-form model) or contractual term (for a lattice model)⁴⁰ to consider the extent to which currently available information indicates that future volatility will differ from historical volatility.⁴¹ A change in a company's business model that results in a material alteration to the company's

³⁷ AU secs. 342 and 328 provide general guidance for reviewing a company's process and evaluating its assumptions.

³⁸ The interpretative response to question 1, section D.1. of SAB 107 states that the process used to gather and review available information to estimate expected volatility should be applied consistently from period to period.

³⁹ Ibid.

⁴⁰ See FAS 123R, paragraph A32a.

⁴¹ See FAS 123R, paragraph A34.

risk profile is an example of a circumstance in which the company's future volatility would be expected to differ from its past volatility.⁴²

- Test the underlying data used in the estimate (See also PCAOB staff question No. 19).

The auditor also should evaluate whether the person or persons determining the expected volatility assumption, including the company's specialists, have experience in valuing employee share options,⁴³ and assess how that evaluation affects the audit procedures.

Historical Volatility

Q13. How should the auditor evaluate the reasonableness of a company's estimate of expected volatility when it uses its historical volatility as its expected volatility?

A13. As discussed in the answer to PCAOB staff question No. 12, the auditor should evaluate whether the company's process provides for looking backward to determine whether currently available information indicates that expected volatility will differ from historical volatility. The auditor should evaluate whether there is other information that the company did not consider and such information indicates that expected volatility will differ from the past. The auditor could base this evaluation on publicly available information related to the company's corporate history and future plans, and knowledge of the industry. In addition, an indication of the reasonableness of the company's process will be the extent to which the company analyzes each factor with respect to its own facts and circumstances.

Additionally, the auditor should consider the criteria established by SAB 107 for exclusive reliance on historical volatility. The SEC staff has stated that it would not object to a public company placing exclusive reliance on historical volatility when the following factors are present, and the methodology is consistently applied, if the company's common shares have been publicly traded for a sufficient period of time:⁴⁴

- The company has no reason to believe that its future volatility over the expected or contractual term, as applicable, is likely to differ from its past;
- The computation of historical volatility uses a simple average calculation method;
- A sequential period of historical data at least equal to the expected or contractual term of the share option, as applicable, is used; and
- A reasonably sufficient number of price observations are used, measured at a consistent point throughout the applicable historical period.

The auditor also should verify that the company has properly calculated the historical volatility.

If a company makes adjustments to historical volatility based on peer company data, the auditor should evaluate the reasonableness of the company's decision to use peer company data. In addition, the auditor should evaluate whether the company is using an appropriate peer group, the company is reasonably comparable to the peer group, and management reasonably blended peer group

⁴² See SAB 107, footnote 55.

⁴³ See AU sec. 328.12.

⁴⁴ See SAB 107, section D.1., "Company B" example.

data and its own company data. The auditor also should be alert to the risk of management override in the area of adjustments to historical volatility.

Q14. FAS 123R indicates that a company should consider historical volatility over a period generally commensurate with the expected term or contractual term, as applicable. How should the auditor evaluate whether a company, in determining its expected volatility, has considered the historical volatility of its share price over an appropriate period of time?

A14. The auditor should evaluate whether the company considered the volatility of its share price over the most recent period that is generally commensurate with the expected term (or contractual term if a lattice model is used). For example, if a company estimated that the expected term of the options is four years, then the company generally should start with its historical volatility for the most recent four-year period in determining the expected volatility.

The following are circumstances that indicate increased inherent risk and might also indicate increased risk of fraud.

- The company used a period of historical data that is longer than the expected term,⁴⁵ and the effect is to lower expected volatility and the resulting fair value, or the company did not consistently use the longer period. Using a period of historical data longer than expected or contractual term is acceptable under SAB 107 if the company reasonably believes that the additional historical information will improve the estimate. However, this situation is similar to the condition described in PCAOB staff question No. 4, in which an adjustment to historical exercise behavior or share price volatility that results in a lower expected term or expected volatility increases inherent risk and might indicate a heightened risk of fraud.
- The company used a method that weights the most recent periods of a company's historical volatility more heavily than earlier periods, especially if the result is a lowering of expected volatility.⁴⁶
- The company excludes a period of time from the calculation of historical volatility, especially if doing so results in a decrease of expected volatility, and hence a decrease in fair value.⁴⁷

Q15. How should the auditor evaluate the company's share price observations for the purpose of determining historical volatility?

A15. The auditor should evaluate whether the company used actual observed prices within intervals that were appropriate based on the facts and circumstances and that provide a basis for a reasonable estimate. For example,

⁴⁵ See the interpretative response to question 2, section D.1 of SAB 107. SAB 107 also points out that paragraph A32a of FAS 123R indicates companies should consider historical volatility over a period generally commensurate with expected or contractual term.

⁴⁶ See SAB 107, interpretative response to question 2, section D.1, including footnote 40. SAB 107 states that such weighting may not be appropriate for longer term employee share options and that an estimate of expected volatility that places "extreme emphasis on the most recent periods" may not be consistent with paragraph A32(a) of FAS 123R.

⁴⁷ See SAB 107, interpretative response to question 2, section D.1. SAB 107 states that if a company disregards a period of historical volatility, it should be prepared to support its conclusion that its historical share price during that previous period is not relevant to estimating expected volatility due to one or more discrete and specific historical events and that similar events are not expected to occur during the expected term of the share option. SAB 107 states that these situations would be rare.

if a company's shares are thinly traded, then weekly or monthly price observations may be more appropriate than daily price observations.⁴⁸ The auditor also should verify that the price observations are taken consistently throughout the period and are consistent with the approach used in prior grants. For example, if a company uses weekly price observations, then the auditor should verify that the company made the observation on the same day of each week. In addition, if the company changes when it makes price observations, for example, from daily price observations to monthly, the auditor should evaluate the reasonableness of the company's rationale for the change.

Implied Volatility

Q16. Implied volatility is inferred by calculating volatility using an option-pricing model (typically Black-Scholes-Merton), where the fair value—the market price of a company's appropriate traded financial instruments—and other variables are known (i.e., share price, exercise price, expected term, risk-free rate, and expected dividends). How should the auditor evaluate a company's use of implied volatility in its estimate of expected volatility?

A16. SAB 107 provides items for a company to consider when using implied volatility. Accordingly, in such situations, the auditor should evaluate whether a company with "appropriate traded financial instruments from which they can derive an implied volatility"⁴⁹ has appropriately taken into account implied volatility in determining the estimate of expected volatility.

For companies with exchange-traded options, or other appropriate traded financial instruments,⁵⁰ the auditor should evaluate whether the company's process for estimating expected volatility is appropriate and consistent from period to period.⁵¹ A company that considers implied volatility will probably do so as part of its overall process for estimating expected volatility. Therefore, the auditor also should consider the concepts described in PCAOB staff question Nos. 3 and 12.

Regarding exclusive reliance on implied volatility, the SEC staff has stated that it would not object to a public company placing exclusive reliance on implied volatility when certain factors are present and the methodology is consistently applied, if the company's common shares have been publicly traded for a sufficient period of time and the company has multiple options on its shares outstanding that are traded on an exchange.⁵²

If the company places exclusive reliance on implied volatility based on its assessment that the factors in SAB 107 are present, the auditor should evaluate that assessment. In addition, the auditor should verify that the company has properly calculated the implied volatility.

Combined Volatility

Q17. How should the auditor evaluate the reasonableness of a company's estimate of expected volatility when it uses a combination of historical and implied volatility in that estimate?

⁴⁸ See SAB 107, footnote 42.

⁴⁹ See SAB 107, interpretative response to question 1, section D.1.

⁵⁰ Ibid. Under SAB 107, appropriate traded financial instruments could include actively traded options or financial instruments with embedded options.

⁵¹ See SAB 107, interpretative responses to question 3, section D.1, regarding the use of implied volatility.

⁵² See SAB 107, section D.1., Company B example, and interpretative response to question 4, section D.1.

A17. The auditor should verify that the company's process for estimating expected volatility includes consideration of the applicable factors for using historical or implied volatility, as discussed in FAS 123R and SAB 107. PCAOB staff question Nos. 13 through 16 provide guidance for the auditor to use when evaluating the company's use of historical volatility, including the effects of any adjustments, and implied volatility in its estimate of expected volatility. In considering the reasonableness of the combined expected volatility, the auditor should evaluate the company's consideration of the factors that affect volatility, including the SEC staff's factors for exclusive use of implied or historical volatility, and the company's support for its conclusions. The factors outlined in SAB 107 for a company's exclusive use of either historical volatility or implied volatility also may provide some relative benchmarks for the auditor to use in evaluating the combined volatility.

Risk-Free Interest Rate(s) and Expected Dividends

Q18. FAS 123R requires that the valuation method, such as the Black-Scholes-Merton formula or lattice models, consider the expected dividends of the underlying shares for the expected term and the risk-free interest rate(s) for the expected term. How should the auditor evaluate whether the company has properly considered these two elements?

A18. The risk-free interest rate(s) and the expected dividends assumption generally are less subjective than the expected term and volatility assumptions and also do not have as significant an effect on the estimate of fair value. However, the auditor still should evaluate the reasonableness of those assumptions.

Risk-free interest rate. In general, the risk-free rate is the yield on a zero-coupon U.S. Treasury bond with a remaining term equal to the option term. A higher risk-free interest rate increases the option value and hence the estimated fair value, all other factors being equal.

If the company uses the Black-Scholes-Merton formula, the auditor should verify that the company used a traded zero-coupon U.S. Treasury bond with a remaining term equal to the expected term, measured on the grant date. The auditor also should verify that the company properly calculated the yield based on the traded price. If the company interpolated a yield because the expected term fell within the remaining terms of two bonds, the auditor should evaluate the accuracy of the interpolation.

If a company's lattice model incorporates a term structure of expected volatilities, the company might use a yield curve for the contractual period. If the company's lattice model uses a yield curve, the auditor should verify that the company properly calculated the yield curve and accurately entered the yields into the lattice model.

Expected dividends. The dividend yield over the option term affects the option value because it reduces the stock price on the ex-dividend date. In general, higher expected dividends decrease the value of the option and hence the estimated fair value. The auditor should:

- Evaluate whether the company has the intent and ability to pay the dividends that are embodied in the expected dividend assumption.

Sufficient cash and observable trends provide evidence of the company's intent and ability to pay dividends.⁵³

- If the company has adjusted its current or historic dividend yield, evaluate the reasonableness of and support for the expected dividend yield. The auditor should evaluate whether the expected dividend yield is consistent with management's plans and information available to market participants by reviewing evidence such as press releases on dividend policy changes and historical dividend yield rates. This evaluation should include whether the company failed to make an adjustment to expected dividends.
- Test the underlying data (See also PCAOB staff question No. 19).

Validation of Data and the Option-Pricing Model

Q19. How should the auditor test the underlying data that supports a company's estimate of fair value, and the related entries?

A19. Pursuant to AU sec. 328.39, the auditor should test the data used to develop the fair value measurements and evaluate whether the fair value measurements have been properly determined from such data and management's assumptions. This includes evaluating whether the data on which the fair value measurements are based, including the data used in the work of a specialist, are accurate, complete, and relevant; and whether fair value measurements have been properly determined using such data and management's assumptions. In considering the controls over data pursuant to AU sec. 328.12, the auditor should consider the effectiveness of the design of controls intended to safeguard the integrity and reliability of the data.

A number of systems, which can be automated or manual, often provide data relevant to the estimate of fair value. The auditor should identify the automated or manual systems that might be subject to testing. Record-keeping systems for stock plan information and awards are usually critical because information about forfeitures and exercises supports the company's estimate of expected term. Payroll, human resources, and tax systems also could be critical if they contain information about awards, forfeitures, and exercises that is used in the estimation process.⁵⁴

The auditor also should establish that any data used that resides outside the company are reliable, such as peer group data. AU sec. 329.16 provides guidance for evaluating the reliability of such data.

Q20. How should the auditor evaluate whether the model has appropriately calculated the fair value estimate for share options?

A20. If the company is using the Black-Scholes-Merton formula, the auditor should verify that the company is using the correct formula and recalculate the fair value. If the company is using a lattice option-pricing model, the auditor should obtain evidence that the model is functioning properly.

⁵³ AU sec. 328.17 states that the auditor should evaluate management's intent to carry out specific courses of action where intent is relevant to the use of fair value measurement and that the auditor also should evaluate management's ability to carry out those courses of action.

⁵⁴ See AU sec. 328.12. When obtaining an understanding of the company's process for determining fair value measurements and disclosures, the auditor should consider the extent to which the company relies on a service organization to provide data that supports the measurement. When a company uses a service organization, the auditor should consider the requirements of AU sec. 324, *Service Organizations*.

Role of Specialists

Q21. What is the role of a specialist in auditing estimates of the fair value of employee share option grants?

A21. AU sec. 328 provides guidance on auditing fair value measurements and disclosures, including auditing the fair value of employee share option grants. According to AU 328.12, as part of obtaining an understanding of the process management uses to determine fair value, such as the fair value of employee share option grants, the auditor should consider the extent to which management engages or employs specialists.

When testing fair value measurements and disclosures, the auditor should, among other things, perform procedures to evaluate whether management's assumptions are reasonable and to evaluate the source and reliability of evidence supporting management's assumptions.⁵⁵ According to AU sec. 328.05, footnote 2, management's assumptions include any assumptions developed by a specialist engaged or employed by management. Thus, the auditor should perform procedures in accordance with AU sec. 328 to evaluate the assumptions developed by a specialist engaged or employed by management.

Pursuant to AU sec. 328.20, the auditor should consider whether to engage a specialist and use the work of that specialist as evidential matter in performing substantive tests to evaluate material financial statement assertions related to the fair value of employee share option grants. In making this decision, the auditor⁵⁶ should evaluate whether he or she has the necessary skill and knowledge to plan and perform audit procedures related to the fair value of employee share option grants, including the reasonableness of the assumptions that the company or its specialist used.

The following circumstances related to the company's fair value measurement under FAS 123R often are particularly complex, involve assumptions that have a significant effect on fair value and, thus, might result in a higher assessment of risk by the auditor. Accordingly, the auditor should evaluate whether he or she has the necessary skill and knowledge to plan and perform audit procedures in these areas.

- Use of a lattice model, including obtaining evidence that the model is functioning properly. (See PCAOB staff questions No. 5, 18, and 20.)
- Exclusion of periods of historical data. (See PCAOB staff questions No. 4 and 14.)
- Adjustments to historical exercise behavior or historical share price volatility that result in shorter expected term or lower expected volatility than the company's historical experience. (See PCAOB staff questions No. 4, 10, and 14.)
- Use of a method that weights the most recent periods of a company's historical volatility more heavily than earlier periods, especially if the result is a lowering of expected volatility. (See PCAOB staff question No. 14.)
- Use of combined volatility. (See PCAOB staff question No. 17.)

⁵⁵ See AU secs. 328.26a and 328.31.

⁵⁶ In this context, the term *auditor* includes employees of the auditor's firm who possess relevant special skill or knowledge and who participate in the audit as a member of the audit team.

Q22. What should the auditor do to satisfy the requirement that he or she evaluate the qualifications of a specialist?

A22. Valuation specialists may have certain areas of experience. When evaluating the qualifications of a specialist in accordance with AU sec. 336.08,⁵⁷ the auditor should evaluate whether the specialist has experience in valuing employee share options. In doing this, the auditor should evaluate the experience of the specialist's firm and of the individual specialist, or specialists, performing the service.

⁵⁷ Pursuant to AU sec. 336.08a and b, the auditor should also consider the specialist's certification, license, or other recognition of competence and the specialist's reputation.

.05 Staff Questions and Answers — Ethics and Independence Rules Concerning Independence, Tax Services, and Contingent Fees, April 3, 2007

Summary

Staff questions and answers set forth the staff's opinions on issues related to the implementation of the standards of the Public Company Accounting Oversight Board ("PCAOB" or "Board"). The staff publishes questions and answers to help auditors implement, and the Board's staff administer, the Board's standards. The statements contained in the staff questions and answers are not rules of the Board, nor have they been approved by the Board.

The following staff questions and answers related to ethics and independence rules concerning independence, tax services, and contingent fees were prepared by the Office of the Chief Auditor. Questions should be directed to Bella Rivshin, Associate Chief Auditor (202/207-9180; rivshinb@pcaobus.org) or Greg Scates, Associate Chief Auditor (202/207-9114; scatesg@pcaobus.org).

* * *

Rule 3522. Tax Transactions

Q1. Does Rule 3522(a), Confidential Transactions, apply when conditions of confidentiality are imposed by tax advisors who are not employed by or affiliated with the registered public accounting firm?

A1. Yes. Under Rule 3522(a), a registered public accounting firm is not independent of its audit client if the firm, or any affiliate of the firm, during the audit and professional engagement period, provides any non-audit service to the client related to marketing, planning, or opining in favor of the tax treatment of a confidential transaction. Under Rule 3501(c)(i)(1), a confidential transaction is a transaction that is offered to a taxpayer under conditions of confidentiality and for which the taxpayer has paid an advisor a fee. As stated in the Board's adopting release, PCAOB Release 2004-015 (July 26, 2005), "Rule 3501(c) defines confidential transactions in terms of confidentiality restrictions imposed by tax advisors generally, not specifically auditors." Therefore, Rule 3522(a) applies not only when conditions of confidentiality have been imposed by a tax advisor that is employed by or affiliated with the registered public accounting firm, but also when conditions of confidentiality have been imposed by any tax advisor, including one that has no relationship with the registered public accounting firm.

Q2. For purposes of Rule 3522(a), Confidential Transactions, can a registered public accounting firm, when marketing, planning, or opining in favor of the tax treatment of a transaction, rely on representations from its audit client that another tax advisor did not impose conditions of confidentiality in connection with the specific tax transaction?

A2. Yes. In determining if any tax advisor imposed conditions of confidentiality in connection with a specific tax transaction, the registered public accounting firm may rely on representations from its audit client, provided that the firm does not know, or have reason to know, that those representations are incorrect or incomplete.

Q3. In planning a tax transaction, may a registered public accounting firm advise an audit client on the tax consequences of alternative ways of structuring the transaction?

A3. Yes, as long as the auditor does not recommend an alternative tax transaction structure: (1) that is not more likely than not to be allowable under applicable tax laws, and (2) a significant purpose of which is tax avoidance. Rule 3522(b) provides that a registered public accounting firm is not independent of the audit client if the firm, or any affiliate of the firm, provides an audit client any non-audit service related to marketing, planning, or opining in favor of the tax treatment of a transaction that was initially recommended by the firm and a significant purpose of which is tax avoidance, unless the proposed tax treatment is at least more likely than not to be allowable under applicable tax laws. In planning a tax transaction for an audit client that is permitted under Rule 3522(b), the firm may need or want to inform the client about the tax consequences of alternative tax transaction structures, some of which may not be more likely than not to be allowable and have a significant purpose of tax avoidance. As long as the firm does not recommend that the audit client engage in such a transaction, the firm will not violate Rule 3522(b).

Q4. How is a registered public accounting firm's independence affected by the Internal Revenue Service's ("IRS") subsequent listing of a transaction that the firm marketed, planned, or opined in favor of, as described in Rule 3522(b), Aggressive Tax Position Transactions?

A4. The listing by the IRS of a transaction after the firm marketed, planned, or opined in favor of the tax treatment of the transaction would not retroactively affect the firm's independence. Whether the firm was independent when it planned, marketed, or opined in favor of the transaction would instead depend on the facts available at that time. An analysis under Rule 3522 would consider, among other things, whether the tax treatment of the transaction was, at the relevant time, at least more likely than not to be allowable under applicable tax laws, including whether the transaction was itself listed or substantially similar to a listed transaction.

After a transaction marketed, planned or opined on by the firm becomes listed, however, the firm's independence may, depending on the circumstances, become impaired. For example, even if a firm was independent at the time the tax transaction was executed, because it reasonably and correctly concluded the transaction was not the same as, or substantially similar to, a listed transaction, once a transaction is actually listed (or a substantially similar transaction becomes listed), the firm that participated in the transaction may find its independence impaired. In this situation, a mutuality of interest could be created by the fact that once a transaction is listed, the firm or client, or both, may be required to defend the tax treatment of the transaction and, in some cases, pay penalties. When a tax transaction in which the firm participated is subsequently listed (or is substantially similar to a transaction that is subsequently listed) by the IRS, the firm should evaluate the potential effect on its independence and discuss it, as appropriate, with the audit client's audit committee.

Rule 3523. Tax Services for Persons in Financial Reporting Oversight Roles

Q5. Rule 3523 restricts the provision of tax services to a person in a Financial Reporting Oversight Role (“FROR”) at an audit client or an immediate family member of such person. FROR is defined under both SEC and PCAOB rules as a role in which a person is in a position to or does exercise influence over the contents of the financial statements or anyone who prepares them. For purposes of Rule 3522, must the auditor evaluate whether persons are in a FROR at any entities other than the one being audited?

A5. Yes. Auditors must evaluate whether a person is in a FROR at an “audit client.” Because Rule 3501(a)(iv) defines “audit client” to include “any affiliates of the audit client,” a person in a financial reporting oversight role at an affiliate of the audit client (and that person’s immediate family members) are covered by Rule 3523, subject to two important exceptions. First, a firm’s independence is not impaired under Rule 3523 if it provides tax services to a person who is in a financial reporting oversight role at the audit client (or an immediate family member of such a person) only because of the person’s relationship to an affiliate whose financial statements are not material to the consolidated financial statements of the entity being audited. See Rule 3523(b)(1). Second, a firm’s independence is not impaired under the rule if it provides tax services to a person who is in a financial reporting oversight role at the audit client (or an immediate family member of such a person) only because of the person’s relationship to an affiliate whose financial statements are audited by an auditor other than the firm. See Rule 3523(b)(2).

Q6. What types of situations does the term “other change in employment event” in Rule 3523(c) encompass?

A6. Rule 3523(c) provides a time-limited exception to Rule 3523’s restrictions on the provision of tax services to persons in financial reporting oversight roles at an audit client and certain of its affiliates. The exception applies when, among other things, a person becomes subject to the rule through a hiring, promotion, or “other change in employment event.” Whether there has been an “other change in employment event” depends on the changed status of a person at an audit client. A change experienced by a company, such as a change in auditor or a change from a private company to a public one, is not, by itself, an “other change in employment event.”

Some changes experienced by a company could, however, result in an “other change of employment event” for a particular person. For example, a person who is not in a financial reporting oversight role might, as a result of a business combination, be assigned additional duties and responsibilities that put him or her into a financial reporting oversight role. A business combination could also result in a change in a person’s employer – for example, from an acquired company to a surviving company. A change in employer is also an “other change in employment event” under Rule 3523(c). For example, if Company A acquires Company B, a person who was in a financial reporting oversight role at Company B would experience an “other change in employment event” if he or she became an employee of Company A in a financial reporting oversight role as a result of the acquisition. If such a person had been receiving tax services from Company A’s registered public accounting firm pursuant to an engagement in process before the acquisition, the time-limited exception in Rule 3523(c) would apply.

.06 Staff Questions and Answers — Registration of Broker-Dealer Auditors, February 19, 2009**Summary**

The questions and answers below set forth staff guidance to assist auditors of non-public broker-dealers considering registration with the Public Company Accounting Oversight Board (“PCAOB” or “Board”). This guidance does not constitute Board rules, nor has it been approved by the Board.

The staff questions and answers below were prepared by the Division of Registration and Inspections to supplement PCAOB Release No. 2003-011B, *Frequently Asked Questions Regarding Registration with the Board*. Questions should be directed to the PCAOB’s registration staff, by emailing registration-help@pcaobus.org or by calling 202-207-9329. The Securities and Exchange Commission (“SEC”) staff and the Financial Industry Regulatory Authority (“FINRA”) have also each published guidance on issues related to the requirement that auditors of non-public broker-dealers register with the Board. The SEC staff guidance can be found at www.sec.gov/divisions/marketreg/faq-pcaobregbdauditors.htm. The FINRA guidance can be found at www.finra.org/Industry/Regulation/Notices/2009/P117689.

* * *

Overview of Registration

Q1. My firm audits broker-dealers but does not audit or participate in audits of public companies. Does my firm have to register with the Board?

A1. Yes. Section 17(e) of the Securities Exchange Act of 1934 (as amended by the Sarbanes-Oxley Act of 2002) provides that every registered broker or dealer shall annually file with the SEC certain financial statements that are certified by a firm that is registered with the PCAOB. Until recently, an order of the Securities and Exchange Commission (the “SEC Order”) had provided non-public broker-dealers with relief from that requirement. As a result of the SEC Order’s recent expiration, financial statements of non-public broker-dealers for fiscal years ending after December 31, 2008 must be certified by a registered public accounting firm.

Q2. What does my firm have to do to become registered with the Board?

A2. To register with the Board, your firm must submit a registration application and the Board must approve it. Links to the instructions to Form 1 and to Section 2 of the Board’s rules (which govern the registration process) may be found at <http://pcaobus.org/Rules/Pages/default.aspx>. You may also view a sample registration application by clicking on “Sample Registration Form 1” located on the Registration page of the Board’s website (www.pcaobus.org/Registration). You can read a discussion of the information Form 1 requires by going to <http://pcaobus.org/Rules/Rulemaking/Pages/Docket001.aspx> and clicking on Release 2003-007. The Board has also published answers to frequently asked questions concerning the application process generally, which you can find on the Registration page. This document, PCAOB Release No. 2003-011B, *Frequently Asked Questions Regarding Registration with the Board*, is referred to below as “Board FAQs” and can be found at http://pcaobus.org/Registration/Information/Documents/Registration_FAQ.pdf.

In addition to submitting the Form 1 registration application, your firm will have to pay a non-refundable registration fee prior to Board consideration of your application. If your firm audited no issuers during the previous calendar

year, the registration fee is \$250. “Issuer” is defined in the Sarbanes-Oxley Act of 2002 and PCAOB rules and does not include a non-public broker-dealer.

Q3. Will PCAOB registration affect the manner in which my firm audits broker-dealers?

A3. The Board does not determine, inspect for compliance with, or enforce the standards applicable to audits of entities that are not issuers. In addition, the SEC staff has published guidance indicating that the requirement to register with the PCAOB does not affect the existing requirement, under SEC rules, that audits of the financial statements of non-public broker-dealers be conducted according to generally accepted auditing standards. See “PCAOB Registration of Auditors of Non-Public Broker-Dealers Frequently Asked Questions” (Question 5), available at www.sec.gov/divisions/marketreg/faq-pcaobregbdauditors.htm.

Q4. If my firm becomes registered with the Board, what ongoing obligations will it have to the PCAOB?

A4. Board rules currently pending with the SEC would require all registered firms, including those that do not audit issuers, to comply with the PCAOB’s annual and special reporting requirements. Once those rules are effective, you will have to file with the Board an annual report, providing basic information about your firm. You will also have to file a special report if certain, specified events occur. These rules, once effective, will also require firms to pay an annual fee. The amount of that fee has not yet been announced. You can read a full description of the annual and special reporting rules adopted by the Board in PCAOB Release No. 2008-004 at <http://pcaobus.org/Rules/Rulemaking/Pages/Docket019.aspx>.

In any given year, both the requirement to file an annual report and the requirement to pay an annual fee apply only to firms that are registered as of March 31 of that year. Firms that become registered after March 31 of a given year would not file an annual report or pay an annual fee that year.

A firm’s failure to comply with the reporting and fee requirements, as well as a failure to comply with the requirements to provide complete and accurate information in the application process, could result in disciplinary sanctions, potentially including revocation of a firm’s registration.

Mechanics of Registration

Q5. How does my firm submit a registration application?

A5. Registration applications are electronic and can only be obtained by accessing the Board’s secure registration system. To gain access to the registration system, go to the Registration page of the Board’s website (www.pcaobus.org/Registration) and click on “Register with the PCAOB” in the gray box on the right. You will be presented with a log-in box and instructions to establish a user ID and password by submitting an “Online Entitlement Request Form.” Follow the instructions to establish a user ID and password, and return to this log-in page to access PCAOB’s secure registration system, where you may download the PDF version of the Form 1 registration application. (Note: The registration system also offers the option to submit Form 1 using XML. See Board FAQ #3 for further information on this option). Complete the application on your computer, making sure to take careful note of the name and location of the file containing your application.

To submit the registration application, log back into the registration system and follow the instructions to upload your completed Form 1. After Form 1 is uploaded, the system will calculate your firm's registration fee and present you with an invoice. You will be given a link to a site where you can submit your payment electronically. Once you've paid, your application will be deemed submitted.

Q6. How long will it take my firm to get registered?

A6. The Board has up to 45 days after the date your firm submits its application to take action on the application. The actual number of days until approval will vary depending on the information contained in the application and the number of applications that are pending at the same time as your firm's application. However, if the Board requests additional information concerning the application, a new 45-day period will begin when the additional information is received. In addition, if the Board cannot determine whether it is in the public interest to approve a firm's application, the Board may hold a hearing. While the applicant could elect to treat the hearing notice as a denial, if it does not do so, it will have waived the 45-day requirement for Board action. See Board FAQ #14 for additional information concerning notices of hearing.

Content of the Registration Application

Q7. My firm does not participate in audits of issuers. Are there sections of the registration application we can skip?

A7. Before responding to any item in the registration application, an applicant should give careful attention to the definitions of terms used in the item. Of particular significance in this context are the definitions of "issuer" (which does not include a non-public broker-dealer), "audit" and "audit report" (which are limited to work and reports relating to the financial statements of issuers), and "associated person" of the applicant (which encompasses only persons that perform work in connection with an audit of an issuer).

If your firm did not, in the current calendar year or in the year preceding submission of its application, participate at all in the audit of an issuer, and your firm does not expect to do so in the current calendar year, it will have no information responsive to Part II (Listing of Applicant's Public Company Audit Clients and Related Fees) or to Item 7.1 (Listing of Accountants Associated with Applicants), and may not have information responsive to other items on the application. The form contains "NA" boxes that you should check to indicate that particular parts of the form do not apply to your firm. A firm that certifies financial statements of broker-dealers, however, should, when filling out an application, also bear in mind the answer to question no. 9 below.

Before concluding that it does not participate in audits of issuers, an applicant should understand that audit work performed for a non-public entity could nevertheless constitute participation in an audit of an issuer if that work is used by another firm in connection with the other firm's audit of an issuer, such as a parent company. In that circumstance, applicants should carefully consider whether they have played, or expect in the current calendar year to play, a "substantial role" in the audit of an issuer as that defined term is used in the registration application.

Q8. Part IV of the registration application requires my firm to provide a statement of its quality control policies. How detailed should we be in describing our quality control policies?

A8. Your firm's discussion of quality control policies should be a summary description presented in a clear, concise and understandable format. You should not provide us with your entire internal quality control manual, but should prepare a brief document that provides an overview of your firm's policies with respect to independence, integrity and objectivity; engagement performance; personnel management; acceptance and continuance of clients and engagements; and monitoring.

Q9. Should my firm provide any specific information relevant to its work for broker-dealers?

A9. In light of the expiration of the SEC order, the staff believes that certain specific information may be relevant to the Board's consideration of an application. In order to avoid the Board seeking the information through a formal request for additional information, which could delay Board action on the application until 45 days after all requested additional information is submitted, the staff urges all applicants who have certified financial statements for SEC filings by broker-dealer clients in the two-year period preceding submission of the application and who intend to continue to do so to (a) indicate that fact in the "Applicant Profile" section on the first page of Form 1 by checking the box for item number 2, and (b) provide the following information:

1. Broker-dealer clients: Include in Exhibit 4.1, in addition to a description of the firm's quality control policies, a separate file listing (a) all broker-dealers for which the firm certified financial statements in the current or preceding calendar year, including the business address of each broker-dealer and, as to each, the dates of any such certification by the firm; and (b) any additional broker-dealers for which the firm expects to certify financial statements in the current calendar year, including the business address of each.

2. Individuals' disciplinary histories: Include in Exhibit 5.3 a statement indicating whether any proprietor, partner, principal, shareholder, or officer of the firm, or any accountant employed by the firm who participates in the firm's work relating to certification of broker-dealer financial statements, has a history that meets any of the criteria described in Item 5.1.a. of Form 1. If any of those individuals has such a history, provide as to each matter the information described in Item 5.1.b. of Form 1. In considering the criteria described in Item 5.1.a.1., please give careful attention to Board FAQ #33.

Q10. Are registration applications made public? If so, can my firm protect any of the information it provides in the application from public disclosure?

A10. The Board makes registration applications available to the public by posting them to its web site as soon as practicable after approving or disapproving them. If your firm wishes to protect information in its registration application from public disclosure, it may request confidential treatment for that information by checking the box labeled "CR" that appears in the application relating to the exact item of information that you want to be treated confidentially. Your firm will be notified of the Board's determination with respect to your request after the Board has acted on your application.

For each request for confidential treatment, your firm must attach, as exhibit 99.1, an explanation as to why you believe the information should be treated confidentially. Refer to Board Rule 2300 (http://pcaobus.org/Rules/PCAOBRules/Pages/Section_2.aspx) for the test the Board will apply in considering whether to grant your requests.

Requesting confidential treatment of a portion of a text exhibit to Form 1 requires your firm to submit two versions of the exhibit – one version should contain all the information in the exhibit and the other version should redact those portions of the exhibit as to which the firm is seeking confidential treatment and show with a notation each redaction that has been made.

Further Questions About Registration

Q11. What should I do if I have further questions?

A11. If you have questions, you should first review the Board's FAQs on Registration, the Board's rules and Instructions to Form 1, and the Instructions for filling out Form 1 that are available for download after you log in to the registration system. If you still have questions, you can email the PCAOB's registration staff at registration-help@pcaobus.org, or call the registration staff's help line at (202) 207-9329. The hours of operation for the help line are 9 a.m. to 5 p.m. EDT, Monday through Friday.

.07 Staff Questions and Answers — References to Authoritative Accounting Guidance in PCAOB Standards, September 2, 2009

Summary

Staff questions and answers set forth the staff's opinions on issues related to the implementation of the standards of the Public Company Accounting Oversight Board ("PCAOB" or "Board"). The staff publishes questions and answers to help auditors implement, and the Board's staff administer, the Board's standards. The statements contained in the staff questions and answers are not rules of the Board, nor have they been approved by the Board.

The following staff questions and answers regarding descriptions of and references to authoritative accounting guidance contained in the standards of the PCAOB were prepared by the Office of the Chief Auditor. Additional questions should be directed to Barbara Vanich, Associate Chief Auditor (202/207-9363; vanichb@pcaobus.org) or Greg Scates, Deputy Chief Auditor (202/207-9114; scatesg@pcaobus.org).

FASB Accounting Standards Codification

On June 30, 2009, the Financial Accounting Standards Board ("FASB") issued FASB Statement of Financial Accounting Standards No. 168, *The FASB Accounting Standards Codification™ and the Hierarchy of Generally Accepted Accounting Principles—a replacement of FASB Statement No. 162* ("FAS 168"). That standard establishes the FASB Codification ("Codification") as the source of authoritative non-Commission accounting principles recognized by the FASB to be applied by nongovernmental entities in the preparation of financial statements in conformity with U.S. generally accepted accounting principles ("U.S. GAAP").¹ The Codification is effective for financial statements issued for interim and annual periods ending after September 15, 2009.

Descriptions of and References to U.S. GAAP

Q1. Certain PCAOB standards include descriptions of and references to U.S. GAAP and accounting requirements. What is the status of those descriptions of and references to U.S. GAAP and accounting requirements upon the effective date of the Codification?

A1. Certain PCAOB standards contain descriptions of and references to U.S. GAAP that existed prior to the Codification. Those descriptions and references were not intended to represent and do not represent authoritative sources of U.S. GAAP.

Some PCAOB standards include descriptions of and references to accounting requirements that are no longer current. Further, some PCAOB standards include descriptions of accounting requirements that may not represent the final language as adopted in the Codification.

The accounting standards set by the FASB are recognized by the U.S. Securities and Exchange Commission ("SEC" or "Commission") as generally accepted

¹ See U.S. Securities and Exchange Commission ("SEC" or "Commission") Release Nos. 33-9062A; 34-60519A; FR-80A, *Commission Guidance Regarding the Financial Accounting Standards Board's Accounting Standards Codification* (August 19, 2009).

under Section 108 of the Sarbanes-Oxley Act of 2002.² Therefore, auditors should disregard descriptions of and references to accounting requirements in PCAOB standards that are inconsistent with the Codification.

Auditors should look to the relevant sections of the Codification and to SEC requirements to identify the applicable accounting and reporting requirements for the company under audit. The FASB's web site contains a cross-reference search function to assist users in transitioning to the Codification.³

The PCAOB plans to revise these descriptions and references in its future standards-setting projects.

Auditor's Responsibilities Regarding the Codification

Q2. What is the auditor's responsibility if, in using the Codification, the auditor believes that an item in the financial statements should be accounted for differently under the Codification than under pre-Codification U.S. GAAP?

A2. The FASB has stated that, generally, the Codification does not represent a change in U.S. GAAP. The FASB, however, has acknowledged that through the process of drafting the Codification, certain wording changes might theoretically lead an issuer to conclude differently on an accounting matter.⁴ To address those types of changes, the FASB will continue to accept feedback on Codification content after the effective date to improve content and address unintentional changes, when applicable.⁵ The FASB also has acknowledged that in reviewing the Codification issuers might discover guidance of which they were previously unaware that now indicates that an error may exist in previously issued financial statements.⁶

If an issuer reaches a different conclusion on an accounting matter, an auditor should evaluate management's conclusion on whether the different accounting treatment is a change in an accounting principle or an error, following the guidance in Codification Topic 250, Accounting Changes and Error Corrections.⁷

If the different accounting treatment is a change in an accounting principle, the auditor should follow the direction in:

- AU sec. 508, *Reports on Audited Financial Statements*
- PCAOB Auditing Standard No. 6, *Evaluating Consistency of Financial Statements*

If the different accounting treatment is an error, the auditor should follow the direction in:

- AU sec. 561, *Subsequent Discovery of Facts Existing at the Date of the Auditor's Report*
- AU sec. 508, *Reports on Audited Financial Statements*

² See SEC Release Nos. 33-8221; 34-47743, *Commission Statement of Policy Reaffirming the Status of the FASB as a Designated Private-Sector Standard Setter* (April 25, 2003).

³ The Codification cross-reference table is available at: http://asc.fasb.org/crossref&analyticsAssetName=home_page_crossreference.

⁴ See FAS 168, paragraph A15.

⁵ *Ibid.*, paragraph A17.

⁶ *Ibid.*, paragraph A16.

⁷ This Codification topic was formerly referred to as FAS 154, *Accounting Changes and Error Corrections*.

- PCAOB Auditing Standard No. 6, *Evaluating Consistency of Financial Statements*
- PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, on evaluating deficiencies in an integrated audit, and AU sec. 325, *Communications About Control Deficiencies in an Audit of Financial Statements*, on evaluating deficiencies in an audit of financial statements only.

Q3. What are the other responsibilities of an auditor with respect to the Codification?

A3. Auditors will need to become knowledgeable about using the Codification. Additionally, for reviews of interim financial information and audits of financial statements for periods ending after September 15, 2009, when referencing or including an excerpt from U.S. GAAP in audit documentation, the relevant Codification topic is the appropriate source for that reference or excerpt. It may be desirable, but is not necessary, to update certain existing audit documentation (e.g., audit schedules, memoranda) containing previous references to U.S. GAAP prepared prior to the Codification.

Audits of Financial Statements Prepared in Conformity with International Financial Reporting Standards

Q4. What consideration, if any, should an auditor give to descriptions of and references to U.S. GAAP in the standards of the PCAOB if he or she is auditing the financial statements of a foreign private issuer (“FPI”)⁸ prepared in conformity with International Financial Reporting Standards (“IFRS”),⁹ as issued by the International Accounting Standards Board?

A4. In an audit of an FPI’s financial statements that are prepared in conformity with IFRS, the auditor needs to consider SEC requirements and IFRS to determine the applicable accounting and reporting requirements and should disregard descriptions of and references to U.S. GAAP in PCAOB standards.

⁸ See Rule 3b-4(c) of the Securities Exchange Act of 1934 for the definition of “foreign private issuer.”

⁹ See Form 20-F, General Instruction E(c), and items 17 and 18; 17 C.F.R. 249.220f; and SEC Release Nos. 33-8879; 34-57026; International Series Release No. 1306; File No. S7-13-07 (December 21, 2007).

.08 Staff Questions and Answers — Special Reporting on Form 3, January 12, 2010**Summary**

The questions and answers below set out staff guidance to assist registered public accounting firms with respect to the requirement to file with the Public Company Accounting Oversight Board (“PCAOB” or “Board”) special reports on Form 3. This guidance does not constitute Board rules, nor has it been approved by the Board.

The questions and answers below were prepared by the PCAOB staff to supplement PCAOB Release No. 2008-004, *Rules on Periodic Reporting by Registered Public Accounting Firms* (June 10, 2008) and the instructions to Form 3, which can be found at http://pcaobus.org/Rules/Rulemaking/Docket019/2008-06-10_Release_No_2008-004.pdf. Please note that the instructions to Form 3 include various “notes” intended to address anticipated questions.

* * *

Overview of the Requirements Relating to Special Reporting on Form 3

Q1. What is the general nature of the obligation to file special reports on Form 3?

A1. The PCAOB’s reporting framework includes two types of reporting obligations. Each registered firm must provide basic information once a year, covering a 12-month period that ends March 31, by filing an annual report on Form 2. Separately, there are certain events (“Form 3 events”) that, if they occur, a firm must report on Form 3 within specified time frames. The reportable events described on Form 3 are not events that routinely occur, and some firms might never experience an event required to be reported on Form 3.

Q2. Does the requirement to file special reports on Form 3 apply to all registered firms, regardless of the nature of the firm’s practice?

A2. Yes. Each firm that is registered with the PCAOB, regardless of the reason the firm is registered, regardless of whether the firm is required to be registered, and regardless of whether the firm plays any role in audits of issuers, must comply with the requirement to file special reports on Form 3 if any of the reportable events described in Form 3 occur with respect to the firm.

Q3. What are the time frames within which events must be reported on Form 3?

A3. The deadlines for filing special reports on Form 3 are set out in Rule 2203(a). In general, any Form 3 event that occurs while a firm is registered must be reported on Form 3 within 30 days after the event occurs. There are, however, two special situations involving one-time reporting deadlines for firms to “bring current” certain information that was submitted on a firm’s registration application.

The first situation relates to firms that are registered as of December 31, 2009, when Rule 2203(a) took effect. For those firms, a specified subset of Form 3 events must be reported if they occurred before December 31, 2009 and information concerning them continues to be current as of December 31, 2009. This reporting requirement is described in detail in General Instruction No. 4

to Form 3. Any firm registered as of December 31, 2009 should review General Instruction No. 4 to determine whether it has any “bring current” reporting obligation, and any such report must be filed on Form 3 by February 1, 2010.

The second situation relates to firms that become registered after December 31, 2009. For those firms, any Form 3 events that occur between the cut-off date used by the firm for purposes of providing information on its registration application and the date the firm receives notice of approval of its application for registration must be reported on Form 3 within 30 days of receiving notice of approval of the application. With respect to events that occur while a firm’s registration application is pending, however, firms should also take account of Q&A 18 in the Board’s Frequently Asked Questions Regarding Registration with the Board (PCAOB Release 2003-011C), which encourages applicants to notify the staff in writing if information contained in the application changes in any significant way while the application is pending.

Q4. What are the consequences of failing to file a special report after a Form 3 event occurs, or of a late filing?

A4. The failure to file a timely special report after a Form 3 event occurs is a violation of PCAOB Rule 2203(a). As with any violation of PCAOB rules, a registered firm that violates Rule 2203(a), and any associated person who causes that violation, could be subject to disciplinary proceedings and disciplinary sanctions, which, in appropriate circumstances, could include revoking a firm’s registration and barring an individual from being an associated person of a registered firm.

In addition, the annual report on Form 2 that every firm must file, for each 12-month period ending March 31, requires the firm to certify that it filed all required special reports on Form 3 with respect to events that occurred during that 12-month reporting period. If a firm overlooked the special reporting requirements for some period of time, the firm would eventually discover that it needed to become current on its Form 3 obligations, even if that meant late filing of a Form 3, so that it could provide the certification required in order to satisfy the annual reporting requirement.

Q5. What happens if the firm does not know of the Form 3 event within 30 days of its occurrence?

A5. The reportable events in Form 3 are described in a way such that either the firm would necessarily be in a position to know about them as they occur (*e.g.*, the firm has changed its name) or that the event triggering the reporting obligation is the firm *becoming aware* of certain information. With respect to that latter category of events, the instructions to Form 3 specify that the firm is deemed to have become aware of the relevant facts on the date that any partner, shareholder, principal, owner, or member of the firm first becomes aware of the facts. The Board’s release adopting the special reporting requirements noted that it is reasonable to expect a firm to have controls designed to ensure that any such person who becomes aware of relevant facts understands the firm’s reporting obligation and brings the matter to the attention of persons responsible for compliance with the obligation.

Q6. If a firm has requested leave to withdraw from registration by filing Form 1-WD, and that request is pending with the Board, must the firm continue to comply with the requirement to file special reports on Form 3?

A6. No. PCAOB Rule 2107(c) provides that the obligation to file special reports on Form 3 is suspended for any firm that has pending before the Board a Form 1-WD requesting leave to withdraw from registration. In the event that the firm decides to withdraw a pending Form 1-WD, PCAOB Rule 2107(f)

requires that the firm file any special report that the firm would have been required to file had the Form 1-WD not been pending.

Events Required to be Reported on Form 3

Q7. What events are required to be reported on Form 3?

A7. The events that must be reported on Form 3 are described in Part II (and the instructions to Part II) of Form 3. For quick reference, a single page summary of the categories of reportable events is set out at the end of this document, but firms should refer to the more detailed descriptions in Part II of Form 3 for the specific events that must be reported. Firms should not attempt to report via Form 3 any events that are not described in Part II of Form 3. For example, while firms must report certain categories of legal proceedings involving the firm or certain firm personnel, firms are not required to report *all* legal proceedings involving the firm or its personnel, and firms should not attempt to use Form 3 to report proceedings not described in Part II of Form 3.

In reviewing the descriptions of events that must be reported, firms should bear in mind that some terms used in those descriptions are defined, for these purposes, in ways that may differ from a firm's common usage of the terms. Defined terms used in Form 3 are italicized, and the definitions can be found in PCAOB Rule 1001 or by clicking on an italicized term in the online form.

Q8. One of the reportable events on Form 3 is a firm's withdrawal of a previously issued audit report. Must a firm file Form 3 in every case where the firm withdraws an audit report or withdraws its consent to the use of its name by an issuer?

A8. No. If the issuer in question complies with its obligation to disclose the matter pursuant to Item 4.02 of a Form 8-K filed with the Securities and Exchange Commission, the firm need not, and should not, separately report the matter on Form 3. However, in the event the issuer fails to make the required Form 8-K filing within the time required by the Commission's rules, the firm must report that event on Form 3 within 30 days after that Form 8-K filing deadline, unless, within that 30-day period, the issuer reports the matter on a late-filed Form 8-K.

Q9. Reportable events on Form 3 include a firm entering into certain relationships with persons or entities who are currently the subject of specified PCAOB sanctions or Securities and Exchange Commission orders. Does a firm need to report such a relationship even if the person or entity does not participate in audits of issuers?

A9. Yes. Those relationships must be reported on Form 3 regardless of whether the relevant person or entity participates in audits of issuers.

Q10. Reportable relationships referred to in the preceding question include certain relationships with entities that are currently the subject of a PCAOB sanction disapproving the entity's application for registration. What does it mean to be "currently the subject" of such a sanction?

A10. An entity is considered to be "currently the subject" of a Board sanction disapproving registration if either of the following is true: (1) the Board order disapproving registration identified a date after which the Board would not treat the violations described in the order as a sole basis for possible disapproval of a new registration application, and that date has not passed, or

(2) the Board order identifies no such date, and the entity has not subsequently become registered with the Board.

Q11. For purposes of Form 3's reporting requirements, is a person or entity considered to be "currently the subject of" a specified PCAOB sanction if the sanction has not yet taken effect because it is pending review by the Securities and Exchange Commission?

A11. A person or entity is not "currently the subject of" a PCAOB sanction if the imposition of the sanction has been stayed, pursuant to Section 105(e) of the Act, by virtue of an application to the Commission for review, and the stay has not been lifted.

Q12. The obligation to report new relationships with persons or entities currently the subject of certain PCAOB sanctions and Commission orders is not by its terms limited to situations in which the firm has become aware of such sanctions or orders. What if the firm is not aware of them?

A12. The sanctions and orders that give rise to this reporting obligation are public information. A firm generally should be able to identify this information as to any person or entity with whom or which it enters into a new relationship, even if the person or entity is not forthcoming about it.

Q13. One of the reportable events on Form 3 is a change in a registered firm's name. Should a firm file a report on Form 3 to report all name changes, including those that occur in connection with a merger or other change in the firm's legal form?

A13. No. A change in a firm's name should be reported on Form 3 if, and only if, other than the name change, the firm remains the same legal entity that it was before the name change. If the name change is in connection with a more significant change in which the firm, as previously constituted, ceases to exist – such as a change in the legal form of the firm or a merger resulting in a new legal entity – the new entity does not automatically succeed to the registration status of the former entity and may not report the event on Form 3 as a mere name change. In that event, the firm should consider whether, pursuant to the provisions of Rule 2108, the firm can make the representations required in a Form 4 filing to enable the firm to succeed to the predecessor firm's registration status.

Q14. If the address of a firm's headquarters changes, must the firm report that change on Form 3?

A14. The only address change that must be reported on Form 3 is a change in the business mailing address (and other contact information) of the person that the firm designates as its primary contact with the PCAOB. If a firm changes its headquarters address, but the contact information for that primary contact person remains unchanged, the firm should not report the headquarters address change on Form 3 but should simply provide the new address in the firm's next annual report on Form 2.

Completing Form 3

Q15. Which portions of Form 3 must be completed if a firm is reporting only a single event?

A15. For any Form 3 filing, a firm must complete Parts I, II, and VIII of Form 3 and at least one of Parts III through VII. Part I identifies the firm and

Part VIII certifies the accuracy of the report. In Part II, the firm must check a box, or boxes, to indicate which of the events described there the firm is reporting. Depending upon which box or boxes the firm checks in Part II, the firm must complete one or more of Parts III through VII to provide certain details.

Q16. May a firm use a single Form 3 filing to report multiple Form 3 events?

A16. A firm may file a Form 3 to report a single event or to report multiple events. Timeliness of reporting, however, is judged with respect to each reported event.

Q17. May a firm combine in a single Form 3 filing the “bring current” reporting described in Q&A 3 above and reporting on other events that occur within the 30-day period before the “bring current” report is due?

A17. Yes, but attention should be given to ensure compliance with the “bring current” reporting requirement. A firm registered as of December 31, 2009 must file a Form 3 by February 1, 2010 to report certain information that is current *as of* December 31, 2009, and it must do so even if that information is superseded by events that occur between December 31, 2009 and February 1, 2010 that must also be reported on Form 3. Similarly, a firm that becomes registered after December 31, 2009 would, within 30 days of becoming registered, need to file a Form 3 to report events that occurred before the date it became registered, even if the relevant information were superseded by other events occurring before the firm filed that “bring current” report. In those situations, a firm would need to file one Form 3 to satisfy the “bring current” obligation and a separate Form 3 to report the subsequent change to that information.

Amending a Previously Filed Form 3

Q18. What should a firm do if it discovers that it provided incorrect information in a filed Form 3 or omitted information that should have been included?

A18. Special reports on Form 3 should be complete and accurate, and an individual in the firm must, on behalf of the firm, certify that the form does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which the statements were made, not misleading. Inaccuracies or omissions could form the basis for disciplinary sanctions for failing to comply with the reporting requirements, and it is therefore in a firm’s interest to correct such errors as soon as possible. A firm may do so by filing an amendment pursuant to PCAOB Rule 2205 and the Form 3 instructions specific to amendments.

Q19. Should a firm amend a previously filed Form 3 to update previously reported information that has changed since the original filing?

A19. Amendments are appropriate only to correct information that was incorrect at the time of the filing, or to supply omitted information that should have been supplied at the time of the filing. The amendment process should not be used to update information reported on a Form 3. In the event of changes, the firm should consider whether a new Form 3 reporting obligation has been triggered.

Requesting Confidential Treatment

Q20. How does a firm request confidential treatment for information that it provides on Form 3?

A20. A firm may request confidential treatment for information provided in certain, though not all, items in Form 3. General Instruction No. 8 to Form 3 identifies the items with respect to which a firm may request confidential treatment. In filling out the form, the firm may request confidential treatment by checking the “CR” box associated with each such item for which the firm wants to request confidential treatment.

The requirements concerning what a firm must submit in support of a request for confidential treatment have changed effective December 31, 2009 and so, for most firms, are different than they were when the firm submitted its registration application. As amended, PCAOB Rule 2300(c) requires both a representation that the information has not otherwise been publicly disclosed and either (1) a detailed explanation of the grounds on which the information is considered proprietary, or (2) a detailed explanation of the basis for asserting that the information is protected by law from public disclosure and a copy of the specific provision of law.

A special report on Form 3 will be published on the PCAOB Web site promptly upon submission. That public version of the Form will not display information for which confidential treatment is requested unless and until a determination to deny the request becomes final. As a safeguard, as a firm prepares to submit a completed Form 3 to the PCAOB’s Web-based system, the system allows a firm to view two separate versions of the completed form – one showing all of the information the firm has entered and the other showing what the publicly available version of the form will look like, with redactions where confidential treatment is requested. Before finally submitting the form, the firm should carefully review the redacted version to make sure that the firm has requested confidential treatment where it intended to do so.

Withholding Information on the Basis of Non-U.S. Legal Restrictions

Q21. May a firm refrain from reporting information on Form 3 if non-U.S. law prohibits the firm from providing or obtaining the information, just as the PCAOB allows firms to withhold information from Form 1 registration applications on that basis?

A21. A non-U.S. firm may withhold certain information from a required special report on Form 3 because of non-U.S. legal restrictions, but the related process, which is governed by PCAOB Rule 2207, is significantly different from the process in the context of a registration application on Form 1.

A legal conflict can be asserted on Form 3 only if the firm is actually withholding information that the form requires. A separate section at the end of each relevant part of Form 3 instructs the firm that if any portion of its response in that part is incomplete because of an asserted legal conflict, the firm must, in that separate section, identify the specific items with respect to which the firm actually has withheld, or been precluded from obtaining, responsive information.

Also, unlike the case with Form 1, the materials that a firm must compile in support of its position that a conflict exists – a copy of the relevant provisions of law, a legal opinion, and a written explanation of the firm’s efforts to seek

consents or waivers that would overcome the conflict – need not routinely be submitted when the firm files Form 3. Rather, the firm must certify on Form 3 that it has those materials in its possession, and it must submit them only in the event of a follow-up request from the Board or the Director of the Division of Registration and Inspections.

Q22. To comply with the requirement to have a legal opinion relevant to the asserted conflict of law, must a firm secure a new legal opinion specific to each Form 3 that the firm files?

A22. The supporting materials maintained by the firm need only contain a legal opinion that the firm has reason to believe is current with respect to the relevant point of law. Rule 2207 does not attempt to specify the ways in which a firm may satisfy this requirement, and various approaches might be satisfactory. Compliance does, however, depend upon a firm implementing in good faith some mechanism for generally being aware of relevant changes in the law, rather than relying on a particular legal opinion in perpetuity without genuine regard for whether the law changes.

Q23. If a non-U.S. firm takes the position that non-U.S. law prohibits it from providing any of the details required by Parts III through VII of Form 3 with respect to a particular matter, is the firm still required to file a Form 3 concerning that matter?

A23. Yes. The firm must still file a Form 3 completing Parts I, II, and VIII, and checking the relevant boxes in Parts III through VII to indicate the items as to which information is being withheld.

The Mechanics of Reporting Through the PCAOB Web-Based System

Q24. How does a firm submit Form 3 to the Board?

A24. To submit Form 3, your firm will need to access the PCAOB's Registration, Annual and Special Reporting system at <https://rasr.pcaobus.org/Security/Login.aspx>. Your firm will need to provide the Username and Password issued in connection with the registration process to gain access. Registered firms may email registration-help@pcaobus.org for assistance with log-in information. Firms that are already registered with the Board should not request a new user name and password through the Board's web site—this functionality is for firms seeking to register with the Board and is not appropriate for registered firms needing login assistance.

Q25. What formats will the system accept? What software is needed to properly prepare and submit Form 3?

A25. To properly communicate with the Board's system, you will need Internet Explorer 6.0 or later, or Firefox 2.0 or later. To complete Form 3, you may fill it out online as a web form, or you may submit it in XML, which is a computer language. If you have large amounts of information going into Form 3, you may find that XML is a more convenient way to submit the data because you would be able to load the data into your XML file directly or indirectly from other databases. If you would like to make your submission in XML, you must download the XML Schema from the Board's system. Using XML will likely require the assistance of a programmer who is versed in that computer language.

Form 3 may require you to submit various documents to be labeled as exhibits. The system will accept exhibits in PDF, GIF or JPEG format. You can convert text documents or scan documents for submission, as long as they are submitted in PDF, GIF or JPEG.

Q26. Is assistance available on how to create a web form in the Board's system?

A26. You may view an online tutorial on how to create a web form in the Board's system by going to the Registration, Annual and Special Reporting page of the Board's web site (<http://pcaobus.org/Registration/Pages/SampleForms.aspx>) and viewing the system tutorial entitled "Create a Form."

Further Questions About Reporting on Form 3

Q27. What should I do if I have further questions?

A27. If you have questions, you should first review the Board's release adopting the reporting requirements, including the rules and Instructions to Form 3, which can be found at http://pcaobus.org/Rules/Rulemaking/Docket019/2008-06-10_Release_No_2008-004.pdf, and the instructions for filling out Form 3 that are available for download after you log into the registration and reporting system. The instructions to Form 3 include various notes intended to address anticipated questions. If you still have questions, you can email the PCAOB's registration staff at registration-help@pcaobus.org.

Summary of Form 3 Reportable Events

- The firm has withdrawn an audit report on financial statements, and the issuer failed to comply with Commission reporting requirements (Item 4.02 of Commission Form 8-K) concerning the matter.
- With respect to the 100 issuer audit client threshold that determines the frequency of Board inspections under Rule 4003, the firm has crossed to a different side of the threshold than the firm was on in the preceding calendar year.
- The firm, or a partner, shareholder, principal, owner, member, or audit manager of the firm (in some cases limited to those who provided at least ten hours of audit services for any issuer during the firm's current or most recently completed fiscal year), has become a defendant in certain types of criminal proceedings, or any such proceeding has been concluded as to the firm or the individual.
- The firm, or a partner, shareholder, principal, owner, member, or audit manager of the firm (in some cases limited to those who provided at least ten hours of audit services for any issuer during the firm's current or most recently completed fiscal year), has become a defendant or respondent in a government-initiated civil proceeding, or an administrative or disciplinary proceeding (other than a Board proceeding), arising out of conduct in the course of providing professional services, or any such proceeding has been concluded as to the firm or the individual.
- The firm, or a parent or subsidiary, has become the subject of a petition filed in bankruptcy court or certain similar proceedings.
- The firm has taken on individuals or entities meeting certain criteria regarding disciplinary history, or entered into an arrangement to receive from such individuals or entities services related to the firm's

audit practice or related to services the firm provides to issuer audit clients.

- The firm has obtained or lost authorization to engage in the business of accounting or auditing in a particular jurisdiction, or that authorization has become subject to conditions or contingencies.
- Contact information for the firm's Board contact person has changed.
- The firm has changed its legal name, while otherwise remaining the same legal entity that it was before the name change.

**.09 Staff Questions and Answers — Succession to Registration Status—
Form 4, January 12, 2010****Summary**

The questions and answers below set out staff guidance to assist registered public accounting firms with respect to succeeding to a predecessor firm's registration status with the Public Company Accounting Oversight Board ("PCAOB" or "Board") by filing Form 4. This guidance does not constitute Board rules, nor has it been approved by the Board.

The questions and answers below were prepared by the PCAOB staff to supplement PCAOB Release No. 2008-005, *Rules on Succeeding to the Registration Status of a Predecessor Firm* (July 29, 2008) and the instructions to Form 4, which can be found at http://pcaobus.org/Rules/Rulemaking/Docket020/2008-07-29_Release_No_2008-005.pdf. Please note that the instructions to Form 4 include various "notes" intended to address anticipated questions.

Q1. What is Form 4?

A1. In the circumstances in which it is available, the Form 4 succession process allows an unregistered firm to succeed to the PCAOB registration status of a predecessor firm that was registered without any interruption in the registration status. Under certain circumstances, however, that registration status may only be temporary, as discussed in Q&A 9 below.

Q2. What are the circumstances in which a firm can succeed to a predecessor's registration status by filing Form 4?

A2. The Form 4 succession process is available (1) if there has been a change in a registered firm's form of organization, or the registered firm has changed the jurisdiction under the law of which it is organized; or (2) if a registered firm is acquired by an unregistered firm, or combines with any other entity or entities, including other registered firms, to form a new public accounting firm. Form 4 can be used only in those circumstances and only if the firm seeking to succeed to registration status makes certain representations required in the form. In the absence of those conditions, a firm cannot use Form 4 to succeed to the registration status of a predecessor and would need to file a registration application on Form 1 if it wished to seek registration.

Q3. Is a firm that results from the circumstances described in Q&A 2 above required to file Form 4?

A3. A firm that results from the circumstances described in Q&A 2 above should not assume that it is registered with the PCAOB just because a predecessor firm was registered with the PCAOB. If the firm wishes to be registered with the PCAOB, Form 4 provides an optional route to registration, but the firm is not required to use the Form 4 process and can choose, instead, to file an application for registration on Form 1.

Q4. Can or should Form 4 be filed in circumstances in which a registered firm has acquired another firm?

A4. If a registered firm acquires another firm in such a way that the acquiring registered firm continues to exist as the same legal entity, that firm continues to be registered and need not, and cannot, file Form 4. The acquiring registered firm would, however, need to report the acquisition when it files its annual report on Form 2 for the period in which the acquisition occurred.

Q5. By when must Form 4 be filed to be timely?

A5. PCAOB Rule 2109(a) governs the timeliness of Form 4 filings. With respect to changes or combinations that take effect on or after December 31, 2009 (the effective date of Rule 2109), a Form 4, to be timely, must be filed within 14 days after the change or combination takes effect.

Q6. If a firm resulted from circumstances described in Q&A 2 above that occurred after a predecessor firm became registered but before December 31, 2009, can and should the firm file a Form 4 to succeed to the predecessor's registration status? If so, when must the form be filed to be timely?

A6. Form 4 can be filed with respect to changes or combinations that took effect before December 31, 2009, and should be filed if the firm intends to operate, and believes it has been operating, under the registration status of the predecessor. For firms in that situation, Form 4 must be filed by January 14, 2010 to be timely. *Even if a firm in that situation has previously informally reported the change or combination to the PCAOB staff and provided requested representations, the firm still would need to file Form 4 to succeed to the predecessor's registration status.*

Q7. If a firm files Form 4 to succeed to the registration status of a registered firm, how soon will it be deemed to have succeeded to the predecessor's registration status?

A7. If a firm files a timely Form 4, succession to the predecessor's registration status is automatic. As discussed below, however, in some cases that registration status may only be temporary.

Q8. If a firm can make the representations required by Form 4 but has failed to file a timely Form 4, is it still possible for the firm to succeed to a predecessor's registration status?

A8. Under PCAOB Rule 2108(d), a firm that is in a position to file Form 4 but has failed to do so timely may submit a completed Form 4 along with a request for leave to file the form out of time. The submission must be accompanied by an exhibit describing the reasons the form was not timely filed and a statement of the grounds on which the firm asserts that the Board should grant leave to file the form out of time. The Board will evaluate the request in light of the relevant facts and circumstances and the public interest and may, in its discretion, grant or deny the request.

During the period that a request for leave to file out of time is pending with the Board, a firm should not assume that it is a registered public accounting firm. A Board decision to grant the request would effectively confer registered status on the firm back to the date of the transaction that is the subject of the Form 4 filing (just as with a timely filed Form 4), but a Board decision to deny the request would mean that the firm was not registered during that period.

Q9. In what circumstances would a firm's succession to the registration status of a predecessor firm through Form 4 be only temporary?

A9. If the event giving rise to the Form 4 filing is an unregistered firm's acquisition of a registered firm or a combination of firms into a new firm, the firm must address three yes-or-no questions, set out in Item 3.2.e. If the firm answers yes to any one of those questions or, in the case of a non-U.S. firm,

declines to answer any one of those questions on the ground that non-U.S. law prevents it from doing so, the firm can succeed to the predecessor's registration status, but only temporarily. In that situation, to succeed temporarily, the firm must also represent that it either has filed an application for registration on Form 1 or will do so no later than 45 days after the date of the acquisition or combination giving rise to the Form 4 filing.

Q10. How long does temporary succession to registration last?

A10. In general, temporary registration ceases to be effective on the earlier of the 91st day after the effective date of the acquisition or combination as reported on Form 4 or the date on which the Board approves a Form 1 registration application submitted by the firm. Temporary registration can be extended in certain circumstances, as described in PCAOB Rule 2108(b)(2)(iii)-(iv).

Q11. A firm seeking to file a Form 4 would, necessarily, be an unregistered firm. How does such a firm access the PCAOB's Web-based system to be able to file the form?

A11. In every situation in which a Form 4 can be filed, there is necessarily at least one firm involved that was a registered firm before the change or combination that gives rise to the Form 4 filing. The firm that seeks to file a Form 4 must identify that firm (or one of those firms) on Form 4 as the predecessor firm to whose registration status the firm is succeeding. The firm should access the PCAOB system using that firm's user ID and password.

Q12. Should the predecessor registered firm, to whose registration status the firm is succeeding, file Form 1-WD to withdraw from registration?

A12. No, the firm designated in Form 4 as the predecessor must not withdraw from registration.

Q13. In the event that a combination of firms giving rise to a Form 4 filing involves any registered firms other than the firm designated in Form 4 as the predecessor, should those other firms file Form 1-WD to withdraw from registration?

A13. Yes, any such firms should file Form 1-WD seeking to withdraw from registration, and the firm filing Form 4 must represent that each such registered firm has done so.

Q14. What should a firm do if it discovers that it provided incorrect information in a filed Form 4 or omitted information that should have been included?

A14. Form 4 filings should be complete and accurate, and an individual in the firm must, on behalf of the firm, certify that the form does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which the statements were made, not misleading. Inaccuracies or omissions could form the basis for disciplinary sanctions for failing to comply with the rules and instructions relating to Form 4, and it is therefore in a firm's interest to correct such errors as soon as possible. A firm may do so by filing an amendment pursuant to PCAOB Rule 2205 (which applies to Form 4 through PCAOB Rule 2109(d)) and the Form 4 instructions specific to amendments.

Q15. If a Form 4 as filed appears on its face to be timely, but a subsequent amendment reveals that the original filing was in fact untimely, what is the firm's registration status?

A15. In that circumstance, the original Form 4 filing would be voided and its effect would be null. If the firm still wanted to try to succeed to the predecessor's registration status, it would need to submit a new Form 4 and request leave to file out of time.

Q16. Can a firm make changes to a Form 4 that has been submitted with a request for leave to file out of time and is pending in that status?

A16. In that circumstance, a firm can withdraw the pending submission and replace it with a new submission. A note to General Instruction No. 7 of Form 4 describes the process.

Q17. Once a firm has filed a timely Form 4, or the Board has granted leave to file a Form 4 out of time, should any subsequent changes to information that was provided on the Form 4 be submitted through an amendment to the Form 4?

A17. No. Amendments are appropriate only to correct information that was incorrect at the time of the filing, or to supply omitted information that should have been supplied at the time of the filing. The amendment process should not be used to update information that has changed since the Form 4 was filed. To the extent, however, that the subsequent changes are events that are required to be reported on a special report on Form 3, the firm should report them on Form 3 in accordance with Rule 2203.

Q18. Can a firm request confidential treatment for information on Form 4?

A18. A firm may request confidential treatment for certain limited aspects of a Form 4 filing, which are identified in General Instruction No. 9 to Form 4. Confidential treatment requests are not automatically granted. The requirements concerning what a firm must submit in support of a confidential treatment request have changed effective December 31, 2009 and so, for most firms, are different than they were when the firm submitted its registration application. As amended, PCAOB Rule 2300(c) requires both a representation that the information has not otherwise been publicly disclosed and either (1) a detailed explanation of the grounds on which the information is considered proprietary, or (2) a detailed explanation of the basis for asserting that the information is protected by law from public disclosure and a copy of the specific provision of law.

Q19. May a firm refrain from providing information on Form 4 if non-U.S. law prohibits the firm from providing or obtaining the information?

A19. If a non-U.S. firm complies with the requirements of PCAOB Rule 2207 (which applies to Form 4 through PCAOB Rule 2109(d)) and the relevant instructions to Form 4, it may withhold certain limited information because of asserted non-U.S. legal restrictions and still succeed to a predecessor's registration status. PCAOB Rules nevertheless reserve to the Board the right to subsequently require the information. In addition, while a non-U.S. firm may withhold answers to the yes-or-no questions discussed in Q&A 9 on the basis of a non-U.S. legal restriction, doing so will result in succession to registration being temporary only, and the firm would need to file a registration application on Form 1 to seek registration beyond the period of the temporary registration.

Q20. Does the Form 4 process affect any aspect of Securities and Exchange Commission Rules or Commission staff guidance concerning the consequences of mergers or similar transactions involving accounting firms?

A20. No. The Form 4 process has no affect on such matters; it merely allows the new entity to be registered with the PCAOB.

Q21. What should I do if I have further questions?

A21. If you have questions, you should first review the Board's release adopting the reporting requirements, including the rules and Instructions to Form 4, which can be found at http://pcaobus.org/Rules/Rulemaking/Docket020/2008-07-29_Release_No_2008-005.pdf, and the instructions for filling out Form 4 that are available for download after you log into the registration and reporting system. The instructions to Form 4 include various notes intended to address anticipated questions. If you still have questions, you can email the PCAOB's registration staff at registration-help@pcaobus.org.

.10 Staff Questions and Answers — Auditing Standard No. 7, *Engagement Quality Review*, February 19, 2010

Summary

Staff questions and answers set forth the staff's opinions on issues related to the implementation of the standards of the Public Company Accounting Oversight Board ("PCAOB" or "Board"). The staff publishes questions and answers to help auditors implement, and the Board's staff administer, the Board's standards. The statements contained in the staff questions and answers are not rules of the Board, nor have they been approved by the Board.

The following staff question and answer related to Auditing Standard No. 7, *Engagement Quality Review* was prepared by the Office of the Chief Auditor. Additional questions should be directed to Dima Andriyenko, Associate Chief Auditor (202/207-9130; andriyenkod@pcaobus.org) or Greg Scates, Deputy Chief Auditor (202/207-9114; scatesg@pcaobus.org).

* * *

Auditing Standard No. 7

On January 15, 2010, the U.S. Securities and Exchange Commission ("SEC") approved Auditing Standard No. 7, *Engagement Quality Review* ("AS No. 7,"), which was adopted by the PCAOB on July 28, 2009.¹ AS No. 7 supersedes the Board's interim standard,² applies equally to all registered firms,³ and requires an engagement quality review ("EQR") and concurring approval of issuance for each audit engagement and for each engagement to review interim financial information conducted pursuant to the standards of the PCAOB.⁴

In its order approving AS No. 7, the SEC encouraged the PCAOB to provide further implementation guidance on the documentation requirements of the standard in light of comments the SEC received during its comment period. The following staff question and answer provides implementation guidance.

Documentation of an EQR

Q. Page 21 of the adopting release provides the following example of the application of the standard's documentation requirements:

[I]f a reviewer identified a significant engagement deficiency to be addressed by the engagement team, the engagement team should document its response to the identified deficiency in accordance with [Auditing Standard No. 3, *Audit Documentation*]. Because AS No. 7 does not require duplication of documentation prepared by the engagement team, the engagement quality reviewer does not have to separately document the engagement team's response. Rather, the EQR documentation should contain sufficient information to enable an experienced auditor, having no

¹ See SEC Release No. 34-61363 (Jan. 15, 2010); PCAOB Release 2009-004, *Auditing Standard No. 7, Engagement Quality Review and Conforming Amendment to the Board's Interim Quality Control Standards* (Jul. 28, 2009) (the "adopting release").

² Requirements of Membership of the Securities and Exchange Commission Practice Section ("SECPS") of the American Institute of Certified Public Accountants ("AICPA") Section 1000.08(f).

³ The Board's interim standard applied only to registered firms that were members of the SECPS as of April 16, 2003.

⁴ See paragraph 1 of AS No. 7.

previous connection with the engagement, to understand, e.g., the significant deficiency identified, how the reviewer communicated the deficiency to the engagement team, why such matter was important, and how the reviewer evaluated the engagement team's response.

Does this example suggest that the standard requires documentation of all of the interactions between the engagement quality reviewer and the engagement team, including all of the interactions before a matter is identified as a significant engagement deficiency?

A. No. The example in the adopting release illustrates how the documentation requirements of AS No. 7 should be applied once a reviewer concludes that a significant engagement deficiency exists.

Paragraph 19 of AS No. 7 establishes a requirement⁵ that “[d]ocumentation of an engagement quality review should contain sufficient information to enable an experienced auditor, having no previous connection with the engagement, to understand the procedures performed by the engagement quality reviewer, and others who assisted the reviewer, to comply with the provisions of this standard....”

[The next page is 11,201.]

⁵ Specific documentation requirements are also set forth at Paragraph 19a-c.

.01 An Audit of Internal Control That Is Integrated With an Audit of Financial Statements: Guidance for Auditors of Smaller Public Companies

January 23, 2009

Introduction

The information in this publication is intended to help auditors apply the provisions of the Public Company Accounting Oversight Board's ("PCAOB" or "Board") Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements* ("Auditing Standard No. 5"),¹ to audits of smaller, less complex public companies ("smaller, less complex companies"). If used appropriately, it can help auditors design and execute audit strategies that will achieve the objectives of Auditing Standard No. 5. This publication is not, however, a rule of the Board and does not establish new requirements. All audits of internal control over financial reporting—regardless of the size of the company—must comply with the requirements of Auditing Standard No. 5. Also, this publication does not address all of the requirements and direction in Auditing Standard No. 5 or all issues that may be encountered in audits of smaller, less complex companies.

In adopting Auditing Standard No. 5, one of the Board's objectives was to make the audit of management's assessment of the effectiveness of internal control over financial reporting ("audit of internal control") more clearly scalable for smaller, less complex companies. Thus, the standard contains direction to auditors on scaling the audit based on a company's size and complexity. This publication discusses how that direction may be applied to audits of smaller, less complex companies, including smaller companies that are not complex, and how auditors may address some of the challenges that might arise in audits of those companies.

Development of This Publication

This publication was developed by the staff of the Board's Office of the Chief Auditor ("OCA"). To develop the information in this publication, OCA organized a working group composed of auditors who have experience with audits of internal control over financial reporting in smaller, less complex companies. These auditors identified issues that pose particular challenges in auditing internal control in smaller, less complex companies. The auditors provided insights and examples based on their experiences in addressing these issues, and they assisted in drafting a preliminary version of the guidance. In developing that preliminary guidance, OCA also consulted with financial executives from smaller public companies, who helped the staff evaluate whether it appropriately reflected the smaller, less complex company environment.

The staff issued the preliminary guidance for public comment on October 17, 2007, and received 23 comments. After considering those comments, the staff made certain changes in this final version that clarify or enhance the guidance.

¹ PCAOB Release 2007-005A, "Auditing Standard No. 5 – *An Audit Of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements and Related Independence Rule and Conforming Amendments*" (June 12, 2007)

Appendix B to this publication discusses comments received and related changes.

Internal Control Examples in this Publication

This publication discusses certain types of controls and provides examples of those controls to help auditors understand the types of controls that might be encountered in the audit of a smaller, less complex company and to provide a context for the discussion of audit strategies for evaluating the effectiveness of those controls. The discussions and examples of controls do not establish internal control requirements and are not intended as guidance to management regarding establishing or evaluating internal control over financial reporting.

Chapter 1

Scaling the Audit for Smaller, Less Complex Companies

Auditing Standard No. 5 establishes requirements and provides direction that applies when an auditor is engaged to perform an audit of internal control over financial reporting that is integrated with an audit of the financial statements.

The complexity of a company is an important factor in the auditor’s risk assessment and determination of the necessary audit procedures. Auditing

² Auditing Standard No. 5 states that the auditor should use the same internal control framework that management uses in its assessment of internal control. Although this publication uses certain terms and concepts from COSO’s *Internal Control—Integrated Framework*, the principles in this publication could be applied to other internal control frameworks.

Standard No. 5 provides direction on scaling the audit of internal control based on the size and complexity of a company. Scaling is important for audits of internal control of all companies, especially smaller, less complex companies. This chapter highlights principles for scaling the audit of internal control over financial reporting set forth in Auditing Standard No. 5 and discusses considerations for applying the principles in audits of smaller, less complex companies.

The audit of internal control should be integrated with the audit of the financial statements, so the auditor must plan and perform the work to achieve the objectives of both audits.¹ This direction applies to all aspects of the audit, and it is particularly relevant to tests of controls. This chapter discusses testing of controls in an integrated audit of a smaller, less complex company. Appendix A illustrates an audit approach for the integrated audit.

Scaling the Audit of Internal Control

Scaling the audit of internal control involves tailoring the audit approach to fit the individual facts and circumstances of the company. Many smaller companies have less complex operations, and they typically share many of the following attributes:

- Fewer business lines
- Less complex business processes and financial reporting systems
- More centralized accounting functions
- Extensive involvement by senior management in the day-to-day activities of the business
- Fewer levels of management, each with a wide span of control.²

The attributes of a smaller, less complex company can affect the particular risks that could result in material misstatement of the company's financial statements and the controls that a company might establish to address those risks. Consequently, these attributes have a pervasive effect on the audit of internal control, including assessing risk, determining significant accounts and disclosures and relevant assertions, selecting controls to test, and testing the design and operating effectiveness of controls. The following are examples of internal control-related matters that might be particularly affected by the attributes of a smaller, less complex company—

- *Use of entity-level controls to achieve control objectives.* In smaller, less complex companies, senior management often is involved in many day-to-day business activities and performs duties that are important to effective internal control over financial reporting. Consequently, the auditor's evaluation of entity-level controls can provide a substantial amount of evidence about the effectiveness of internal control over financial reporting. Chapter 2 discusses methods of evaluating entity-level controls and explains how that evaluation can affect the testing of other controls.
- *Risk of management override.* The extensive involvement of senior management in day-to-day activities and fewer levels of management can provide additional opportunities for management to override controls or intentionally misstate the financial statements in smaller, less complex companies. In an integrated audit, the auditor should consider the risk of management override and company actions to address that

¹ See Auditing Standard No. 5, paragraphs 6 and 7.

² See Auditing Standard No. 5, paragraph 9.

risk in connection with assessing the risk of material misstatement due to fraud and evaluating entity-level controls.³ Chapter 3 discusses these considerations in more detail.

- *Implementation of segregation of duties and alternative controls.* By their nature, smaller, less complex companies have fewer employees, which limits the opportunity to segregate incompatible duties. Smaller, less complex companies might use alternative approaches to achieve the objectives of segregation of duties, and the auditor should evaluate whether those alternative controls achieve the control objectives.⁴ This is discussed in Chapter 4.
- *Use of information technology (IT).* A smaller, less complex company with less complex business processes and centralized accounting operations might have less complex information systems that make greater use of off-the-shelf packaged software without modification. In the areas in which off-the-shelf software is used, the auditor's testing of information technology controls might focus on the application controls built into the pre-packaged software that management relies on to achieve its control objectives and the testing of IT general controls might focus on those controls that are important to the effective operation of the selected application controls. Chapter 5 discusses IT controls in more detail.
- *Maintenance of financial reporting competencies.* Smaller, less complex companies might address their needs for financial reporting competencies through means other than internal staffing, such as engaging outside professionals. The auditor may take into consideration the use of those third parties when assessing competencies of the company. Chapter 6 discusses the evaluation of financial reporting competencies in more detail.
- *Nature and extent of documentation.* A smaller, less complex company typically needs less formal documentation to run the business, including maintaining effective internal control over financial reporting. The auditor may take that into account when selecting controls to test and planning tests of controls. Chapter 7 discusses this in more detail.

In some audits of internal control, auditors might encounter companies with numerous or pervasive control deficiencies. Smaller, less complex companies can be particularly affected by ineffective entity-level controls, as these companies typically have fewer employees and fewer process-level controls. The auditor's strategy can be influenced by the nature of the control deficiencies and factors such as the availability of audit evidence and the effect of the deficiencies on other controls. Chapter 8 discusses these situations in more detail.

Tests of Controls in an Integrated Audit

Auditing Standard No. 5 provides direction on selecting controls to test and testing controls in an audit of internal control. The standard also provides direction on testing controls for the audit of the financial statements. The following paragraphs discuss how the auditor might apply the directions in Auditing Standard No. 5 to an audit of a smaller, less complex company.

³ See Auditing Standard No. 5, paragraphs 14 and 24.

⁴ See Auditing Standard No. 5, paragraph 42.

Selection of Controls to Test

Appropriate selection of controls helps focus the auditor's testing on those controls that are important to the auditor's conclusion about whether the company's internal control over financial reporting is effective. The decision about whether to select a control for testing depends on which controls, individually or in combination, sufficiently address the assessed risk of misstatement in a given relevant assertion rather than on how the control is labeled (e.g., entity-level control, transaction-level control, control activity, monitoring control, preventive control, or detective control). A practical starting point for identifying these controls is to consider the controls that management relies on to achieve its objectives for reliable financial reporting.

Besides the overriding consideration of whether a control addresses the risk of misstatement, as a practical matter, the auditor might also consider the following factors when selecting controls to test:

- Is the control likely to be effective?
- What evidence exists regarding operation of the control?

When selecting controls to test, the auditor could seek to select controls that are more likely to be effective in addressing the risk of misstatement in one or more relevant assertions.⁵ If none of the controls that are intended to address a risk for a relevant assertion is likely to be effective, the auditor can take that into account in determining the evidence needed to support a conclusion about the effectiveness of controls for this assertion.⁶ Chapter 8 discusses in more detail how auditors could design their audit strategies in a situation when internal control over financial reporting is likely to be ineffective because of the presence of pervasive control deficiencies that result in one or more material weaknesses.

The auditor needs to be able to obtain enough evidence about a control's operation to conclude on its effectiveness. The auditor could take into account the nature and availability of audit evidence when selecting controls to test and determining the nature, timing, and extent of tests of controls. For example, if two or more controls adequately address the risk of misstatement for a relevant assertion, the auditor may select the control for which evidence of operating effectiveness can be obtained more readily. Chapter 7 discusses documentation and audit evidence in more detail.

Tests of Operating Effectiveness of Controls

Historically, the approach for financial statement audits of smaller, less complex companies has been to focus primarily on testing accounts and disclosures, with little or no testing of controls. The internal control reporting requirements under Sections 103 and 404 of the Sarbanes-Oxley Act of 2002 (the "Act") give auditors the opportunity to re-consider their traditional approach to the financial statement audit portion of the integrated audit. The principles in Auditing Standard No. 5 also give auditors latitude to determine an appropriate testing strategy to—

- (a) Obtain sufficient evidence to support the auditor's opinion on internal control over financial reporting as of year-end, and

⁵ There might be more than one control that addresses the assessed risk of misstatement for a particular relevant assertion; conversely, one control might address the assessed risk of misstatement to more than one relevant assertion. It is neither necessary to test all controls related to a relevant assertion nor necessary to test redundant controls, unless redundancy is itself a control objective. See Auditing Standard No. 5, paragraph 40.

⁶ Auditing Standard No. 5, paragraph 47, indicates that, generally, less evidence is needed to support a conclusion that controls are not operating effectively.

- (b) Obtain sufficient evidence to support the auditor's control risk assessments in the audit of the financial statements.⁷

To express an opinion on internal control over financial reporting taken as a whole, the auditor must obtain evidence about the effectiveness of selected controls over all relevant financial statement assertions. Because the auditor's opinion on internal control over financial reporting is as of a point in time, Auditing Standard No. 5 indicates that he or she should obtain evidence that internal control over financial reporting has operated effectively for a sufficient period of time, which may be less than the entire period (ordinarily one year) covered by the company's financial statements.⁸

In an audit of financial statements, the objective of tests of controls is to assess control risk. To assess control risk at less than the maximum, the auditing standards require the auditor to obtain evidence that the relevant controls operated effectively during the entire period upon which the auditor plans to place reliance on those controls.⁹ However, the auditor is not required to assess control risk at less than the maximum for all relevant assertions, and, for a variety of reasons, the auditor may choose not to do so.¹⁰

The auditor's assessment of control risk at the maximum for one or more relevant assertions in an audit of financial statements does not necessarily preclude the auditor from issuing an unqualified opinion in an audit of internal control. The objectives of the two audits are not identical. The auditor could obtain sufficient evidence to support his or her opinion on internal control over financial reporting, even if the auditor decides not to test controls over the entire period of reliance to support a control risk assessment below the maximum. However, if the auditor assesses control risk at the maximum because of identified control deficiencies, the auditor should evaluate the severity of the deficiencies, individually or in combination, to determine whether a material weakness exists.¹¹

The auditor's decision about relying on controls in an audit of financial statements may depend on the particular facts and circumstances. In some areas, the auditor might decide to rely on certain controls to reduce the substantive testing of accounts and disclosures. For other areas, the auditor might perform primarily substantive tests of the assertions without relying on controls. For example, the auditor might test a company's controls over billings and cash receipts processing to cover the entire period of reliance in order to reduce the extent of confirmation of accounts receivable balances but might perform primarily substantive tests of the allowance for doubtful accounts. In this case, the auditor might perform the tests of controls over the allowance for doubtful accounts only as necessary for the audit of internal control over financial reporting.

For some significant accounts, the auditor might decide that a relevant assertion can be tested effectively and efficiently through substantive procedures without relying on controls. For example, the auditor might decide to confirm an outstanding loan payable with the lender rather than rely on controls. In that situation, the auditor may test controls of the relevant assertions only as necessary to support his or her opinion on the company's internal control over financial reporting at year-end.

⁷ See Auditing Standard No. 5, paragraph 7.

⁸ See Auditing Standard No. 5, paragraph B2.

⁹ See paragraph B4 of Auditing Standard No. 5 and paragraph .66 of AU sec. 319, *Consideration of Internal Control in a Financial Statement Audit*.

¹⁰ See Auditing Standard No. 5, paragraph B4, and AU sec. 319.65.

¹¹ See Auditing Standard No. 5, paragraph 62.

To obtain evidence about whether a selected control is effective, the control must be tested; the effectiveness of a control cannot be inferred from the absence of misstatements detected by substantive procedures. The absence of misstatements detected by substantive procedures, however, is one of a number of factors that inform the auditor's risk assessments in determining the testing necessary to conclude on the effectiveness of a control.¹² See the section entitled Specific Responses—Substantive Procedures and Tests of Controls in Appendix A to this publication for more discussion on this topic.

Chapter 2

Evaluating Entity-Level Controls

An important aspect of performing an audit of internal control is the process of identifying and evaluating entity-level controls. This chapter discusses entity-level controls and explains how they can affect the nature, timing, and extent of the auditor's procedures in an audit of internal control for a smaller, less complex company.

For the purposes of this discussion, entity-level controls are controls that have a pervasive effect on a company's internal control. These controls include¹ –

- Controls related to the control environment;
- Controls over management override;
- The company's risk assessment process;
- Centralized processing and controls, including shared service environments;
- Controls to monitor results of operations;
- Controls to monitor other controls, including activities of the audit committee² and self-assessment programs;³
- Controls over the period-end financial reporting process; and
- Policies that address significant business control and risk management practices.

In smaller, less complex companies, senior management often is involved in many day-to-day business activities and performs many controls—including entity-level controls—that are important to effective internal control over financial reporting. When this is the case, the auditor's evaluation of entity-level controls can be an important source of evidence about the effectiveness of internal control over financial reporting.

Effective controls related to the control environment and controls that address the risk of management override are particularly important to the effective functioning of controls performed by senior management. Chapter 3 discusses the auditor's evaluation of the risk of management override and mitigating actions.

¹² See Auditing Standard No. 5, paragraphs 47, 58, and B9.

¹ See Auditing Standard No. 5, paragraph 24.

² If no audit committee exists, all references to the audit committee in this publication apply to the entire Board of Directors of the company. See 15 U.S.C. 78c(a)58 and 7201(a)(3).

³ Some smaller, less complex companies might have an internal audit function, especially in regulated industries. If the activities of the internal audit function include controls to monitor other controls, those controls also are entity-level controls.

Auditors might find that limited formal documentation is available regarding the operation of some entity-level controls. Chapter 7 discusses how the auditor can obtain evidence about controls when less formal documentation is available.

Evaluation of Entity-Level Controls and Testing of Other Controls

Auditing Standard No. 5 requires the auditor to test those entity-level controls that are important to the auditor's conclusion about whether the company has effective internal control over financial reporting. This includes evaluating the company's control environment and period-end financial reporting process.⁴

Identifying Entity-Level Controls

The process of identifying relevant entity-level controls could begin with discussions between the auditor and appropriate management personnel for the purpose of obtaining a preliminary understanding of each component of internal control over financial reporting (i.e., control environment, risk assessment, control activities, monitoring, and information and communication).

While evaluating entity-level controls, auditors might identify controls that are capable of preventing or detecting misstatements in the financial statements. The period-end financial reporting process and management's monitoring of the results of operations are potential sources of such controls.

Assessing the Precision of Entity-Level Controls

Auditing Standard No. 5 indicates that entity-level controls vary in nature and precision—

- Some entity-level controls, such as certain control environment controls, have an important, but indirect, effect on the likelihood that a misstatement will be detected or prevented on a timely basis. These controls might affect the other controls the auditor selects for testing and the nature, timing, and extent of procedures the auditor performs on other controls.
- Some entity-level controls monitor the effectiveness of other controls. Such controls might be designed to identify possible breakdowns in lowerlevel controls, but not at a level of precision that would, by themselves, sufficiently address the assessed risk that misstatements to a relevant assertion will be prevented or detected on a timely basis. These controls, when operating effectively, might allow the auditor to reduce the testing of other controls. [See Example 2-1.]
- Some entity-level controls might be designed to operate at a level of precision that would adequately prevent or detect on a timely basis misstatements to one or more relevant assertions. If an entity-level control sufficiently addresses the assessed risk of misstatement, the auditor need not test additional controls relating to that risk.⁵ [See Example 2-2.]

As noted previously, the key consideration in assessing the level of precision is whether the control is designed in a manner to prevent or detect on a timely basis misstatements in one or more assertions that could cause the financial statements to be materially misstated and whether such control is operating

⁴ See Auditing Standard No. 5, paragraph 22, and 25–27.

⁵ See Auditing Standard No. 5, paragraph 23.

effectively.⁶ Factors that auditors might consider when judging the level of precision of an entity-level control include the following:

- *Purpose of the control.* A procedure that functions to prevent or detect misstatements generally is more precise than a procedure that merely identifies and explains differences.
- *Level of aggregation.* A control that is performed at a more granular level generally is more precise than one performed at a higher level. For example, an analysis of revenue by location or product line normally is more precise than an analysis of total company revenue.
- *Consistency of performance.* A control that is performed routinely and consistently generally is more precise than one performed sporadically.
- *Correlation to relevant assertions.* A control that is indirectly related to an assertion normally is less likely to prevent or detect misstatements in the assertion than a control that is directly related to an assertion.
- *Criteria for investigation.* For detective controls, the threshold for investigating deviations or differences from expectations relative to materiality is an indication of a control's precision. For example, a control that investigates items that are near the threshold for financial statement materiality has less precision and a greater risk of failing to prevent or detect misstatements that could be material than a control with a lower threshold for investigation.
- *Predictability of expectations.* Some entity-level controls are designed to detect misstatements by using key performance indicators or other information to develop expectations about reported amounts. The precision of those controls depends on the ability to develop sufficiently precise expectations to highlight potentially material misstatements.

When forming an opinion on the effectiveness of a company's internal control over financial reporting, the auditor should evaluate evidence obtained from all sources, including misstatements detected during the financial statement audit.⁷ Evidence regarding detected misstatements also might be relevant in assessing the level of precision of entity-level controls.

Effect of Entity-Level Controls on Testing of Other Controls

The auditor's evaluation of entity-level controls can result in increasing or decreasing the testing that the auditor otherwise might have performed on other controls. For example, if the auditor has designed an audit approach with an expectation that certain entity-level controls (e.g., controls in the control environment) will be effective and those controls are not effective, the auditor might re-evaluate the planned audit approach and decide to expand his or her audit procedures.

⁶ The auditor should test the design effectiveness of controls by determining whether the company's controls, if they are operated as prescribed by persons possessing the necessary authority and competence, satisfy the company's control objectives and can effectively prevent or detect errors or fraud that could result in material misstatement of the financial statements. The auditor should test the operating effectiveness of a control by determining whether the control is operating as designed and whether the person performing the control has the necessary authority and competence to perform the control effectively. See Auditing Standard No. 5, paragraphs 42 and 44.

⁷ See Auditing Standard No. 5, paragraph 71.

On the other hand, the auditor's evaluation of some entity-level controls can result in a reduction of his or her testing of other controls, such as controls over corresponding relevant assertions. The degree to which the auditor might be able to reduce testing of controls over relevant assertions in such cases depends on the precision of the entity-level controls.

Example 2-1 – Monitoring the Effectiveness of Other Controls

Scenario: A small public video game developer conducts business in the United States and other countries, requiring the company to maintain a multitude of bank accounts. A staff accountant is charged with performing bank reconciliations for the accounts according to a predetermined schedule (some of the accounts have a different closing date). Through inquiries of management, the auditor learns that the company's chief financial officer ("CFO"), who is an experienced accountant, reviews on a monthly basis the bank reconciliations prepared by the staff accountant as a means to determine—

- whether reconciliations are being prepared on a timely basis,
- the nature of reconciling items identified through the process, and
- whether reconciling items are investigated and resolved on a timely basis.

Audit Approach: In this example, the purpose of the control is one of the factors that the auditor considers in assessing precision of the CFO's review. The auditor has noted that the purpose of the CFO's review is to check that the staff has performed the reconciliations as described above. Therefore, the auditor does not expect the CFO's review of the reconciliations to be sufficiently precise to detect misstatements by itself. However, the CFO's review could still influence the auditor's assessment of risk because it provides additional information about the nature and consistency of the reconciliation procedures. The auditor obtains evidence about the CFO's review through inquiry and document inspection, evaluates the review's effectiveness, and determines the amount of direct testing of the reconciliation controls that is needed based on the assessed level of risk. If the auditor concludes that the CFO's review is effective, she could reduce the direct testing of the reconciliation controls, absent other indications of risk.

Example 2-2 – Entity-Level Controls Related to Payroll Processing

Scenario: A manufacturer of alternative fuel products and systems for the transportation market has union labor, supervisors, managers, and executives. All plants run two shifts six days a week, with each having approximately the same number of employees.

The chief financial officer (“CFO”) has been with the company for 10 years and thoroughly understands its business processes, including the payroll process, and reviews weekly payroll summary reports prepared by the centralized accounting function. With the company’s flat organizational design and smaller size, the CFO’s background with the company and his understanding of the seasons, cycles, and workflows, and close familiarity with the budget and reporting processes, the CFO quickly identifies any sign of improprieties with payroll and their underlying cause—whether related to a particular project, overtime, hiring, layoffs, and so forth. The CFO investigates as needed to determine whether misstatements have occurred and whether any internal control has not operated effectively, and takes corrective action.⁸ Based on the results of audit procedures relating to the control environment and controls over management override, the auditor observes that the CFO demonstrates integrity and a commitment to effective internal control over financial reporting.

Audit Approach: The auditor evaluates the effectiveness of the CFO’s reviews, including the precision of those reviews. She inquires about the CFO’s review process and obtains other evidence of the review. She notes that the CFO’s threshold for investigating significant differences from expectations is adequate to detect misstatements that could cause the financial statements to be materially misstated. She selects some significant differences from expectations that were flagged by the CFO and determines that the CFO appropriately investigated the differences to determine whether the differences were caused by misstatements. Also, in considering evidence obtained throughout the audit, the auditor observes that the results of the financial statement audit procedures did not identify likely misstatements in payroll expense.

The auditor decides that the reviews could detect misstatements related to payroll processing because the CFO’s threshold for investigating significant differences from expectations is adequate. However, she determines that the control depends on reports produced by the company’s IT system, so the CFO’s review can be effective only if controls over the completeness and accuracy of those reports are effective.

After performing the tests of the relevant computer controls, the auditor concludes that the review performed by the CFO, when coupled with relevant controls over the reports, meets the control objectives for the relevant aspects of payroll processing described above. (See Chapter 5 for a discussion of tests of controls over such reports.)

⁸ Adapted from the COSO Small Companies Guidance, Volume II: Guidance, page 90.

Chapter 3

Assessing the Risk of Management Override and Evaluating Mitigating Actions

The risk of management override of controls exists in all organizations, but the extensive involvement of senior management in day-to-day activities and fewer levels of management can provide additional opportunities for management to override controls in smaller, less complex companies. Company actions to mitigate the risk of management override are important to the consideration of the effectiveness of internal control over financial reporting.

In an integrated audit, the auditor should consider the risk of management override in connection with assessing the risk of material misstatement due to fraud, as he or she evaluates mitigating actions in connection with the evaluation of entity-level controls and selecting other controls to test.¹ This chapter discusses the auditor's consideration of the risk of management override of internal control and evaluation of actions that companies take to mitigate that risk.

Assessing the Risk of Management Override

AU sec. 316, *Consideration of Fraud in a Financial Statement Audit*, requires the auditor to assess the risk of material misstatement due to fraud ("fraud risk"). As part of that assessment, the auditor is directed to perform the following procedures to obtain information to be used in identifying fraud risks, which includes procedures to assess the risk of management override² —

- *Conducting an engagement team discussion regarding fraud risks.* This discussion includes brainstorming about how and where management could override controls to engage in or conceal fraudulent financial reporting.
- *Making inquiries of management, the audit committee, and others in the company to obtain their views about the risks of fraud and how those risks are addressed.* These inquiries can provide information about the possibility of management override of controls.
- *Considering fraud risk factors.* Fraud risk factors include events or conditions that indicate incentives and pressures for management to override controls, opportunities for management override, and attitudes or rationalizations that enable management to justify override of controls.

After identifying fraud risks, the auditor should assess those risks, taking into account an evaluation of the company's programs and controls that are intended to address those risks.³

Because of the characteristics of fraud, the auditor's exercise of professional skepticism is particularly important when considering the risk of material misstatement due to fraud, including the risk of management override of controls.

¹ See Auditing Standard No. 5, paragraph 14.

² See AU sec. 316.14–34.

³ See AU sec. 316.43–45.

Evaluating Mitigating Controls

Auditing Standard No. 5 directs the auditor to evaluate whether the company's controls sufficiently address identified risks of material misstatement due to fraud and controls intended to address the risk of management override of other controls as part of the evaluation of entity-level controls.⁴

Smaller, less complex companies can take a number of actions to address the risk of management override. The following are examples of some of the controls that might address the risk of management override—

- Maintaining integrity and ethical values;
- Active oversight by the audit committee;
- Maintaining a whistleblower program; and
- Controls over certain journal entries.

When assessing a company's anti-fraud programs and controls, the auditor should evaluate whether the company has appropriately addressed the risk of management override.⁵ Often, a combination of actions might be implemented to address the risk of management override.

Evaluating Integrity and Ethical Values

An important part of an effective control environment is sound integrity and ethical values, particularly of top management, which are communicated and practiced throughout the company. A code of conduct or ethics policy is one way that a company can communicate its policies with respect to ethical behavior. This type of control can be effective if employees are aware of the company's policies and observe the policies in practice.

Auditors should evaluate integrity and ethical values as part of the assessment of the control environment component of internal control.⁶ One approach for testing the effectiveness of the company's communications regarding integrity and ethical values is to gain an understanding of what the company believes it is communicating to employees and interview employees to determine if they are aware of the existence of the company's policies for ethical behavior and what they understand those policies to be. A discussion with employees regarding observed behaviors can assist the auditor further in understanding management's past actions and determining whether management's behavior demonstrates and enforces the principles in its code of conduct. The auditor's experience with the company also can be an important source of information about whether management demonstrates integrity and ethical values in its business practices and supports the achievement of effective internal control in its day-to-day activities.

Evaluating Audit Committee Oversight

An active and independent audit committee evaluates the risk of management override, including identifying areas in which management override of internal control could occur, and assesses whether those risks are appropriately addressed within the company. As part of their oversight duties, the audit committee might perform duties such as meeting with management to discuss

⁴ See Auditing Standard No. 5, paragraph 14.

⁵ See Auditing Standard No. 5, paragraphs 14 and 24.

⁶ See Auditing Standard No. 5, paragraph 25.

significant accounting estimates and reviewing the reasonableness of significant assumptions and judgments.⁷

The consideration of the effectiveness of the audit committee's oversight is part of the evaluation of the control environment. In connection with the auditor's inquiries of the audit committee, required by AU sec. 316.22, the auditor may interview audit committee members to determine their level of involvement and their activities regarding the risk of management override. For example, the auditor might read minutes of audit committee discussions on matters related to the committee's oversight or might observe some of those discussions if the auditor attends the meetings in connection with the audit. In addition, the auditor can examine evidence of the board of directors' or audit committee's activities that address the risk of management override, such as monitoring of certain transactions.

Evaluating Whistleblower Programs

A whistleblower program provides an outlet for employees or others to report behaviors that might have violated company policies and procedures, including management override of controls. A key aspect of an effective whistleblower program is the appropriateness of responses to concerns expressed by employees through the program. The audit committee may review reports of significant matters and consider the need for corrective actions.⁸

Audit procedures relating to a whistleblower program are intended to assess whether the program is appropriately designed, implemented, monitored, and maintained. Such procedures might include inquiry of employees, inspection of communications to employees about the program, and, if tips or complaints have been received, follow-up procedures to evaluate whether remedial actions were taken as necessary.

Evaluating Controls over Journal Entries

Controls that prevent or detect unauthorized journal entries can reduce the opportunity for the quarterly and annual financial statements to be intentionally misstated. Such controls might include, among other things, restricting access to the general ledger system, requiring dual authorizations for manual entries, or performing periodic reviews of journal entries to identify unauthorized entries.

As part of obtaining an understanding of the financial reporting process, the auditor should consider how journal entries are recorded in the general ledger and whether the company has controls that would either prevent unauthorized journal entries from being made to the general ledger or directly to the financial statements or detect unauthorized entries.⁹ Tests of controls over journal entries could be performed in connection with the testing of journal entries required by AU sec. 316.

⁷ When a company does not have an audit committee, the entire board of directors is considered the audit committee under Section 2(b)(3) of the Act. In such circumstances, Principle 2, *Board of Directors* of COSO Small Companies Guidance states, "[w]hen a board chooses not to have an audit committee, the full board performing the activities described should have a sufficient number of independent members."

⁸ Section 10A(m)(4) of the Securities Exchange Act of 1934 requires audit committees to "establish procedures for (A) the receipt, retention, and treatment of complaints received by the issuer regarding accounting, internal accounting controls, or auditing matters; and (B) the confidential, anonymous submission by employees of the issuer of concerns regarding questionable accounting or auditing matters." The SEC has implemented this provision by adopting rules directing the national securities exchanges and national securities associations to prohibit the listing of any security of an issuer that is not in compliance with the audit committee requirements mandated by the Act.

⁹ See Auditing Standard No. 5, paragraphs 26 and 34; AU sec. 316.58–60.

Considering the Effects of Other Evidence

The auditor might identify indications of management override in other phases of the integrated audit. For example, AU sec. 316 requires the auditor to perform procedures in response to the risk of management override, including examining journal entries for evidence of fraud, reviewing accounting estimates for bias, and evaluating the business rationale for significant, unusual transactions.¹⁰ Also, if the auditor performs walkthroughs during the audit of internal control,¹¹ he or she could obtain information about potential management override by asking employees about their knowledge of override. Also, the auditor might identify indications of management override when evaluating the results of tests of controls or other audit procedures.

If the auditor identifies indications of management override of controls, he or she should take such indications into account when evaluating the risk of override and the effectiveness of mitigating actions.¹²

Example 3-1 – Audit Committee Oversight

Scenario: The audit committee of a small utility company discusses in executive session at least annually its assessment of the risks of management override of internal control, including motivations for management override and how those activities could be concealed. The audit committee performs the following procedures to address the risk of management override: (a) reviews the reasonableness of management's assumptions and judgments used to develop significant estimates; and (b) reviews the functioning of the company's whistleblower process and related reports, and from time to time, inquires of managers not directly responsible for financial reporting (including personnel in sales, procurement, and human resources, among others), obtaining information regarding concerns about ethics or indications of management override of internal controls.¹³

Audit approach: In this situation, the auditor can draw upon several sources of evidence to evaluate the audit committee's oversight. The auditor might attend selected meetings of the audit committee where the risks of override and whistleblower programs are discussed or review minutes of meetings where those matters are discussed. In connection with its inquiries of the audit committee about the risk of fraud, as required by AU sec. 316, the auditor can discuss matters relating to the risk of override, including how the audit committee assesses the risk of management override, what information, if any, the audit committee has obtained about possible management override, and how the audit committee's concerns about the risk of management override have been addressed. This information can inform the auditor's consideration of the risk of management override and the testing of mitigating controls.

¹⁰ See AU sec. 316.57–.66.

¹¹ Auditing Standard No. 5, paragraph 34, sets forth the objectives that should be achieved to further understand likely sources of misstatement and as part of selecting controls to test. The standard states that performing walkthroughs will frequently be the most effective way to achieve the objectives in paragraph 34. Paragraphs 37–38 of Auditing Standard No. 5 provide direction on walkthroughs.

¹² See Auditing Standard No. 5, paragraph 15.

¹³ Adapted from the COSO Small Companies Guidance, Volume II: Guidance, page 26.

Chapter 4

Evaluating Segregation of Duties and Alternative Controls

Segregation of duties refers to dividing incompatible functions among different people to reduce the risk that a potential material misstatement of the financial statements would occur without being prevented or detected. Assigning different people responsibility for authorizing transactions, recording transactions, reconciling information, and maintaining custody of assets reduces the opportunity for any one employee to conceal errors or perpetrate fraud in the normal course of his or her duties.¹

When a person performs two or more incompatible duties, the effectiveness of some controls might be impaired. For example, reconciliation procedures may not effectively meet the control objectives if they are performed by someone who also has responsibilities for transaction recording or asset custody.

Smaller, Less Complex Companies' Approach to Segregation of Duties

By their nature, smaller, less complex companies have fewer employees, which limits their opportunities to implement segregation of duties. Due to these personnel restrictions, smaller, less complex companies might approach the control objectives relevant to segregation of duties in a different manner from larger, more complex companies. Despite personnel limitations, some smaller, less complex companies might still divide incompatible functions by using the services of external parties. Other smaller, less complex companies might implement alternative controls intended to achieve the same objectives as segregation of duties for certain processes.

This chapter discusses the auditor's evaluation of the company's approach to achieving the objectives of segregation of duties at a smaller, less complex company.

Audit Strategy Considerations

It is generally beneficial for the auditor and the company to identify concerns related to segregation of duties early in the audit process to allow the auditor to design procedures that effectively respond to those concerns. Also, management might have already identified, as part of its risk assessment, risks relating to inadequate segregation of duties and alternative controls that respond to those risks. Where walkthroughs are performed, those procedures can help identify matters related to segregation of duties.

When management implements an alternative control or combination of controls that address the same objectives as segregation of duties, the auditor should evaluate whether the alternative control or controls effectively meet the related control objectives.² The auditor's approach to evaluating those alternative control or controls depends on the control objectives, the nature of the controls, and the associated risks. The following sections of this chapter discuss how the auditor can evaluate common approaches to the objectives of segregation of duties.

¹ See the COSO Small Companies Guidance, Volume II: Guidance, page 5, for discussion of management's actions relevant to segregation of duties issues.

² See Auditing Standard No. 5, paragraph 42.

Use of External Resources

Some small companies use external parties to assist with some of their financial reporting-related functions. Use of external parties also can help achieve segregation of certain incompatible duties without investing in additional full-time resources.

A company might use one or more types of external-party arrangements in meeting its control objectives. Consultants, other professionals, or temporary employees can assist companies in performing some controls or other duties. For more complex or specialized portions of internal control, such as cash receipts handling, payroll processing, or securities recordkeeping, the company might use an external party to perform an entire function.

When controls over a relevant assertion depend on the use of an external party to perform a particular function, the auditor could evaluate that function in relation to the company's other relevant controls and procedures. The audit approach used with respect to the externally performed function depends on the circumstances. For those controls that are documented or are observable by the auditor (e.g., controls performed by external professionals at the company's premises), the auditor's evaluation may be similar to what he or she could perform for the company's other controls. For some externally performed functions, the direction relating to use of service organizations may be relevant.³

Management Oversight and Review

A smaller, less complex company might address some segregation of duties matters through alternative controls involving management oversight and review activities, e.g., reviewing transactions, checking reconciliations, reviewing transaction reports, or taking periodic asset counts.⁴ Many of those types of management activities could be entity-level controls. Chapter 2 discusses the auditor's evaluation of entity-level controls at a smaller, less complex company.⁵ Example 4-1 below, and Example 5-1 in Chapter 5 illustrate the testing of certain types of alternative controls.

When the auditor applies a top-down approach to select the controls to test, starting at the financial statement level and evaluating entity-level controls,⁶ the auditor might identify entity-level controls that are designed to operate at a level of precision to effectively address the risk of misstatement for one or more relevant assertions. In those cases, the auditor could select and test those entity-level controls rather than test the process controls that could be affected by inadequate segregation of duties.

³ See Auditing Standard No. 5, paragraphs B17 – B27, for discussion of the auditor's consideration of a company's use of a service organization in an audit of internal control.

⁴ See the COSO Small Companies Guidance, Volume II: Guidance, page 5, for examples of the types of management actions that might be used as alternatives to segregation of duties.

⁵ As discussed in Chapter 2, controls related to the control environment and controls over the risk of management override are particularly important to the effective functioning of the controls performed by senior management. Chapter 3 discusses assessing the risk of management override and evaluating mitigating controls.

⁶ See Auditing Standard No. 5, paragraph 21.

Example 4-1 – Alternative Controls over Inventory

Scenario: A provider of office furnishings and equipment uses a locked storeroom to store certain key components. The person responsible for the components has access to both the storeroom and the related accounting records. To address the risks related to undetected loss of components, the manager responsible for purchasing performs periodic spot-checks of the components and reconciles them to the general ledger in addition to the inventory ledger. The components also are included in the company's year-end inventory count. IT access controls are implemented to prevent the person responsible for the components from entering transactions or modifying related account balances in the general ledger.⁷

Audit approach: The auditor observes the company's year-end inventory counting process. He inspects documentation for some of the periodic spot-checks and the related reconciliations. For discrepancies in the counts or reconciliations inspected, he performs inquiries and inspects the accounting records to determine whether those items were appropriately resolved. Relevant IT access controls are evaluated in connection with the evaluation of IT general controls. (See Chapter 5.)

Chapter 5

Auditing Information Technology Controls in a Less Complex Information Technology Environment

A company's use of information technology (IT) can have a significant effect on the audit of internal control. The IT environment is a consideration in the auditor's risk assessments, selection of controls to test, tests of controls, and other audit procedures.

This chapter discusses the auditor's evaluation of IT controls in a smaller company with a less complex IT environment. It explains how the auditor could decide which IT controls to evaluate and how the auditor could evaluate those controls. In addition, it provides an overview of the major categories of IT controls and related testing considerations for a smaller, less complex IT environment.

Characteristics of Less Complex IT Environments

In smaller companies, less complex IT environments tend to have the following characteristics:

- *Transaction processing.* Data inputs can be readily compared or reconciled to system outputs. Management tends to rely primarily on manual controls over transaction processing.
- *Software.* The company typically uses off-the-shelf packaged software without programming modification. The packaged software requires relatively little user configuration to implement.¹
- *Systems configurations and security administration.* Computer systems tend to be centralized in a single location, and there are a limited number of interfaces between systems. Access to systems is typically managed by a limited number of personnel.

⁷ Adapted from the COSO Small Companies Guidance, Volume II: Guidance, page 60.

¹ Significant user configuration might create additional risks that require additional controls.

- *End-user computing.* The company is relatively more dependent on spreadsheets and other user-developed applications, which are used to initiate, authorize, record, process, and report the results of business operations, and, in many instances, perform straightforward calculations using relatively simple formulas.

The complexity of the IT environment has a significant effect on the risks of misstatement and the controls implemented to address those risks. The auditor's approach in an environment with the preceding characteristics may be different from the approach in a more complex IT environment.

Some smaller, less complex companies outsource certain of their IT functions to service organizations. Auditing Standard No. 5, paragraphs B17–B27, provides direction on the auditor's consideration of a company's use of a service organization in an audit of internal control.

Determining the Scope of the Evaluation of IT Controls

The following matters affect the scope of the auditor's evaluation of IT controls in a smaller company with a less complex IT environment—

- The risks, i.e., likely sources of misstatement, in the company's IT processes or systems relevant to financial reporting, and the controls that address those risks.²
- The reports produced by IT systems that are used by the company for performing important controls over financial reporting.
- The automated controls that the company relies on to maintain effective internal control over financial reporting.

The IT controls that are important to effective internal control over financial reporting generally relate to at least one of the preceding matters, which are discussed in more detail in the following paragraphs. IT control categories and testing procedures are discussed later in this chapter.

IT-Related Risks Affecting Financial Reporting

Paragraph .19 of AU sec. 319, *Consideration of Internal Control in a Financial Statement Audit*, lists the following types of IT-related risks that could affect the reliability of financial reporting—

- Reliance on systems or programs that are inaccurately processing data, processing inaccurate data, or both;
- Unauthorized access to data that may result in destruction of data or improper changes to data, including the recording of unauthorized or nonexistent transactions or inaccurate recording of transactions;
- Unauthorized changes to data in master files;
- Unauthorized changes to systems or programs;
- Failure to make necessary changes to systems or programs;
- Inappropriate manual intervention;
- Potential loss of data.

² Auditing Standard No. 5, note to paragraph 36, indicates that the identification of risks and controls within IT is not a separate evaluation. Instead, it is an integral part of the top-down approach used to identify significant accounts and disclosures and their relevant assertions, and the controls to test, as well as to assess risk and allocate audit effort as described by the standard.

The IT-related risks that are reasonably possible to result in material misstatement of the financial statements depend on the nature of the IT environment. In a less complex environment, the auditor could identify many of the risks by understanding the software being used and how it is installed and used by the company.

After understanding the relevant IT-related risks, the auditor should identify the controls that address those risks.³ These controls could include automated controls and IT-dependent controls and the IT general controls that are important to the effective operation of the selected controls. For example, even the simplest IT environments generally rely on controls that are designed to make sure that necessary software updates are appropriately installed, access controls that are designed to prevent unauthorized changes to financial data, and other controls that address potential loss of data necessary for financial statement preparation.

As the complexity of the software or environment increases, the type and number of potential IT risks increase, which could lead the auditor to devote more attention to IT controls.

IT-Dependent Controls

Many controls that smaller, less complex companies rely on are manual controls. Some of those controls are designed to use information in reports generated by IT systems, and the effectiveness of those controls depends on the accuracy and completeness of the information in the reports. When those IT-dependent controls are selected for testing, it also may be necessary to select controls over the completeness and accuracy of the information in the reports in order to address the risk of misstatement. Example 5-1 presents an illustration involving IT-dependent controls.

Other Automated Controls

Although smaller, less complex companies tend to rely primarily on manual controls, they could rely on certain automated controls built into the packaged software to achieve some control objectives. For example, software controls can be used to maintain segregation of duties, prevent certain data input errors, or to help make sure that certain types of transactions are properly recorded. The auditor might focus some of his or her testing on these automated controls and the IT general controls that are important to the effective operation of the automated controls.⁴

Consideration of Deficiencies in General Controls on Tests of Other Controls

IT general controls support operation of the application controls by ensuring the proper access to, and functioning of, the company's IT systems. Deficiencies in the IT general controls may result in deficiencies in the operation of the automated or IT-dependent controls. One of the factors in the auditor's evaluation of the identified deficiencies in the IT general controls, is the interaction of an IT general control and the related automated or IT-dependent controls.⁵

In some situations, an automated or IT-dependent control might be effective even if deficiencies exist in IT general controls. For example, despite the presence of deficient program change controls, the auditor might directly test

³ See Auditing Standard No. 5, paragraph 36.

⁴ See Auditing Standard No. 5, paragraph 47.

⁵ According to paragraph 65 of Auditing Standard No. 5, one of the risk factors that affects the severity of a deficiency is "The interaction or relationship of the control with other controls, including whether they are interdependent or redundant."

the related automated or IT-dependent manual control, giving consideration to the risk associated with the deficient change controls in his or her risk assessment and audit strategy. If the testing results were satisfactory, the auditor could conclude that the automated or IT-dependent manual controls operated effectively at that point in time e.g., as of the issuer's fiscal year end. On the other hand, deficient program change controls might result in unauthorized changes to application controls, in which case the auditor could conclude that the application controls are ineffective.

Example 5-1 – IT-Dependent Controls

Scenario: A company has a small finance department. For the accounting processes that have a higher risk of misstatement, senior management performs a number of business process reviews and analyses to detect misstatements in transaction processing.

The company has a small IT department that supports a packaged financial reporting system whose software code cannot be altered by the user. Since the company uses packaged software, and there have been no changes to the system or processes in the past year, the IT general controls relevant to the audit of the internal control over financial reporting are limited to certain access controls and certain computer operation controls related to identification and correction of processing errors. Management uses several system-generated reports in the business performance reviews, but these reports are embedded in the application and programmed by the vendor and cannot be altered.

Audit Approach: The auditor determines that senior management personnel performing the business process reviews and analyses are not involved with incompatible functions or duties that impair their ability to detect misstatements. Based on the auditor's knowledge of the financial reporting system and understanding of the transaction flows affecting the relevant assertions, the auditor selects for testing certain process reviews and analyses and certain controls over the completeness and accuracy of the information in the reports used in management's reviews. The tests of controls could include, for example

- Evaluating management's review procedures including assessing whether those controls operate at an appropriate level of precision. (See Chapter 2.)
- Evaluating how the company assures itself regarding the completeness and accuracy of the information in the reports used by management in the reviews. Matters that might be relevant to this evaluation include how the company determines that –

The data included in the report are accurate and complete. This evaluation might be accomplished through testing controls over the initiation, authorization, processing, and recording of the respective transactions that feed into the report.

The relevant computer settings established by the software user are consistent with the objectives of management's review. For example, if management's review is based on items in an exception report, the reliability of the report depends on whether the settings for reporting exceptions are appropriate.

The auditor verifies that the code in the packaged software cannot be changed by the user. The auditor also evaluates the IT general controls that are important to the effective operation of the IT-dependent controls (such as the access controls and operations controls previously described).

Categories of IT Controls

The remaining sections of this chapter discuss major categories of IT controls and considerations for testing them in a smaller, less complex IT environment.

IT General Controls

IT general controls are broad controls over general IT activities, such as security and access, computer operations, and systems development and system changes.

Security and Access

Security and access controls are controls over operating systems, critical applications, supporting databases, and networks that help ensure that access to applications and data is restricted to authorized personnel.

In a small, less complex IT environment, security administration is likely to be centralized, and policies and procedures might be documented informally. A small number of people or a single individual typically supports security administration and monitoring on a part-time basis. Controls for mitigating the risk caused by a lack of segregation of duties over operating systems, data, and applications tend to be detective controls rather than preventive. Access controls tend to be monitored informally.

Tests of security and access controls could include evaluating the general system security settings and password parameters; evaluating the process for adding, deleting, and changing security access; and evaluating the access capabilities of various types of users.

Computer Operations

Computer operations controls relate to day-to-day operations and help ensure that computer operational activities are performed as intended, processing errors are identified and corrected in a timely manner, and continuity of financial reporting data is maintained through effective data backup and recovery procedures.

A smaller, less complex IT environment might not have a formal operations function. There might not be formal policies regarding problem management or data storage and retention, and backup procedures tend to be initiated manually.

Tests of controls over computer operations could include evaluating the backup and recovery processes, reviewing the process of identifying and handling operational problems, and, if applicable, assessing control over job scheduling.

Systems Development and System Changes

Systems development and system change controls are controls over systems selection, design, implementation, and configuration changes that help ensure that new systems are appropriately developed, configured, approved, and migrated into production, and controls over changes—whether to applications, supporting databases, or operating systems—that help to ensure that those changes are properly authorized and approved, tested, and implemented. Although they might be viewed as separate categories, in less complex environments, systems development and system change procedures often are combined for ease of implementation, training, and ongoing maintenance.

A smaller, less complex IT environment typically includes a single or small number of off-the-shelf packaged applications that do not allow for modification of source code. Modifications to software are prepared by and, in some cases, implemented by, the software vendor in the form of updates or patches or via

a network connection between the vendor and the organization. Typically, a small number of individuals or a single individual (employees or consultants) support all development and production activities.

Examples of possible tests of controls over systems development and system changes include examining the processes for selecting, acquiring, and installing new software; evaluating the process for implementing software upgrades or patches; determining whether upgrades and patches are authorized and implemented on a timely basis; and assessing the process for testing new applications and updates.

Application Controls

Application controls are automated or IT-dependent controls intended to help ensure that transactions are properly initiated, authorized, recorded, processed, and reported. For example, in a three-way match process, received vendor invoices are entered into the system, which matches them automatically to the purchase order and goods receipt based on the document reference numbers, price, and quantity. The system's simultaneous matching of the information within the three documents upon their entry to authorize a payment to the vendor is an automated application control. Management's review and reconciliation of an exception report generated by the system is an example of an IT-dependent manual control.⁶

The general nature of application controls tends to be similar in most IT environments, although in less complex environments, the controls tend to be manual and detective rather than automated and preventive. The testing procedures also could be similar. In most IT environments, the auditor could focus on error correction procedures over inputting, authorizing, recording, processing, and reporting of transactions when evaluating application controls. However, in less complex IT environments there might be fewer financial applications affecting relevant assertions and fewer application controls within those applications.

Regardless of the complexity of the IT environment, the audit plan for testing application controls could include a combination of inquiry, observation, document inspection, and re-performance of the controls. Efficiencies can be achieved through altering the nature, timing, and extent of testing procedures performed related to automated and IT-dependent application controls if IT general controls are designed and operating effectively. In some situations, benchmarking of certain automated controls might be an appropriate audit strategy.⁷

End-User Computing Controls

End-user computing refers to a variety of user-based computer applications, including spreadsheets, databases, ad-hoc queries, stand-alone desktop applications, and other user-based applications. These applications might be used as the basis for making journal entries or preparing other financial statement information. End-user computing is especially prevalent in smaller, less complex companies.

End-user computing controls are controls over spreadsheets and other user-developed applications that help ensure that such applications are adequately documented, secured, backed up, and reviewed regularly for process integrity.

⁶ See Example 5-1 for an illustration of how those types of controls might be tested in a small, less complex IT environment.

⁷ Auditing Standard No. 5, paragraphs B28–B33, discuss benchmarking of automated controls.

Enduser computing controls include general and application controls over user-developed spreadsheets and applications.

Tests of controls over end-user computing could include assessing access controls to prevent unauthorized access; testing of controls over spreadsheet formulas or logic of queries and scripts; testing of controls over the completeness and accuracy of information reported by the end-user computing applications; and reviewing the procedures for backing up the applications and data.

Chapter 6

Considering Financial Reporting Competencies and Their Effects on Internal Control

To maintain effective internal control over financial reporting, a company needs to retain individuals who are competent in financial reporting and related oversight roles.¹ Smaller, less complex companies can face challenges in recruiting and retaining individuals with sufficient experience and skill in accounting and financial reporting. Also, resource limitations might prevent a smaller, less complex company from employing personnel who are familiar with the accounting required for unique, complex, or nonroutine transactions or relevant changes in rules, regulations, and accounting practices. Smaller, less complex companies might address their needs for financial reporting competencies through means other than internal staffing, such as engaging outside professionals.

This chapter discusses the auditor's consideration of financial reporting competencies at a smaller, less complex company, including situations in which a smaller, less complex company enlists outside assistance in financial reporting matters.

Understanding and Evaluating a Company's Financial Reporting Competencies

The evaluation of competence is one aspect of evaluating the control environment and the operating effectiveness of certain controls. For example, when evaluating entity-level controls, such as risk assessment and the period-end financial reporting process, the auditor could obtain information about whether—

- Management identifies the relevant financial reporting issues on a timely basis (e.g., issues arising from new transactions or lines of business or changes to accounting standards); and
- Management has the competence to ensure that events and transactions are properly accounted for and that financial statements and related disclosures are presented in conformity with generally accepted accounting principles (“GAAP”).

For recurring clients, the auditor's experience in prior audit engagements can be a source of information regarding management's financial reporting competencies. The auditor could be aware of specific accounts or disclosures that have caused problems in prior engagements, or of management's response to past changes in accounting pronouncements. These experiences can inform the auditor about management's financial reporting competencies, including whether and how management identifies and responds to financial reporting

¹ See e.g., Principle 5 of the COSO Small Companies Guidance.

risks. The procedures performed to evaluate the period-end financial reporting process also could be valuable to the evaluation of financial reporting competency.

The auditor's inquiries and observations pertaining to the company's overall commitment to competence, which is part of the evaluation of the control environment, also can inform the auditor's assessment of financial competency. The auditor can consider whether and how the company and management—

- Establish and agree on the knowledge, skills and abilities needed to carry out the required responsibilities prior to hiring individuals for key financial reporting positions,
- Train employees involved in financial reporting processes and provide them with the appropriate tools and resources to perform their responsibilities, and
- Periodically review and evaluate employees relative to their assigned roles, including whether the audit committee (or board of directors) evaluates the competencies of individuals in key financial reporting roles, such as the chief executive and financial reporting officers.

Auditors may keep in mind that company financial reporting personnel do not need to be experts in all areas of accounting and financial reporting but need to be sufficiently competent with respect to the accounting for current and anticipated transactions and changes in accounting standards to identify and address the risks of misstatement.

Supplementing Competencies with Assistance from Outside Professionals

Some smaller, less complex companies might not have personnel on staff with experience in certain complex accounting matters that are encountered. In these circumstances, a company might engage outside professionals to provide the necessary expertise (i.e., an individual or firm possessing special skill or knowledge in the particular accounting and financial reporting matter).² When assessing the competence of the personnel responsible for the company's financial reporting and associated controls, the auditor may consider the combined competence of company personnel and other parties that assist with functions related to financial reporting.

When an outside professional provides accounting assistance related to relevant assertions or the period-end financial reporting process, the auditor might begin by considering how the company assures itself that events and transactions are properly accounted for and that financial statements and the related disclosures are free of material misstatement. The company might have differing levels of involvement with outside professionals, depending upon the nature of the services provided. The auditor could evaluate management's oversight to determine whether the company, with the assistance of the professional, is adequately identifying and responding to risks.³ In performing this evaluation, the auditor can consider—

² This section of the chapter does not pertain to management's use of a service organization that supports routine accounting functions, such as processing payroll transactions or supporting the company's information technology systems. It also does not apply to management's use of specialists in matters outside of accounting and financial reporting, such as actuaries, engineers, environmental consultants, and geologists. See Auditing Standard No. 5, AU sec. 324, *Service Organizations*, and AU sec. 336, *Using the Work of Specialists*, for direction on these matters.

³ If the audit committee has oversight over the use of service providers, the auditor may also consider the nature and extent of that oversight.

- Whether management recognizes situations for which additional expertise is needed to adequately identify and address risks of misstatement.
- How management determines that the outside professionals possess the necessary qualifications. For example, management might obtain information from the professional about his or her skills and competence.
- Whom management designates to oversee the services and whether they possess the suitable skill, knowledge, or experience to sufficiently oversee the outside professionals. (Note: Management is not required to possess the expertise to perform or re-perform the services.)
- Whether management has established controls over the work of the outside accounting professional and over the completeness and accuracy of the information provided to the outside professional. For example, in addition to reviewing the work of the outside professional, management might inquire about the professional's monitoring and review procedures related to the work performed by the professional for the company.
- How management participates in matters involving judgment, for example, whether management understands and makes significant assumptions and judgments underlying accounting calculations prepared by an outside professional.
- How management evaluates the adequacy and the results of the services performed, including the form and content of the outside accounting professional's findings, and accepts responsibility for the results of the services.

In gathering evidence to support this evaluation, the auditor could hold discussions with both management and the outside professional, perhaps while obtaining an understanding of the period-end financial reporting process. The auditor also could inspect documentation that provides support for management's oversight of the outside professional.⁴

⁴ Refer to Chapter 7 for discussion of how the auditor can obtain sufficient evidence when less formal documentation is available.

Example 6-1 – Assistance from Outside Professionals

Scenario: A small developer of analytical software products does not have an individual with strong tax accounting expertise on staff. The company retains a thirdparty accounting firm (not its auditor) to prepare the income tax provision. Management obtains information from the third-party accounting firm about the training and experience of the staff assigned to do this work. The company's CFO, who has basic knowledge of tax accounting, reviews and discusses the tax provision with the accounting firm that prepared it, and compares the provision to CFO's expectations based on past periods, budgets, and knowledge of business operations.⁵

Audit Approach: The auditor observes that management identifies risks to financial reporting related to accounting for income taxes and engages an outside professional to provide technical assistance. Further, the auditor evaluates management's oversight to determine whether the company, with the assistance of the professional, is adequately identifying and responding to risks of material misstatement regarding the income tax provision. As part of this evaluation, the auditor inspects the engagement letter, other correspondence between the company and the third-party firm, and the tax schedules and other information produced by the third-party firm. The auditor also evaluates the controls over the completeness and accuracy of the information furnished by the company to the third-party firm. The auditor also assesses whether the third-party accounting firm has the proper skills and staff assigned to do this work.

Chapter 7

Obtaining Sufficient Competent Evidence When the Company Has Less Formal Documentation

Implementing and assessing effective internal control over financial reporting by a company's management generally involves some level of documentation. A smaller, less complex company often has different needs for documentation, and the nature of that documentation might differ from that of a larger or more complex organization. Differences in the form and extent of control documentation of smaller, less complex companies generally relate to their operating characteristics, particularly to fewer resources and more direct interaction of senior management with controls.¹

The nature and extent of a company's documentation of internal control over financial reporting can have a significant effect on the auditor's strategy regarding the audit of internal control. This chapter discusses how the auditor could adapt his or her audit strategy to obtain sufficient competent evidence in an environment with less formal documentation.

Audit Strategy Considerations

The auditor must plan and perform the audit to obtain competent evidence that is sufficient to obtain reasonable assurance about whether material weaknesses exist as of the date specified in management's assessment.² The auditor can obtain this evidence through direct testing or using the work of others, as appropriate. Procedures the auditor could perform to test operating effectiveness include a mix of inquiry of appropriate personnel, observation of the

⁵ Adapted from the COSO Small Companies Guidance, Volume II: Guidance, page 34.

¹ The COSO Small Companies Guidance, Volume II: Guidance, pages 12–13, discusses circumstances that affect the need for documentation of internal control.

² See Auditing Standard No. 5, paragraph 3.

company's operations, inspection of relevant documentation, and re-performance of the control. The nature, timing, and extent of tests of controls depend on the risk associated with the controls. As the risk associated with the control being tested increases, the evidence that the auditor should obtain also increases.³

PCAOB standards establish the documentation requirements for these audits. Those documentation requirements apply only to the auditor.

Documentation of Processes and Controls

Larger companies with complex operations are more likely to have formal documentation of their processes and controls, such as in-depth policy manuals and systems flowcharts of processes. In a smaller, less complex company, documentation of processes and controls might take a variety of forms. For example, information about processes and controls might be found in other documentation, such as memoranda, questionnaires, software manuals, source documents, or job descriptions. This documentation might not cover every process and might not be in a consistent form across all processes.

Where walkthroughs are performed, auditors could use those procedures to obtain an understanding of the flow of transactions affecting relevant assertions and to assess the design effectiveness of certain controls, even when documentation is limited.

Documentation of Operating Effectiveness of Controls

In a smaller, less complex business, the nature and extent of documentation of the operating effectiveness of controls may vary. Also, evidence of a control's operation might exist only for a limited period.

The type and availability of evidence regarding controls to be tested can affect the auditor's testing strategy.⁴ In particular, company documentation can influence the nature and timing of audit procedures performed. For example, the nature of some audit procedures e.g., document inspection, requires documentation. Also, the timing of some tests of controls might be determined, in part, based on when the evidence of the controls' operation is available.

Obtaining sufficient evidence about the operating effectiveness of controls can be challenging when there is limited documentation of their operation. In those situations, inquiry combined with other procedures, such as observation of activities, inspection of documentation produced or used by the controls,⁵ and reperformance of certain controls, might provide sufficient evidence about whether a control is effective.

As a practical matter, the auditor also needs to obtain documentation of the work of others to use that work to reduce the auditor's own testing.⁶

Other Considerations

When auditing a smaller, less complex company with limited documentation, it generally is helpful to obtain an understanding of the nature and availability

³ Auditing Standard No. 5, paragraph 46. Paragraph 47 discusses the factors that affect the risk associated with a control.

⁴ As discussed in Chapter 8, a pervasive lack of documentation and other audit evidence could prevent the auditor from being able to obtain sufficient evidence to support an opinion on internal control.

⁵ Examples of documentation that might be produced or used by controls include exception reports, memoranda, or documented communications between management and employees.

⁶ The auditor's use of the work of others also is dependent on such factors as the nature of the subject matter and the competence and objectivity of the individuals performing the work. See Auditing Standard No. 5, paragraphs 16–19.

of audit evidence relating to internal control over financial reporting as early in the audit process as practical. This understanding ordinarily includes consideration of existing documentation regarding—

- Company processes and procedures, particularly for transactions affecting relevant assertions and controls that the auditor is likely to select for testing
- Monitoring of other controls performed by management or others

The auditor can then identify gaps in important documentation so alternatives can be explored. For example, if the CFO prepares contemporaneous documentation of certain controls and retains it for a limited period, the auditor might arrange to obtain access to that documentation for testing purposes. Early conversations with management about these matters can help provide auditors with the most flexibility in developing efficient and effective audit strategies.

If the company does not have formal documentation of its processes and controls, the auditor may consider whether other documentation is available before drafting formal descriptions of processes and controls for the audit documentation. A practical way to identify such other documentation is to look at the information that the company uses to run the business.

As discussed in Chapter 1, one of the practical considerations when selecting controls to test and determining the nature, timing, and extent of testing is the nature and availability of evidence of operating effectiveness. For example, if two or more controls adequately address the risk of misstatement for a relevant assertion, the auditor could select the control for which evidence of operating effectiveness can be obtained more readily.

Example 7-1 – Obtaining Information about Processes and Controls

Scenario: A small manufacturer in the electronics industry periodically makes large purchases of specialty components. The company has established procedures covering the initiation, authorization, and recording of these purchases, although the company has not developed an in-depth policies and procedures manual. The company's procedures provide for completion of a form that describes the product requirements and payment terms and indicates how to record the purchase. The forms are reviewed and approved by the CEO and CFO before the purchase is executed. When the goods are received, they are matched with the purchase form and accounted for as indicated on the form.

Audit Approach: The auditor inspects a copy of a completed purchase form and related documentation to obtain an initial understanding of the flow of the purchase transactions. She follows up with inquiries of personnel involved in the process of authorizing, sending, and accounting for the purchases and traces the recording of the transactions through the accounting system. She summarizes her understanding of the transaction flow in a memo and includes a copy of a purchase form in the workpapers. The auditor uses her understanding of the purchase process to plan and perform tests of selected controls over the purchases.

Example 7-2 – Obtaining Evidence about Operating Effectiveness of Controls

Scenario: One control that management relies on with respect to the period-end financial reporting process is the CFO's review of the quarterly financial statements prepared by the controller. The CFO does not create separate documentation of her review but does retain copies of the financial statements with her handwritten notes and other markings for reference purposes. She sends her review comments to the controller via email, and the company's email system retains the email messages. If errors are identified, the controller prepares adjusting entries, which are approved by the CFO.

Each quarter, the CFO and controller prepare and present to the audit committee a financial package, explaining significant trends in the company's financial condition, operating results, and cash flows, as well as comparisons to budgeted amounts and comparable prior periods.

Audit Approach: The auditor can draw upon multiple sources of audit evidence to evaluate whether the control is in place and operating effectively to detect errors in the period-end financial reporting process. He can make inquiries of the CFO to obtain an understanding of the frequency, nature, timing, and level of precision⁷ of the CFO's review. He can corroborate this understanding and evaluate the operating effectiveness of the review by, for selected items, inspecting copies of the reviewed drafts of the financial statements, reviewing comments sent to the controller, and reviewing adjusting entries and supporting information. He can also talk to other employees to find out if the CFO contacts them to ask questions, what types of questions are asked, and how those questions are resolved. In addition, he can read the information in the financial package delivered to the audit committee and might observe the CFO's financial review with the audit committee, if the auditor attends the meetings in connection with the audit.

Chapter 8

Auditing Smaller, Less Complex Companies with Pervasive Control Deficiencies

In some audits of internal control, auditors might encounter companies with numerous or pervasive deficiencies in internal control over financial reporting. Smaller, less complex companies can be particularly affected by ineffective entity-level controls, as these companies typically have fewer employees and fewer process-level controls.

Auditing internal control over financial reporting in companies with pervasive deficiencies can be challenging. The auditor's strategy is influenced by the nature of the control deficiencies and factors such as the effect of the deficiencies on other controls and the availability of audit evidence. Although the facts and circumstances can vary significantly, the auditor might not be able to express an unqualified opinion on the effectiveness of internal control over financial reporting in some of these situations.¹

This chapter discusses how auditors could design their audit strategies in response to situations involving pervasive deficiencies.

⁷ Level of precision is discussed in more detail in Chapter 2.

¹ To enable the auditor to express an unqualified opinion on internal control, the company would need to remediate all of its material weaknesses early enough before year-end to enable the auditor to obtain sufficient competent audit evidence about the remediated controls to support an unqualified opinion on internal control over financial reporting.

Pervasive Deficiencies that Result in Material Weaknesses

The auditor's objective in an audit of internal control is to express an opinion on the effectiveness of the company's internal control over financial reporting. Because a company's internal control over financial reporting cannot be considered effective if one or more material weaknesses exist, to form a basis for expressing an opinion, the auditor must plan and perform the audit to obtain competent evidence that is sufficient to obtain reasonable assurance about whether material weaknesses exist as of the date specified in management's assessment.²

Ordinarily, the auditor's strategy should include tests of controls as necessary to support a conclusion that internal control over financial reporting is effective.³ However, the auditor's existing knowledge of the company or information obtained early in the audit process might lead an auditor to a preliminary judgment that internal control over financial reporting is likely to be ineffective because of the presence of pervasive control deficiencies that result in one or more material weaknesses. In those situations, the auditor's strategy for testing selected controls may depend on the effect of the pervasive deficiencies on other controls, as discussed in the following paragraphs.

Considering the Effect of Pervasive Control Deficiencies on Other Controls

When the auditor encounters pervasive control deficiencies, he or she might decide that those deficiencies also impair the effectiveness of other controls by rendering their design ineffective or by keeping them from operating effectively. For example, certain deficient entity-level controls, such as the following, might impair the effectiveness of other controls over relevant assertions:

- *Ineffective control environment (considering the risk profile of the company).* An ineffective control environment can increase the risk associated with a control by rendering its design ineffective or preventing it from operating effectively. Also, certain controls in the control environment, such as maintaining financial reporting competencies, might be necessary for the effective functioning of other controls.
- *Ineffective IT controls or information systems.* Ineffective information systems could impair the effectiveness of certain IT-dependent controls (e.g., monitoring controls that rely on the reports produced by an ineffective information system).
- *Pervasive lack of segregation of duties without appropriate alternative controls.* When a person performs two or more incompatible duties, the design of some controls might be ineffective without appropriate alternative controls.
- *Frequent management override of controls.* A control that is frequently overridden is less likely to operate effectively. The effectiveness of controls that depend on an overridden control also might be impaired.

The top-down audit approach can help the auditor identify pervasive control deficiencies earlier in the audit process and take them into account in determining the audit approach for testing other controls.

² See Auditing Standard No. 5, paragraph 3.

³ See Auditing Standard No. 5, paragraph 39.

The auditor's preliminary judgments regarding the effect of the pervasive control deficiencies can help determine the approach to gathering audit evidence. When the pervasive control deficiencies adversely affect other controls, the auditor may modify the planned testing of the other controls because less evidence generally is needed to support a conclusion that controls are not effective than a conclusion that controls are effective.⁴ For example, if a control is likely to be impaired because of another control's deficiency, the inquiries and observations during walkthroughs might provide enough evidence to conclude that the design of a control is deficient and thus could not prevent or detect misstatements. In some cases, limited testing of a control might be necessary (e.g., if a walkthrough has not been performed) to conclude that a control is not operating effectively. Also, detected misstatements from the audit of the financial statements could indicate that a control is not effective.

Some companies might have pervasive control deficiencies and still have effective controls over some relevant assertions. For the selected controls that are likely to be effective, the auditor should test those controls to obtain the evidence necessary to support a conclusion about their operating effectiveness.⁵ The pervasive control deficiencies may affect the risk associated with the controls selected for testing, and, in turn, the amount of audit evidence needed. Example 8-1 discusses the effect of pervasive control deficiencies on tests of controls.

Scope Limitation Due to Lack of Sufficient Audit Evidence

Pervasive deficiencies in a company's internal control over financial reporting do not necessarily prevent an auditor from obtaining sufficient audit evidence to express an opinion on internal control over financial reporting. If the auditor determines that sufficient evidence is available to express an opinion, the auditor should perform tests of those controls that are important to the auditor's conclusion about the effectiveness of the company's internal control over financial reporting and evaluate the severity of the identified control deficiencies.⁶

In some audits of companies with pervasive control deficiencies, the auditor could become aware that there is minimal available evidence about the design and operation of internal control over financial reporting. Such situations could lead the auditor to conclude that the lack of available evidence constitutes a scope limitation that will prevent him or her from obtaining reasonable assurance necessary to express an opinion on internal control over financial reporting, including identification of existing material weaknesses.

The auditor may issue a report disclaiming an opinion on internal control over financial reporting as soon as the auditor concludes that a scope limitation will prevent the auditor from obtaining the reasonable assurance necessary to express an opinion.⁷ The auditor is not required to perform any additional work before issuing a disclaimer when the auditor concludes that he or she will not be able to obtain sufficient evidence to express an opinion. The auditor's report should disclaim an opinion on internal control and disclose the substantive reasons for the disclaimer. The report also should disclose the material weaknesses of which the auditor is aware.⁸

⁴ See Auditing Standard No. 5, paragraphs 46 and 47.

⁵ See Auditing Standard No. 5, paragraph 39.

⁶ See Auditing Standard No. 5, paragraphs 22, 39, and 62.

⁷ See Auditing Standard No. 5, paragraph C6.

⁸ See Auditing Standard No. 5, paragraph C5, for the specific requirements regarding the disclosures of the material weaknesses.

Even if the auditor lacks sufficient evidence to express an opinion on internal control, the auditor might still be able to obtain sufficient evidence to perform an audit of the financial statements. The auditor should, however, take into account the control deficiencies and issues encountered in the audit of internal control in assessing control risk and determining the nature, timing, and extent of tests of accounts and disclosures in the audit of the financial statements.⁹

Example 8-2 illustrates a situation in which the auditor is unable to obtain sufficient evidence to express an opinion on internal control over financial reporting.

Example 8-1 – Pervasive Deficiencies and Testing of Controls

Scenario: A small company has a two-person staff that handles all of the accounting and financial reporting duties. The staff is competent in routine financial reporting matters but has difficulty with more complex accounting matters, such as valuation of stock-based compensation and income tax calculations and disclosures. The lack of competencies in these areas has resulted in adjustments based on the auditor's identification of material misstatements.¹⁰

Audit Approach: Based on the auditor's experience with the company, she expects that controls over the valuation/allocation and disclosures related to stock-based compensation and income taxes will not be effective. For those assertions, the auditor obtains evidence about the respective controls during a walkthrough of the related process. Also, misstatements in those assertions were detected in the financial statement audit, and she observes that the controls failed to prevent or detect those misstatements. Based on this evidence, she concludes that the controls over those assertions are not effective.

With respect to routine financial reporting processes, such as cash receipts and disbursements, the auditor plans to perform tests of the selected controls to obtain enough evidence to support a conclusion that the respective controls are effective.

⁹ See Auditing Standard No. 5, paragraph B5.

¹⁰ Chapter 6 discusses financial reporting competencies in more detail, including approaches that smaller, less complex companies might take to enhance their financial reporting competencies.

Example 8-2 – Lack of Sufficient Audit Evidence

Scenario: A development stage company is devoted exclusively to research and development for a new product and currently generates no revenue. The financial staff consists of a CFO and accounting clerk. The company's principal accounting records consist of a checkbook and payroll records, and the company has no documentation of policies and procedures. Most of its controls are undocumented supervisory checks by the CFO.

Late in the fourth quarter, a management dispute results in the resignation of the CFO and termination of the accounting clerk. Management hires an accountant on a temporary contract basis to prepare financial statements from the company's existing records and to help the company establish appropriate controls over its financial reporting functions. However, most of these controls were implemented near or shortly after year-end.

Audit Approach: As the auditor begins trying to obtain an understanding of the company's internal control over financial reporting and evaluate entity-level controls, she notes that there is minimal information available about the controls that existed at yearend. Because of the turnover in financial reporting personnel, the auditor is unable to perform inquiries, observations, or other procedures to understand the flow of transactions and related controls in significant processes. The auditor identifies some material weaknesses, but she determines that the lack of evidence results in a scope limitation because she cannot obtain reasonable assurance that all of the existing material weaknesses are identified.

Accordingly, the auditor ceases further audit procedures in the audit of internal control. The auditor's report on internal control over financial reporting contains a disclaimer of opinion and disclosure of the substantive reasons for the disclaimer and the material weaknesses that she identified.

Appendix A

The Integrated Audit Process

Auditing Standard No. 5 indicates that the audit of internal control should be integrated with the audit of the financial statements. This means that the auditor should plan and perform the work to achieve the objectives of both audits,¹ which are as follows:

- *Audit of the financial statements.* To express an opinion on the fairness with which the financial statements present, in all material respects, financial position, results of operations, and its cash flows in conformity with GAAP.²
- *Audit of internal control.* To express an opinion on the effectiveness of the company's internal control over financial reporting.³

This appendix illustrates one approach for integrating the audit of internal control with the audit of the financial statements and is not intended to present all of the procedures that are required for a particular audit. Auditors must plan and perform their integrated audits to achieve the objectives of the audits and to comply with standards of the PCAOB.⁴

Summary of the Illustrative Audit Approach

The integrated audit process can be summarized into the following major components:

- a. Preliminary engagement procedures
- b. Audit planning
- c. Risk assessment procedures
- d. Auditor response, including tests of accounts and controls
- e. Conclusion and wrap-up

Preliminary Engagement Procedures

Preliminary engagement procedures include the auditor's engagement acceptance process and reaching an understanding with the audit committee about the terms of the engagement, including pre-approval of audit and non-audit services.

During the engagement acceptance process, the auditor might identify matters that could affect the risk of material misstatement of the financial statements or the risk of material weakness in internal control over financial reporting and, thus, could inform the auditor's risk assessments during the audit.

Audit Planning

During audit planning, the auditor should make a preliminary judgment about materiality. The judgment about materiality is the same for both the audit of the financial statements and the audit of internal control.⁵

The auditor also can develop a preliminary audit strategy and audit plan based on his or her understanding of the company and its environment. The audit

¹ See Auditing Standard No. 5, paragraphs 6 and 7.

² See paragraph .01 of AU sec. 110, *Responsibilities and Functions of the Independent Auditor*.

³ See Auditing Standard No. 5, paragraph 3.

⁴ See Auditing Standard No. 5, paragraph 6.

⁵ See AU sec. 311.03, AU sec. 312.12–.33, and Auditing Standard No. 5, paragraph 20.

strategy could cover matters such as general scope and timing of the engagement. The audit strategy and plan could be refined further as the audit progresses.

Risk Assessment Procedures

Risk assessment procedures are intended to help the auditor identify risks of misstatement and the controls that are in place to address those risks. When performing risk assessment procedures, the auditor should obtain an understanding of the company and its environment, including its internal control.⁶ These procedures include walkthroughs, or other procedures, to understand the likely sources of misstatement.⁷ It also includes performing preliminary analytical procedures and procedures to assess the risk of material misstatement due to fraud.⁸ The auditor's risk identification and assessment should also take into account his or her knowledge about the company and its environment from other sources, such as prior audits.⁹

Based on the auditor's understanding gained through performing the risk assessment procedures and obtaining other evidence, the auditor should assess the identified risks.¹⁰

The auditor's risk assessments are the basis for the identification of significant accounts and disclosures and relevant assertions as well as the selection of controls to test. Relevant assertions and significant accounts and disclosures should be determined based on whether there is a reasonable possibility that they could contain misstatements that could cause the financial statements to be materially misstated.¹¹ The identification of relevant assertions and significant accounts¹² is the same for both the audit of internal control and the audit of the financial statements.

Auditing Standard No. 5 states that the auditor should use a top-down approach to the audit of internal control to select the controls to test. A top-down approach begins at the financial statement level and with the auditor's understanding of the overall risks to internal control over financial reporting.¹³ The auditor then focuses on entity-level controls and works down to significant accounts and disclosures and their relevant assertions. This approach directs the auditor's attention to accounts, disclosures, and assertions that present a reasonable possibility of material misstatement to the financial statements and related disclosures. The auditor then verifies his or her understanding of the risks in the company's processes and selects for testing those controls that sufficiently address the assessed risk of misstatement to each relevant assertion.

⁶ See AU sec. 319.25–.61, and Auditing Standard No. 5, paragraph 9.

⁷ See Auditing Standard No. 5, paragraphs 34–38, for discussion of the objectives of walkthroughs and direction on walkthrough procedures.

⁸ See AU sec. 329.06–.08, and AU sec. 316.35–.45.

⁹ See AU sec. 311.04 and .08, and AU sec. 319.59.

¹⁰ See AU sec. 312.16 and .26–.33.

¹¹ See Auditing Standard No. 5, paragraphs 28–33.

¹² In the financial statement audit, the auditor may perform substantive auditing procedures on financial statement accounts, disclosures, and assertions that are not determined to be significant accounts and disclosures and relevant assertions. This is because his or her assessment of the risk that undetected misstatement would cause the financial statements to be materially misstated is unacceptably high (see AU sec. 312.39 for further discussion about undetected misstatement) or as a means of introducing unpredictability in the procedures performed (see AU sec. 316.50 for further discussion about predictability of auditing procedures).

¹³ See Auditing Standard No. 5, paragraph 21.

Overall Response to Risks

Based on the auditor's risk assessment, the auditor should evaluate the need for an overall response to the risks.¹⁴ This evaluation is particularly important for pervasive risks of misstatement, which can affect many financial statement accounts, but it applies to every audit.

The overall responses could affect such aspects of the audit as –

- Assignment of staff
- Level of supervision
- Need for specialists
- Appropriateness of planned audit strategy and scope

Specific Responses – Substantive Procedures and Tests of Controls

Specific responses to risk relate to the tests of relevant assertions of significant accounts and disclosures (“substantive procedures”) and the controls over those assertions. Auditing Standard No. 5 requires the auditor to obtain evidence about the controls over relevant assertions, and it states that the auditor should perform substantive procedures for all relevant assertions, regardless of the assessed level of control risk.¹⁵ The auditor should determine an appropriate mix of the nature, timing, and extent of testing based on the associated risks and other factors.¹⁶ The determination of the nature, timing, and extent of testing includes decisions about using the work of others to test controls in the integrated audit. As the associated risk increases, the evidence that the auditor should obtain also increases.¹⁷

The relationship between tests of controls and substantive procedures is important to the integration of the audit of internal control with the audit of financial statements. Obtaining sufficient evidence to support control risk assessments of low for purposes of the financial statement audit ordinarily allows the auditor to reduce the amount of substantive procedures that otherwise would have been necessary to opine on the financial statements. On the other hand, deficiencies in the controls that the auditor planned to rely on could lead the auditor to expand his or her substantive procedures.

As discussed in Chapter 1, the results of substantive tests of accounts and disclosures do not provide sufficient evidence for the auditor to conclude on the operating effectiveness of controls. However, the results of substantive tests could affect the auditor's risk assessments associated with the controls. For example, if the results of substantive procedures indicate misstatements in an assertion, evaluating the nature, cause, and significance of the misstatements could lead the auditor to identify a deficiency in the related controls or to modify his or her risk assessments. When no misstatements are detected from substantive procedures for an assertion, the auditor should take that into account along with the factors discussed in paragraphs 46–49 of Auditing Standard No. 5 in considering the risk associated with the related controls, which affects the

¹⁴ See AU sec. 312.16.

¹⁵ See Auditing Standard No. 5, paragraph B7.

¹⁶ For example, in the audit of internal control, walkthroughs might provide sufficient evidence of operating effectiveness for some selected controls, depending on the risk associated with the control being tested, the specific procedures performed as part of the walkthrough, and the results of those procedures.

¹⁷ See Auditing Standard No. 5, paragraphs 46 and 49.

nature, timing, and extent of the testing necessary to conclude on the effectiveness of the controls.¹⁸

Conclusion and Wrap-up

In the conclusion and wrap-up phase, the auditor should evaluate the results of his or her testing, particularly for identified misstatements and control deficiencies. The auditor should evaluate the misstatements and control deficiencies, individually and in the aggregate. In evaluating the effects of misstatements, the auditor should include both quantitative and qualitative considerations.¹⁹

Based on the evaluation of the testing results, the auditor should form conclusions about whether—

- The financial statements are materially misstated,
- A material weakness in internal control exists, and
- He or she has obtained sufficient competent evidence to support those conclusions.²⁰

The results of each portion of the integrated audit inform the auditor's conclusions about the other portion. For example, the auditor's conclusions about the effectiveness of controls should be based on all of the pertinent information about control effectiveness,²¹ including—

- Tests of controls for the audit of internal control,
- Tests of controls for the audit of the financial statements,
- Use of the work of others in either audit, and
- Evidence about control deficiencies resulting from identified misstatements or other sources (e.g., control deficiencies identified by management).

This information could affect the conclusions about control effectiveness as of year-end as well as control risk assessments for the financial statement audit. In some situations, the evaluation of audit results also could lead the auditor to re-evaluate his or her assessments of risk and the sufficiency of the audit procedures performed.

The conclusion and wrap-up phase of the audit also includes completion of the review of the audit and resolution of reviewers' comments.

¹⁸ See Auditing Standard No. 5, paragraph B9. This does not mean that the auditor is required to perform substantive procedures for a relevant assertion before performing tests of controls.

¹⁹ See AU sec. 312.34, and Auditing Standard No. 5, paragraphs 62 and B8.

²⁰ See paragraphs .34–.41 of AU sec. 312, *Audit Risk and Materiality in Conducting an Audit*, paragraph .01 of AU sec. 326, *Evidential Matter*, and Auditing Standard No. 5, paragraph 3.

²¹ See Auditing Standard No. 5, paragraph 71.

Appendix B

Discussion of Comments Received on the Preliminary Staff Views

On October 17, 2007, the staff of the Board's Office of the Chief Auditor published for comment *Preliminary Staff Views – An Audit of Internal Control That Is Integrated with An Audit of Financial Statements: Guidance for Auditors of Smaller Public Companies* (“the preliminary guidance”). During the public comment period, 23 comment letters were received from investors, auditors, issuers, and others.

The majority of commenters were supportive of the preliminary guidance. They noted that it appropriately considered the environment of smaller, less complex companies and provided useful examples that will help in designing and executing strategies for the audits of these companies in accordance with the provisions of Auditing Standard No. 5.

The commenters offered suggestions to improve the preliminary guidance. After a careful analysis, certain changes have been made to this publication to further clarify or enhance the guidance. This Appendix describes significant comments received on the preliminary guidance and the related changes that the staff made in this publication.

General Comments

The introduction to the preliminary guidance stated that it did not establish new requirements for auditors. However, some commenters suggested reinforcing this statement by providing references to the Board's standards that establish mandatory or presumptively mandatory responsibilities to which this publication refers. As suggested by commenters, this publication includes additional references to the Board's standards.

Several commenters suggested that some or all of the preliminary guidance could be applicable to audits of internal control of larger public companies. As noted in the introduction, this publication was developed specifically to describe how auditors may apply the provisions of Auditing Standard No. 5 to audits of smaller, less complex companies. If auditors of larger public companies find this guidance useful in applying the scalability principles of Auditing Standard No. 5, they may, of course, refer to it. As noted earlier, this guidance does not establish requirements for the audit of internal control. Rather, all audits of internal control—regardless of the size of the company—must comply with the requirements of Auditing Standard No. 5.

Chapter 1 – Scaling the Audit for Smaller, Less Complex Companies

The preliminary guidance said that “[i]f none of the controls that are designed to address a risk for a relevant assertion is likely to be effective, the auditor can take that into account in determining the testing of that control.” According to one commenter, this statement could suggest that, under such circumstances, the auditor still has an obligation to test a particular control. This sentence has been modified to say that, if none of the controls over an assertion “is likely to be effective, the auditor can take that into account in determining the evidence needed to support a conclusion about the effectiveness of controls for this assertion.” Paragraph 47 of Auditing Standard No. 5 indicates that less evidence generally is needed to support a conclusion that controls are not effective. Chapter 8 discusses how this principle may be applied when a company has pervasive control deficiencies.

Several commenters asked the staff to clarify the example in the section entitled Tests of Operating Effectiveness of Controls, in which the auditor was able to use the results of tests of controls to reduce the substantive work on accounts receivable but not revenue. In the commenters' view, it can be difficult to distinguish controls over accounts receivable—specifically, over billing and cash receipt processing—from controls over revenue recognition. In response, the reference to revenue recognition in this example has been replaced with a reference to the allowance for doubtful accounts, the controls over which are more easily distinguishable from controls over billing and cash receipt processing.

Additionally, as suggested by the commenters, the discussion leading to this example has been modified to emphasize that the auditor's decisions about relying on controls, which were illustrated by the example, were related to the audit of the financial statements rather than the audit of internal control. The example is not meant to suggest that the auditor should avoid testing controls in high-risk areas. Rather, the example assumes that the auditor is following the requirements and direction in AU sec. 319, *Consideration of Internal Control in a Financial Statement Audit*, in designing his or her audit strategy.

Another commenter asked for clarification about whether an auditor would be able to issue an unqualified opinion on the effectiveness of internal control over financial reporting when the auditor assessed control risk at the maximum for one or more relevant assertions in the audit of financial statements. A new paragraph that discusses the relationship between assessing control risk at the maximum and expressing an opinion on internal control over financial reporting has been added to the section entitled Tests of Operating Effectiveness of Controls.

In the last paragraph of Chapter 1, one commenter asked to clarify what impact the absence of misstatements detected by substantive procedures has on the testing of controls. In response, this publication explains that the absence of misstatements is only one of a number of factors that informs the auditor's risk assessment in determining the testing necessary to conclude on the effectiveness of a control. Additionally, as recommended by another commenter, the wording in this paragraph has been revised to better reflect paragraph B9 of Auditing Standard No. 5, to which it refers.

One commenter suggested adding guidance to address situations in which controls changed during the period. The purpose of Chapter 1 is to discuss the principles in Auditing Standard No. 5 for scaling the audit and integrating tests of controls in audits of smaller, less complex public companies. Auditing Standard No. 5 and AU sec. 319, address the auditor's responsibilities for situations in which controls change during the year.

Chapter 2 – Evaluating Entity-Level Controls

Comments on Chapter 2 related primarily to the guidance on the precision of entity-level controls.

Some commenters were concerned that the list of factors that the auditor might consider in judging the level of precision of an entity-level control, in the section entitled Assessing the Precision of Entity-Level Controls, will be used as a checklist by auditors. Other commenters suggested expanding the list. Consistent with the preliminary guidance, this publication uses the phrase “factors include” to indicate that the list of factors is not all-inclusive, and the list of factors is not a list of criteria that the auditor should determine are met for every entity-level control. Not all factors are necessarily applicable to every control (e.g., some are relevant only to detective controls), and some factors might be more important than others for a given control. Examples 2-1 and 2-2

have been modified to better explain which factors the auditor in those examples took into account in evaluating the precision of the company's entity-level controls.

One commenter suggested expanding the guidance in Chapter 2 by discussing auditing considerations related to evaluating design and operating effectiveness of company's entity-level risk assessment component. The risk assessment component of internal control involves identification and analysis of the risks of material misstatement²² and thus, by itself, would not necessarily prevent or detect misstatements. Chapter 2 focuses on those entity-level controls that are more likely to operate at a sufficient level of precision to result in a reduction of testing of processlevel controls in an audit of a smaller, less complex company.

Additionally, another commenter asked for clarification regarding when the auditor can obtain a substantial amount of evidence about the effectiveness of internal control over financial reporting through the evaluation of entity-level controls. In this publication, the discussion following the bullet points at the beginning of Chapter 2, to which the commenter referred, has been revised to state more clearly that the auditor can obtain such evidence if senior management performs many controls—including entity-level controls—that are important to effective internal control over financial reporting.

Chapter 3 – Assessing the Risk of Management Override and Evaluating Mitigating Actions

Some commenters on Chapter 3 were concerned that the introductory statement to a list of mitigating controls in the section entitled Evaluating Mitigating Controls constituted a requirement for management to implement these controls. As stated in the introduction to this publication, the discussions and examples of controls in this publication do not establish internal control requirements and are not intended as guidance to management regarding establishing or evaluating internal control over financial reporting. Nevertheless, the introductory statement has been revised to remove reference to management's implementation of controls. Additionally, as suggested by some commenters, the fourth item in the list of mitigating controls has been renamed "controls over certain journal entries" to more clearly refer to the related discussion in the subsection entitled Evaluating Controls over Journal Entries later in the chapter.

As recommended by one of the commenters, a statement about the importance of the auditor's exercise of professional skepticism when considering the risk of management override has been added to the section entitled Assessing the Risk of Management Override. Because of the important role that the audit committee may play in mitigating the risk of management override, several commenters suggested providing more details in Example 3-1 about procedures performed by the audit committee. Accordingly, Example 3-1 has been expanded to provide more details on the types of procedures performed by the audit committee to address the risk of management override.

Some commenters suggested adding clarification regarding situations in which a company does not have an audit committee. A footnote reference to COSO Small Companies Guidance has been added to the section entitled Evaluating Audit Committee Oversight for clarification, as suggested.

²² See COSO Small Companies Guidance, Volume II: Guidance, page 43.

Chapter 4 – Evaluating Segregation of Duties and Alternative Controls

Most comments on Chapter 4 related to perceived inconsistencies in Example 4-1, which illustrates some audit procedures for testing alternative controls over inventory. In response to these comments, the example has been revised to describe more clearly the access rights of both the company's employee who performs certain incompatible duties, and the manager who performs the alternative controls. The paragraph preceding the example has also been revised to clarify that entity-level controls should operate at a necessary level of precision to effectively address the risk of misstatement.

One commenter suggested using the term “compensating controls” instead of “alternative controls” to describe controls that address the same issues as segregation of duties. The term “compensating controls” is not used in this chapter because it is generally applied to situations in which control deficiencies have been identified and the auditor is evaluating whether other controls might compensate for the deficiencies. Chapter 4 of this publication, as well as paragraph 42 of Auditing Standard No. 5, use the term “alternative controls” to apply to situations in which management has designed and implemented controls that achieve the same objectives as segregation of duties.

Chapter 5 – Auditing Information Technology Controls in a Less Complex IT Environment

Some commenters cautioned against underestimating risks that are associated with pre-packaged software. They indicated that readers might mistakenly perceive prepackaged software to be risk-free. In response to these comments, a footnote has been added to the section entitled Characteristics of Less Complex IT Environments in Chapter 5 to indicate that significant user configuration of the pre-packaged software might create additional risks that require additional controls.

In response to other commenters' suggestions, the following sentence has been added to the discussion in the third bullet point in the section entitled Characteristics of Less Complex IT Environments. “Access to systems is typically managed by a limited number of personnel.” In the fourth bullet point, the phrase “in many instances” has been inserted to acknowledge that a smaller, less complex company might perform more complex calculations using spreadsheets and other user-developed applications. In the same bullet point, the phrase “to accumulate, summarize, process, and report” has been replaced with “to initiate, authorize, record, process and report” to more accurately describe tasks included in the end-user computing.

Some commenters asked to clarify how the lack of controls over backups might impact the financial reporting process. In response, the second to last paragraph in the section entitled IT-Related Risks Affecting Financial Reporting of this publication has been reworded to refer, more specifically, to the controls that address the financial reporting risk, i.e., the risk of loss of data necessary to prepare the financial statements, and to acknowledge that there may be different controls to address the potential loss of data.

Several commenters suggested modifying Example 5-1 in order to better illustrate the points made in this chapter. In response, the description of controls and software in the Scenario section of Example 5-1 has been clarified, and controls over authorization have been added to the first sub-bullet in the Audit Approach section.

In general, several commenters were concerned about the potential for auditors to use the lists of controls and audit procedures from Chapter 5 as checklists.

As previously mentioned, the discussions and examples of controls in this publication do not establish internal control requirements and are not intended as guidance to management regarding establishing or evaluating internal control over financial reporting. These examples of controls in Chapter 5 do not represent required controls for management.

One commenter suggested adding guidance relating to testing of controls over spreadsheets. The purpose of this chapter was to discuss general audit strategies that might be employed regarding the evaluation of IT controls in a less complex IT environment rather than to discuss testing of any particular control activities.

Chapter 6 – Considering Financial Reporting Competencies and Their Effects on Internal Control

Most of the comments on Chapter 6 related to controls over the work performed by outside professionals.

One commenter provided examples of the controls that a company might implement to test work performed by the outside professional. These examples have been added to the discussion of audit considerations in the section entitled Supplemented Competencies with Assistance from Outside Professionals. Additionally, as suggested by commenters, Example 6-1 has been modified to more clearly outline the responsibilities of management and the third-party service provider in a situation typical for a smaller, less complex company. The discussion in the example has also been expanded to provide further details of the procedures performed by the auditor.

Some commenters asked what controls the auditors should expect to see over the work of outside professionals in addition to those over the competence and the accuracy of the information. One commenter asked for specific examples of controls in the situations when the management uses outside professionals in the areas of stock compensation, derivatives and hedging activities, off-balance-sheet accounting, and financial statements preparation. Because of the variety of situations in which outside professionals could be used, including the ones mentioned by the commenters, and the diversity of potential controls that might be implemented by companies using outside professionals, the chapter focuses mainly on the control objectives that might be relevant to those situations rather than the individual controls. However, as noted in the preceding paragraph, some additional examples of controls have been included in this publication as suggested by commenters.

Chapter 7 – Obtaining Sufficient Competent Evidence When the Company Has Less Formal Documentation

Some commenters on this chapter asked the staff to clarify the differences between the terms “formal” and “less formal” documentation and the impact of the distinction on the audit. One commenter asked about the auditor’s course of action if there is no documentary evidence at all.

“Formal” and “less formal” documentation are relative terms used in this publication to illustrate differences that might exist in the documentation practices of larger and smaller companies. For instance, the section entitled Documentation of Processes and Controls provides examples of more formal documentation and less formal documentation of processes and controls. As stated in this chapter, when auditing a smaller, less complex company, it generally is helpful to obtain an understanding of the nature and availability of documentation as early in the audit process as practical, so that the auditor has sufficient time to explore alternatives if the company has less formal documentation. The section entitled Other Considerations discusses various

types of documentation that auditors might consider using as audit evidence relating to internal control, including the documentation of company processes and procedures and other documentation that the company uses to run the business. The chapter also addresses situations in which only limited documentation exists.

Additionally, in response to one commenter's concern, Example 7-2 has been clarified to explain that the CFO's review represents one control – rather than the only control – that management relies on with respect to the period-end financial reporting process.

Chapter 8 – Auditing Smaller, Less Complex Companies with Pervasive Control Deficiencies

Several commenters asked for clarification regarding when limited testing of a control that is unlikely to be effective might be necessary. Chapter 8 now includes an example indicating that limited testing of a control might be necessary if walkthrough procedures have not been performed. In response to another commenter's suggestion, the discussion in the section entitled *Considering the Effect of Pervasive Control Deficiencies on Other Controls* has been expanded to clarify how certain deficient entity-level controls might impair the effectiveness of other controls over relevant assertions.

Other commenters suggested changing the discussion of management override of controls to state that a control that has been “inappropriately overridden” instead of “frequently overridden” is either less likely to operate effectively or ineffective. The wording from the preliminary guidance has been retained in this publication because it best describes the risk associated with management override. Although management override might be appropriate in certain circumstances (e.g., manual override of the old credit limits until the new limits are posted in the IT system), frequent management override of a control could impair the effectiveness of the overridden control.

Appendix A – The Integrated Audit Process

Some commenters expressed concern that auditors might view the audit approach outlined in Appendix A as the preferred approach because this publication would “formalize” it. Others expressed concern that the audit approach described in the appendix does not cover all of the auditing procedures that might need to be performed. As noted in the Introduction to this publication, the guidance is not a rule of the Board and does not establish new requirements. Rather, it discusses how the auditors of smaller, less complex companies may address some (but not all) of the challenges that might arise in audits of those companies. Thus, this publication does not attempt to “formalize” or endorse any particular approach to the audit of internal control over financial reporting. Auditing Standard No. 5 provides direction on integrating the audit of internal control with the audit of financial statements. Appendix A to this publication has been developed to illustrate one approach for integrating the two audits, and it is not intended to present all of the procedures that are required for a particular audit. Auditors should plan and perform their integrated audits to achieve the objectives of the audits and to comply with standards of the PCAOB.

Section 400

STAFF AUDIT PRACTICE ALERTS

.01 Staff Audit Practice Alert No. 1 Matters Related to Timing and Accounting for Option Grants

July 28, 2006

Audit Practice Alerts highlight new, emerging, or otherwise noteworthy circumstances that may affect how auditors conduct audits under the existing requirements of PCAOB standards and relevant laws. Auditors should determine whether and how to respond to these circumstances based on the specific facts presented. The statements contained in Audit Practice Alerts are not rules of the Board and do not reflect any Board determination or judgment about the conduct of any particular firm, auditor, or any other person.

Recent reports and disclosures about issuer practices related to the granting of stock options, including the “backdating” of such grants, indicate that some issuers’ actual practices in granting options might not have been consistent with the manner in which these transactions were initially recorded and disclosed. Some issuers have announced restatements of previously issued financial statements as a result of these practices. In addition, some of these practices could result in legal and other contingencies that may require recognition of additional expense or disclosure in financial statements.

This practice alert advises auditors that these practices may have implications for audits of financial statements or of internal control over financial reporting (“ICFR”) and discusses factors that may be relevant in assessing the risks related to these matters.

Background

The recorded value of a stock option depends, in part, on the market price of the underlying stock on the date that the option is granted and the exercise price specified in the option. Some issuers may have granted options with exercise prices that are less than the market price of the underlying stock on the date of grant. These options are sometimes referred to as “discounted” or “in-the-money” options. Where discounted options were granted and an issuer failed to properly consider this condition in its original accounting for the option, errors in recording compensation cost, among other effects, may have resulted. These errors may cause an issuer’s financial statements, including related disclosures, to be materially misstated.¹

While this alert does not attempt to describe all of the variations in circumstances that may result in the issuance of discounted options, a range of practices appears to be involved, including—

¹ In addition, academic research has suggested the possibility that some issuers may have purposefully granted options immediately before the release of information that the issuer believed would be favorable to its share price. While these practices may not result in the granting of discounted options, they may create legal or reputational risks and raise concerns about the issuer’s control environment.

- The application of provisions in option plans that allow for:
 - the selection of exercise prices based on market prices on dates earlier than the grant date, or
 - the award of options that allow the option holder to obtain an exercise price equal to the lower of the market price of the stock at the grant date or during a specified period of time subsequent to the grant date.
- Preparation, or subsequent modification, of option documentation for purposes of indicating a lower exercise price than the market price at the actual grant date.
- Treating a date as the grant date when, in fact, all of the prerequisites to a grant had not yet occurred.

Available information suggests that the incidence of these and similar practices may have substantially decreased after the implementation of the shortened filing deadline for reports of option grants specified by Section 403 of the Sarbanes-Oxley Act of 2002. In August 2002, the Securities and Exchange Commission (“SEC”) implemented this requirement by requiring the reporting of an option grant on Form 4 within two days of the date of grant. However, periods subsequent to the grant of an option may also be affected by improper accounting for a grant because option cost is generally expensed over the period during which the issuer receives the related services, most commonly its vesting period.

Matters for Auditor Consideration

Auditors planning or performing an audit should be alert to the risk that the issuer may not have properly accounted for stock option grants and, as a result, may have materially misstated its financial statements or may have deficiencies in its ICFR. For audits currently underway or to be performed in the future, the auditor should acquire sufficient information to allow him or her to assess the nature and potential magnitude of these risks. An auditor must use professional judgment in making these assessments and in determining whether to apply additional procedures in response.

In making these judgments, auditors should be mindful of the following—

Applicable financial accounting standards. Financial Accounting Standards Board Statement of Financial Accounting Standards (“SFAS”) No. 123 R (revised 2004), *Share-Based Payment*, applies to issuer reporting periods beginning after June 15, 2005 (December 15, 2005 for small business issuers). Accounting for options was, however, previously governed by other accounting standards and related interpretations, specifically Accounting Principles Board Opinion No. 25, *Accounting for Stock Issued to Employees* (APB 25), and SFAS No. 123, *Accounting for Stock-Based Compensation*. If an auditor determines that it is necessary to consider the accounting for option grants and related disclosures in financial statements of a prior period, the auditor should take care to determine the applicable generally accepted accounting principles in effect in those periods and to consider the specific risks associated with these principles.

- *Accounting for discounted options.* For periods in which an issuer used the provisions of APB 25 to determine compensation cost related to stock options, the issuer may have been required to record additional compensation cost equal to the difference in the

exercise price and the market price at the measurement date (as defined in APB 25). In periods in which the issuer has recorded option compensation cost using the fair value method as allowed by SFAS No. 123, or as required by SFAS No. 123 R (revised 2004), the impact on the calculated fair value of options of using an incorrect date as the grant date would depend on the nature and magnitude of changes in conditions that affect option valuation between the incorrect date used and the actual grant date. In all cases, the compensation cost of options should be recognized over the period benefited by the services of the option holder.

- *Accounting for variable plans.* For periods in which an issuer used the provisions of APB 25 to determine compensation cost related to stock options, an option with terms allowing a modification of the exercise price, or whose exercise price was modified subsequent to the grant date may require variable plan accounting. Variable option accounting requires that compensation cost be recorded from period to period based on the variation in current market prices. In periods in which the issuer records option compensation cost using the fair value method as allowed by SFAS No. 123, or as required by SFAS No. 123 R, the right to a lower exercise price may constitute an additional component of value of the option that should be considered at the grant date. In all cases, the cost of options should be recognized over the period benefited by the services of the option holder.
- *Accounting for contingencies.* If the consequences of the issuer's practices for stock option grants or its accounting for, and disclosure of, option grants result in legal or other contingencies, the application of SFAS No. 5, *Accounting for Contingencies*, may require that the issuer record additional cost or make additional disclosures in financial statements.
- *Accounting for tax effects.* The grant of discounted stock options may affect the issuer's ability to deduct expenses related to these options for income tax purposes, thereby affecting the issuer's cash flows and the accuracy of the related accounting for the tax effects of options.

Consideration of materiality. In evaluating materiality, auditors should remember that paragraph .11 of AU sec. 312, *Audit Risk and Materiality in Conducting an Audit*, and SEC Staff Accounting Bulletin: No. 99—*Materiality* emphasize that both quantitative and qualitative considerations must be assessed. Quantitatively small misstatements may be material when they relate to unlawful acts or to actions by an issuer that could lead to a material contingent liability. In all cases, auditors should evaluate the adequacy of related issuer disclosures.

Possible illegal acts. Auditors who become aware that an illegal act may have occurred must comply with the applicable requirements of AU section ("AU sec.") 317, *Illegal Acts*, and Section 10A of the Securities Exchange Act of 1934. Section 10A, among other things, requires a registered public accounting firm to take certain actions if it "detects or otherwise becomes aware of information indicating that an illegal act (whether or not perceived to have a material effect on the financial statements of the issuer) has or may have occurred..." If it is likely that an illegal act has occurred, the registered public accounting firm must "determine and consider the possible effect of the illegal act on the financial statements of the issuer, including any contingent monetary effects, such as fines, penalties, and

damages.” The registered public accounting firm must also inform the appropriate level of management and assure that the audit committee is adequately informed “unless the illegal act is clearly inconsequential.” The auditor may, depending on the circumstances, also need to take additional steps required under Section 10A if the issuer does not take timely and appropriate remedial actions with respect to the illegal act.

A. Effects of options-related matters on planned or ongoing audits

In planning and performing an audit of financial statements and ICFR, the auditor should assess the nature and potential magnitude of risks associated with the granting of stock options and perform procedures to appropriately address those risks. The following factors are relevant to accomplishing these objectives—

- Assessment of the potential magnitude of risks of misstatement of financial statements and deficiencies in ICFR related to option granting practices. This assessment should include consideration of possible indicators of risk related to option grants, including, where appropriate:
 - The status and results of any investigations relating to the timing of options grants conducted by the issuer or by regulatory or legal authorities.
 - The results of direct inquiries of members of the issuer’s management and its board of directors that should have knowledge of matters related to the granting and accounting for stock options.
 - Public information related to the timing of options grants by the issuer.
 - The terms and conditions of plans or policies under which options are granted; in particular, terms that allow exercise prices that are not equal to the market price on the date of grant or that delegate authority for option grants to management. In these situations, auditors should also consider whether issuers have other policies that adequately control the related risks.
 - Patterns of transactions or conditions that may indicate higher levels of inherent risk in the period under audit. Such patterns or conditions may include levels of option grants that are very high in relation to shares outstanding, situations in which option-based compensation is a large component of executive compensation, highly variable grant dates, patterns of significant increases in stock prices following option grants, or high levels of stock-price volatility.
- In planning and performing audits, auditors should appropriately address the assessed level of risk, if any, related to option granting practices. Specifically:
 - In addition to the general planning considerations for financial statement audits identified in AU sec. 311, *Planning and Supervision*, the auditor should consider:
 - The implications of any identified or indicated fraudulent or illegal acts related to option grants to assessed risks of fraud (AU sec. 312.07 and AU sec. 316, *Consideration of Fraud in a*

Financial Statement Audit); the potential for illegal acts (AU sec. 317, *Illegal Acts by Clients*); or the assessment of an issuer's internal controls (AU sec. 319, *Internal Control in a Financial Statement Audit*).

- The scope of procedures applied to assess the potential for fraud (AU sec. 316) and illegal acts (AU sec. 317).
- The nature, timing, and extent of audit procedures applied to elements of the financial statements affected by the issuance of options. In particular, this assessment should include consideration of:
 - The need for specific management representations related to these matters (AU sec. 333, *Management Representations*) and the nature of matters included in inquiries of lawyers (AU sec. 337, *Inquiry of a Client's Lawyer*).
 - Where applicable, the result of tests of internal controls over the granting, recording, and reporting of option grants.
 - The need, based on the auditor's risk assessment, for additional specific auditing procedures related to the granting of stock options.

For integrated audits performed as described in PCAOB Auditing Standard No. 2, *An Audit of Internal Control Over Financial Reporting Performed in Conjunction with An Audit of Financial Statements* ("AS No. 2"), the auditor should consider the implications of identified or potential accounting and legal risks related to options in planning, performing, and reporting on audits of ICFR. In addition, as discussed in paragraphs 145–158 of AS No. 2, the results of the audit of ICFR should be considered in connection with the related financial statement audit.

B. Auditor involvement in registration statements

In cases where an auditor is requested to consent to the inclusion of his or her report, including a report on ICFR, in a registration statement under the Securities Act of 1933, AU sec. 711, *Filings Under Federal Securities Statutes*, provides that the auditor should perform certain procedures prior to issuing such a consent.²

- Paragraph .10 of AU sec. 711 provides that an auditor should perform certain procedures with respect to events subsequent to the date of the audit opinion up to the effective date of the registration statement (or as close thereto as is reasonable and practical under the circumstances). These procedures include inquiry of responsible officials and employees of the issuer and obtaining written representations from them about whether events have occurred subsequent to the date of the auditor's report that have a material effect on the financial statements or that should be disclosed in order to keep the financial statements from being misleading. The auditor should consider performing inquiries and obtaining representations specifically related to the granting and recording of option grants.
- Paragraph .11 of AU sec. 711 provides that a predecessor auditor that has been requested to consent to the inclusion of his or her report on

² Under Paragraph 198 of AS No. 2, the auditor should apply AU sec. 711 when the auditor's report on management's assessment of ICFR is included in filings under federal securities statutes.

prior-period financial statements in a registration statement should obtain written representations from the successor auditor regarding whether the successor auditor's audit and procedures with respect to subsequent events revealed any matters that might have a material effect on the financial statements reported on by the predecessor auditor or that would require disclosure in the notes to those financial statements. If the successor auditor becomes aware of information that leads him or her to believe that financial statements reported on by the predecessor auditor may require revision, the successor auditor should apply paragraphs .21 and .22 of AU sec. 315.³

- If either the successor or predecessor auditor discovers subsequent events that require adjustment or disclosure in the financial statements or becomes aware of facts that may have existed at the date of his or her report and might have affected the report had he or she been aware of them, the auditor should take the actions described in paragraph .12 of AU sec. 711. In addition, where the auditor concludes that unaudited financial statements or unaudited interim financial information presented, or incorporated by reference, in a registration statement are not in conformity with generally accepted accounting principles, he or she should take the actions described in paragraph .13 of AU sec. 711.

C. Effects of option-related matters on previously issued opinions

If an auditor becomes aware of information that relates to financial statements previously reported on by the auditor, but which was not known to him or her at the date of the report, and which is of such a nature and from such a source that he or she would have investigated it had it come to his or her attention during the course of the audit, he or she should take the actions described in AU sec. 561, *Subsequent Discovery of Facts Existing at the Date of the Auditor's Report*.

Contact Information

Inquiries concerning this Practice Alert may be directed to—

Phil D. Wedemeyer, Director, Office of Research and Analysis, 202-207-9204, wedemeyerp@pcaobus.org

Thomas Ray, Chief Auditor and Director of Professional Standards, 202-207-9112, rayt@pcaobus.org

³ In cases in which a predecessor auditor reissues his or her report on financial statements included in a filing under the Securities Exchange Act of 1934, the predecessor auditor should follow the directives in paragraphs .71 through .73 of AU sec. 508.

.02 Staff Audit Practice Alert No. 2 Matters Related to Auditing Fair Value Measurements of Financial Instruments and the Use of Specialists

December 10, 2007

Staff Audit Practice Alerts highlight new, emerging, or otherwise noteworthy circumstances that may affect how auditors conduct audits under the existing requirements of PCAOB standards and relevant laws. Auditors should determine whether and how to respond to these circumstances based on the specific facts presented. The statements contained in Audit Practice Alerts are not rules of the Board and do not reflect any Board determination or judgment about the conduct of any particular firm, auditor, or any other person.

The purpose of this staff audit practice alert is to remind auditors of their responsibilities for auditing fair value measurements of financial instruments and when using the work of specialists under the existing standards of the PCAOB. This alert is focused on specific matters that are likely to increase audit risk related to the fair value of financial instruments in a rapidly changing economic environment.¹

This practice alert highlights certain requirements in the auditing standards related to fair value measurements and disclosures in the financial statements and certain aspects of generally accepted accounting principles (GAAP) that are particularly relevant to the current economic environment.

While this practice alert focuses on fair value in general, it also draws the auditor's attention to certain areas of the new fair value accounting standard, Statement of Financial Accounting Standard (SFAS) No. 157, *Fair Value Measurements*.² Auditing fair value measurements developed under the new accounting standard likely will provide new challenges during implementation. Therefore, the practice alert describes the applicable accounting pronouncements in these areas and provides direction, in accordance with the auditing standards, for evaluating the application of GAAP.³

The practice alert also discusses the auditor's responsibilities, under the existing auditing standards, when using the work of specialists. The alert

¹ A combination of factors in the housing and mortgage markets, including rising delinquency and default rates on subprime mortgages and declining home prices, has led to increases in actual and expected credit losses for residential mortgage-backed securities and mortgage loans. In early 2007, the credit markets began reacting to these changing factors and the prices of many securities backed by subprime mortgages began to decline. Lower volumes of transactions in certain types of collateralized securities might make it more difficult to obtain relevant market information to estimate the fair value of these financial instruments.

² In September 2006, the Financial Accounting Standards Board (FASB) issued SFAS 157, which is effective for financial statements issued for fiscal years beginning after November 15, 2007 and interim periods within those fiscal years. This standard, which some companies early-adopted, defines fair value, establishes a framework for measuring fair value, and expands disclosures. On November 14, 2007, the FASB voted to expose for comment a one year deferral for the implementation of SFAS 157 for certain nonrecurring, nonfinancial assets and liabilities. See FASB web site at www.fasb.org.

³ In order to provide guidance to auditors on auditing fair value measurements, this practice alert necessarily describes GAAP used by public companies to measure fair value. The Board, however, has no authority to prescribe the form or content of an issuer's financial statements. That authority, and the authority to make binding determinations concerning an issuer's compliance with GAAP, rests with the Securities and Exchange Commission. Accordingly, while this staff audit practice alert describes applicable GAAP, it should not be understood as establishing or interpreting GAAP.

provides some considerations for the auditor in determining whether a specialist is needed and highlights the requirement that the auditor should evaluate assumptions used in fair value measurements developed by a company's specialist in accordance with the PCAOB standard on auditing fair value measurements. It also highlights the auditor's responsibility to evaluate the appropriateness of using the specialist's work for the purpose of financial statements prepared in conformity with GAAP.

The practice alert is organized into four sections—

- Auditing fair value measurements;
- Classification within the fair value hierarchy under SFAS 157;
- Using the work of specialists; and
- Use of a pricing service.

Auditing Fair Value Measurements

AU sec. 328, *Auditing Fair Value Measurements and Disclosures*, applies to auditing fair value measurements and disclosures in financial statements.⁴ Among other things, AU sec. 328 states that the auditor should evaluate whether the fair value measurements and disclosures in the financial statements are in conformity with GAAP. In general, for companies that had not adopted SFAS 157 before its mandatory effective date, GAAP in effect throughout 2007 provides that—

- Fair value is the amount at which an asset or liability could be bought or sold in a current transaction between willing parties, that is, other than a forced or liquidation sale;⁵
- Quoted market prices in active markets are the best evidence of fair value and should be used as the basis for the measurement, if available;⁶
- The estimate of fair value should consider prices for similar assets;⁷ and
- Valuation techniques should incorporate assumptions that market participants would use in their estimates of value.⁸

In addition, AICPA Statement of Position (SOP) 94-6, *Disclosure of Certain Significant Risks and Uncertainties*, requires certain disclosures, in addition to those required by other accounting standards, about estimates when certain information is known prior to the issuance of financial statements.⁹

⁴ AU secs. 342, *Auditing Accounting Estimates*, and 332, *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities*, also are related to auditing fair value.

⁵ See SFAS 115, *Accounting for Certain Investments in Debt and Equity Securities*, paragraph 137; SFAS 133, *Accounting for Derivatives and Hedging Activities*, paragraph 540; and SFAS 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*, paragraph 69.

⁶ *Ibid.* Also, in paragraph 58 of SFAS 107, *Disclosures about Fair Value of Financial Assets* the FASB Board reiterated its belief that quoted prices, even from thin markets, provide useful information because investors and creditors regularly rely on those prices to make their decisions.

⁷ See SFAS 115, *Accounting for Certain Investments in Debt and Equity Securities*, paragraph 137; SFAS 133, *Accounting for Derivatives and Hedging Activities*, paragraph 540; and paragraph 69 of SFAS 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*.

⁸ *Ibid.*

⁹ See SOP 94-6, paragraph .13.

SFAS 157 incorporates concepts similar to those in SFASs 115, *Accounting for Certain Investments in Debt and Equity Securities*, 133, *Accounting for Derivatives and Hedging Activities*, and 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*. SFAS 157 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. However, it also introduces concepts such as the principal and most advantageous markets and the fair value hierarchy of inputs (further discussed in this alert).¹⁰

In planning and performing procedures in response to the risk associated with fair value measurements, the auditor should obtain an understanding of the company's process for determining fair value measurements and disclosures, including relevant controls.¹¹ In addition, the auditor should, among other things—

- Evaluate whether management's assumptions are reasonable and reflect, or are not inconsistent with, market information.¹² For example, the fact that transaction volume in a particular market is lower than in previous periods may not necessarily support an assumption that transactions in that market constituted forced or distressed sales.
- If management relies on historical financial information in the development of an assumption, consider the extent to which such reliance is justified. However, historical information might not be representative of future conditions or events.¹³ For example, an auditor should evaluate whether a company's use of historical default rates, in an environment in which default rates are increasing, is justified.
- Evaluate whether the company's method for determining fair value measurements is applied consistently and if so, whether the consistency is appropriate considering possible changes in the environment or circumstances affecting the company.¹⁴ For example, the relative weightings in a company's model may not be reasonable in situations where there has been a change in market conditions. In such cases, auditors should consider whether compliance with applicable accounting standards might require a change in the model.

Inputs based on a company's own data may be more susceptible to preparer bias because they may not be based on observable market inputs.¹⁵ In such cases, the auditor should be aware of the increased risk of management bias and address the related risk of material misstatement.¹⁶

¹⁰ See SFAS 157, paragraphs 8, 22, and 23.

¹¹ See AU sec. 328.09.

¹² See AU sec. 328.26.

¹³ See AU sec. 328.37.

¹⁴ See AU sec. 328.19. Also, under SFAS 157, paragraph 20, a change in valuation technique or its application, is appropriate if the change results in a measurement that is equally or more representative of fair value in the circumstances.

¹⁵ See AU sec. 316, *Consideration of Fraud in a Financial Statement Audit*. Paragraph .39 notes that certain accounts, classes of transactions, and assertions may have high inherent risk due to a high degree of management judgment and subjectivity. They also may represent fraud risks because they are susceptible to management manipulation.

¹⁶ AU sec 312, *Audit Risk and Materiality in Conducting an Audit*, paragraph .36, provides that the risk of material misstatement is generally greater when account balances include estimates because of the inherent subjectivity in estimating future events.

Classification Within the Fair Value Hierarchy Under SFAS 157

Under SFAS 157, a company must determine the appropriate level in the fair value hierarchy for each fair value measurement. The fair value hierarchy in SFAS 157 prioritizes the inputs, which refer broadly to assumptions market participants would use in pricing an asset or liability, into three levels. It gives the highest priority to quoted prices (unadjusted) in active markets for identical assets or liabilities and the lowest priority to unobservable inputs.¹⁷ The level in the fair value hierarchy within which a fair value measurement in its entirety falls is determined based on the lowest level input that is significant to the fair value measurement in its entirety.

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date.
- Level 2 inputs are inputs other than quoted prices within Level 1 that are observable for the asset or liability, either directly or indirectly. A significant adjustment to a Level 2 input could result in the Level 2 measurement becoming a Level 3 measurement.
- Level 3 inputs are unobservable inputs for the asset or liability.¹⁸

Because there are different consequences associated with each of the three levels of the hierarchy, the auditor should be alert for circumstances in which the company may have an incentive to inappropriately classify fair value measurements within the hierarchy. For example, an asset or liability with Level 1 inputs generally must be measured using unadjusted quoted prices in an active market, while an asset or liability with Level 2 inputs is measured using observable market inputs other than quoted prices included in Level 1. Accordingly, a Level 2 measurement might allow for more discretion or judgment on the part of management than a Level 1 measurement. As another example, the required disclosures associated with Level 3 measurements are more extensive than those associated with Level 1 and Level 2 measurements.

The auditor's opinion is based on, among other things, his or her judgment as to whether the financial statements and related notes are informative of matters that may affect their use, understanding, and interpretation.¹⁹ In evaluating whether a company's disclosures are complete, accurate, and in conformity with SFAS 157, the auditor should be aware that a financial statement disclosure that is not in accordance with GAAP could be a misstatement of the financial statements.²⁰

¹⁷ See SFAS 157, paragraph 21. Observable inputs are inputs that reflect the assumptions market participants would use in pricing the asset or liability developed based on market data obtained from sources independent of the reporting entity. Unobservable inputs are those that reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances.

¹⁸ See SFAS 157, paragraphs 22–32.

¹⁹ See AU sec. 411, *The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles*, paragraph .04.

²⁰ See AU sec. 9312, *Audit Risk and Materiality in Conducting an Audit: Auditing Interpretations of Section 312*, paragraphs .01 and .02.

Using the Work of Specialists

Management and auditors frequently use the work of a specialist in preparing and auditing financial statements containing complex fair value measurements.

AU sec. 328 states that the auditor should consider whether to engage a specialist and use the work of that specialist as evidential matter in performing substantive tests to evaluate material financial statement assertions.²¹ As part of the consideration, the auditor should evaluate whether he or she has the necessary skill and knowledge to plan and perform audit procedures related to the fair value measurement. Factors to consider include—

- Significant use of unobservable inputs;
- Complexity of the valuation technique; and
- Materiality of the fair value measurement.

AU sec. 336, *Using the Work of a Specialist*, provides direction that applies when the auditor uses the work of a specialist, whether the specialist is engaged by the company or the auditor. It states that the auditor should (a) obtain an understanding of the methods and assumptions used by the specialist, (b) make appropriate tests of data provided to the specialist, and (c) evaluate whether the specialist's findings support the related assertions in the financial statements.²² In obtaining an understanding of the specialist's methods, the auditor should consider whether the method will result in a measurement that is in conformity with the applicable accounting standards.²³ In addition, the auditor should evaluate, in accordance with AU sec. 328, the assumptions developed by a specialist engaged or employed by management.²⁴

Additionally, the auditor should evaluate the specialist's qualifications, including the specialist's experience in the type of work under consideration, and obtain an understanding of the work performed by the specialist, including the appropriateness of using the specialist's work for the intended purpose.²⁵ In the context of this practice alert, the intended purpose of the specialist's work is the valuation of assets and liabilities for use in financial statements prepared in conformity with GAAP.

Use of a Pricing Service

If a company uses a pricing service for its fair value measurements, the auditor should determine the nature of the information provided by the pricing service. For example, the auditor should understand whether the fair value measurement was determined using quoted prices from an active market, observable inputs (such as prices for similar assets), or fair value measurements based on a model, and adjust his or her audit procedures based on the nature of the information provided by the pricing service.²⁶ In addition, if the price is not based on quoted prices from an active market or observable inputs (such as

²¹ See AU sec. 328.20.

²² See AU sec. 336.12.

²³ See AU secs. 328.03 and 336.09.

²⁴ AU sec. 328 provides that management's assumptions used in fair value measurements or disclosures include assumptions developed by a specialist engaged or employed by management. See AU sec. 328.05, footnote 2.

²⁵ See AU sec. 336.08–.09.

²⁶ The evaluation of pricing information also is applicable to fair value measurements that a company obtains from other third parties.

prices for similar assets), the auditor should obtain an understanding of the model and evaluate whether the assumptions are reasonable.²⁷

There are additional factors for the auditor to consider under SFAS 157. For example, under SFAS 157, a fair value measurement assumes that the transaction occurs in the principal market for the asset or liability or, in the absence of a principal market, the most advantageous market. The principal market is one in which the reporting entity would sell the asset or transfer the liability with the greatest volume and level of activity. If there is a principal market, under SFAS 157, the fair value measurement represents the price in that market even if the price in a different market is potentially more advantageous.²⁸

Under SFAS 157, when a company uses a pricing service, the auditor should evaluate whether the assumptions used by the pricing service reflect the price to sell the asset or paid to transfer the liability in the principal market (or most advantageous market if the company has no principal market) of the company. If the pricing service valuation is based on actual trades or quotes, the auditor should evaluate whether those traded or quoted prices would be available to the company in the company's principal market (or most advantageous market, if the company has no principal market). For example, a pricing service might provide an amount for which a large financial institution could sell the financial instrument. However, a company that owns that financial instrument might not be able to transact in the same market as a large financial institution. If the price available to a large financial institution would not be available to the company, then that price may not be an appropriate measure of fair value under SFAS 157.

.03 Staff Audit Practice Alert No. 3 Audit Considerations in the Current Economic Environment

December 5, 2008

Staff Audit Practice Alerts highlight new, emerging, or otherwise noteworthy circumstances that may affect how auditors conduct audits under the existing requirements of PCAOB standards and relevant laws. Auditors should determine whether and how to respond to these circumstances based on the specific facts presented. The statements contained in Audit Practice Alerts are not rules of the Board and do not reflect any Board determination or judgment about the conduct of any particular firm, auditor, or any other person.

Recent events in the financial markets and the current economic environment may affect companies' operations and financial reporting and, in turn, may have implications for audits of financial statements and internal control over financial reporting. Audit risks that may have been identified previously may become more significant or new risks may exist due to current events (e.g. those affecting the economy, credit and liquidity). Among other things, the current uncertainties in the market and economy may create questions about the valuation, impairment, or recoverability of certain assets and the completeness or valuation of certain liabilities reflected in financial statements.

The purpose of this staff audit practice alert is to assist auditors in identifying matters related to the current economic environment that might affect audit risk and require additional emphasis. While the alert highlights certain areas, it is not intended to identify all areas that might affect audit risk in the current economic environment or serve as a substitute for the relevant auditing standards. All audits of issuers must be conducted in accordance with the standards of the PCAOB.

The practice alert is organized into six sections—

- Overall audit considerations;
- Auditing fair value measurements;
- Auditing accounting estimates;
- Auditing the adequacy of disclosures;
- Auditor's consideration of a company's ability to continue as a going concern; and
- Additional audit considerations for selected financial reporting areas.

In order to provide guidance to auditors on audit considerations in the current economic environment, this practice alert necessarily describes generally accepted accounting principles ("GAAP") used by public companies in various areas. The Board, however, has no authority to prescribe the form or content of an issuer's financial statements. That authority, and the authority to make binding determinations concerning an issuer's compliance with GAAP, rests with the U.S. Securities and Exchange Commission ("SEC"). Accordingly, while this staff audit practice alert describes applicable GAAP, it should not be understood as establishing or interpreting GAAP.

Overall Audit Considerations

The following section describes overall audit considerations related to planning, fraud, internal controls, substantive procedures, and communications with audit committees that may be affected by recent events in the financial markets and current economic conditions.

Planning considerations

The effects of current economic conditions on a company's operations and financial reporting may affect audit planning. In planning the audit, the auditor should consider, among other things, matters affecting the industry in which the company operates, including the economic conditions.¹

As the audit progresses, changed conditions may make it necessary to modify planned audit procedures.² Accordingly, the auditor may need to reassess audit risks and update his or her understanding of how current economic conditions may affect the company's financial reporting. Knowledge of these effects helps the auditor in—

- Identifying areas that may need special consideration;
- Assessing conditions under which accounting data are produced, processed, reviewed, and accumulated within the company;
- Evaluating the reasonableness of estimates, such as valuation of inventories, depreciation, allowances for doubtful accounts, and percentage of completion of long-term contracts;
- Evaluating the reasonableness of management representations;
- Making judgments about the appropriateness of the accounting principles applied and the adequacy of disclosures.³

Whenever the auditor has concluded that there is significant risk of material misstatement of the financial statements, the auditor should consider this conclusion in determining the nature, timing, or extent of procedures; assigning staff; or requiring appropriate levels of supervision.⁴ Higher risk may cause the auditor to expand the extent of procedures applied, apply procedures closer to or as of year end, particularly in critical audit areas, or modify the nature of procedures to obtain more persuasive evidence.⁵

In an audit of internal control over financial reporting, a direct relationship exists between the degree of risk that a material weakness could exist in a particular area of the company's internal control over financial reporting and the amount of audit attention that should be devoted to that area.⁶

Fraud risk considerations

The current economic environment may also trigger certain risk factors that may affect the risk of misstatement due to fraudulent financial reporting. Examples of risk factors include—

- Incentives and pressures

¹ Paragraphs .03 and .07 of AU sec. 311, *Planning and Supervision*, and paragraph 9 of PCAOB Auditing Standard No. 5 ("AS No. 5"), *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

² AU sec. 311.05.

³ AU sec. 311.06.

⁴ Paragraph .17 of AU sec. 312, *Audit Risk and Materiality in Conducting an Audit*.

⁵ Ibid.

⁶ AS No. 5, paragraph 11.

- Financial stability or profitability is threatened by economic, industry, or company operating conditions;
- Excessive pressure exists for management to meet the requirements or expectations of third parties;
- Information available indicates management or the board of directors' personal financial situation is threatened by the company's financial performance;
- Excessive pressure is placed on management or operating personnel to meet financial targets set up by the board of directors or management, including sales or profitability incentive goals;
- Opportunities
 - The nature of the industry or the company's operations provides opportunities to engage in fraudulent financial reporting;
 - There is ineffective monitoring of management;
 - There is a complex or unstable organizational structure;
 - Internal control components are deficient.⁷

The auditor has a responsibility to plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether caused by error or fraud.⁸ As part of the understanding of internal control sufficient to plan the audit, the auditor should evaluate whether entity programs and controls that address identified risks of material misstatement due to fraud have been suitably designed and placed in operation.⁹ Also, the auditor should ordinarily presume that there is a risk of material misstatement due to fraud relating to revenue recognition.¹⁰ The auditor responds to risks of material misstatement due to fraud in the following three ways—

- A response that has an overall effect on how the audit is conducted—that is, a response involving more general considerations apart from the specific procedures otherwise planned.¹¹ For example, the knowledge, skill, and ability of personnel assigned significant engagement responsibilities should be commensurate with the auditor's assessment of the risks of material misstatement due to fraud for the engagement.¹² The auditor also should consider management's selection and application of significant accounting principles, particularly those related to subjective measurements and complex transactions.¹³ Further, the auditor should incorporate an element of unpredictability in the selection from year to year of auditing procedures to be performed.¹⁴
- A response to identified risks involving the nature, timing, and extent of the auditing procedures to be performed.¹⁵ For example, the auditing

⁷ Paragraph .85A.2 of AU sec. 316, *Consideration of Fraud in a Financial Statement Audit*.

⁸ Paragraph .02 of AU sec. 110, *Responsibilities and Functions of the Independent Auditor*.

⁹ AU sec. 316.44.

¹⁰ AU sec. 316.41.

¹¹ AU sec. 316.48.

¹² AU sec. 316.50.

¹³ Ibid.

¹⁴ Ibid.

¹⁵ AU sec. 316.48.

procedures performed in response to identified risks of material misstatement due to fraud should vary depending upon the types of risks identified and the account balances, classes of transactions, and related assertions that may be affected.¹⁶ Such procedures may involve both substantive tests and tests of the operating effectiveness of the company's programs and controls.¹⁷

- A response involving the performance of certain procedures to further address the risk of material misstatement due to fraud involving management override of controls, given the unpredictable ways in which Audit Considerations in the such override could occur.¹⁸ For example, the auditor should examine journal entries and other adjustments for evidence of possible material misstatement due to fraud.¹⁹ The auditor also should review accounting estimates for biases that could result in material misstatement due to fraud,²⁰ and evaluate the business rationale for significant unusual transactions.²¹

The auditor's assessment of the risks of material misstatement due to fraud should be ongoing throughout the audit.²²

In an audit of internal control over financial reporting, the risk that a company's internal control over financial reporting will fail to prevent or detect misstatement caused by fraud usually is higher than the risk of failure to prevent or detect error.²³

Internal control considerations

The current environment may increase audit risk and thus require additional auditor attention regarding the effective operation of internal controls. Areas in which additional attention may be required include the company's entity-level controls, such as, among other things, controls related to the control environment, and the company's risk assessment process. Additional attention also may be warranted on the controls related to certain significant accounts and disclosures and their relevant assertions, such as controls over the development of inputs and assumptions for the valuation of significant assets and liabilities; controls over the identification and review of assets for recoverability or impairment; and controls over the company's use of external specialists (for example, valuation or actuarial specialists) who assist in the determination of recorded amounts of certain assets or liabilities. In addition, some companies are responding to the current economic conditions by eliminating jobs. The loss of employees integral to the operation of internal controls may increase the risk of deficiencies in internal control over financial reporting because of, for example, lack of segregation of duties or lack of effective monitoring controls.

In an audit of internal control over financial reporting, the auditor also should evaluate whether the company's controls sufficiently address the identified risks of material misstatement due to fraud²⁴ and controls intended to address

²² AU sec. 316.68.

²³ AS No. 5, paragraph 11.

²⁴ AS No. 5, paragraph 14.

the risk of management override of controls.²⁵ Controls that might address these risks include—

- Controls over significant, unusual transactions, particularly those that result in late or unusual journal entries;
- Controls over journal entries and adjustments made in the period-end financial reporting process;
- Controls over related party transactions;
- Controls related to significant management estimates; and
- Controls that mitigate incentives for, and pressures on, management to falsify or inappropriately manage financial results.²⁶

Effect on substantive procedures

Because the current environment may increase inherent and control risks, the auditor might need to modify his or her planned substantive procedures or perform additional substantive procedures in order to reduce the level of detection risk to an acceptable level to support his or her opinion on the financial statements. Examples of modifications of planned substantive procedure include the following—

- Changing the nature of substantive tests from a less effective to a more effective procedure, such as using tests directed toward independent parties outside the company rather than tests directed toward parties or documentation within the company;
- Changing the timing of substantive tests, such as performing them at year end rather than at an interim date; and
- Changing the extent of substantive tests, such as using a larger sample size.²⁷

Communications with audit committees

The auditor has a responsibility to communicate certain matters related to the conduct of the audit to the audit committee.²⁸ Some of the required communications that may be affected by current economic conditions include discussions about accounting estimates as well as the company's accounting principles.

With respect to accounting estimates, the auditor should determine that the audit committee is informed about the process used by management in formulating particularly sensitive accounting estimates and about the basis for the auditor's conclusions regarding the reasonableness of those estimates.²⁹ The auditor should discuss with the audit committee the auditor's judgments about the quality, not just the acceptability, of the company's accounting principles as applied in its financial reporting.³⁰ The discussion should include such matters as the consistency of the company's accounting policies and their application, and the clarity and completeness of the company's financial statements, which

²⁵ AS No. 5, paragraph 14. AU secs. 316.57 to .67 describe procedures that should be performed to address the risk of management override of controls.

²⁶ AS No. 5, paragraph 14.

²⁸ Paragraph .01 of AU sec. 380, *Communication With Audit Committees*.

²⁹ AU sec. 380.08.

³⁰ AU sec. 380.11.

include related disclosures.³¹ The discussion also should include items that have a significant impact on the representational faithfulness, verifiability, and neutrality of the accounting information included in the financial statements.³² Examples of items that may have such an effect include the following—

- Selection of new or changes to accounting policies;
- Estimates, judgments, and uncertainties;
- Unusual transactions; and
- Accounting policies relating to significant financial statement items, including the timing of transactions and the period in which they are recorded.³³

While these and other communications are directed to the audit committee, the auditor is not precluded from communicating with management or other individuals within the company, who may, in the auditor's judgment, benefit from the communications.³⁴

Auditing Fair Value Measurements

Certain kinds of investments such as auction rate securities, commercial paper, mortgage-backed or other asset-backed securities, alternative investments (such as hedge funds, private equity investments, funds of funds, etc.), collateralized debt obligations and other investments may present complexities in valuation because of the current conditions in the financial markets. Accordingly, difficulties surrounding the measurement of fair value and the adequacy of related disclosures have come under increased focus over the past year.

Statement of Financial Accounting Standard (“SFAS”) No. 157, *Fair Value Measurements*,³⁵ establishes a framework for measuring fair values for financial reporting purposes and expands disclosures about those measurements. On September 30, 2008, the SEC’s Office of the Chief Accountant and the Financial Accounting Standards Board (“FASB”) staff issued *Clarifications on Fair Value Accounting* acknowledging that “the current environment has made questions surrounding the determination of fair value particularly challenging for preparers, auditors and users of financial information.”³⁶ On October 10, 2008, the FASB issued Staff Position (“FSP”) No. FAS 157-3, *Determining the Fair Value of a Financial Asset When the Market for That Asset Is Not Active*, which provides application guidance regarding—

- How the company’s own assumptions (that is, expected cash flows and appropriately risk-adjusted discount rates) should be considered when measuring fair value when relevant observable inputs do not exist;
- How available observable inputs in a market that is not active should be considered when measuring fair value; and

³¹ Ibid.

³² Ibid.

³³ Ibid.

³⁴ AU sec. 380.02.

³⁵ In September 2006, the Financial Accounting Standards Board (“FASB”) issued Statement of Financial Accounting Standard (“SFAS”) No. 157, *Fair Value Measurements*, which is effective for financial statements issued for fiscal years beginning after November 15, 2007 and interim periods within those fiscal years. The FASB deferred the implementation of SFAS No. 157 for certain nonrecurring, nonfinancial assets and liabilities for financial statements issued for fiscal years beginning after November 15, 2008 and interim periods within those fiscal years.

³⁶ See <http://www.sec.gov/news/press/2008/2008-234.htm>.

- How the use of market quotes (for example, broker quotes or pricing services for the same or similar financial assets) should be considered when assessing the relevance of observable and unobservable inputs available to measure fair value.³⁷

The following matters may be particularly important for auditors in considering fair value accounting estimates—

- The extent to which fair value accounting applies to various accounts;
- The choice and complexity of valuation techniques and models;
- Judgments concerning significant assumptions that may be used by others such as specialists employed or engaged by the company or the auditor;
- The availability, or lack thereof, of information or evidence and its reliability; and
- The extent of disclosure in the financial statements about measurement methods and uncertainty.

PCAOB Staff Audit Practice Alert No. 2 (“Practice Alert No. 2”), *Matters Related to Auditing Fair Value Measurements of Financial Instruments and the Use of Specialists*, remains relevant in the current environment and reminds auditors of their responsibilities with regard to—

- Auditing fair value measurements,
- Classification within the fair value hierarchy under SFAS 157,
- Using the work of specialists, and
- Use of a pricing service.³⁸

In discussing the auditor’s responsibilities for auditing fair value measurements, Practice Alert No. 2 refers the auditor to AU sec. 328, *Auditing Fair Value Measurements and Disclosures*, AU sec. 332, *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities*, AU sec. 336, *Using the Work of a Specialist*, and AU sec. 342, *Auditing Accounting Estimates*.

Auditing Accounting Estimates

Accounting estimates measure the effects of past business transactions or events, or the present status of an asset or liability.³⁹ Examples of accounting estimates include net realizable value of inventories, allowance for uncollectible accounts receivable, valuation allowance for deferred tax assets, actuarial assumptions in pension and other postretirement benefit costs, the impairment analysis and estimated useful lives of long-lived assets, restructuring accruals, and assumptions used in option pricing models for share-based payments.⁴⁰ In auditing accounting estimates, the auditor normally should consider, among other things, the company’s historical experience in making past estimates as well as the auditor’s experience in the industry.⁴¹ However, changes in facts, circumstances, or a company’s procedures may cause factors different from

³⁷ Paragraph 5 of FASB Staff Position (“FSP”) No. FAS 157-3, *Determining the Fair Value of a Financial Asset When the Market for That Asset Is Not Active*.

³⁸ PCAOB Staff Audit Practice Alert No. 2, *Matters Related to Auditing Fair Value Measurements of Financial Instruments and the Use of Specialists* (December 10, 2007).

³⁹ Paragraph .02 of AU sec. 342, *Auditing Accounting Estimates*.

⁴⁰ See AU sec. 342.16 for other examples of accounting estimates.

⁴¹ AU sec. 342.09.

those considered in the past to become significant to the accounting estimate.⁴² The significance of the recent changes in the economy and the financial markets increases the likelihood that this will be the case.

The auditor is responsible for evaluating the reasonableness of accounting estimates made by management in the context of the financial statements taken as a whole.⁴³ In evaluating the reasonableness of accounting estimates, the auditor should obtain an understanding of how management developed the estimate.⁴⁴ Based on that understanding, the auditor should use one or a combination of the following approaches—

- Review and test the process used by management to develop the estimate;
- Develop an independent expectation of the estimate to corroborate the reasonableness of management's estimate;
- Review subsequent events or transactions occurring prior to the date of the auditor's report.⁴⁵

The work that the auditor performs as part of the audit of internal control over financial reporting should necessarily inform the auditor's decisions about the approach he or she takes to auditing an estimate because, as part of the audit of internal control over financial reporting, the auditor would be required to obtain an understanding of the process management used to develop the estimate and to test controls over all relevant assertions related to the estimate.⁴⁶

In evaluating the reasonableness of an estimate, the auditor normally concentrates on key factors and assumptions that are—

- Significant to the accounting estimate;
- Sensitive to variations;
- Deviations from historical patterns;
- Subjective and susceptible to misstatement and bias.⁴⁷

When assessing audit differences between estimates best supported by the audit evidence and the estimates included in the financial statements, the auditor should consider whether such differences, even if they are individually reasonable, indicate a possible bias on the part of the company's management, in which case the audit or should reconsider the estimates taken as a whole.⁴⁸

As part of the audit, the auditor also should perform a retrospective review of significant accounting estimates reflected in the financial statements of the prior year to determine whether management judgments and assumptions relating to the estimates indicate a possible bias on the part of management.⁴⁹ With the benefit of hindsight, a retrospective review should provide the auditor with additional information about whether there may be a possible bias on the part of management in making the current year estimates.⁵⁰

Auditing the Adequacy of Disclosures

The current economic environment may increase the risks regarding the adequacy of disclosures, including the disclosures surrounding a company's risks and uncertainties, which in turn may warrant additional auditor attention.

The American Institute of Certified Public Accountants' Statement of Position 94-6 ("SOP 94-6"), *Disclosure of Certain Significant Risks and Uncertainties*, focuses on disclosures about risks and uncertainties, that in the near term (considered to be within one year from the date of the financial statements), could affect the amounts reported in the financial statements or the functioning of the reporting company.⁵¹ SOP 94-6 provides that companies should make disclosures in their financial statements about the risks and uncertainties in the following areas—

- Nature of operations;
- Use of estimates in the preparation of financial statements;
- Certain significant estimates;
- Current vulnerability due to certain concentrations.⁵²

The presentation of financial statements in conformity with GAAP includes adequate disclosure of material matters, related to the form, arrangement, and content of the financial statements and their appended notes.⁵³ The auditor considers whether a particular matter should be disclosed in light of the circumstances and facts of which he or she is aware at the time.⁵⁴ If management omits from the financial statements, including the accompanying notes, information that is required by GAAP, the auditor should express a qualified or adverse opinion and should provide the information in his or her report, if practicable, unless its omission from the auditor's report is recognized as appropriate by a specific PCAOB auditing standard.⁵⁵

With respect to other information included in documents containing the financial statements, the auditor should read the other information and consider whether such information, or the manner of its presentation, is materially inconsistent with information, or the manner of its presentation, appearing in the financial statements.⁵⁶ For instance, the section on management's discussion and analysis of financial condition and results of operations in Form 10-K requires discussion of liquidity, capital resources, results of operations, off-balance sheet arrangements and contractual obligations.⁵⁷ In addition, the section on controls and procedures of the Form 10-K requires discussion of management's responsibility for internal control over financial reporting and changes in internal control over financial reporting.⁵⁸ If the information in these disclosures is materially inconsistent with the financial statements, the

⁵¹ Paragraph .02 of American Institute of Certified Public Accountants' Statement of Position 94-6 ("SOP 94-6"), *Disclosure of Certain Significant Risks and Uncertainties*. Paragraph .07 of SOP 94-6 defines near term as a period of time not to exceed one year from the date of the financial statements.

⁵² SOP 94-6, paragraph .08.

⁵⁸ Regulation S-K, Items 308 and 308T, *Internal Control Over Financial Reporting*.

auditor should determine whether the financial statements, the audit report, or both require revision.⁵⁹

Auditor's Consideration of a Company's Ability to Continue as a Going Concern

In the current economic environment, some companies may face challenges in their ability to continue operating as a going concern. For instance, sources of liquidity may be strained because of reduced availability of lines/letters of credit from financial institutions or because of a violation of a debt covenant or other covenant. Additionally, companies may encounter limited access to the commercial paper markets, a decrease in valuation of collateral, difficulty restructuring loans, and delays in payment from customers.

The auditor has a responsibility to evaluate whether there is a substantial doubt about the company's ability to continue as a going concern for a reasonable period of time, not to exceed one year beyond the date of the financial statements being audited.⁶⁰ The auditor's evaluation is based on his or her knowledge of relevant conditions and events that exist at or have occurred prior to the date of the auditor's report.⁶¹

The auditor's evaluation includes considering whether the results obtained in planning, performing, and completing the audit identify conditions and events that, when considered in the aggregate, indicate there could be a substantial doubt about the company's ability to continue as a going concern for a reasonable period of time.⁶² It may be necessary to obtain additional information about such conditions and events, as well as the appropriate evidential matter to support information that mitigates the auditor's doubt.⁶³ Conditions or events that, when considered in the aggregate, indicate there could be substantial doubt about the company's ability to continue as a going concern for a reasonable period of time include—

- *Negative trends*—for example, recurring operating losses, working capital deficiencies, negative cash flows from operating activities, adverse key financial ratios;
- *Other indications of possible financial difficulties*—for example, default on loan or similar agreements, arrearages in dividends, denial of usual trade credit from suppliers, restructuring of debt, noncompliance with statutory capital requirements, need to seek new sources or methods of financing or to dispose of substantial assets;
- *Internal matters*—for example, work stoppages or other labor difficulties, substantial dependence on the success of a particular project, uneconomic long-term commitments, need to significantly revise operations;
- *External matters that have occurred*—for example, legal proceedings, legislation, or similar matters that might jeopardize a company's ability to operate; loss of a key franchise, license, or patent; loss of a

⁵⁹ AU sec. 550.04.

⁶⁰ Paragraph .02 of AU sec. 341, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*.

⁶¹ Ibid.

⁶² AU sec. 341.03a.

⁶³ Ibid.

principal customer or supplier; uninsured or underinsured catastrophe such as a drought, earthquake, or flood.⁶⁴

If the auditor believes there is substantial doubt about the company's ability to continue as a going concern for a reasonable period of time, the auditor should obtain information about management's plans that are intended to mitigate the effect of such conditions or events, and assess the likelihood that such plans can be effectively implemented.⁶⁵ The auditor's considerations relating to management plans may include the following—

- Plans to dispose of assets;
- Plans to borrow money or restructure debt;
- Plans to reduce or delay expenditures;
- Plans to increase ownership equity.⁶⁶

Such considerations also may include the effect of federal assistance or participation in a federal program.

If, after considering identified conditions and events and management's plans, the auditor concludes there is substantial doubt, he or she should consider the possible effects on the financial statements and the adequacy of disclosure about the company's inability to continue as a going concern for a reasonable period of time, and include an explanatory paragraph in the audit report to reflect this conclusion.⁶⁷ If the auditor concludes that substantial doubt is alleviated, the auditor should consider the need for disclosure of the principal conditions and events that initially caused the auditor to believe there was substantial doubt.⁶⁸

Additional Audit Considerations for Selected Financial Reporting Areas

The following discussion provides auditors with information on selected financial reporting areas that may be affected by the current economic environment. The auditor should give consideration to elevated risks related to the current economic environment and adjust his or her audit procedures as appropriate. This list is not intended to be all inclusive.

- Consolidation
- Contingencies and guarantees
- Credit derivatives
- Debt obligations
- Deferred tax assets
- Derivatives (other than credit derivatives)
- Goodwill, intangible assets and other long-lived assets
- Inventory
- Other-than-temporary impairment
- Pension and other postretirement benefits

⁶⁴ AU sec. 341.06.

⁶⁵ AU sec. 341.03b.

⁶⁶ AU sec. 341.07.

⁶⁷ AU secs. 341.10 and 341.12.

⁶⁸ AU sec. 341.11.

- Receivables
- Restructuring
- Revenue recognition
- Share-based payments

Consolidation

As a result of the economic environment, some companies have provided financial support or guarantees, or have taken other actions that may cause them to have a variable interest in an entity or to have increased their exposure to the entity, and, therefore, cause them to consider or reconsider whether the entity is a variable interest entity and if so whether they are its primary beneficiary.⁶⁹ Such commitments to provide financial support or guarantees might be found in various contractual arrangements, such as leasing arrangements, supply contracts, service contracts or derivative contracts.

FASB Interpretation (“FIN”) No. 46(R) (as amended), *Consolidation of Variable Interest Entities—an interpretation of ARB No. 51*, addresses consolidation by the primary beneficiary of variable interest entities. On November 21, 2008, the FASB announced plans to issue final FSP FAS 140-4 and FIN 46(R)-8, *Disclosures about Transfers of Financial Assets and Interests in Variable Interest Entities*, by December 15, 2008, which will increase disclosure requirements for public companies for reporting periods that end after December 15, 2008.⁷⁰

Contingencies and guarantees

Recent events in the credit markets may expose companies to additional contingencies and guarantees, which could increase the risk of unidentified or undisclosed contingencies related to, for example—

- Pending or threatened litigation;
- Asserted or unasserted claims and assessments;
- Guarantees of indebtedness of others;
- Guarantees to repurchase receivables or property previously sold or otherwise assigned;
- Violations of laws and regulations;
- Guarantees of contractual performance of others; and
- Outstanding purchase commitments at prices in excess of market values.

The audit normally includes procedures that might identify litigation, claims, and assessments, among other things.⁷¹ Examples of such procedures include the following—

- Reading minutes of meetings of stockholders, directors, and appropriate committees held during and subsequent to the period being audited;

⁶⁹ Paragraphs 7 and 15 of FASB Interpretation (“FIN”) No. 46(R) (as amended), *Consolidation of Variable Interest Entities – an interpretation of ARB No. 51*.

⁷⁰ See <http://www.fasb.org/news/nr112108.shtml>.

⁷¹ Paragraph .07 of AU sec. 337, *Inquiry of a Client’s Lawyer Concerning Litigation, Claims and Assessments*. AU sec. 337.08 indicates that a letter of audit inquiry to the client’s lawyer is the auditor’s primary means of obtaining corroboration of the information furnished by management concerning litigation, claims, and assessments.

- Reading contracts, loan agreements, leases, and correspondence from taxing or other governmental agencies, and similar documents;
- Obtaining information concerning guarantees from bank confirmation forms;
- Inspecting other documents for possible guarantees by the client.⁷²

Credit derivatives

The downturn in the credit markets can have a significant effect on the fair value of a company's credit derivatives. A credit derivative is a derivative instrument whose value derives from the credit risk on an underlying bond, loan or financial asset. The credit risk is on an entity other than the counterparty to the transaction.⁷³ This entity is known as a reference entity, which incurred the debt.⁷⁴

Credit derivatives are bilateral contracts between the buyer and seller under which the seller sells to the buyer protection against the credit risk of the reference entity.⁷⁵ Credit derivatives may be valued through the use of internally developed models or by pricing services. The assumptions used in models can be highly subjective, sensitive, and complex. A slight difference in assumptions could result in a significant change in the valuation of the derivative.

One factor that affects the fair value of credit derivatives is a decline in the credit quality of the reference entity. As a result of the deterioration in credit derivative positions insured by sellers of credit derivatives, some sellers have been required to post significant amounts of additional collateral. A seller also may be required to post additional collateral based on the deterioration of its own credit standing (regardless of changes in value of the written credit derivatives) to protect the buyer from default by the seller. In addition, the fair value of the asset included in the buyer's financial statements is affected by both the credit rating of the seller of the credit derivative (the counterparty) and the credit rating of the reference entity. The credit risk of the seller may affect the fair value of the liability in the seller's financial statements. In response to concerns from financial statement users and others that the current disclosure requirements for derivative instruments and certain guarantees did not adequately address the potential adverse effects of changes in the credit risk on the financial position, financial performance, and cash flows of the sellers of credit derivatives and certain guarantees, the FASB issued a staff position aimed at improving such disclosures.⁷⁶

The auditor should obtain evidence supporting management's assertions about the fair value of derivatives measured or disclosed at fair value.⁷⁷ In addition,

⁷⁶ Paragraph 1 of FSP No. FAS 133-1 and FIN 45-4, *Disclosures about Credit Derivatives and Certain Guarantees: An Amendment of FASB Statement No. 133 and FASB Interpretation No. 45; and Clarification of the Effective Date of FASB Statement No. 161* (September 12, 2008).

⁷⁷ Paragraph .35 of AU sec. 332, *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities*. AU secs. 332.35 to .48 provide further direction on auditing valuations based on fair value.

the auditor should evaluate whether the presentation and disclosure of derivatives are in conformity with GAAP.⁷⁸

In addition to valuation and presentation and disclosure, other considerations relate to existence and completeness. In March 2008, the President's Working Group on Financial Markets noted "[w]hile the infrastructure of the financial markets generally has coped quite well with heightened price volatility and surging trading volumes, there have been issues with the accuracy and timeliness of trade data transmissions, the timeliness of resolutions of trade matching errors, documentation and cash settlement, electronic post-trade processing, backlogs, integrated processing, and reconciliation and valuation."⁷⁹ Sellers and buyers of credit derivatives may have made trades which may not be properly reflected in the financial statements. AU sec. 332 provides examples of substantive procedures auditors may perform to obtain evidence about whether all derivatives have been properly identified and appropriately included in the financial statements.⁸⁰

Debt obligations

Companies may find it more difficult to refinance debt or it may take longer to arrange new financing in the current business environment, and compliance with debt covenants may be more challenging. Circumstances such as the following can affect the risks of material misstatement and the necessary audit procedures regarding debt obligations—

- Violations of existing debt covenants;
- Proper classification between short-term and long-term debt;
- The existence of cross default provisions, such that a violation of a covenant on one loan affects compliance with covenants for another loan;
- Exchange of debt or modifications to the terms of outstanding debt agreements;
- Concessions granted by lenders, including those that constitute a troubled debt restructuring;
- Subjective acceleration clauses;
- Embedded derivatives.

Deferred tax assets

Under current economic conditions, companies may need to record valuation allowances for their deferred tax assets. Deferred tax assets are required to be reduced "by a valuation allowance if, based on the weight of available evidence,

⁷⁸ AU sec. 332.49. AU secs. 332.49 to .51 provide further direction on auditing presentation and disclosure of derivatives.

⁷⁹ See pages 18 to 19 of the Policy Statement on Financial Market Developments by The President's Working Group on Financial Markets (March 2008) (http://www.treas.gov/press/releases/reports/pwgpolicystatemktturmoil_03122008.pdf). In June 2008, the Federal Reserve Bank of New York noted that "[s]tarting in September 2005, industry participants implemented a number of initiatives to improve the operational performance and infrastructure of the over-the-counter markets" and that market participants and regulators agreed on an "agenda for bringing about further improvements in the OTC derivatives market infrastructure." Federal Reserve Bank of New York, "Statement Regarding June 9 Meeting on Over-the-Counter Derivatives" (June 9, 2008), (<http://www.newyorkfed.org/newsevents/news/markets/2008/ma080609.html>).

⁸⁰ AU secs. 332.21 to .24.

it is *more likely than not* (a likelihood of more than 50 percent) that some portion or all of the deferred tax assets will not be realized.”⁸¹

Evaluating the need for and amount of a valuation allowance for deferred tax assets requires consideration of “all available evidence, both positive and negative”⁸² to determine whether all or some portion of the deferred tax assets will not be realized. SFAS No. 109, *Accounting for Income Taxes*, provides that the more negative evidence that exists (a) the more positive evidence is necessary and (b) the more difficult it is to support a conclusion that a valuation allowance is not needed for some portion or all of the deferred tax asset.⁸³

In addition, SFAS No. 109 states that “information about an enterprise’s current financial position and its results of operations for the current and preceding years ordinarily is readily available. That historical information is supplemented by all currently available information about future years. Sometimes, however, historical information may not be available (for example, start-up operations) or it may not be as relevant (for example, if there has been a significant, recent change in circumstances) and special attention is required.”⁸⁴

Future realization of a deferred tax asset “ultimately depends on the existence of sufficient taxable income of the appropriate character (for example, ordinary income or capital gain) within the carryback, carryforward period available under the tax law.”⁸⁵ SFAS No. 109 states that “the weight given to the potential effect of negative and positive evidence should be commensurate with the extent to which it can be objectively verified.”⁸⁶

In addition, FIN No. 48 (as amended), *Accounting for Uncertainty in Income Taxes – an Interpretation of FASB Statement No. 109*, defines a criterion that an individual tax position must meet for any part of the benefit of that position to be recognized in a company’s financial statements.⁸⁷ The interpretation also provides guidance on measurement, derecognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition.⁸⁸

Derivatives (other than credit derivatives)

The current environment may have a significant effect on the fair value of a company’s derivative contracts. In addition, the ability for a company to use hedge accounting, including its ability to apply the short-cut method, may be affected because of the company’s or the counterparty’s creditworthiness.⁸⁹ Hedge accounting also may be affected because changes in the fair value of the

derivative may be attributable to a risk other than the risk that is being hedged, such as company or counterparty creditworthiness.⁹⁰

Auditors should obtain evidence supporting management's assertion about the fair value of derivatives measured or disclosed at fair value.⁹¹ External factors, such as credit and market risk, may affect the valuation of derivatives. Credit or default risk exposes the company to the risk of loss as a result of the counterparty to a derivative failing to meet its obligation. Alternatively, the credit risk of the company may affect the fair value of the derivative when the derivative is in a liability position. Market risk exposes the company to the risk of loss from adverse changes in market factors that affect the fair value of a derivative, such as interest rates and foreign exchange rates. In order for a company to use hedge accounting, GAAP requires that management have an expectation that the hedging relationship will be highly effective at inception and on an ongoing basis.⁹² Counterparty default risk may affect hedge accounting as GAAP requires that consideration be given to the likelihood that the counterparty will comply with the contractual terms of the derivative contract.⁹³ If the likelihood that the counterparty will not default ceases to be probable, the company would be unable to conclude that a cash flow hedging relationship is expected to be highly effective in achieving offsetting cash flows.⁹⁴ Additionally, a change in the creditworthiness of the derivative's counterparty in a fair value hedge would affect the assessment of whether the relationship qualifies for hedge accounting and amount of ineffectiveness recognized in earnings under fair value hedge accounting.⁹⁵ Under SFAS No. 133, hedge accounting ceases when a hedge is no longer highly effective on an ongoing basis.⁹⁶

When assessing hedge accounting, auditors should gather evidential matter—

- To determine whether management complied with the hedge accounting requirements of GAAP, including designation and documentation requirements.⁹⁷
- To support management's expectation at the inception of the hedge that the hedging relationship will be highly effective and its periodic assessment of the ongoing effectiveness of the hedging relationship as required by GAAP.⁹⁸
- Supporting the recorded change, for a fair value hedge, in the hedged item's fair value that is attributable to the hedged risk.⁹⁹

In addition, for a cash flow hedge of a forecasted transaction, the auditor should evaluate management's determination of whether a forecasted transaction is probable.¹⁰⁰

⁹⁰ Paragraphs 20 and 28 of SFAS No. 133 (as amended), *Accounting for Derivative Instruments and Hedging Activities*, discuss the risks that are being hedged for a fair value and a cash flow hedge, respectively. Paragraphs 25 and 29 of SFAS No. 133 indicate when to discontinue hedge accounting for a fair value and cash flow hedge, respectively.

Goodwill, intangible assets and other long-lived assets

Market conditions during an economic downturn may result in an impairment of goodwill, other indefinite-lived intangible assets and other long-lived assets. Goodwill and indefinite-lived intangible assets “shall be tested for impairment annually, or more frequently if events or changes in circumstances indicate that the asset might be impaired.”¹⁰¹ Similarly, SFAS No. 144 (as amended), *Accounting for the Impairment or Disposal of Long-Lived Assets*, states that “A long-lived asset (asset group) shall be tested for recoverability whenever events or changes in circumstances indicate that its carrying amount may not be recoverable.”¹⁰² The following are examples of such events and changes in circumstances—

- A significant decrease in the market price of a long-lived asset (asset group);
- A significant adverse change in the extent or manner in which a long-lived asset (asset group) is being used or in its physical condition;
- A significant adverse change in legal factors or in the business climate that could affect the value of a long-lived asset (asset group), including an adverse action or assessment by a regulator;
- An accumulation of costs significantly in excess of the amount originally expected for the acquisition or construction of a long-lived asset (asset group);
- A current-period operating or cash flow loss combined with a history of operating or cash flow losses or a projection or forecast that demonstrates continuing losses associated with the use of a long-lived asset (asset group);
- A current expectation that, more likely than not, a long-lived asset (asset group) will be sold or otherwise disposed of significantly before the end of its previously estimated useful life. The term more likely than not refers to a level of likelihood that is more than 50 percent.¹⁰³

Goodwill of a reporting unit shall be tested for impairment between annual tests if an event occurs or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying amount.¹⁰⁴ Examples of such events or circumstances include—

- A significant adverse change in legal factors or in the business climate;
- An adverse action or assessment by a regulator;
- Unanticipated competition;
- A loss of key personnel;
- A more-likely-than-not expectation that a reporting unit or a significant portion of a reporting unit will be sold or otherwise disposed of;
- The testing for recoverability under SFAS No. 144 of a significant asset group within a reporting unit;

¹⁰¹ Paragraph 17 of SFAS No. 142 (as amended), *Goodwill and Other Intangible Assets*.

¹⁰² Paragraph 8 of SFAS No. 144 (as amended), *Accounting for the Impairment or Disposal of Long-Lived Assets*.

¹⁰³ Ibid.

¹⁰⁴ SFAS No. 142, paragraph 28.

- Recognition of a goodwill impairment loss in the financial statements of a subsidiary that is a component of a reporting unit.¹⁰⁵

In addition to valuation, companies may need to reassess the useful life of indefinite-lived intangible assets and other long-lived assets. SFAS No. 142 (as amended), *Goodwill and Other Intangible Assets*, requires companies to “evaluate the remaining useful life of an intangible asset that is not being amortized each reporting period to determine whether events and circumstances continue to support an indefinite useful life.”¹⁰⁶ In addition, when other long-lived assets (asset group) are tested for recoverability, companies also may need to review depreciation estimates and methods.¹⁰⁷ Under SFAS No. 144, any revision to the remaining useful life of a long-lived asset resulting from that review also shall be considered in developing estimates of future cash flows used to test the asset (asset group) for recoverability.¹⁰⁸

Inventory

Current market conditions and the effect on consumer spending may result in excess or obsolete inventory or inventory with carrying amounts in excess of market values. Inventory is required to be stated at the lower of cost or market.¹⁰⁹ The following are examples of conditions related to the current environment that might affect the risk of material misstatement of inventory valuation and the necessary audit procedures—

- An increase in inventory balances in relation to sales levels, a reduction in inventory turnover, and the aging of inventory may indicate excess or obsolete inventory balances that are not recoverable.
- Declining prices may indicate the carrying amount of inventory is in excess of market value. Accounting Research Bulletin (“ARB”) No. 43 (as amended), *Inventory Pricing* (chapter 4), requires that a loss be recognized in the current period “whenever the utility of goods is impaired by damage, deterioration, obsolescence, changes in price levels, or other causes.”¹¹⁰

In addition, losses on firm, uncancelable, and unhedged commitments to purchase inventory should be measured in the same way as are inventory losses and, if material, should be recognized in the accounts in the current period and separately disclosed in the income statement.¹¹¹

Other-than-temporary impairment

Many debt and equity securities have experienced significant declines in fair value. These declines in fair value may raise questions about whether such declines are other than temporary. The auditor should evaluate management’s conclusion about the need to recognize in earnings an impairment loss for a decline in fair value that is other than temporary.¹¹²

In accordance with SFAS No. 115 (as amended), *Accounting for Certain Investments in Debt and Equity Securities*, a charge to earnings should be made for

¹⁰⁵ Ibid.

¹¹² AU sec. 332.46.

impairment that is “other than temporary” in held-to-maturity and available-for-sale securities.¹¹³ SEC Staff Accounting Bulletin (“SAB”) No. 59, *Accounting for Noncurrent Marketable Equity Securities*, also provides the SEC staff’s view and indicates that “other than temporary” should not be interpreted to mean “permanent.” SAB No. 59 provides examples of factors which, individually or in combinations, may indicate that a decline is other than temporary and that a write-down of the carrying value is required, including—

- The length of the time and the extent to which the market value has been less than cost;
- The financial condition and near-term prospects of the issuer, including any specific events which may influence the operations of the issuer such as changes in technology that may impair the earnings potential of the investment or the discontinuance of a segment of the business that may affect the future earnings potential; or
- The intent and ability of the holder to retain its investment in the issuer for a period of time sufficient to allow for any anticipated recovery in market value.

SAB No. 59 further provides that “[u]nless evidence exists to support a realizable value equal to or greater than the carrying value of the investment, a write-down accounted for as a realized loss should be recorded.”

Additionally, under FASB Emerging Issues Task Force No. 99-20, *Recognition of Interest Income and Impairment on Purchased Beneficial Interests and Beneficial Interests That Continue to Be Held by a Transferor in Securitized Financial Assets*, certain beneficial interests should be written down to fair value through earnings if the security has declined below its cost and there has been an adverse change in the estimated cash flows based on a holder’s best estimate of cash flows that a market participant would use in determining the fair value of the beneficial interest.¹¹⁴

Pension and other postretirement benefits (“OPEB”)

Increased credit risk and reduced liquidity in the current economic environment can have a significant effect on the fair value of plan assets as well as the assumptions used to measure the pension and OPEB obligation. Companies that sponsor pension and OPEB plans are required to recognize the funded status of these plans in the statement of financial position.¹¹⁵ The funded status is measured as the difference between the fair value of plan assets and the benefit obligation.¹¹⁶ SFAS No. 87 (as amended), *Employers’ Accounting for Pensions*, and SFAS No. 106 (as amended), *Employers’ Accounting for Postretirement Benefits Other Than Pensions*, generally require that plan investments, whether equity or debt securities, real estate or other, be measured at fair value as of the measurement date.¹¹⁷ Therefore, the measurement requirements of SFAS No. 157 apply to defined-benefit postretirement plan assets.

¹¹³ Paragraph 16 of SFAS No. 115 (as amended), *Accounting for Certain Investments in Debt and Equity Securities*.

¹¹⁴ Paragraph 12b of FASB Emerging Issues Task Force No. 99-20, *Recognition of Interest Income and Impairment on Purchased Beneficial Interests and Beneficial Interests That Continue to Be Held by a Transferor in Securitized Financial Assets*.

¹¹⁵ Paragraph 1 of SFAS No. 158, *Employers’ Accounting for Defined Benefit Pension and Other Postretirement Plans, an amendment of FASB Statements No. 87, 88, 106, and 132(R)*.

¹¹⁶ SFAS No. 158, paragraph 4a.

¹¹⁷ Paragraph 49 of SFAS No. 87 (as amended), *Employers’ Accounting for Pensions* and paragraph 65 of SFAS No. 106 (as amended), *Employers’ Accounting for Postretirement Benefits Other Than Pensions*.

Several assumptions are relevant to determining a company's pension and OPEB obligation, such as discount rate, expected rate of return on plan assets, and rate of compensation increase. Significant declines in the stock market may adversely affect the fair value of the plan assets, and companies may need to consider recent shifts in the market when developing the expected rate of return on plan assets. Changes in fair value of plan assets affect the funded status of the plan.¹¹⁸ Deviations from the expected rate of return on plan assets affect a company's pension or OPEB expenses in future periods,¹¹⁹ unless gains and losses are recognized immediately.¹²⁰

Receivables

In the current economic environment, companies may face a heightened risk of non-collection of receivables. Evidence of this risk might be noted in an increase in days sales outstanding, the aging of receivables, or the amount of delinquent receivables.¹²¹

In addition for loans receivable, evidence of this risk might be rising loan delinquency and defaults and decreasing secondary market liquidity.¹²² These situations can affect the risk of material misstatement in the valuation of a company's receivables and the auditor's evaluation of management's estimate of the allowance.

Restructuring

Market events and their effect on liquidity have caused many companies to take actions such as restructuring to reduce costs. SFAS No. 146 (as amended), *Accounting for Costs Associated with Exit or Disposal Activities*, addresses financial accounting and reporting for costs associated with exit or disposal activities.¹²³ The risks of material misstatement may relate to recording costs in the improper period, incorrect measurement or presentation of restructuring liabilities and costs, or inadequate disclosures. Misstatements could result in understatement or overstatement of restructuring liabilities and costs.

¹¹⁸ SFAS No. 87, paragraph 35 and SFAS No. 106, paragraph 44A.

¹¹⁹ SFAS No. 87, paragraph 34 and SFAS No. 106, paragraph 62.

¹²⁰ SFAS No. 87, paragraph 32 and SFAS No. 106, paragraph 59.

¹²¹ Scott Malone, "Corporate America Taking Longer to Collect: Study" (August 24, 2008), (<http://www.reuters.com/article/reutersEdge/idUSN2745047620080827>), noted that it is taking companies longer to collect from their customers.

¹²² SFAS No. 114 (as amended), *Accounting by Creditors for Impairment of a Loan- an amendment of FASB Statements no. 5 and 15*, addresses the accounting by creditors for impairment of a loan by specifying how allowances for credit losses related to certain loans should be determined.

¹²³ As described in paragraph 2a of SFAS No. 146 (as amended), *Accounting for Costs Associated with Exit or Disposal Activities*, SFAS No. 146 does not change the accounting for termination benefits, including one-time termination benefits granted in the form of an enhancement to an ongoing benefit arrangement, covered by SFAS No. 87, SFAS No. 88 (as amended), *Employers' Accounting for Settlements and Curtailments of Defined Benefit Pension Plans and for Termination Benefits*, SFAS No. 106, and SFAS No. 112 (as amended), *Employers' Accounting for Postemployment Benefits - an amendment of FASB Statements No. 5 and 43*. FSP No. FAS 146-1 (as amended), *Determining Whether a One-Time Termination Benefit Offered in Connection with an Exit or Disposal Activity Is, in Substance, an Enhancement to an Ongoing Benefit Arrangement*, provides guidance on when additional termination benefits offered in connection with an exit or disposal activity are considered, in substance, enhancements to an ongoing benefit arrangement and, therefore, subject to the provisions SFAS Nos. 87, 88, 106 and 112. In addition, SFAS No. 144 addresses accounting for long-lived assets and disposal groups to be disposed of, including components of a company that are discontinued operations.

Revenue recognition

In the current economic environment, companies may be faced with increased pressure to meet revenue targets and analysts' expectations. These pressures may cause companies to change business practices, which could affect the amount and timing of revenue recognition. Examples of business practices that could affect revenue recognition and the necessary audit procedures include, among other things, rights of return, bill-and-hold arrangements, change in payment terms, side agreements, and consignment arrangements. Also, the auditor should ordinarily presume that there is a risk of material misstatement due to fraud relating to revenue recognition.¹²⁴

Share-based payments

Current market conditions have resulted in volatile stock prices for many companies. As a result, some companies may consider modifying share-based payment awards. In addition, the changing economic environment may affect the assumptions used when valuing such awards.

The valuation of share-based payment awards under an option-pricing model includes significant estimates, such as expected term, pre-vesting forfeiture rate and the expected volatility of the underlying stock price. For new grants of awards, companies may need to revise these and other inputs to reflect current expectations. For example, expected volatility in an option-pricing model may be affected by recent volatility in the markets. Assumptions used in the option pricing model affect the value of the award and, consequently, the compensation expense that is recognized in the financial statements.

Modifications of share-based payment awards may result in the recognition of incremental compensation cost. Incremental compensation cost is measured as the excess, if any, of the fair value of the modified award over the fair value of the original award immediately before its terms are modified.¹²⁵

PCAOB Staff Questions and Answers ("Q&A"), *Auditing the Fair Value of Share Options Granted to Employees*, remains relevant in the current environment and reminds auditors of their responsibilities for auditing share-based payments including consideration of—

- The company's process,
- Risk factors,
- Model selection,
- Assumptions used in option-pricing models,
- Validation of data and the option-pricing model,
- Role of specialists.¹²⁶

In discussing the auditor's responsibilities for auditing the fair value of share options granted to employees, the Q&A refers the auditor to AU sec. 316, *Consideration of Fraud in a Financial Statement Audit*, AU sec. 328, *Auditing Fair Value Measurements and Disclosures*, AU sec. 336, *Using the Work of a Specialist*, and AU sec. 342, *Auditing Accounting Estimates*.

¹²⁴ AU 316.41.

¹²⁵ Paragraph 51 of SFAS No. 123(R) (as amended), *Share-Based Payment*.

.04 Staff Audit Practice Alert No. 4 Auditor Considerations Regarding Fair Value Measurements, Disclosures, and Other-Than-Temporary Impairments

April 21, 2009

Staff Audit Practice Alerts highlight new, emerging, or otherwise noteworthy circumstances that may affect how auditors conduct audits under the existing requirements of PCAOB standards and relevant laws. Auditors should determine whether and how to respond to these circumstances based on the specific facts presented. The statements contained in Staff Audit Practice Alerts are not rules of the Board and do not reflect any Board determination or judgment about the conduct of any particular firm, auditor, or any other person.

On April 9, 2009, the Financial Accounting Standards Board (“FASB”) issued three FASB Staff Positions (“FSP” or, collectively, “the FSPs”):

- FSP FAS 157-4, *Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly* (“FSP FAS 157-4”)
- FSP FAS 115-2 and FAS 124-2, *Recognition and Presentation of Other-Than-Temporary Impairments* (“FSP FAS 115-2”)
- FSP FAS 107-1 and APB 28-1, *Interim Disclosures about Fair Value of Financial Instruments* (“FSP FAS 107-1”)¹

The objectives of these FSPs are to: (1) provide “additional guidance for estimating fair value in accordance with FASB Statement No. 157, *Fair Value Measurements*, when the volume and level of activity for the asset or liability have significantly decreased” including “guidance on identifying circumstances that indicate a transaction is not orderly,”² (2) amend “the other-than-temporary impairment guidance in U.S. GAAP for debt securities to make the guidance more operational and to improve the presentation and disclosure of other-than-temporary impairments on debt and equity securities in the financial statements,”³ and (3) “require disclosures about fair value of financial instruments for interim reporting periods for publicly traded companies as well as in annual financial statements.”⁴

The purpose of this staff audit practice alert is to inform auditors about potential implications of the FSPs on reviews of interim financial information and annual audits. This alert addresses the following topics: (1) reviews of interim financial information (“reviews”); (2) audits of financial statements,

¹ The respective FSPs are available at:

- http://www.fasb.org/pdf/fsp_fas157-4.pdf
- http://www.fasb.org/pdf/fsp_fas115-2andfas124-2.pdf
- http://www.fasb.org/pdf/fsp_fas107-1andapb28-1.pdf

² FSP FAS 157-4, paragraph 1.

³ FSP FAS 115-2, paragraph 2. This FSP does not amend existing recognition and measurement guidance related to other-than-temporary impairment of equity securities. On April 14, 2009, the SEC’s staff released Staff Accounting Bulletin (“SAB”) No. 111, *Other Than Temporary Impairment of Certain Investments in Equity Securities*, which amends SAB Topic 5.M. SAB Topic 5.M. now excludes debt securities from its scope while maintaining the SEC staff’s views related to equity securities.

⁴ FSP FAS 107-1, paragraph 1.

including integrated audits; (3) disclosures; and (4) auditor reporting considerations. While this alert highlights certain areas, it is not intended to serve as a substitute for the relevant auditing standards.

In considering the effects of the FSPs on their audits and reviews, auditors should be aware that some PCAOB standards include descriptions of accounting requirements that are no longer current. The accounting standards set by the FASB are recognized by the U.S. Securities and Exchange Commission (“SEC”) as generally accepted.⁵ Auditors should look to those standards and to the requirements of the SEC,⁶ rather than the standards of the PCAOB, for current accounting requirements and disregard descriptions of accounting requirements in PCAOB standards that are inconsistent with the FSPs. The PCAOB has a project on its standards-setting agenda to address the auditing standards related to auditing accounting estimates and auditing fair value measurements. In connection with this project, the PCAOB is planning to remove descriptions of accounting requirements from these standards. In general, as the PCAOB replaces or substantively revises its interim standards, it will continue to remove descriptions of accounting requirements from those auditing standards.

Reviews of Interim Financial Information

The objective of a review is to provide the auditor with a basis for communicating whether he or she is aware of any material modifications that should be made to the interim financial information for it to conform with generally accepted accounting principles (“GAAP”). A review differs significantly from an audit and consists principally of performing analytical procedures and making inquiries of persons responsible for financial and accounting matters.⁷ A review does not provide a basis for expressing an opinion about whether the financial statements are presented fairly, in all material respects, in conformity with GAAP.⁸ For an audit, PCAOB standards require that the auditor plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.⁹

As part of the review, the auditor should, among other things, make inquiries of members of management who have responsibility for financial and accounting matters. If relevant to the company, the auditor should include in these inquiries questions about the implementation of the FSPs.¹⁰

The auditor also should determine whether any matters described in AU sec. 380, *Communication With Audit Committees* (“AU sec. 380”), as they relate to the interim financial information, have been identified.¹¹ If such matters have been identified, the auditor should communicate those matters to the audit

⁵ SEC, *Policy Statement: Reaffirming the Status of the FASB as a Designated Private-Sector Standard Setter*, Exchange Act Release No. 34-47743 (April 25, 2003). The PCAOB has no authority to prescribe the form or content of an issuer’s financial statements. Accordingly, while this staff audit practice alert describes applicable generally accepted accounting principles (“GAAP”), it does not establish or interpret GAAP.

⁶ Auditors should look to the requirements of the SEC for the company under audit with respect to the accounting principles applicable to that company. See AU sec. 411, *The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles*.

⁷ Paragraph .07 of AU sec. 722, *Interim Financial Information* (“AU sec. 722”).

⁸ Ibid.

⁹ Paragraph .08 of AU sec. 508, *Reports on Audited Financial Statements*. An audit includes, among other things, examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements.

¹⁰ AU sec. 722.18(c).

¹¹ AU sec. 722.34.

committee or be satisfied, through discussion with the audit committee, that management has communicated such matters to the audit committee.¹² Matters to be communicated include: a change in a significant accounting policy affecting the interim financial information; accounting estimates and management's judgments about those accounting estimates; processes management uses to formulate sensitive accounting estimates; and the auditor's judgment about the quality, not just the acceptability, of the company's accounting policies.¹³ Depending upon the circumstances, the implementation of the FSPs may present matters that should be communicated to the audit committee.

Audits of Financial Statements, Including Integrated Audits

FSP FAS 157-4 provides additional guidance for estimating fair value when the volume and level of activity for an asset or liability have significantly decreased.¹⁴ In performing procedures under AU sec. 328, *Auditing Fair Value Measurements and Disclosures* ("AU sec. 328"), the auditor is required to, among other things, obtain an understanding of the company's process for determining fair value measurements and disclosures and of the relevant controls sufficient to assess the risk of material misstatement, and to plan the nature, timing, and extent of the audit procedures.¹⁵ Based on the auditor's assessment of the risk of material misstatement, the auditor should test the entity's fair value measurements and disclosures.¹⁶ Because of the wide range of possible fair value measurements, from relatively simple to complex, and the varying levels of risk of material misstatement associated with the process for determining fair values, the auditor's planned audit procedures can vary significantly in nature, timing, and extent.¹⁷ The auditor's substantive tests of the fair value measurements may involve (a) testing management's significant assumptions, the valuation model, and the underlying data, (b) developing independent fair value estimates for corroborative purposes, or (c) reviewing subsequent events and transactions.¹⁸

FSP FAS 115-2 amends the guidance for recognizing an other-than-temporary impairment ("OTTI") for a debt security.¹⁹ The auditor is required to evaluate a company's conclusions about the need to recognize an impairment loss.²⁰ When a company has recognized an impairment loss, the auditor should gather evidence supporting the amount of the impairment adjustment recorded and determine whether the company has appropriately followed GAAP.²¹ In certain circumstances, a company is required to separate the amount of the OTTI representing credit losses (as defined by FSP FAS 115-2) and the amount representing all other factors.²² In those situations, the auditor's objective is to obtain sufficient competent evidential matter to provide reasonable assurance that these estimates are reasonable in the circumstances and that they are

¹² Ibid.

¹³ AU secs. 380.07-08, AU sec. 380.11, and AU sec. 722.34.

¹⁴ FSP FAS 157-4, paragraphs 12-16.

¹⁵ AU secs. 328.09 and 328.13.

¹⁶ AU sec. 328.23.

¹⁷ Ibid.

¹⁸ Ibid.

¹⁹ FSP FAS 115-2, paragraph 7.

²⁰ Paragraph .48 of AU sec. 332, *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities*.

²¹ Ibid.

²² FSP FAS 115-2, paragraphs 29-30.

presented and disclosed in conformity with GAAP.²³ In evaluating reasonableness, the auditor should obtain an understanding of how the company developed the estimates.²⁴ In addition, the auditor should discuss an accounting change due to FSP FAS 115-2 and other related topics (as described in the previous section related to interim financial information), with the audit committee in connection with the audit of the financial statements, including integrated audits.²⁵

Disclosures

The FSPs require additional disclosures regarding fair value measurements and OTTI. For example (1) FSP FAS 157-4 requires a company to disclose changes in valuation techniques and related inputs for fair value measurements in interim and annual periods and to provide additional disclosures under Statement No. 157, *Fair Value Measurements*²⁶ and (2) FSP FAS 115-2 requires a company to disclose information that enables users to understand the reasons that a portion of OTTI was not recognized in earnings and the methodology and significant inputs used to calculate the portion of OTTI that was recognized in earnings.²⁷ The auditor should evaluate whether the financial statement disclosures are in conformity with the FSPs.²⁸

In addition, the auditor should read the other information accompanying the interim and annual financial statements contained in reports filed with the SEC.²⁹ For example, the Management's Discussion and Analysis of Financial Condition and Results of Operations section of annual reports and other filings might include discussions regarding fair value measurements and OTTI.³⁰ The auditor should consider whether that information or the manner of its presentation is materially inconsistent with the financial statements. If the auditor concludes that there is a material inconsistency, or becomes aware of information that he or she believes is a material misstatement of fact, the auditor should determine if the financial statements, the audit report, or both require revision. If the auditor concludes that the financial statements or audit report do not require revision, the auditor should request the company to revise the other information.³¹

Auditor Reporting Considerations

FSP FAS 157-4 states that revisions resulting from a change in the valuation technique or its application are to be accounted for as a change in accounting estimate. In the period of adoption, entities are required to disclose a change,

²³ Paragraph .07 of AU sec. 342, *Auditing Accounting Estimates*.

²⁴ AU sec. 342.10.

²⁵ AU secs. 380.07 and 380.11. Also, Section 10A(k) of the Securities and Exchange Act of 1934 requires the auditor to communicate certain matters to the audit committee.

²⁶ FSP FAS 157-4, paragraph 20.

²⁷ FSP FAS 115-2, paragraph 38.

²⁸ The auditor considers whether a particular matter should be disclosed in light of the circumstances and facts of which the auditor is aware at the time. See paragraph .02 of AU sec. 431, *Adequacy of Disclosure in Financial Statements*.

²⁹ AU sec. 722.18(f) and paragraph .04 of AU sec. 550, *Other Information in Documents Containing Audited Financial Statements* ("AU sec. 550").

³⁰ For example, see the discussion of critical accounting policies and critical accounting estimates, respectively, in SEC Release Nos. 33-8040, *Cautionary Advice Regarding Disclosure About Critical Accounting Policies* (December 12, 2001) and 33-8350, *Commission Guidance Regarding Management's Discussion and Analysis of Financial Condition and Results of Operations* (December 29, 2003).

³¹ AU secs. 550.04-.05.

if any, in valuation technique and related inputs and quantify the total effect, if practicable, by major category.³² In addition, FSP FAS 115-2 requires the company to recognize the cumulative effect of initially applying the FSP as an adjustment to the opening balance of retained earnings, as of the beginning of the period in which FSP FAS 115-2 is adopted, with a corresponding adjustment to accumulated other comprehensive income.³³

The auditor should evaluate whether the company's accounting for and disclosure of the changes are in accordance with the FSPs. To identify consistency matters that might affect the auditor's report, the auditor should evaluate whether the comparability of the financial statements between periods has been materially affected by changes in accounting principles. A change in accounting principle that has a material effect on the financial statements should be recognized in the auditor's report through the addition of an explanatory paragraph following the opinion paragraph.³⁴

.05 Staff Audit Practice Alert No. 5 Auditor Considerations Regarding Significant Unusual Transactions

April 7, 2010

Staff Audit Practice Alerts highlight new, emerging, or otherwise noteworthy circumstances that may affect how auditors conduct audits under the existing requirements of PCAOB standards and relevant laws. Auditors should determine whether and how to respond to these circumstances based on the specific facts presented. The statements contained in Staff Audit Practice Alerts are not rules of the Board and do not reflect any Board determination or judgment about the conduct of any particular firm, auditor, or any other person.

During the course of an audit, the auditor may become aware of significant transactions that are outside the normal course of business for the company, or that otherwise appear to be unusual given the auditor's understanding of the company and its environment ("significant unusual transactions").¹ Significant unusual transactions, especially those close to period end that pose difficult "substance over form" questions, can provide opportunities for companies to engage in fraudulent financial reporting.² Further, the auditor's evaluation of whether the company's financial statements are presented fairly, in all material respects, in conformity with the applicable financial reporting framework, includes the consideration of the financial statement presentation and disclosure of significant unusual transactions.³

The auditor should gain an understanding of the business rationale or such transactions and whether that rationale (or the lack thereof) suggests that the transactions may have been entered into to engage in fraudulent financial reporting or conceal a misappropriation of assets.⁴ The audit engagement team might consult with individuals having appropriate levels of knowledge, competence, and judgment regarding significant unusual transactions.⁵ Such consultations regarding significant unusual transactions should occur in accordance with the firm's policies and procedures. The auditor should determine that the audit committee is informed about the methods used to account for significant unusual transactions.⁶ In addition, the engagement quality reviewer cannot provide concurring approval of issuance if he or she is aware of a significant engagement deficiency, including those regarding significant unusual transactions.⁷

¹ Paragraph .66 of AU sec. 316, *Consideration of Fraud in a Financial Statement Audit*.

² AU sec. 316.85.

³ Paragraph .04 of AU sec. 312, *Audit Risk and Materiality in Conducting an Audit*, notes financial statements are materially misstated when they contain misstatements whose effect, individually or in the aggregate, is important enough to cause them not to be presented fairly, in all material respects, in conformity with generally accepted accounting principles.

⁴ AU sec. 316.66.

⁵ Paragraph .19 of QC sec. 20, *System of Quality Control for a CPA Firm's Accounting and Auditing Practice*.

⁶ Paragraph .07 of AU sec. 380, *Communication With Audit Committees*.

⁷ Paragraphs 12 and 17 of Auditing Standard No. 7, *Engagement Quality Review*. AS No. 7 is effective for audits of financial statements and reviews of interim financial information for fiscal years beginning on or after December 15, 2009.

Introduction

Staff Audit Practice Alert No. 3, *Audit Considerations in the Current Economic Environment* (“Practice Alert No. 3”), was issued in December 2008 to assist auditors in identifying matters related to the current economic environment that might affect audit risk and require additional emphasis.⁸ Practice Alert No. 3 reminds auditors that the auditors’ response to the risks of material misstatement due to fraud includes evaluating the business rationale for significant unusual transactions. In the staff’s view, although the economic conditions have changed since December 2008, the risk factors, including the risks of significant unusual transactions, that existed in December 2008 continue to exist today and may affect the risk of material misstatement.

The existing standards of the PCAOB contain a variety of requirements related to significant, unusual, or complex transactions, or a combination thereof. The purpose of this staff audit practice alert is to complement Practice Alert No. 3 by compiling selected, relevant requirements from existing PCAOB auditing standards regarding significant unusual transactions into one document. While this alert summarizes certain areas with respect to significant unusual transactions, it is not intended to, and does not, serve as a substitute for the relevant standards of the PCAOB. Nor does this alert change the auditor’s responsibilities regarding significant, unusual, or complex transactions. This alert reminds auditors of certain responsibilities with respect to significant unusual transactions and assists auditors in assessing and responding to the risks of material misstatement associated with these transactions during reviews of interim financial information and audits of financial statements, including integrated audits.

This alert groups the existing requirements for significant unusual transactions into the following categories: (1) identifying and assessing risks of material misstatement, (2) responding to risks of material misstatement, (3) consulting others, (4) evaluating financial statement presentation and disclosure,⁹ (5) communicating with audit committees, and (6) reviewing interim financial information.

Identifying and Assessing Risks of Material Misstatement

The auditor’s identification of significant unusual transactions is informed by the performance of audit procedures and the auditor’s knowledge of the company’s business and industry. The auditor should obtain knowledge of matters that relate to the nature of the company’s business, its organization, and its operating characteristics.¹⁰ Such matters include, for example, the type of business, types of products and services, and related parties.¹¹ The auditor also should consider matters affecting the industry in which the company operates, such as accounting practices common to the industry, competitive conditions, and financial trends and ratios.¹²

⁸ Staff Audit Practice Alert No. 3 is available at http://pcaobus.org/Standards/QandA/12-05-2008_APA_3.pdf.

⁹ The PCAOB has no authority to prescribe the form or content of an issuer’s financial statements. Accordingly, while this staff audit practice alert describes authoritative accounting guidance, it does not establish or interpret that accounting guidance. See Staff Questions and Answers, References to Authoritative Accounting Guidance in PCAOB Standards, available at http://pcaobus.org/Standards/QandA/2009-09-02_FASB_Codification.pdf.

¹⁰ Paragraph .07 of AU sec. 311, *Planning and Supervision*.

¹¹ *Ibid.*

¹² *Ibid.*

The auditor should consider whether the information obtained about the company and its environment indicates that one or more fraud risk factors are present, including significant unusual transactions.¹³ The auditor also should consider identified fraud risk factors in identifying and assessing risks of material misstatement due to fraud.¹⁴ In obtaining the information needed to identify risks of material misstatement due to fraud, the auditor, among other things, should inquire of others within the company about the existence or suspicion of fraud, including, for example, employees involved in initiating, recording, or processing significant unusual transactions.¹⁵ The auditor also should perform analytical procedures when planning the audit with one objective being the identification of significant unusual transactions.¹⁶ The auditor's assessment of the risks of material misstatement due to fraud, including those regarding significant unusual transactions, should be ongoing throughout the audit.¹⁷

The auditor should take into account the results of the fraud risk assessment when planning and performing an audit of internal control over financial reporting.¹⁸ The auditor should evaluate whether the company's controls (including controls over significant unusual transactions, particularly those that result in late or unusual journal entries) sufficiently address the identified risks of material misstatement due to fraud and controls intended to address the risk of management override of other controls.¹⁹

Responding to Risks of Material Misstatement

When the auditor has concluded that there is a significant risk of material misstatement of the financial statements, the auditor should consider this conclusion in determining the nature, timing, or extent of procedures; assigning staff; or requiring appropriate levels of supervision.²⁰ The auditor's response to the assessment of the risks of material misstatement of the financial statements due to fraud is influenced by the nature and significance of the risks identified as being present and the company's programs and controls that address these identified risks.²¹

The auditor's response to the assessment of the risks of material misstatement due to fraud involves the application of professional skepticism in gathering and evaluating audit evidence.²² Because of the characteristics of fraud, the auditor's exercise of professional skepticism is important when considering the risk of material misstatement due to fraud associated with significant unusual transactions.²³

As part of the overall responses to the risks of material misstatement due to fraud, the auditor should consider management's selection and application of

¹³ AU sec. 316.32.

¹⁴ *Ibid.*

¹⁵ AU sec. 316.24-.25.

¹⁶ AU sec. 316.28.

¹⁷ AU sec. 316.68.

¹⁹ *Ibid.*

²⁰ AU secs. 312.17 and 316.50.

²¹ AU sec. 316.47.

²² AU sec. 316.13. In addition, paragraphs .07-.09 of AU sec. 230, *Due Professional Care in the Performance of Work*, notes that due professional care requires the auditor to exercise professional skepticism.

²³ *Ibid.*

significant accounting principles, including those related to significant unusual transactions.²⁴ In this respect, the auditor may have a greater concern about whether the accounting principles selected and policies adopted are being applied in an inappropriate manner to create a material misstatement of the financial statements.²⁵ The auditor should consider whether their collective application indicates a bias that might create a material misstatement of the financial statements.²⁶ In examining journal entries and other adjustments for evidence of possible material misstatement due to fraud, the auditor should consider that inappropriate entries or adjustments may be applied to accounts that contain significant unusual transactions.²⁷ The auditor also should evaluate whether analytical procedures that were performed in the overall review stage of the audit indicate a previously unrecognized risk of material misstatement resulting from significant unusual transactions.²⁸

In evaluating whether the business rationale (or the lack thereof) for significant unusual transactions suggests that the transactions may have been entered into to engage in fraudulent financial reporting or conceal misappropriation of assets, the auditor should consider:

- Whether the form of such transactions is overly complex;
- Whether management has discussed the nature of and accounting for such transactions with the audit committee or board of directors;
- Whether management is placing more emphasis on the need for a particular accounting treatment than on the underlying economics of the transaction;
- Whether transactions that involve unconsolidated related parties, including special purpose entities, have been properly reviewed and approved by the audit committee or board of directors; and
- Whether the transactions involve previously unidentified related parties or parties that do not have the substance or the financial strength to support the transaction without assistance from the company under audit.²⁹

If the company has entered into a significant unusual transaction and the combined assessed level of inherent and control risk is high, in addition to examining documentation held by the company, the auditor should consider confirming the terms and amounts of the transaction with the other parties.³⁰ The auditor also should obtain an understanding of the substance of the transaction to determine the appropriate information to include on the confirmation request.³¹

The auditor must identify all significant findings or issues (including significant unusual transactions) in an engagement completion document.³² The auditor must document actions taken to address significant unusual transactions (including additional evidence obtained), and the basis for the conclusions

³² Paragraphs 12 and 13 of Auditing Standard No. 3, *Audit Documentation*.

reached.³³ In addition, a principal auditor that decides not to make reference to the audit of another auditor, among other things, must obtain, review, and retain an engagement completion document from that auditor.³⁴

Engagement Quality Review

The engagement quality reviewer should review the engagement completion document and confirm with the engagement partner that there are no significant unresolved matters, including unresolved matters related to significant unusual transactions.³⁵ The engagement quality reviewer also should, among other things, evaluate whether (1) appropriate consultations have taken place on difficult or contentious matters, and review the documentation, including conclusions, of such consultations and (2) appropriate matters have been communicated, or identified for communication, to the audit committee, management, and other parties, such as regulatory bodies.³⁶

Consulting Others

A firm's policies and procedures should provide reasonable assurance that personnel refer to authoritative literature or other sources and consult, on a timely basis, with individuals within or outside the firm, when appropriate (for example, when dealing with significant unusual transactions).³⁷ Individuals consulted should have appropriate levels of knowledge, competence, judgment, and authority.³⁸ The nature of the arrangements for consultation depends on a number of factors, including the size of the firm and the levels of knowledge, competence, and judgment possessed by the persons performing the work.³⁹ In addition, procedures performed by filing reviewers for U.S. Securities and Exchange Commission ("SEC") filings by SEC registrants audited by foreign associated firms of registered firms that were members of the American Institute of Certified Public Accountants' SEC Practice Section should generally include discussing with the engagement partner any significant auditing, accounting, financial reporting, and independence matters that come to the attention of the filing reviewer, including how such matters were addressed and resolved.⁴⁰

Evaluating Financial Statement Presentation and Disclosure

The auditor's opinion that the financial statements are presented fairly in conformity with the applicable financial reporting framework should be based on whether:

- a. The accounting principles selected and applied have general acceptance,⁴¹
- b. The accounting principles are appropriate in the circumstances;

³³ Paragraph 12 of Auditing Standard No. 3.

³⁴ Paragraph .12 of AU sec. 543, *Part of Audit Performed by Other Independent Auditors*.

³⁵ Paragraph 10.e of Auditing Standard No. 7.

³⁶ Paragraphs 10.h and 10.i of Auditing Standard No. 7.

³⁷ QC sec. 20.19.

³⁸ *Ibid.*

³⁹ *Ibid.*

⁴⁰ PCAOB Rule 3400T, *Interim Quality Control Standards*.

⁴¹ The auditor should look to the requirements of the SEC for the company under audit with respect to accounting principles applicable to that company. See Rule 4-01 of Regulation S-X.

- c. The financial statements, including the related notes, are informative of matters that may affect their use, understanding, and interpretation;
- d. The information presented in the financial statements is classified and summarized in a reasonable manner, that is, neither too detailed nor too condensed; and
- e. The financial statements reflect the underlying transactions and events in a manner that presents the financial position, results of operations, and cash flows stated within a range of acceptable limits, that is, limits that are reasonable and practicable to attain in financial statements.⁴²

The auditor's judgment concerning the "fairness" of the overall presentation of financial statements should be applied within the framework of generally accepted accounting principles.⁴³ Generally accepted accounting principles recognize the importance of reporting transactions and events in accordance with their substance.⁴⁴ The auditor should consider whether the substance of transactions or events, including significant unusual transactions, differs materially from their form.⁴⁵

The presentation of financial statements in conformity with generally accepted accounting principles includes adequate disclosure of material matters.⁴⁶ An auditor considers whether a particular matter should be disclosed by management in light of the circumstances and facts of which he or she is aware at the time.⁴⁷ A basic tenet of the auditing standards of reporting states, "[i]nformative disclosures in the financial statements are to be regarded as reasonably adequate unless otherwise stated in the report."⁴⁸ If management omits from the financial statements, including the accompanying notes, information that is required by generally accepted accounting principles, the auditor should determine the effect on his or her audit report.⁴⁹ The auditor also may emphasize a matter regarding the financial statements in a separate paragraph of the auditor's report.⁵⁰

In addition, the auditor should read the other information accompanying the interim and annual financial statements contained in reports filed with the SEC.⁵¹ For example, the Management's Discussion and Analysis of Financial Condition and Results of Operations section of annual reports and other filings

⁴² Paragraph .04 of AU sec. 411, *The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles*.

⁴³ AU sec. 411.03.

⁴⁴ AU sec. 411.06.

⁴⁵ *Ibid.*

⁴⁶ Paragraph .02 of AU sec. 431, *Adequacy of Disclosure in Financial Statements*.

⁴⁷ *Ibid.* When an auditor becomes aware of information that relates to financial statements previously reported on by the auditor, but which was not known to the auditor at the date of the report, and which is of such a nature and from such a source that the auditor would have investigated it had it come to the auditor's attention during the course of the audit, the auditor should take the actions described in AU sec. 561, *Subsequent Discovery of Facts Existing at the Date of the Auditor's Report*.

⁴⁸ Paragraph .02 of AU sec. 150, *Generally Accepted Auditing Standards*, and AU sec. 431.01.

⁴⁹ AU sec. 431.03.

⁵⁰ Paragraph .19 of AU sec. 508, *Reports on Audited Financial Statements*.

⁵¹ Paragraph 18(f) of AU sec. 722, *Interim Financial Information*, and paragraph .04 of AU sec. 550, *Other Information in Documents Containing Audited Financial Statements*.

might include discussions regarding significant unusual transactions.⁵² The auditor should consider whether that information or the manner of its presentation is materially inconsistent with the financial statements. If the auditor concludes that there is a material inconsistency, or becomes aware of information that he or she believes is a material misstatement of fact, the auditor should determine if the financial statements, the audit report, or both require revision. If the auditor concludes that the financial statements or audit report do not require revision, the auditor should request the company to revise the other information.⁵³

Communicating With Audit Committees

The auditor should determine that the company's audit committee is informed about the methods used to account for significant unusual transactions.⁵⁴ The auditor also should discuss with the audit committee the auditor's judgments about the quality, not just the acceptability, of the company's accounting principles as applied in its financial reporting.⁵⁵ The discussion should be open and frank and generally should include such matters as the clarity and completeness of the company's financial statements, which include related disclosures.⁵⁶ In addition, the discussion should include items that have a significant impact on the representational faithfulness, verifiability, and neutrality of the accounting information included in the financial statements.⁵⁷ Items that may have such an impact include significant unusual transactions.⁵⁸

Reviewing Interim Financial Information

The objective of a review of interim financial information is to provide the auditor with a basis for communicating whether he or she is aware of any material modifications that should be made to the interim financial information for it to conform with generally accepted accounting principles.⁵⁹ The objective of a review differs significantly from that of an audit of annual financial statements and consists principally of performing analytical procedures and making inquiries of persons responsible for financial and accounting matters.⁶⁰ Certain auditing procedures may be performed concurrently with the review of interim financial information.⁶¹ For example, there may be significant unusual transactions occurring during the interim period under review for which the auditing procedures needed for purposes of the audit of the annual financial statements could be performed, to the extent practicable, at the time of the interim review.⁶²

During a review of interim financial information, the auditor should make inquiries of members of management who have responsibility for financial and

⁵² For example, Item 303(a)(3)(i) of Regulation S-K instructs management to “[d]escribe any unusual or infrequent events or transactions or any significant economic changes that materially affected the amount of reported income from continuing operations and, in each case, indicate the extent to which income was so affected.”

⁶² *Ibid.*

accounting matters.⁶³ Specifically, the auditor should inquire about, among other things (a) significant unusual transactions that may have an effect on the interim financial information, and (b) significant unusual transactions occurring or recognized in the last several days of the interim period.⁶⁴ If the auditor becomes aware of information that leads him or her to believe that the interim financial information may not be in conformity with generally accepted accounting principles in all material respects, the auditor should make additional inquiries or perform other procedures that he or she considers appropriate to provide a basis for communicating whether he or she is aware of any material modifications that should be made to the interim financial information.⁶⁵

When conducting a review of interim financial information, the auditor also should determine whether significant unusual transactions have been identified.⁶⁶ If such transactions have been identified, the auditor should communicate them to the audit committee, or be satisfied, through discussion with the audit committee, that such matters have been communicated to them by management.⁶⁷

Standards-Setting Activities

The PCAOB has a project on its standards-setting agenda to address the auditing standards regarding related parties. In connection with that project, the PCAOB is evaluating its auditing standards regarding the consideration of significant unusual transactions. In addition, the PCAOB also has on its standards-setting agenda projects to address other standards referenced in this practice alert. Updates on these activities are available on the PCAOB's website. Relevant links are provided below:

.06 Staff Audit Practice Alert No. 6 Auditor Considerations Regarding Using the Work of Other Auditors and Engaging Assistants From Outside the Firm

July 12, 2010

Staff Audit Practice Alerts highlight new, emerging, or otherwise noteworthy circumstances that may affect how auditors conduct audits under the existing requirements of PCAOB standards and relevant laws. Auditors should determine whether and how to respond to these circumstances based on the specific facts presented. The statements contained in Staff Audit Practice Alerts are not rules of the Board and do not reflect any Board determination or judgment about the conduct of any particular firm, auditor, or any other person.

Introduction

The PCAOB staff has observed that a number of registered public accounting firms located in the United States (“U.S.”) have been issuing audit reports on financial statements filed by issuers that have substantially all of their operations outside of the U.S. Although there is nothing inherently inappropriate about this, observations from the Board’s inspection process suggest that some firms may not be conducting those audits in accordance with PCAOB standards. Specifically, some firms may be issuing audit reports based on the work of another firm, or by using the work of assistants engaged from outside of the firm, without complying with relevant PCAOB standards.

The circumstances in which such conduct occurs often involve issuers that are incorporated in the U.S. (and that file their annual reports with the Securities and Exchange Commission (“SEC”) on Form 10-K), even though substantially all of their operations are in another country. In this context, a number of issuers have come to be incorporated in the U.S., and to have securities trading in the U.S., following a transaction in which an operating company in another country merges with a U.S. shell company that had previously registered its securities under the Securities Exchange Act of 1934.

The number of issuers that file financial statements audited by U.S. auditors, while having substantially all of their operations in another country, has increased in recent years. The demand for those audit services is met by U.S. registered public accounting firms of various sizes, including small firms.¹ The Board’s inspection staff has observed some situations in which it appeared that U.S. registered public accounting firms that provided those auditing services did so by having all or most of the audit performed by another firm or by assistants engaged from outside the firm (including firms and assistants

¹ For example, in a 27-month period ending March 31, 2010, at least 40 U.S. registered public accounting firms with fewer than five partners and fewer than ten professional staff issued audit reports on financial statements filed with the SEC by companies whose operations were substantially all in the China region. (As used in this Staff Audit Practice Alert, the term “China region” includes the People’s Republic of China, Hong Kong Special Administrative Region, and Taiwan.) This trend has also attracted attention, and was a subject of discussion at a recent meeting of the Board’s Standing Advisory Group (available beginning at minute 43:15 of the archived Webcast at <http://pcaobus.org/News/Webcasts/Documents/2010/pcaob-040710-p2.mp3>). This trend is not necessarily limited to the China region, and the discussion in this Staff Audit Practice Alert of issues associated with the U.S. registered public accounting firms’ audits of companies whose operations were substantially all in the China region also is relevant to audits of companies located in other jurisdictions.

located in another country) without complying with PCAOB standards applicable to using the work and reports of another auditor and supervising assistants.² Prompted by those observations, this Alert is intended as a reminder to registered firms concerning a firm's obligations when using the work of other firms or using assistants engaged from outside the firm.

Using the Work of Other Auditors

AU sec. 543, *Part of Audit Performed by Other Independent Auditors*, establishes requirements that apply when an auditor of an issuer's financial statements "use[s] the work and reports of other independent auditors who have audited the financial statements of one or more subsidiaries, divisions, branches, components, or investments included in [that issuer's] financial statements."³

The Board's inspection staff has identified indications that some U.S. firms auditing issuers with substantially all of their operations in another country are not properly applying AU sec. 543. For example, in one situation, a U.S. firm engaged to audit such an issuer retained an accounting firm in the China region to perform audit procedures. In the year preceding the audit, the U.S. firm's managing partner and engagement partner traveled to the China region to meet with the issuer's board of directors, the issuer's management, and the other firm in order to gain an understanding of the issuer's business and processes and review with the other firm its audit process. The U.S. firm's personnel did not travel to the China region during the audit, and the audit procedures performed by the other firm constituted substantially all of the audit procedures on the issuer's financial statements. The firm in the China region did not issue a report, and substantially all of the audit documentation was maintained by the firm in the China region. Based on its view that AU sec. 543 applied and permitted it to do so, the U.S. firm issued an audit report stating that it had audited the financial statements and expressing an unqualified opinion on the financial statements. The inspection staff, however, concluded that it was inappropriate for the firm to serve as principal auditor and use the work of the other auditor pursuant to AU sec. 543.

Identifying Circumstances in Which AU sec. 543 Applies

AU sec. 543 applies only to circumstances in which a firm would use the "work and reports of other independent auditors who have audited the financial statements of one or more subsidiaries, divisions, branches, components, or investments" of an issuer.⁴ AU sec. 543 does not provide a way for an auditor to take responsibility for the work of another auditor that has essentially audited an issuer's financial statements in their entirety, even if the firm complies with the other requirements in AU sec. 543. AU sec. 543 does not apply to the use of another auditor's work if that work is anything other than an audit of the financial statements of one or more subsidiaries, divisions, branches, components, or investments of the issuer.

² Where appropriate, the Board follows up on indications of such misconduct with enforcement investigations, disciplinary proceedings, and sanctions. By law, these Board processes are nonpublic unless and until they result in a final disciplinary sanction taking effect. In one completed matter, the Board imposed sanctions in a case in which a U.S. firm used a significant amount of audit work performed by a Hong Kong firm without adequately coordinating its work with that of the Hong Kong firm. See *In the Matter of Clancy and Co., P.L.L.C., Jennifer C. Nipp, CPA, and Judith J. Clancy, CPA*, PCAOB Release No. 105-2009-001 (March 31, 2009). Referrals from the Board's inspection program to the Board's enforcement program relating to situations in which firms are using work of other firms or using assistants from outside the firm in connection with audits of foreign-based issuers have been on the rise.

³ AU sec. 543.01.

⁴ *Ibid.*

Determining Whether to Serve as Principal Auditor

Even in circumstances where a firm has access to the work and reports of another auditor that has audited the financial statements of a subsidiary, division, branch, component, or investment, the firm cannot serve as principal auditor (and, accordingly, may not sign the audit report on the issuer's financial statements) unless the firm's own participation in the audit is sufficient.⁵ In determining whether its participation is sufficient to serve as principal auditor, the firm "should consider, among other things, the materiality of the portion of the financial statements [the firm] audited in comparison with the portion audited by other auditors, the extent of [the auditor's] knowledge of the overall financial statements, and the importance of the components [the firm] audited in relation to the enterprise as a whole."⁶ If an issuer has no significant operations other than those in another country, a registered public accounting firm that plays no significant part in the audit of the foreign operations is highly unlikely to have sufficient participation in the audit to serve as the issuer's principal auditor. A lack of sufficient participation cannot be overcome by using the work of the other auditor, even if the firm assumes responsibility for that work.

Responsibilities of the Principal Auditor

In circumstances in which AU sec. 543 applies and in which the firm's own participation is sufficient to serve as principal auditor, the principal auditor must comply with the other requirements in AU sec. 543 relative to the firm's use of the work and reports of the other auditor,⁷ including:

- *Determining the Method of Reporting* – The principal auditor must decide, taking certain factors into account, whether to express an opinion on the financial statements taken as a whole without making reference to the audit of the other auditor (thereby assuming responsibility for the work of the other auditor) or to make reference to the audit of the other auditor.⁸
- *Procedures Applicable to Both Methods of Reporting* – The principal auditor "should make inquiries concerning the professional reputation and independence of the other auditor [and] adopt appropriate measures to assure the coordination of [the principal auditor's] activities with those of the other auditor in order to achieve a proper review of matters affecting the consolidating or combining of accounts in the financial statements."⁹

⁵ See AU sec. 543.02.

⁶ AU sec. 543.02. In an integrated audit, the auditor who serves as the principal auditor of the financial statements should also be the principal auditor of internal control over financial reporting ("ICFR") and so must participate sufficiently in the audit of ICFR to provide a basis for serving as the principal auditor of ICFR. See Paragraph C8 of Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

⁷ AU sec. 543.03-.17.

⁸ See AU sec. 543.03-.06.

⁹ AU sec. 543.10. In connection with this point, both the principal auditor and auditors whose work and reports the principal auditor uses should be cognizant of PCAOB registration requirements. Under section 102(a) of the Sarbanes-Oxley Act of 2002 and PCAOB Rule 2100, *Registration Requirements for Public Accounting Firms*, an auditor whose work and report the principal auditor uses must be registered with the PCAOB if that auditor's work constitutes a substantial role in the preparation or furnishing of the audit report on the issuer's financial statements, as defined in PCAOB Rule 1001(p)(ii), *Definitions of Terms Employed in Rules / Play a Substantial Role in the Preparation or Furnishing of an Audit Report*.

- *Procedures Applicable When Assuming Responsibility* – If the principal auditor assumes responsibility for the work of the other auditor, the principal auditor “must obtain, and review and retain ... prior to the report release date”, certain specific information from the other auditor, and should also consider “[visiting] the other auditor and [discussing] the audit procedures followed and results thereof; [reviewing] the audit programs of the other auditor [and, if appropriate, issuing] instructions to the other auditor as to the scope of the audit work; [and/or reviewing] additional audit documentation of the other auditor relating to significant findings or issues in the engagement completion document.”¹⁰

If the principal auditor assumes responsibility for the work of other auditors, the principal auditor should determine whether the results of the principal auditor’s own work, combined with the results of the work of other auditors, provide sufficient competent evidential matter to afford a reasonable basis for an audit opinion on the issuer’s financial statements.¹¹ In developing an opinion, the principal auditor “should consider relevant evidential matter regardless of whether it appears to corroborate or to contradict the assertions in the financial statements.”¹²

The principal auditor must exercise due professional care in the performance of the audit.¹³ When the principal auditor assumes responsibility for the other auditor’s work, the principal auditor’s review of the audit documentation obtained from the other auditor¹⁴ and performance of other required procedures may identify issues requiring additional consideration by the principal auditor, such as the following issues observed in some audits by the Board’s inspection staff:

- The other auditor did not comply with instructions issued by the principal auditor.
- The other auditor identified an accounting or auditing issue that the other auditor did not resolve.
- The other auditor performed an audit in accordance with auditing standards other than the standards of the PCAOB.
- The other auditor reported on the financial statements of a component that prepares its financial statements in accordance with a financial reporting framework¹⁵ other than the framework used to prepare the financial statements of the issuer as a whole.

To the extent the principal auditor has substantial doubt about any financial statement assertion of material significance, the principal auditor “must refrain from forming an opinion until [the principal auditor] has obtained sufficient competent evidential matter to remove such substantial doubt, or ... must express a qualified opinion or a disclaimer of opinion.”¹⁶ For example, if the

¹⁰ AU sec. 543.12.

¹¹ See paragraph .02 of AU sec. 150, *Generally Accepted Auditing Standards*, and paragraph .08 of AU sec. 230, *Due Professional Care in the Performance of Work*.

¹² Paragraph .25 of AU sec. 326, *Evidential Matter*.

¹³ See AU sec. 230.01.

¹⁴ AU sec. 543.12 describes certain specific information that the principal auditor must obtain from the other auditor.

¹⁵ U.S. generally accepted accounting principles and International Financial Reporting Standards are examples of a financial reporting framework. Auditors should look to the requirements of the SEC for the issuer under audit with respect to the accounting framework applicable to the issuer.

¹⁶ AU sec. 326.25.

principal auditor determines that the work of the other auditor does not provide the necessary audit evidence, the principal auditor should take appropriate actions to obtain sufficient competent evidence, including “[participating] in discussions regarding the accounts with management personnel of the component whose financial statements are being audited by other auditors and/or [making] supplemental tests of such accounts.”¹⁷

Language Considerations

Appropriately satisfying the requirements described above necessarily entails overcoming any language barriers. If the appropriate supervisory personnel of the principal auditor are not sufficiently fluent in the language in which the audit documentation of the other auditor is prepared, the principal auditor must take the necessary actions to enable the principal auditor to fulfill its responsibilities in accordance with PCAOB standards. The principal auditor can neither omit the procedures described in AU sec. 543 because of language differences, nor satisfy those requirements by reference to documents that the principal auditor does not understand.

Engaging Assistants from Outside the Firm

The previous section describes certain requirements in PCAOB standards that apply when a principal auditor uses the work and reports of other auditors who have audited the financial statements of one or more subsidiaries, divisions, branches, components, or investments included in the financial statements presented. In other situations, the auditor might engage assistants from outside the firm in performing the audit. The auditor’s responsibilities related to the work of assistants engaged from outside the firm are governed by the same standards as the auditor’s responsibilities related to the work of assistants who are associated with the auditor’s firm as a partner, shareholder, or employee.

The Board’s inspection staff has identified situations in which U.S. firms auditing companies with substantially all of their operations in another country appeared not to have appropriately executed their responsibilities with respect to the work of assistants engaged from outside of the firm. For example, in one situation, a U.S. firm retained the services of a consulting firm that had personnel who could read, write, and speak the language of the area, in the China region, in which the issuer’s operations were located. Those consultants planned the audit, communicated with the issuer’s management, and traveled to the China region to complete a substantial portion of the audit. None of the U.S. firm’s partners or employees traveled to the China region or planned, performed, supervised, or meaningfully reviewed the audit work. Procedures performed by the U.S. firm’s engagement partner consisted primarily of reviewing certain work papers prepared by the consultants as well as issuer-prepared draft financial statements and lead schedules that had been translated into English. The inspection staff concluded that the level of the firm’s involvement in the audit work performed by the consultants was not sufficient for the firm to assert that an audit had been performed by the firm and that the audit provided a reasonable basis for the firm to have an opinion on the financial statements.

As described further in this Alert, some key considerations in determining the appropriate level of the firm’s involvement in audit work performed by assistants engaged from outside the firm (including planning, performing, and supervising the audit work) include, but are not limited to, the following:

¹⁷ AU sec. 543.13.

- Whether the auditor would be able to obtain information about the knowledge, skill, and ability of the assistants engaged from outside the firm (including their knowledge of PCAOB standards and the relevant financial reporting requirements), and to evaluate the independence of the assistants engaged from outside the firm.
- Whether the auditor would be able to properly plan and supervise the work of the assistants engaged from outside the firm and whether the auditing procedures performed by such assistants, in combination with the work performed by individuals from within the firm, would provide sufficient competent evidential matter to afford a reasonable basis for an audit opinion.
- Whether the assistants engaged from outside the firm are located in the same country or speak the same language as the auditor or the auditor's client.
- Whether the auditor would be able to comply with the documentation requirements, including the preparation, assembly, and retention of documentation, with respect to the work performed by the assistants engaged from outside the firm.

Knowledge, Skill, Ability, and Independence

As is the case when a registered public accounting firm deploys its own partners, shareholders, or employees on an audit, when a registered public accounting firm engages assistants from outside of the firm, the firm's engagement partner "is responsible for the assignment of tasks to, and supervision of, [those] assistants."¹⁸ Those assistants, like all assistants, should be "assigned to tasks and supervised commensurate with their level of knowledge, skill, and ability",¹⁹ which necessarily requires the person who assigns and supervises the assistants to have an understanding of the level of knowledge, skill, and ability possessed by those assistants. The knowledge, skill, and ability of personnel assigned significant engagement responsibilities also should be commensurate with the auditor's assessment of the level of risk for the engagement, including the risk of material misstatement due to fraud.²⁰ Ordinarily, higher risk requires the assignment of more experienced personnel or additional persons with specialized skills and knowledge, e.g., information technology or forensic specialists.²¹

As for independence, the registered public accounting firm must approach independence considerations concerning the assistants engaged from outside the firm as if they were employees of the firm.²²

¹⁸ AU sec. 230.06.

¹⁹ *Ibid.* A registered public accounting firm has a responsibility to ensure that all individuals who perform audit procedures for which the firm is responsible, including assistants engaged from outside the firm, comply with the professional standards applicable to the firm's auditing practice (see QC sec. 20.03) and that work is assigned to individuals who have the degree of technical training and proficiency required in the circumstances (see QC sec. 20.13).

²⁰ See paragraph .17 of AU sec. 312, *Audit Risk and Materiality in Conducting an Audit*, and paragraph .50 of AU sec. 316, *Consideration of Fraud in a Financial Statement Audit*.

²¹ *Ibid.*

²² PCAOB standards require that policies and procedures be established to provide the firm with reasonable assurance that individuals who perform the audit maintain independence (in fact and in appearance) in all required circumstances, perform all professional responsibilities with integrity, and maintain objectivity in discharging professional responsibilities. (See QC sec. 20.09.)

Planning and Supervision

The registered public accounting firm is responsible for planning the audit, and for ensuring that the work of assistants is supervised and reviewed in accordance with PCAOB standards.

As the “auditor with final responsibility for the audit”, as that term is used in paragraph .02 of AU sec. 311, *Planning and Supervision*, the registered public accounting firm’s engagement partner is responsible for audit planning, which involves developing an overall strategy for the expected conduct and scope of the audit.²³ Procedures that an auditor may consider in planning the audit usually involve review of records relating to the company and discussions with assistants, including assistants engaged from outside the firm, and management of the company, the board of directors, or its audit committee.²⁴ “In planning the audit, the auditor should consider the nature, extent, and timing of work to be performed and should prepare a written audit program (or set of written audit programs).”²⁵

“The auditor should obtain a level of knowledge of the [issuer’s] business that will enable [the auditor] to plan and perform [the] audit in accordance with [PCAOB standards].”²⁶ “Knowledge of an [issuer’s] business is ordinarily obtained through experience with the [issuer] or its industry and inquiry of personnel of the [issuer].”²⁷ Prior to, or in conjunction with, gathering information about the issuer’s business, the engagement partner and key members of the audit team, including any engaged from outside the firm, should discuss the potential for material misstatement due to fraud.²⁸ The discussion should include, among other things, “an exchange of ideas or “brainstorming” ... about how and where [the auditor] believe[s] the [issuer’s] financial statements might be susceptible to material misstatement due to fraud, how management could perpetrate and conceal fraudulent financial reporting, and how assets of the [issuer] could be misappropriated.”²⁹

Appropriate supervision and review necessarily entails overcoming any language barriers. The engagement partner is responsible for the supervision of assistants, including any engaged from outside the firm.³⁰ “Elements of supervision include instructing assistants, keeping informed of significant problems encountered, reviewing the work performed, and dealing with differences of opinion ... The extent of supervision appropriate in a given instance depends on many factors, including the complexity of the subject matter and the qualifications of persons performing the work.”³¹ “Ordinarily, higher risk requires ... more extensive supervision by the [engagement partner] during both the planning and the conduct of the engagement.”³² Also, “the extent of supervision should reflect the risks of material misstatement due to fraud.”³³ “The work performed by each assistant should be reviewed to determine whether it was

²³ See AU sec. 311.03, and paragraph 9 of Auditing Standard No. 5.

³² AU sec. 312.17.

³³ AU sec. 316.50.

adequately performed and to evaluate whether the results are consistent with the conclusions to be presented in the auditor's report."³⁴

Audit Documentation

The registered public accounting firm is responsible for ensuring that all audit documentation – including the documentation of the work of the assistants – necessary to meet the PCAOB's documentation requirements is prepared and retained.³⁵ Auditing Standard No. 3, *Audit Documentation*, "establishes general requirements for documentation the auditor should prepare and retain in connection with engagements conducted pursuant to the standards of the PCAOB."³⁶ Among other things, Auditing Standard No. 3 requires that the auditor "identify all significant findings or issues in an engagement completion document."³⁷ These requirements are applicable in situations in which the auditor engages, as assistants, individuals from outside the firm.

Engagement Quality Review

"[T]he engagement quality reviewer should evaluate the significant judgments made by the engagement team and the related conclusions reached in forming the overall conclusion on the engagement and in preparing the [audit] report"³⁸ including "[reviewing] the engagement completion document and [confirming] with the engagement partner that there are no significant unresolved matters."³⁹ "[T]he firm may grant permission to the client to use the [audit] report only after the engagement quality reviewer provides concurring approval of issuance."⁴⁰

Standard-setting Activities

The Board has a project on its standard-setting agenda regarding the responsibilities of the principal auditor. The Board's Standing Advisory Group discussed this topic at its April 7-8, 2010 meeting.⁴¹

.07 Staff Audit Practice Alert No. 7 Auditor Considerations of Litigation and Other Contingencies Arising From Mortgage and Other Loan Activities

December 20, 2010

Staff Audit Practice Alerts highlight new, emerging, or otherwise noteworthy circumstances that may affect how auditors conduct audits under the existing requirements of PCAOB standards and relevant laws. Auditors should determine whether and how to respond to these circumstances based on the specific facts presented. The statements contained in Staff Audit Practice Alerts are not rules of the Board and do not reflect any Board determination or judgment about the conduct of any particular firm, auditor, or any other person.

Background

In the fall of 2010, allegations surfaced that banks may have misrepresented the quality of mortgages sold and that those banks could be required to repurchase the affected mortgages.¹ Additional allegations have been made that companies servicing \$6.4 trillion in American mortgages may have bypassed legally required steps to foreclose on homes.² Some of these practices could result in loss contingencies for certain financial institutions that may require recognition of liabilities or disclosure in financial statements.³

The situation remains fluid, with estimates of potential costs associated with foreclosure irregularities and mortgage repurchases ranging from “manageable” to an exposure for the industry of up to \$52 billion.⁴ Some experts have acknowledged scenarios in which the title and legal documentation problems related to foreclosures could lead to significant effects on banks’ balance sheets.⁵

Numerous federal and state agencies are coordinating their efforts to review practices that may not comply with state foreclosure laws or applicable federal laws⁶ and to provide for better disclosures and improve transparency in the securitization market.

As part of the efforts to provide for better disclosures, in October 2010, the United States Securities and Exchange Commission’s (“SEC”) Division of Corporation Finance sent letters to certain public companies as a reminder of their disclosure obligations with respect to their forthcoming quarterly reports on Form 10-Q and subsequent filings. The letters highlighted continued concerns about potential risks and costs associated with mortgage and foreclosure-related activities or exposures. The sample letter posted to the SEC Web site stated that companies should consider certain items for disclosure, including, without limitation, “the impact of various representations and warranties

¹ Congressional Oversight Panel, *November Oversight Report* (November 16, 2010), available at: <http://cop.senate.gov/reports/library/report-111610-cop.cfm>.

² *Ibid.*

³ Loss contingencies may include, among others, accruals for liabilities relating to representations and warranties made at the time loans were sold or for litigation costs.

⁴ *November Oversight Report*, p. 52.

⁵ *Ibid.*

⁶ White House, Office of the Press Secretary, *Fact Sheet: Federal Government Efforts to Support Accountability, Stability and Clarity in the Housing Market*, dated October 20, 2010.

regarding mortgages made to purchasers of the mortgages (or to purchasers of mortgage-backed securities) including to the government-sponsored entities (GSEs), private-label mortgage-backed security (MBS) investors, financial guarantors and other whole loan purchasers.”⁷

The letters further reminded companies of the requirements for disclosures in Management’s Discussion and Analysis for Forms 10-Q and 10-K under Item 303 of Regulation S-K and for accruing and disclosing loss contingencies in the financial statements under the Financial Accounting Standards Board’s (“FASB”) Accounting Standards Codification (“ASC”) Topic 450, Contingencies, Subtopic 450-20. Companies were reminded that, as appropriate, they should consider the need to accrue loss contingencies and to provide clear and transparent disclosure regarding obligations relating to the various representations and warranties that were made in connection with securitization activities and whole loan sales, and to discuss any implications of any foreclosure reviews, including potential delays in completing foreclosures. If applicable, these disclosures would address the company’s role as an originator, securitizer, servicer, and investor.

The letters cautioned companies to consider a number of matters when preparing their quarterly and subsequent filings (e.g., litigation risks and uncertainties related to any known or alleged defects in the securitization process, including any potential defects in mortgage documentation or in the assignment of the mortgages). The letter also cautioned that some of these issues are not limited to financial institutions.

This practice alert advises auditors that the potential risks and costs associated with mortgage and foreclosure-related activities or exposures, such as those discussed in the SEC staff letters, could have implications for audits of financial statements or of internal control over financial reporting. These implications might include accounting for litigation or other loss contingencies and the related disclosures. Auditors should consider the effect of these matters during their reviews of interim financial information, year-end audits, and attestation engagements on assessments of compliance with servicing criteria.

Staff Audit Practice Alert No. 3, *Audit Considerations in the Current Economic Environment* (“Practice Alert No. 3”), was issued in December 2008 to assist auditors in identifying matters related to the current economic environment that might affect audit risk and require additional emphasis.⁸ Among other things, Practice Alert No. 3 provides auditors with information on selected financial reporting areas, including contingencies and guarantees that may be affected by the economic environment, and reminds auditors of the requirements regarding accounting estimates.

Audit risks that existed in December 2008 with respect to contingencies and guarantees, as well as potential other issues, continue to exist today. These audit risks potentially affect the risk of material misstatement, as evidenced by recent concerns regarding problematic foreclosures and asserted claims or potential litigation relating to representations and warranties made in connection with securitizations or whole loan sales. Auditors may need to consider

⁷ Neither companies nor public accounting firms should rely on the summary of the SEC staff letter in this practice alert, but should review the letter in its entirety. The SEC staff sample letter is available at: <http://www.sec.gov/divisions/corpfin/guidance/cfeforeclosure1010.htm>.

⁸ Staff Audit Practice Alert No. 3 is available at: http://pcaobus.org/Standards/QandA/12052008_APA_3.pdf.

the possible effects that these issues might have on the nature, timing, and extent of planned audit procedures.⁹

Matters for the auditor's consideration

In light of continued concerns about potential risks and costs associated with mortgage and foreclosure-related activities or exposures, this practice alert reminds auditors of their responsibilities with respect to auditing loss contingencies, disclosures, and other related topics.

Auditing Litigation, Claims, and Assessments

Companies that may be affected by mortgage and foreclosure-related activities or exposures may need to accrue for or provide disclosures relating to legal contingencies.¹⁰

AU sec. 337, *Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments*, establishes requirements with respect to litigation, claims, and assessments.¹¹ This standard states that in order to identify litigation, claims, and assessments, and to become satisfied with the accounting and reporting of such matters, the auditor should gather sufficient and appropriate audit evidence relevant to the following factors:

- The existence of a condition, situation, or set of circumstances indicating an uncertainty as to the possible loss to an entity arising from litigation, claims, and assessments;
- The period in which the underlying cause for legal action occurred;¹²
- The degree of probability of an unfavorable outcome; and
- The amount or range of potential loss.¹³

AU sec. 337 discusses the procedures the auditor should perform regarding litigation, claims, and assessments¹⁴ and also states that although certain audit procedures may be undertaken for other purposes, they might also disclose litigation, claims, and assessments (e.g., reading minutes of meetings of stockholders, directors, and appropriate committees held during and subsequent to the period being audited; reading contracts, loan agreements, leases, and correspondence from taxing or other governmental agencies; or inspecting similar documents).¹⁵ Further, the auditor should obtain a letter from the

⁹ Paragraph .33 of AU sec. 312, *Audit Risk and Materiality in Conducting an Audit*.

¹⁰ FASB ASC Subtopic 45020 requires companies to establish accruals for litigation and other contingencies when it is probable that a loss has been incurred and the amount of the loss can be reasonably estimated. In an audit of a foreign private issuer ("FPI") whose financial statements are prepared in conformity with International Financial Reporting Standards ("IFRS"), the auditor should refer to applicable accounting and disclosure requirements of the International Accounting Standards Board ("IASB"). PCAOB standards apply regardless of the applicable financial reporting framework.

¹¹ AU sec. 337.01.

¹² According to paragraphs .01 and .04 of AU sec. 561, *Subsequent Discovery of Facts Existing at the Date of the Auditor's Report*, when an auditor becomes aware of information that relates to financial statements previously reported on by the auditor, but which was not known to the auditor at the date of the report, and which is of such a nature and from such a source that the auditor would have investigated it had it come to the auditor's attention during the course of the audit, the auditor should take the actions described in AU sec. 561.

¹³ AU sec. 337.04.

¹⁴ AU sec. 337.05.

¹⁵ AU sec. 337.07.

client's lawyer to assist the auditor in corroborating the information furnished by management concerning litigation, claims, and assessments.¹⁶

Auditing Accounting Estimates

Companies involved in mortgage and foreclosure-related activities may need to estimate and accrue amounts for other potential loss contingencies including those related to various representations and warranties. AU sec. 342, *Auditing Accounting Estimates*, establishes requirements regarding obtaining and evaluating sufficient appropriate audit evidence for accounting estimates. In auditing accounting estimates, the auditor normally should consider the company's historical experience in making past estimates as well as the auditor's experience in auditing companies in the same industry.¹⁷ However, changes in facts, circumstances, or a company's procedures may cause factors different from those considered in the past to become significant to the accounting estimate.¹⁸ For example, a company's historical experience relating to repurchasing loans sold into securitization structures may not be indicative of future trends in that area.

According to AU sec. 342, when planning and performing procedures to evaluate the reasonableness of the company's accounting estimates, the auditor should consider, with an attitude of professional skepticism, the subjective and objective factors included in the estimate.¹⁹ When evaluating accounting estimates relating to mortgage loan repurchase losses, such factors may include, among others, estimated levels of defects based on the company's review or experience, default expectations, investor repurchase demand, or appeal success rates.

Evaluating Financial Statement Presentation and Disclosure

Information essential for a fair presentation in conformity with generally accepted accounting principles should be set forth in the financial statements (which include the related notes).²⁰ When such information is set forth elsewhere in a report to shareholders "it should be referred to in the financial statements."²¹ If management omits from the financial statements, including the accompanying notes, information that is required by generally accepted accounting principles, the auditor should express a qualified or adverse opinion and should provide the information in the audit report, if practicable.²²

In addition, the auditor should read the other information accompanying the interim and annual financial statements contained in reports filed with the SEC,²³ including the Management's Discussion and Analysis of Financial Condition and Results of Operations sections of annual reports and other filings.²⁴ The auditor should consider whether that information or the manner of its presentation is materially inconsistent with the financial statements. If

¹⁹ AU sec. 342.04.

²⁰ Paragraph .41 of AU sec. 508, *Reports on Audited Financial Statements*.

²¹ Ibid.

²² Paragraph .03 of AU sec. 431, *Adequacy of Disclosure in Financial Statements*.

²³ Paragraph .18(f) of AU sec. 722, *Interim Financial Information*, and paragraph .04 of AU sec. 550, *Other Information in Documents Containing Audited Financial Statements*.

²⁴ For example, Item 303(a)(1) of Regulation S-K instructs management to "[i]dentify any known trends or any known demands, commitments, events or uncertainties that will result in or that are reasonably likely to result in the registrant's liquidity increasing or decreasing in any material way."

the auditor concludes that there is a material inconsistency or becomes aware of information that he or she believes is a material misstatement of fact, the auditor should determine if the financial statements, the audit report, or both, require revision. If the auditor concludes that the financial statements or audit report do not require revision, the auditor should request the company to revise the other information.²⁵

FASB ASC Topic 450, Contingencies, Subtopic 450-20 requires that when a loss is not both probable and estimable, an accrual is not recorded, but disclosure of the contingency is required to be made when there is at least a reasonable possibility that a loss or an additional loss has been incurred.²⁶ Companies involved in mortgage and foreclosure-related activities or exposures may need to establish new disclosures or enhance existing disclosures regarding litigation and other contingencies or estimates. For example, companies that sold or securitized loans but may not have complied with representations and warranties may be at risk of being forced to repurchase such loans. These companies may need to disclose or enhance their existing disclosures regarding the nature, timing, and uncertainty of their potential exposures as additional claims arise and are resolved.

Communication with Audit Committees

To the extent potential risks and costs associated with mortgage and foreclosure-related activities or exposures are identified, auditors are reminded of their responsibility to communicate with the audit committee. AU sec. 380, *Communication With Audit Committees*, includes requirements regarding communications relating to management judgments and accounting estimates.²⁷ Other communication with the audit committee includes such matters as the clarity and completeness of the company's financial statements, which include related disclosures²⁸ and a discussion of items that have a significant impact on the representational faithfulness, verifiability, and neutrality of the accounting information included in the financial statements.²⁹ For example, in appropriate circumstances, this discussion would include the auditor's view on disclosures relating to representations and warranties that were made in connection with securitization activities.

Reviewing Interim Financial Information

The objective of a review of interim financial information is to provide the auditor with a basis for communicating whether he or she is aware of any material modifications that should be made to the interim financial information for it to conform with generally accepted accounting principles.³⁰ AU sec. 722, *Interim Financial Information*, requires the auditor to make inquiries regarding unusual or complex situations that may have an effect on the interim information.³¹ These situations may include changes in estimated loss contingencies as well as trends and developments affecting accounting estimates.³²

²⁵ AU secs. 550.04–05.

²⁶ In an audit of a FPI whose financial statements are prepared in conformity with IFRS, the auditor should refer to applicable accounting and disclosure requirements of the IASB. PCAOB standards apply regardless of the applicable financial reporting framework.

²⁷ AU sec. 380.08.

²⁸ AU sec. 380.11.

²⁹ Ibid.

³⁰ AU sec. 722.07.

³¹ AU sec. 722.18c.

³² AU sec. 722.55B1.

If information obtained from performing review procedures leads the auditor to believe that the interim financial information may not be in conformity with generally accepted accounting principles in all material respects, the auditor should make additional inquiries or perform other procedures considered appropriate to provide a basis for communicating whether any material modifications should be made to the interim financial information.³³ AU sec. 722 provides additional requirements in cases where the auditor believes that a material modification should be made to the interim financial information.³⁴

Ongoing Audit Considerations

As additional information is determined in future periods regarding the potential risks and costs associated with mortgage and foreclosure-related activities or exposures, auditors planning or performing an audit should acquire a sufficient understanding to assess how the additional information affects the nature and potential magnitude of the associated risks. Auditors should modify the overall audit strategy and the audit plan as necessary if circumstances change significantly during the course of the audit, including changes due to a revised assessment of the risks of material misstatement or the discovery of a previously unidentified risk of material misstatement.³⁵ Accordingly, auditors may need to consider, e.g., how documentation issues in the loan origination process at a bank affect the auditors' initial risk assessment, overall audit strategy and the audit plan.
